

UNIVERSITY OF ZAGREB, SCHOOL OF MEDICINE

THE DOCTORAL STUDY PROGRAMME

BIOMEDICINE AND HEALTH SCIENCES

Zagreb, 11 April 2019

NAME, LAST NAME AND THE TITLE OF THE CONTACT PERSON: Associate Professor Fran Borovečki, MD, PhD

FUNCTION: Coordinator of the PhD programme

E-MAIL: fran.borovecki@mef.hr

TELEPHONE: +385-1-4590-068

ADDRESS: Šalata 3, Zagreb HR-10000, Croatia

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

A. OVERVIEW OF THE STUDY PROGRAMME

A.1. GENERAL INFORMATION ON THE DOCTORAL STUDY

A.1.1. NAME OF THE DOCTORAL STUDY

University postgraduate doctoral program Biomedicine and Health Sciences

A.1.2. NAME OF THE PROVIDER OF THE STUDY PROGRAMME

University of Zagreb School of Medicine

THE COOPERATING INSTITUTION(S) PARTICIPATING IN THE STARTING AND IMPLEMENTATION OF THE DOCTORAL STUDY

-

A.1.3. NAME OF THE IMPLEMENTER OF THE STUDY PROGRAMME

University of Zagreb School of Medicine

A.1.4. SCIENTIFIC OR ARTISTIC FIELD AND DISCIPLINE OF THE STUDY PROGRAMME

Area: biomedicine and health sciences

Field: basic medical sciences; clinical medicinal sciences, public health and health care

Branch (if the doctoral study is performed in a branch):

A.1.5. DURATION OF THE DOCTORAL STUDY IN ACCORDANCE WITH THE REGULATIONS (IN YEARS)

3

A.1.6. NUMBER OF REQUIRED COURSES/MODULES

8

A.1.7. NUMBER OF ELECTIVE COURSES/MODULES OFFERED WITHIN THE DOCTORAL STUDY

78

A.1.8. ACADEMIC TITLE EARNED UPON COMPLETION OF THE DOCTORAL STUDY

Doctor of Science - PhD

A.1.9. PROPOSED SMALLEST NUMBER OF DOCTORAL STUDENTS FOR ONE ACADEMIC YEAR

15

A.1.10 PROPOSED HIGHEST NUMBER OF DOCTORAL STUDENTS FOR ONE ACADEMIC YEAR

50

A.2. INTRODUCTION

A.2.1. REASONS FOR STARTING THE PROPOSED DOCTORAL STUDY

This proposal presents the Postgraduate University (PhD) Programme Biomedicine and Health Sciences at the University of Zagreb, School of Medicine in the process of re-assessment of the study programme after an international evaluation carried out in November 2016.

The reasons for establishing this PhD programme were based on the need to sustain and advance scientific work in the field of medicine and health care in the Republic of Croatia in order to improve and promote people's health through renewal of human resources, primarily in academic, scientific and leading professional institutions (university and clinical hospitals, healthcare institutions and institutes), state administration (ministries, republic and county bureaus, agencies), and in the business sector, which requires complex task solving and decision-making using scientific methodology (in the pharmaceutical industry, biotech companies, etc.).

The PhD programme Biomedicine and Health Sciences at the University of Zagreb, School of Medicine is the first PhD programme in the Republic of Croatia, which has, since its foundation, been continuously developed and improved in accordance with Croatian higher education strategies, mission and Science Strategy of the School of Medicine and European standards (<http://www.orpheus-med.org/images/stories/documents/ORPHEUS-AMSE-WFME-standards-for-PhD-education.pdf>).

Historically, the first PhD thesis at the University of Zagreb, School of Medicine was defended in 1954. Thereafter, the number of PhD theses gradually increased, and in the mid-1970s the PhD thesis became a pre-requisite for scientific-teaching appointments. Only after the establishment of the PhD programme does the PhD thesis become the responsibility of not only mentors and PhD candidates but also universities. Since the mid-1990s, this idea has been gradually developed by the European University Association (EUA) and has become a public policy in 2003 when the Berlin Ministerial Communiqué consequently defined doctoral programmes as the third cycle of the Bologna process (<http://www.ehea.info/cid100938/ministerial-conference-berlin-2003.html>).

PhD programme Biomedicine and Health Sciences started initially as a master's degree program called "Biomedicine" in the academic year 1997/1998, due to legal framework. From the academic year 1999./2000. the study programme changed its aim and the name to "Medical Science", and started enrolling students with the explicit intention of continuing into the 3rd year of study and finishing with a doctoral dissertation, in line with the views of the European University Association (EUA) (link: https://eua-cde.org/downloads/publications/2005_eua_doctoral-programs-european-knowledge-society.pdf). By the amendment of the Law on Scientific Activity and Higher Education in 2003, a Master's degree has been abolished, and the study programme is renamed for the third time in the PhD programme "Biomedicine and Health Sciences". It was the first postgraduate programme in Croatia that followed the ideas of the Bologna process, introduced the European Credits Transfer System and followed the development of synergies between the European Higher Education Area and the European Research Area. In co-operation with the rectorate of the University of Zagreb, this study anticipated the direct demands of the 2003 Berlin Ministerial Conference and from the outset defined PhD programmes as the responsibility of the university and its faculties to provide students with knowledge, skills and competences for independent scientific work (i.e., neither as the introduction to research nor as its crowning achievement).

The School of Medicine has significantly contributed to the development and harmonization of PhD programmes in Europe and has clearly defined rules for initiating and approving PhD programmes in

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

accordance with international agreements. According to the documents adopted at the two ORPHEUS (Organisation for PhD Education in Biomedicine and Health Sciences in the European System) conferences held in Zagreb (The Declaration of the European Conference on Harmonisation of PhD Programmes in Medicine and Health Sciences in 2004 and Guidelines for Organization of PhD Programs in Biomedicine and Health Sciences in 2005) the first European standards were established that later developed into the Common Standards / Best Practices document by ORPHEUS, the European Association of Medical Schools (AMSE) and the World Medical Association (WFME). The School of Medicine hosted the annual AMSE 2009 Conference which produced the AMSE - Zagreb Declaration on the Role of the Medical School in Postgraduate Education. In summary, the School of Medicine was one of the leading forces in the development of the Bologna Process at the level of doctoral studies not only in Croatia, but also in Europe. As a result of this international initiative of the School, ORPHEUS was founded (the first president from 2006 to 2014 was Professor Zdravko Lacković, now its honorary member), and the headquarters of the organization are today at the School of Medicine in Zagreb. The School of Medicine has significantly contributed to the development and harmonization of PhD programmes in the Republic of Croatia. Immediately after the aforementioned European conferences in 2005 and 2006, in cooperation with the Croatian Academy of Sciences and Arts and its Department of Medical Sciences, meetings of all medical faculties in Croatia were organized precisely for the purpose of harmonizing PhD programmes in Croatia and the European Research Area.

A.2.1.1. Justifiability of starting the new doctoral study with regard to existence of similar doctoral studies at the University of Zagreb

This re-evaluation of the oldest PhD programme of the University of Zagreb and the Republic of Croatia is carried out following an international evaluation conducted in November 2016. At the University of Zagreb, this is the only and the most comprehensive study in biomedicine and health sciences that is providing organized education for research work in the field of expertise and science, including scientific fields of basic medical science, clinical medicine, public health and health care with relevant scientific branches to physicians and other professionals in the medical and health care system. Following the experience and practice of the leading European and world scientific medical institutions, the School of Medicine is focused on improving translational research and integration of basic, clinical and public health programs, which is in turn reflected in the organization of the PhD programme Biomedicine and Health Sciences. Thus, this PhD programme is clearly distinguished from other programs at the University and similar programs in the Republic of Croatia and the surrounding region. The possibility for such a direction of development of research and science at the School is further facilitated by cooperation with the University Hospital Centre Zagreb (UHC Zagreb) and other clinical and health institutions which are both teaching and research bases of the School of Medicine. All this places the School of Medicine and its PhD programme in a unique position to promote research in biomedicine and healthcare in Croatia. Strategic commitment to translational research was established through the founding of the Centre for Translation and Clinical Research of the School of Medicine and UHC Zagreb, the two branches of the School - the Croatian Institute for Brain Research (CIBR) in the field of neuroscience and the School of Public Health (SPH) "Andrija Štampar" in the field of public health, and two recently established Centres of Research Excellence (CoRE) - CoRE for Reproductive and Regenerative Medicine and CoRE for Basic, Clinical and Translational Neuroscience.

A.2.1.2. Usefulness of the proposed doctoral study with regard to needs of research activities in the public and private sectors, and possibilities of employment upon completion of the study program, including the opinion of 3 organizations related to the labour market (e.g. professional associations, employers and their associations, trade unions, public services) on the appropriateness of planned learning outcomes for the needs of the labour market

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

The PhD programme Biomedicine and Health Sciences educates scientists and researchers who, at the level of the study program as a whole, acquire specific competences and appropriate measurable learning outcomes in accordance with 8.2 of the Croatian Qualifications Framework (CQF). Students are trained to create, design, implement and adopt the processes of independent and original scientific research as well as the use of these skills and knowledge in solving complex scientific and research problems in the field of biomedicine and healthcare and in interdisciplinary areas. This is in full accordance with the proclaimed ambition of the European Union and the Republic of Croatia to attain the achievements of social and economic objectives by acquiring knowledge (exploration). In this concept of a knowledge-based society doctoral studies have a key role. Accordingly, its role to provide a sufficient number of scientists through doctoral studies is not only used to provide scientific and teaching staff for the needs and the renewal of academic and professional (health) potential, but also to provide a critical mass of scientists in the labour market for the needs of the economy, state administration and the like, which is in accordance with the principles of the Salzburg Declaration (http://www.aic.lv/ace/ace_disk/Bologna/Bolsemin/Salzburg/index.htm).

At a time when a growing number of young scientists and holders of PhD degrees are leaving the country and science and education funding is not following an upward trend, there is a continuing national need to provide financial, material and administrative-legal prerequisites for effective education and employment of the critical mass of doctoral degree holders.

The PhD programme Biomedicine and Health Sciences ensures that the number of holders of doctoral degrees (critical mass) is maintained. It also advances scientific work in the field of biomedicine and health care in the Republic of Croatia by educating holders of doctoral degrees employable in the academic and education sector, leading scientific and professional institutions (university and clinical hospitals, healthcare institutions and institutes), government administration (ministries, republic and county bureaus, agencies), and in the business sector, which requires complex task solving and decision-making using scientific methodology (in the pharmaceutical industry, biotech companies, etc.).

The Science Strategy of the School of Medicine particularly emphasizes the need to launch a human resources policy that will enable the recruitment of doctoral and postdoctoral students in basic (institutes), clinical (hospital) and public health scientific areas. In the context of re-evaluation of PhD programmes, the School of Medicine, as a scientific institution, advocates for the possibility of recruiting young scientists, encouraging their interest in research in Croatia, welcoming Croatian scientists to participate in the PhD programme and mentorship, as well as encouraging the return of Croatian scientists from abroad. The School of Medicine considers this to be its responsibility for the advancement of scientific work in biomedicine, which can enhance the position of science and universities in society and contribute to improving Croatia's competitiveness.

A.2.1.3. Usefulness of the proposed doctoral study with regard to the scientific, cultural, social and economic needs

The usefulness and usability of the PhD programme Biomedicine and Health Sciences with regard to scientific, cultural, social and economic needs is indisputable. First of all, PhD education is different from professional degree or higher degree education since the core activity of the PhD candidate is to carry out original research according to academic standards in order to create new knowledge, while developing research skills and acquiring knowledge. Institutions are increasingly viewing holders of PhD degrees as potential new researchers in academic and scientific environments, as well as researchers outside the academic community, as highly qualified "knowledge workers" that bring added value to the their employers. In this context, there is also increased sector mobility of PhD candidates and young degree

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

holders corresponding to their career prospects (academic community, industry, education, government, counselling, etc.).

Taking into account the social and economic influences, we live in a time of high technology that requires integration of science and technology with application in different spheres of society, including applied medicine. Conversely, modern medicine itself strongly influences the development of technology, and in turn initiates certain social and economic developments. Examples can be found in the experiences and cooperation of the School of Medicine in Zagreb with other University faculties, such as the development of 3D printer modelling technology, the development of robotic devices and devices for surgical applications, the development of new materials and bone healing techniques, the development of new diagnostic tests based on molecular analyses and bioinformatics, the development of smart medicines, the development of reproductive medicine, resulting in the development of new accompanying technologies (e.g., seed banks and egg cells), etc. The aforementioned technologies are integral parts of research projects at the School of Medicine and are included in this PhD programme.

A number of PhD degree holders will find their place in state institutions responsible for specific scientific and professional activities in biomedicine, health and science, especially in ministries, state agencies, departments and institutes. The activities of these highly educated professionals in their institutions can significantly influence the development of the profession and the implementation of specific measures with direct consequences on social and economic issues (e.g. financing of specific health or scientific programs, undertaking specific preventive public health measures, health care organizations, public health actions, etc.).

In addition to the public sector and state administration, PhD programmes have great potential for recruiting future biomedical and health care scientists in the private sector. This applies in particular to the medical industry in which PhD degree holders can play a key role in research institutes and management, in biotechnology companies and private contracting research companies, as well as in privately held biotech companies (e.g., pharmaceuticals or food production, etc.). So it follows that the proposed PhD programme has the purpose and real potential for realization of scientific, cultural, social and economic needs, including the private sector.

A.2.1.4. Foundation of the proposed study programme on competitive scientific or artistic research, and on new insights, knowledge and skills

In line with the recommendations of the European University Association (2007) (<https://eua.eu/resources/publications/615:salzburg-ii-%E2%80%93-recommendations.html>) and ORPHEUS (2011) (<http://www.orpheus-med.org/images/stories/documents/ORPHEUS-AMSE-WFME-standards-for-PhD-education.pdf>) and in accordance with the Strategy of Education, Science and Technology of the Ministry of Science, Education and Sports of the Republic of Croatia from 2014 (<https://mzo.hr/en/strategy-education-science-and-technology>) the PhD programme Biomedicine and Health Sciences follows and implements the scientific criteria met by the mentors and teachers of the PhD programme, defines the competences and skills to be adopted by the PhD candidate and the criteria to be fulfilled by the PhD thesis (original contribution to science), all with the aim of improving science as one of fundamental development priorities that can facilitate long-term social stability and economic progress. The programme approaches the European level of competence required for the development of a knowledge-based society at the highest level that allows the present development of science in the Republic of Croatia as a “small” scientific community.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

The School of Medicine is recognized and held in high regard for its research achievements in the scientific area of the PhD programme “Biomedicine and Health Sciences”, which is reflected in the scientific work and achievements of teachers and mentors, scientific projects, established scientific centres and research cooperation. The School is particularly focused on improving translational research and integrating basic, clinical and public health programs, which puts the School of Medicine in a unique position in The Republic of Croatia to promote research in biomedicine and health.

More than 370 teachers (40% staff, 60% of title-elected teachers and external associates) take part in the programme. They have published a total of 5,005 papers (average 13/teacher) with a total of 39,575 citations (104/teacher) and with an average teacher h-index of 8.34 (staff 9.53). At the University of Zagreb, the School of Medicine is ranked first by number of published papers (48.6% of all, citation from the thematic issue of the journal *mef.hr*: Scientific Projects in Biomedicine and Health, July 2016, available at www.unizg.mef.hr). According to the SCOPUS database, almost every fourth scientific article published by scientific institutions in the Republic of Croatia has been authored by the faculty of the School of Medicine in Zagreb. According to the SCOPUS database, 42% of the total scientific production in the Republic of Croatia belongs to the field of biomedicine (all fields). Of these, 48% of all biomedical articles have at least one author from the School of Medicine in Zagreb. In the so-called Leiden list of universities that have published more than 1000 articles in the Web of Science over the past 4 years, the University of Zagreb is ranked 419th out of 938 world universities, and the University of Zagreb School of Medicine is ranked 396 in the field of biomedicine and public health. Out of the approximately 400 scientific articles in the Web of Science database published annually by members of the School of Medicine in Zagreb, about 120 are in the first quartile (Q1), and more than 40 are published in journals with the highest scientific impact (M. Klarica. The role of the University of Zagreb School of Medicine in the development of education, health care, and science in Croatia. *Croat Med J*. 2018; 59: 185-188).

Majority of the scientific projects at the School of Medicine in the previous periods (2007-2014) were financed by national funding (Ministry of Science and Education of the Republic of Croatia). These are the 25 scientific programmes with a total of 87 projects and 74 individual projects, or a total of 161 projects. The faculty staff were the holders of 4 projects under the Unity Through Knowledge Fund programme, and during the period of the European Research and Innovation Funding Program (FP), the faculty members participated in 6 projects. Within the recent Horizon 2020 programme, the School participates with 4 approved projects. In recent years, the School has been successful in obtaining projects funded by the Croatian Science Foundation (CSF) with a total of 15 projects (in preparation for a dozen more) and a University Support Program (40 grants). In addition, there is a considerable number of other international projects (COST Actions, TEMPUS, EAHC), bilateral interstate projects, etc. Among them are DAAD (Deutscher Akademischer Austauschdienst), a bilateral programme for the exchange of participants in projects between the Republic of Croatia and the Federal Republic of Germany. Within the framework of bilateral cooperation, the School also cooperates with Italian and French scientific and research institutions. In the aforementioned article published in *Croat Med J* 2018, Table 2, the Dean of the School lists newer and more favourable data as of October 16, 2018. According to the Dean, there were 157 scientific projects at the School of Medicine in Zagreb, out of which six were Horizon 2020 projects (totalling € 21 million), 1 COST project, 4 DAAD projects, 29 CSF projects, one EXPANd project, two BICRO-HAMAG projects, one Adris project and 111 University support projects, not counting the two Centres of Research Excellence projects with HRK 74 million.

The School of Medicine is particularly proud to be the only institution in Croatia to have two appointed scientific Centres of Research Excellence (CoRE) - CoRE for Reproductive and Regenerative Medicine and

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

CoRE for Basic, Clinical and Translational Neuroscience. There is also the Centre for Translational and Clinical Research at the School of Medicine and the Clinical Hospital Centre Zagreb, established in 2009, which is of particular importance in the transfer of knowledge and technology. It is one of the few national faculties that promote the development of translational sciences. The Centre also has a Research and Technology Transfer Office supporting scientists in writing and implementing research projects and helping transfer knowledge and technology from research laboratories and clinical research to industry, enabling faster and more efficient transfer of results to end users - patients.

The School has its own quality research resources in terms of space, equipment, infrastructure and supporting services in accordance with the requirements of the scientific discipline from which the PhD programme is derived. The PhD programme is carried out at the premises of the School of Medicine, University of Zagreb, clinical and outpatient health institutions in Zagreb and scientific-research institutions (partners) with which the School has entered into a cooperation agreement. In addition to the facilities at the School of Medicine, other facilities are located at its research bases in the health system - two university hospital centres, six clinical hospitals, two health centres and two public health institutes. The School has cooperation agreements with the the Ruđer Bošković Institute, University of Zagreb Faculty of Science, University of Zagreb Faculty of Veterinary Medicine, University of Rijeka Faculty of Food Technology and Biotechnology, University of Split School of Medicine, and University Josip Juraj Strossmayer of Osijek Faculty of Medicine.

A.2.1.5. Innovativeness of the proposed study programme, that is, potential of the proposed study programme for creation of new and relevant knowledge or artistic practices

The postgraduate university (PhD) programme “Biomedicine and Health Sciences” educates scientists and researchers who, at the level of the study programme as a whole, must acquire specific competencies and corresponding measurable learning outcomes.

In this context, the PhD programme “Biomedicine and Health Sciences” is fully aligned with the School's scientific mission and vision, the strategic programme of scientific research at the School, as well as with international standards in the field of PhD programmes (ORPHEUS/AMSE/WFME) (<http://www.orpheus-med.org/images/stories/documents/ORPHEUS-AMSE-WFME-standards-for-PhD-education.pdf>). The School's mission in the field of science is to conduct collaborative, innovation-driven research programmes that connect scientists in the fields of basic, clinical and public health sciences, promoting interdisciplinarity and collaborativeness. The School of Medicine strives to create a stimulating intellectual environment, to promote scientific and humanitarian aspects of medical practice, while carrying out scientific research in the framework of international and national projects that result in the advancement of science, application in the teaching process and improvement of health care.

Research and development strategies of the School of Medicine are underpinned by the fundamental lines of performance pursued by the institution and involve the following:

- Culture promotion strategy and quality assurance system
- Study curricula quality strategy
- Student support strategy
- Research work quality development strategy
- IT/communication technologies development and application strategy
- National-scale collaboration development strategy

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

- International-scale collaboration development strategy
- Infrastructure, business and work organisation development strategy

These strategies of are based on the School's values themselves, which can be summarized as follows:

- competent teachers who are leaders in their scientific and professional areas in the Republic of Croatia and have national, regional and international reputation;
- previous references of the School of Medicine that guarantee a high level of quality in teaching, research and transfer of knowledge into practice;
- a high-quality infrastructural support of the realization of all activities of the School of Medicine

student-centred teaching in line with the agreed principles and standards of international medical education and standards of PhD programmes.

A.2.2. ANALYSIS OF THE COMPATIBILITY OF THE DOCTORAL STUDY WITH THE RESEARCH STRATEGY OF THE UNIVERSITY OF ZAGREB

The proposed PhD programme is fully in line with the Research Strategy, Technology Transfer and Innovation of the University of Zagreb document (http://www.unizg.hr/fileadmin/rektorat/O_Sveucilistu/Dokumenti_javnost/Dokumenti/Strateski_dokumenti/Izvjescia/Istrazivacka_strategija_verzija.pdf) in which one of the key goals is to improve doctoral education. This applies in particular to increasing the research productivity of young researchers, preparing PhD programmes for different careers after obtaining a PhD (basic medical sciences, clinical medical sciences, public health, industry, public sector) and appointment of young scientists to the University, i.e. the need to redefine the position of assistant professors. The system needs to be arranged to attract a number of international PhD candidates - junior researchers, which is carried out at the School of Medicine through the PhD programme in English.

In the above aspects, the PhD programme “Biomedicine and Health Sciences” is fully aligned with the mission, vision and strategic programme of scientific research of the School of Medicine and the University of Zagreb. The research mission of the School of Medicine consists of the implementation of research programs that are collaborative, focused on innovation and that bring together scientists in the fields of basic, clinical and public health sciences.

The immediate goals of the science strategy that fully correspond to the proclaimed goals of the University are the following:

- to develop and maintain a high level of research work that will enhance the research profile and international reputation of the School;
- to educate future generations of researchers in the field of medicine;
- to create synergies in the fields of science, medicine and technology;
- to facilitate the transition and translation of research findings into clinical and public health practice and collaboration with industry;
- to strengthen the culture of cooperation at national and international level;
- to establish a staff scientific policy;
- to strengthen the high level of research collaboration between biomedical science, clinical research departments and outpatient healthcare institutions;

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

- to encourage continuous monitoring of public health indicators and their application in the process of improving political decision-making on health and healthcare.

Measures to achieve the goals of the science development strategy at the School of Medicine emphasize the need to initiate a staff scientific policy that will enable the recruitment of young scientists (PhD and postdoctoral students) in basic, clinical and public health fields. In the context of the re-accreditation of the PhD programme, the School of Medicine, as the responsible scientific institution, advocates the employment of young scientists, stimulating their interest in research and work in Croatia, and encouraging the return of Croatian scientists from abroad. The School considers this its responsibility for the advancement of scientific work in biomedicine, which can influence the better position of science and universities in society and contribute to improving Croatia's competitiveness.

A.2.3. PRIOR EXPERIENCES OF THE PROGRAMME PROPOSER IN IMPLEMENTATION OF DOCTORAL STUDIES

The University of Zagreb School of Medicine is one of the oldest medical schools in this part of Europe, and was the first to establish and carry out postgraduate programmes in accordance to the changing laws and regulations. The first postgraduate programme was introduced in 1947/1948 in public health, with occupational medicine starting in 1949/1950. In short, the School of Medicine has over 70 years of experience in organizing and implementing postgraduate programmes.

Preparations for the establishment of the PhD programme began in a working group led by Prof. Zdravko Lacković in 1996. The programme started in the academic year 1997/1998., due to legal restrictions, first as a master-of-science degree programme called "Biomedicine". From 1999/2000. the programme was called "Medical Sciences", but was organized with the explicit intention that the continuation (the third year of study) should end with a PhD. With the change of the Act on Scientific Activity and Higher Education in 2003 and the Bologna process, the Master's Degree was abolished, and for the third time the study changed its name to the PhD programme "Biomedicine and Health Sciences". As already mentioned, it was the first postgraduate programme in the Republic of Croatia implementing the ideas of the Bologna Process and introducing the European Credits Transfer System, and it followed the development of synergy between the European Higher Education Area and the European Research Area. In cooperation with the Rectorate of the University of Zagreb, from its outset this programme anticipated the direct requests of the Ministerial Conference in Berlin in 2003 and prescribed that PhD programme, as the responsibility of the School of Medicine, should provide students with knowledge, skills and competences for independent scientific work. The University of Zagreb School of Medicine is a European leader in the implementation of the Bologna Process at the PhD level. As a result of this international initiative, ORPHEUS was founded (the first president from 2006 to 2014 was Prof. Zdravko Lacković, today its honorary member), and the headquarters of the organization were at the School of Medicine in Zagreb. As a result, the PhD programme Biomedicine and Health Sciences became widely known in Europe, bringing the School closer to the European level of competence required for the development of a knowledge-based society at the highest level, spurring and facilitating the current development of science in the Republic of Croatia.

The School has significantly contributed to the development and harmonization of PhD programmes in Croatia. Immediately after the ORPHEUS European conferences in 2005 and 2006, in cooperation with the Department of Medical Sciences of the Croatian Academy of Sciences and Arts (HAZU), meetings of all medical schools in Croatia were held with the aim to harmonize PhD programmes in Croatia and the European Research Area.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

During the last years, several international and external evaluation processes have been carried out at the School, which, among other things, have included the evaluation of the PhD programme “Biomedicine and Health Sciences”:

- The Peer Mission of the European Commission visited the School in 2007 as part of the negotiations for the accession of the Republic of Croatia to the European Union, and in 2012 as part of the monitoring before accession;
- The National Council for Higher Education initiated the School's external evaluation process at the end of 2008 and, on the basis of the Final Report, the Faculty received a work permit in early 2009;
- by the decision of the Agency for Science and Higher Education (ASHE) from 2011, the School of Medicine was selected as one of the three faculties of the University of Zagreb, where an internal and external evaluation of the quality assurance system was carried out according to the ESG guidelines. Based on the final report, in 2013 the Faculty was awarded the ASHE certificate for an efficient, developed and functionally organized quality assurance system;
- The re-accreditation process of the School of Medicine was carried out in 2015. The Final Report states: “Each study programme is defined in accordance with clearly defined learning outcomes and international standards. The institution of higher education has put in place mechanisms to approve, monitor and improve its programmes and qualifications”;
- in addition to the aforementioned processes of international and national quality evaluation of the School of Medicine as a whole, 2013/2014. The PhD Programme Committee of the University of Zagreb conducted the evaluation process for the PhD programme “Biomedicine and Health Sciences”. The International Commission has given the opinion that the PhD programme “Biomedicine and Health Sciences” is eligible for continuation of the programme at the University of Zagreb, but some improvements have been proposed;
- the process of re-accreditation of the PhD programme “Biomedicine and Health Sciences”, conducted by the Agency for Health and Safety in 2016. The International Commission identified examples of good practice in the study, but also made recommendations for improving the quality of study.

A.2.4. INTERNATIONAL RECOGNISABILITY OF THE PROPOSER OF THE DOCTORAL STUDY IN SCIENTIFIC OR ARTISTIC RESEARCH, OR ARTISTIC CREATION

The University of Zagreb School of Medicine is an internationally recognized faculty on several grounds. In particular, two basic points should be emphasized - the School as a driving force for the development of PhD programmes in the Republic of Croatia and a frontrunner of harmonization of PhD programmes in Europe, and the School as a place of quality scientific research activity, which is ultimately manifested by international projects and the number of scientific papers and publications.

The School has contributed significantly to the development and harmonization of PhD programmes in Europe and has clearly established rules for establishing and approving PhD programmes in accordance with international agreements. According to documents adopted at two ORPHEUS conferences held in Zagreb, the first European standards were established, which later evolved into common standards (Standards/Best Practices) by ORPHEUS, the Association of Medical Schools of Europe (AMSE) and the World Federation for Medical Education (WFME). The School hosted the 2009 annual AMSE conference at which the *AMSE - Zagreb Declaration on the Role of the Medical School in Postgraduate Education* was adopted. In short, the School has been the leader in the development of the Bologna process at the PhD

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

level in the European context. As previously already stated, the School was a major force in the establishment of ORPHEUS. Today, ORPHEUS is a large European association with 105 institutional members (faculties / universities) from Europe, several medical colleges from Canada, India, Australia and the United States and four associate members: the British Pharmacological Society, The Federation of European Pharmacologists, EMTRAIN Project and Federation of American Societies for Experimental Biology (FASEB). It is the largest PhD programme association in Europe working to promote and link PhD programmes in biomedical and health research. It also implements the ORPHEUS Evaluation Certificate and Labelling whose purpose is to assist institutions to reflect on their doctoral training programmes, by providing them with a comprehensive and flexible procedure to assist this process of self-reflection.

In terms of research recognition, the School is strategically focused on improving translational research and integrating basic, clinical and public health programmes. The University Hospital Centre Zagreb and other health care institutions are not only teaching but also research bases of the School of Medicine, which puts the School in a unique position to promote research in biomedicine and health in Croatia.

According to the number of published papers by the University of Zagreb, the School of Medicine is in the first place by the number of published papers (48.6%) (mef.hr: Scientific projects in biomedicine and health, July 2016, available at www.mef.unizg.hr). Regarding international projects and cooperation, the Faculty's teachers were holders of 4 UKF projects, 5 FP6 projects and 6 FP7 European research and innovation funding programmes, and 4 Horizon 2020 projects. In addition, there is a significant number of other international projects (IPA, COST Actions, TEMPUS, EAHC, Michael J. Fox) and bilateral / interstate projects. Among them are the DAAD (Deutscher Akademischer Austauschdienst), a bilateral program for the exchange of participants in projects between the Republic of Croatia and the Federal Republic of Germany. Within the framework of bilateral cooperation, the Faculty also cooperates with Italian and French scientific and research institutions.

The School has numerous international bilateral cooperation agreements with the faculties of renowned world universities, including the American (University of California/San Francisco, Medical College of Wisconsin/Milwaukee, Penn State University, Pennsylvania, University of Georgia College of Public Health, The State University of New Jersey/The Rutgers University, Vanderbilt University/Tennessee, University of Northern Colorado, University of Michigan Medical School, McGill / Montreal, etc.) and several European medical school (Ljubljana, Graz, Moscow, Hamburg, Pécs, Rennes, etc.).

The School is also actively involved in a number of European associations for the promotion of higher education in biomedicine: the Association of Medical Schools of Europe (AMSE), the International Association for Medical Education (AMEE), The European Training Consortium in Public Health & Health Promotion, the Association of Schools of Public Health in the European Region (ASPHER), European Public Health Association (EUPHA), Forum for Public Health in South-East Europe, Organization for PhD Education for Biomedicine & Health in European System (ORPHEUS) and European University Association (EUA).

A.2.5. COMPARABILITY WITH SIMILAR DOCTORAL PROGRAMMES OF HIGHLY RANKED FOREIGN UNIVERSITIES

Various PhD programmes are carried out at European medical schools, a number of which are comparable to this proposed PhD programme, primarily in concept with respect to the scientific and educational components of the study programme. In this context, it should be emphasised once again that the PhD programme at the Zagreb School of Medicine hosted two European conferences on the harmonization of doctoral studies in the field of biomedicine, held in 2004 and 2005. Important documents adopted at these conferences are the so-called Zagreb Declaration, which defines PhD programmes, and the “Zagreb Recommendations on the Organization of Doctoral Studies”. The ORPHEUS - Organisation for PhD

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Education in Biomedicine and Health Sciences in the European System was founded at the Second Conference, headed by Professor Zdravko Lacković. In 2012, the association published a strategic document entitled “Standards for PhD Education in Biomedical and Health Sciences in Europe - A Proposal from ORPHEUS - AMSE – WFME”. This document proposes a set of standards for PhD programmes and PhD degrees in biomedicine and health sciences. The PhD programme “Biomedicine and Health Sciences” follows the standards set out in that document regarding the structure of the institutions of higher education and the research environment, study outcomes, eligibility criteria, curriculum, mentoring, PhD thesis proposals, and the evaluation and defence of PhD theses. The definition of a PhD thesis standard is in most cases the assurance of quality PhD education that is internationally accepted.

All this shows the comparability with the programmes of reputable foreign higher education institutions, especially those from the EU, and furthermore that the PhD programme of the School of Medicine at the University of Zagreb has played and still has one of the leading roles in these processes of harmonization in Europe.

A.2.6. REQUIREMENTS FOR ADMISSION TO THE STUDY PROGRAMME

Enrolment quotas are determined on the basis of availability of research, teaching and mentorship capacities. Enrolment quotas are determined by the Council for Postgraduate Programmes based on the proposal of the PhD Programme Coordination Committee. Enrolment in a PhD programme is done on the basis of a public call for applications published in the daily press and on the School's website. The public call for applications to the PhD programme is announced at least one month prior to the start of the courses. Enrolment conditions and selection procedures for students are harmonized with the Zagreb Recommendations of the Second European Conference on the Harmonization of PhD Programmes in Biomedicine and Health Sciences.

The conditions for application are:

- a completed relevant university graduate or university integrated undergraduate and graduate programme in the scientific field of Biomedicine and Health Sciences and related field. Exceptionally, with the explanation and the request, applicants with a completed university graduate programme in other fields of natural, and in the case of public health social sciences, may be admitted;
- a grade point average of at least 3.51 (in the grading system 5-10 or AF grade point average of at least 8.00);
- candidates who have completed integrated undergraduate and graduate programme or graduate programme abroad must undergo a process of academic recognition of a foreign degree of higher education before enrolment (<http://www.unizg.hr/homepage/study-at-the-university-of-zagreb/academic-recognition-of-foreign-higher-education-qualifications/>);
- a letter of recommendation by potential mentor/s, and a research topic proposal
- additional documentation must be submitted with the application (copies of papers and congress summaries, certificates of indexation of papers and congress review, participation in projects);
- a certificate of proficiency in English language (issued by a foreign language school, or other institutions of higher learning) or Croatian language (for candidates whose native language is not Croatian) must also be enclosed;

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

- candidates who have completed their undergraduate study abroad are required to submit a decision on academic recognition of a foreign degree of higher education prior to enrolment.

A.2.7. DESCRIPTION OF THE SELECTION OF APPLICANTS WITH A SPECIAL EMPHASIS ON DESCRIPTION OF ADMISSION REQUIREMENTS CRITERIA AND TRANSPARENCY OF THE APPLICANT SELECTION PROCEDURE

Candidates are eligible for admission to the programme:

- if they have been ranked among the top fifty candidates determined by the total number of points based on the grade point average in undergraduate and graduate study, professional and scientific activity (number and type of published papers, participation in congresses and meetings, participation in projects), as well as on the basis of candidate employment contracts in the system of scientific recruits; and
- if they have successfully passed a structured interview with the PhD Programme Coordination Committee.

The table lists the points by individual criteria used when applying for enrolment and ranking candidates in the academic year 2018/2019.

Grade point average in the undergraduate study	2 points for each decimal point between 3.5 – 4.0; 3 points for each decimal point above 4.0
Graduate thesis	1 point for defended research graduate thesis
English language certificate	B1-B2 level 5 points
	C1-C2 level 20 points
Professional and scientific activity:	
Articles indexed in CC (enclose: list of publications, copies of publications and evidence that the journal is indexed)	first author 40 points, co-author 30 points per paper
Articles indexed in other international indices (enclose: list of publications, copies of publications and evidence that the journal is indexed)	first author 20 points, co-author 15 points per paper
Active participation in international scientific conferences (points awarded for active participation per conference – oral or poster presentation with published abstract; enclose: list of abstracts, copies of abstracts and covers of conference proceedings, i.e. conference programmes which indicate that the conference has been organised by an international or European association (institution) or by at least three countries; if there were multiple presentations at the same conference, please submit only one, the most favourable for the candidate)	2 points per conference or active participation as first author, 1 point as co-author; points are awarded per conference, not per abstract

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Active participation in domestic scientific conferences (points awarded for active participation per conference –oral or poster presentation with published abstract; enclose: list of abstracts, copies of abstracts and covers of conference proceedings; if there were multiple presentations at the same conference, please submit only one, the most favourable for the candidate)	1 point per conference or active participation as first author, 0,5 points as co-author; points are awarded per conference, not per abstract
Active participation in a project (enclose: signed contract on employment at the project, signed statement of the leader of the project that the candidate is engaged at the project)	for Croatian Science Foundation and EU Horizon 2020 projects 50 points; for other peer-reviewed projects 5 points
Dean's award for original scientific work (enclose copy of the award)	10 points
Rector's award for original scientific work (enclose copy of the award)	20 points
Assistant employed by the School of Medicine University of Zagreb or junior researcher on the Croatian Science Foundation project (enclose: copy of the contract)	100 points

The selection of candidates for PhD programme is carried out by a PhD Programme Application Committee consisting of Vice-Dean for Postgraduate Programmes and Director, Deputy Director and Assistant Directors of the PhD Programme. PhD Programme Application Committee awards points to the candidates in accordance with the prescribed criteria (Table). The interview is a structured and mandatory part of the application procedure. There are three basic elements to consider during the interview: a) the research topic proposal and its feasibility with respect to the candidate's circumstances of employment, and the duration of the study (where the research will be conducted, sample assessment / research subjects, materials and methods, hypothesis and aims of research, funding, expected realization, possible difficulties in the realization of the research), b) proposed mentor (competences in relation to the proposed research and in general, previous cooperation with the candidate, expectations, etc.) and c) knowledge and command of the English language. The main goal is to examine and determine the likelihood of the proposed research being completed during the PhD programme.

The Faculty Council makes the decision on the acceptance and enrolment of candidates, which is publicly announced on the School's notice board and website. The decision on acceptance and enrolment of candidates is considered a first instance decision. Candidates whose application for enrolment is not accepted may submit their appeal to the Dean within 15 days from the date of announcement of the decision on the School's notice board and website. The Dean's decision on the appeal is final.

A.2.8. DESCRIPTION OF THE INSTITUTIONAL MANAGEMENT OF THE STUDY***PhD Programme Coordination Committee***

PhD Programme Coordination Committee consists of a PhD programme director, his/her deputy and one or more assistants from the ranks of teaching staff with scientific-teaching titles who actively participate in the organisation of the curriculum. The PhD programme director is appointed for a period of three years, and the same person may be re-appointed as a PhD programme director. Programme director, deputy director and director assistants are appointed by the Faculty Council based on the recommendation of the

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Council for Postgraduate Programmes. PhD programme director organizes the PhD programme and is responsible for the implementation of the curriculum, proposes a plan for implementation of the curriculum, convenes and chairs the meetings of the course leaders of the PhD programme, proposes amendments to the curriculum, and submits annual reports on the courses held at the PhD programme to the Council for Postgraduate Programmes and the Faculty Council

Governing bodies responsible for conducting PhD programmes at the School

1) The Faculty Council, which appoints the PhD programme directors and their deputies; the chairpersons and the members of the boards conducting the PhD programmes; the President and the members of the Ethics Committee and its working groups; committees for the evaluation of the PhD thesis proposal and for the evaluation and defence of the PhD thesis; mentor and co-mentor of a PhD candidate;

2) The Council for Postgraduate Programmes, which performs the function of the Postgraduate University Study Programmes Council, ensures the equal quality of the teaching plans and curricula of PhD programmes, proposes directors of postgraduate programmes as well as course leaders and in cooperation with boards and committees prepares standards and procedures for the evaluation of postgraduate programmes, evaluates student activities during the PhD programme, determines the ECTS workload of programme contents according to their curricula.

3) The Board for Evaluation of Postgraduate Programmes is a permanent expert committee of the Council for Postgraduate Programmes in charge of coordinating activities and harmonizing standards in designing curricula and evaluation of postgraduate programmes.

4) The Board for Evaluation of Scientific Activity of PhD Candidates is a permanent committee of the Council for Postgraduate Programmes in charge of coordinating activities and harmonizing standards in the process of evaluating the scientific activity of PhD candidates and mentors. The Board evaluates whether the conditions for the public defence of the PhD thesis have been fulfilled, in accordance to the Regulations on PhD Programmes.

5) The Board for PhD Theses and Scientific Degrees harmonizes the criteria and coordinates the activities in the process of attaining the academic degree of doctor of science from the moment of the registration of the PhD thesis proposal up to the public defence of the completed PhD thesis and the graduation ceremony. The Board, in cooperation with the Ethics Committee of the School, carries out the entire procedure of application, evaluation and defence of PhD thesis, and proposes to the Faculty Council the appointment of appropriate committees and the appointment of a mentor and co-mentor of the PhD thesis.

6) The Ethics Committee of the School of Medicine (including the Working Group for Biomedical Research and the Board for Animal Well-being), together with the Board for PhD Theses and Scientific Degrees, participates in the process of academic review, public discussion and the final evaluation of the PhD thesis proposal, using the prescribed combined forms.

The mentor and co-mentor cannot be members of the committees for the evaluation and public discussion of the PhD thesis proposal, nor for the evaluation and defence of the completed PhD thesis. In the procedure of attaining the academic degree of Doctor of Science, the members of the expert committees may not be persons who are related to the PhD candidate (by blood or other close relationship, e.g. parents, grandparents, siblings, spouse) nor persons who share common financial and other material interests with the PhD candidate (e.g. co-authorship or co-ownership of a patent).

A.3. CURRICULUM OF THE DOCTORAL STUDY

A.3.1. DESCRIPTION OF THE STRUCTURE OF THE PROGRAMME OF THE DOCTORAL STUDY

The programme consists of methodological courses (learning research procedures and methods), field-related (elective) courses for the application of scientific-research competences in particular medical fields, and a so-called third-credit group which represents measurable scientific contribution of PhD candidates during their studies. In addition, PhD Day is organised with the aim of improving public awareness of the PhD programmes, facilitating and encouraging the exchange of experience in PhD and mentor research and insight into the quality of PhD candidates' work for everyone involved. The PhD Day includes a one-day public presentation of the ongoing research and preliminary results in the PhD theses of all PhD candidates of the 2nd and 3rd year of the PhD programme. Research progress is presented in the form of poster presentation and abstract in a specially printed publication, while several best abstracts are also selected for oral presentation. Participation in PhD Day awards 4 ECTS credits to each candidate and is considered an integral part of the PhD work-load.

The PhD programme can be attended either full-time or part-time.

Full-time programme is completely research oriented and generally lasts for three years. It can be extended up to a total of five years for justified reasons. After this five-year term, the PhD candidate loses the right to obtain an academic degree of Doctor of Science in that programme. The specified period of five years does not include the temporary suspension of studies for justified reasons.

Part-time programme is intended for candidates who, in addition to their PhD obligations, perform other professional duties during their employment (e.g. clinical work or public health, etc.), and often teaching. Part-time programme is organized to facilitate this as much as possible.

Part-time programme lasts for up to five years. It can be extended up to a total of eight years for justified reasons. After this eight-year term, the PhD candidate loses the right to obtain an academic degree of Doctor of Science in that programme. The specified period of eight years does not include the temporary suspension of studies for justified reasons.

The principal scheme of programme activities and the appertaining student credits is as follows:

First year: methodological courses (12 ECTS), submission of PhD thesis proposal and research work with mentor(s) (28 ECTS), scientific activity (publications, attending conferences, meetings, lectures, etc.) (20 ECTS);

Second year: methodological courses and field-related courses (12 ECTS), PhD Day (4 ECTS), public discussion of the PhD thesis proposal and its acceptance by the Faculty Council, research work with mentor(s) (24 ECTS), scientific activity (publications, attending conferences, meetings, lectures, etc.) (20 ECTS);

Third year: methodological and field-related courses (12 ECTS), PhD Day (4 ECTS), research work with mentor(s), writing and successfully defending the PhD thesis (24 ECTS), scientific activity (publications, attending conferences, meetings, lectures, etc.) (20 ECTS).

A.3.1.1. Methodological courses

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Methodological courses are offered during all three years of study with emphasis on the first year. The aim of these courses is to familiarize students with the basics of scientific work as a whole, and the procedures and methods in particular research areas. Although students may not fully learn numerous and very different research methods and procedures by attending these courses, an important goal is to gain knowledge of techniques (e.g. biochemical, molecular or in vitro procedures), some of which will be used as groundwork of their PhD thesis. An additional goal of these subjects is to free students, especially clinicians, from the frequent fear of laboratory methods and procedures and to show them that they would be able to master it. Methodological courses should not consist of more than 30% of lectures on theory, while at least 70% of teaching must be focused on presentation of the methods and practical work. The lesser portion of conventional teaching is compensated by the recommended and compulsory literature. Each of these courses is accompanied by a corresponding reference book prepared by the teachers of the course in question. The courses are, as a rule, organized as integrated and include both preclinical and clinical (or public health) methods of tackling particular problems, since, when it comes to scientific methodology, the boundaries between these areas are narrowing.

A.3.1.2. Field-related courses

The field-related courses aim to introduce scientific knowledge and problems in certain narrower areas of research in the field of biomedicine and health sciences. In addition to extending knowledge, such courses enable students to understand and follow the latest scientific literature on a particular area of research. Field-related courses are offered in all years of the programme, but predominantly after the PhD thesis proposal had already been submitted.

Proposals of new field-oriented courses are accepted and considered at all times and all teachers of the School of Medicine, University of Zagreb are invited to apply with courses in the area of their research. All experts from Croatia or abroad who meet the legal requirements are also welcome to apply. All course proposals are subject to double anonymous scientific peer-review prior to acceptance.

A.3.1.3. Scientific activity

The completion of the organized programme and the one of the conditions for submitting a PhD thesis for assessment is considered to be the day when the PhD candidate fulfilled the requirements of the so-called third-credit group, i.e. his/her scientific activities. The PhD student's scientific activity is valued at 20 ECTS per year (60 ECTS credits in total), and scoring elements include published scientific papers stemming from their PhD research and other papers in the field of research, participation in scientific conferences (abstracts), number of citations, invited lectures on the topic of the PhD thesis and received awards in the field of research. An additional requirement is that the PhD student is the co-author with the mentor or co-mentor of the PhD thesis of a paper that is published (or has been accepted for publication) and that is related to the PhD thesis, that he/she is one of the main authors, and that the paper is published in a peer-reviewed scientific journal in the Web of Science (Core Collection) database.

A.3.2. DESCRIPTION OF THE MANNER OF TRAINING DOCTORAL STUDENTS FOR ACQUISITION OF SCIENTIFIC OR ARTISTIC KNOWLEDGE, EXPERIENCES AND SKILLS THAT WILL ENABLE THEM TO SOLVE COMPLEX SOCIAL AND ECONOMIC PROBLEMS CREATIVELY AND ON THE BASIS OF RESEARCH

The PhD programme aims to enable students to independently conduct original and scientifically relevant research and to critically evaluate the research of others after completing the programme and successfully defending their PhD thesis. Additionally, given the fact that in today's environment, healthcare and

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

biomedical practitioners need to be capable of lifelong learning, the additional goal of the PhD programme is to further candidates' critical thinking and creative problem solving. The achievement of these goals encourages the use of problem-based learning as part of teaching. These principles include not only the need to dissect a particular problem, but also the acquisition of new knowledge and its practical application in achieving the final results of the research. The aforementioned principles are used in a number of mostly methodological courses carried out as part of the PhD programme, for example in subjects "Structure, methodology and functioning of scientific work 1", "Structure, methodology and functioning of scientific work 2", "Structure, methodology and functioning of scientific work 3: research projects", "Medical statistics 2.1: statistical tools for medical data analysis in planned experimental study design", "Medical statistics 2.2: statistical tools for medical data analysis in quasi-experimental study design", "Medical statistics 2.3: statistical tools for medical data analysis in observational study design with large samples", "Medical statistics 2.4: statistical tools for medical data analysis in observational study design with small samples", "Genomic approaches in biomedical and translational research", "Proteomics in biomedical research", "Medical informatics methods", and others.

A.3.3. DESCRIPTION OF THE PROGRAMME POTENTIAL FOR TRAINING DOCTORAL STUDENTS FOR AN INDEPENDENT, RESEARCH-BASED AND INTERDISCIPLINARY APPROACH TO PROBLEMS, FOR INDEPENDENT RESEARCH AND FOR CRITICAL EVALUATION OF THE WORK OF OTHERS

According to the "Zagreb Declaration", upon completion of the programme, a Doctor of Science has full competences for continuing scientific research work: knowledge of methodology in the field of biomedical and health sciences, is able to write a research proposal, write and publish a paper in a journal indexed on world bases (Web of Science, Scopus, Medline), is able to present, report and defend research findings in the scientific community and to critically evaluate the scientific work of others. They are eligible for postdoctoral training or employment in any of the institutions collaborating in this PhD programme, at other universities in Croatia as well as in collaborative laboratories in the world, in the public sector, in healthcare, research institutions and scientific-educational institutions.

The Postgraduate University (PhD) Programme Biomedicine and Health Sciences is aimed at acquiring new knowledge and skills that enable independent scientific and research work. This applies in particular to the adoption of new methodologies, from molecular, biological and biochemical methods to genomics and proteomics and other research approaches. In addition, through seminars, practical work and journal clubs, discussion of certain aspects of the research is encouraged, and the possible shortcomings of the published research are critically discussed. Within individual courses, such as "Genomic approaches in biomedical and translational research", candidates are encouraged to develop research proposals that contain elements of the methodology presented within the course, and at the end of the course, presentations of research proposals are shared and discussed by all participants. This encourages the development of critical thinking, how to conduct a constructive debate about the results of scientific research, but also how to defend the conclusions drawn from the research results.

Methodological course "Structure, methodology and functioning of scientific work 3: research projects" is especially important for encouraging independent scientific work of students, since within this course students acquire the knowledge and skills necessary for the preparation and application of scientific projects. Since securing financial resources for conducting research is crucial for independent scientific work, the mentioned subject is central for further independent work of PhD candidates. They are introduced to a variety of research funding instruments as well as educational scholarships to facilitate

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

postdoctoral training. The course also contains a practical part during which candidates have to prepare their own project proposals according to the exact requirements, which specifically prepares them for the requirements of future independent scientific activity.

Another important aspect of PhD programme is that it is interdisciplinary, manifested through various forms of cooperation between PhD candidates and experts of different profiles. For example, many PhD candidates in the programme are clinicians who use specific laboratory, imaging and other methods in their research, which contributes to gaining new insights and creating new knowledge. The requirement for successful cooperation is knowledge and understanding of both areas, whereby the PhD candidate acquires new competences and skills. Another example is dual mentoring, where two experts from different fields jointly pursue PhD research, which is increasingly needed in the dynamic field of biomedicine today.

A.3.4. DESCRIPTION OF THE PROGRAMME POTENTIAL FOR ACQUISITION OF WORK COMPETENCES, INCLUDING LIST OF COURSES FOR DEVELOPMENT OF GENERIC AND TRANSFER SKILLS

A.3.4.1. Learning outcomes at the programme level

The Biomedicine and Health Sciences PhD programme educates scientists / researchers who, at the level of the PhD programme as a whole, must acquire the following specific competencies and their corresponding, measurable learning outcomes in accordance with 8.2 of the Croatian Qualifications Framework (CROQF):

Competence 1. The individual will be able to devise, design, apply and adopt a process of independent, original scientific research.

The measurable learning outcomes related to this competence are as follows: to create new knowledge (entirely new, complement existing, refute existing) by their own distinctive contribution to research through PhD research, create new methods, invent new approaches, instruments or materials that will move the known boundaries in the field of PhD research.

Competence 2. The individual will be able to systematically understand relevant scientific facts, monitor and understand the latest knowledge in the field of PhD research, systematically develop and adopt state-of-the-art methodology and skills in the scientific field of PhD research, and use the acquired knowledge and skills to solve complex scientific research problems.

The measurable learning outcomes related to this competence are the following: to use advanced, highly specialized knowledge and skills independently so that they can develop their own new ideas, theories, facts and procedures in a field of scientific interest.

Competence 3. The individual will be able to assume professional, ethical and social responsibilities independently, professionally and with academic integrity when planning and conducting scientific research, but also upon completion of the research, which includes taking responsibility for the scientific success and social benefit of the PhD research results.

The measurable learning outcomes related to this competence are as follows: to develop a personal, professional and ethical authority at a level that meets all the requirements required to publish research results in scientific publications with international peer review in the field of PhD research.

Competence 4. The individual will be able to communicate in a socially acceptable manner with individuals and groups of different attitudes and opinions, both within the scientific and academic community and within their own profession and beyond.

The measurable learning outcomes related to this competence are as follows: to build their own acceptable and effective forms and methods of interpersonal communication with individuals and groups of

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

researchers in the process of collaboration on planning and conducting PhD research, PhD thesis and PhD thesis defence, and peer review publication of scientific papers related to PhD thesis.

A.3.4.2. Learning outcomes at the level of methodological courses

The aim of this group of courses is to introduce PhD candidates to the basics of advanced-level scientific work, but also to procedures and methods in particular research areas.

The learning outcomes of the methodological group of courses as a whole, consistent with the 8.2 CROQF level, are as follows:

- independently present advanced knowledge (facts, theories) that underpins modern scientific methodology (biochemical, morphological, molecular - biological, physiological, immunological, microbiological, neuroscientific, psychological and behavioural, pharmacological, organ system imaging, diagnostic and laboratory, pathophysiological, epidemiological, statistical, etc.) and that will be used in PhD research;
- independently present methodological skills and procedures necessary for planning, selecting, performing (collecting and processing data), standardizing and optimizing the scientific method pertaining to PhD research;
- independently or in a team critically evaluate the results published in a presented scientific article, especially in the light of controlling the trial conditions and the multiple factors affecting the research results before and during the experiment.

Examples of learning outcomes for several methodological courses are as follows:

Biochemical methods in biomedical research: Select the latest laboratory analytical methods and judge the biological variability of the sample. Make conclusions on the impact of pre-analytical procedures on the results of specific laboratory analyses. Make conclusions on the possibility of measuring specific analytically in low concentration ranges.

Gene targeting in mammals: Present advanced knowledge of human disease modelling in mice with genetic techniques, including gene knockout gene disabling procedures. Recognize the application of a particular model with a genetically engineered mouse in their own research.

Statistical analysis of medical data 1: Use statistical software (SAS, JMP, Statistica, R). Perform preparation, input and screening of data for statistical analysis on their own. Assess the strength of the test and sample size independently. Perform descriptive statistics procedures independently. Independently test a hypothesis using parametric and non-parametric methods of statistical testing of hypotheses. Independently perform basic statistical and analytical procedures for qualitative data. Independently perform basic statistical modelling procedures by regression (logistic regression, linear regression, Cox regression). Independently present, interpret and generalize statistical results. Journal Club: Critically evaluate the appropriateness of the statistical procedures applied in selected publications.

Epidemiologic methods in research: Plan to conduct epidemiological research. Hypothesize epidemiological research. Calculate and explain frequency and connectivity measures. Make conclusions on possible errors of epidemiological and clinical research (accidental, systematic error; major types of confounding, selection, lead-time, drop-out, etc.). Assess the impact of applied health interventions or health technology on treatment outcomes. Make conclusions on reliability, effectiveness of tests or diagnostic methods. Detect an epidemic based on epidemiological analyses or sudden grouping of events.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Make a proposal to address ethical issues specific to epidemiology (research approval, notification, consent, data protection and treatment of newly diagnosed patients).

A.3.4.3. Learning outcomes at the level of field-related courses

Field-related courses aim to introduce students to specific problems and provide the knowledge needed for research in particular narrower branches of biomedicine and health sciences. By incorporating advanced knowledge, extended beyond the graduate and postgraduate specialist level of learning, such courses must enable the student to follow with understanding the latest scientific literature in their field of research. Therefore, critical judgment about selected scientific papers (the Journal Club) is an essential part of field-related courses.

Examples of learning outcomes for several field-related courses in the clinical, preclinical, and public health subjects are as follows:

Experimental oncology: malignant diseases as persistent oxidative stress: Present the latest knowledge on the pathophysiology of oxidative stress and its importance in oncology. Evaluate the purpose and application of specific biochemical methods for the determination of markers of oxidative stress and lipid peroxidation in tumours. Discuss scientific and practical aspects of complementary forms of oncology therapy based on scientific approach. Independently judge a selected scientific article in the subject area (Journal Club).

Pharmacogenomics: Present advanced knowledge in the field. Assess the importance of certain pharmacogenetic analyses. Interpret genotyping findings and apply them to create algorithms and select the optimal drug and dose for the individual patient.

Proteomics in biomedical research: Present advanced knowledge of the fundamentals of mass spectrometer and other tools in proteomic research. Know the capabilities, advantages and limitations of proteomic methods in specific research questions.

Disorders of adrenal gland: Present advanced knowledge of diagnostic treatment of patients with adrenal tumours, diagnosis and treatment of congenital adrenal hyperplasia, hormone replacement therapy for patients with adrenal insufficiency, options for surgical and pharmaceutical treatments of adenomas, pheochromocytomas and adrenal cortical carcinomas. Comment on diagnostic and therapeutic dilemmas in adrenal disease and independently devise possible solutions based on patient presentation. Make critical judgments on your chosen issue through the Journal Club discussion.

A.3.4.4. Generic skills

Generic/transferable skills and competences that can be acquired through the PhD programme Biomedicine and Health Sciences and used outside the scientific, academic and/or clinical careers are:

- solving complex problems using critical thinking, judgment, generalization, synthesis and integration of ideas; know the meaning of evaluation and systematic procedures in the process of evaluating results, projects and programmes;
- ability to transfer and operationalise new technologies and new ideas;
- ability to manage project tasks;
- organisational and leadership skills;
- ability to teach others.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

The PhD programme has a number of required courses which develop generic skills of the candidates. They are required to attend three blocks of methodological courses in which they become acquainted with:

- advanced knowledge and skills of scientific communication, both verbally and in writing, in Croatian and English languages;
- advanced statistical methods needed to carry out their research;
- designing research and experiments and the relationship between design and statistics;
- importance of a well-defined hypothesis, the role of pilot studies and preliminary data;
- advanced knowledge of databases, computer and automated data collection;
- specifics of working with human subjects in research;
- specifics of working with experimental animals in research
- basics of intellectual property and patent filing.

A.3.5. POTENTIAL OF THE STUDY FOR ESTABLISHING COOPERATION WITH OTHER HIGHER EDUCATION INSTITUTIONS, RESEARCH INSTITUTES, AND PRIVATE AND PUBLIC BUSINESS SECTORS

The PhD programme “Biomedicine and Health Sciences” features participation of numerous external associates in teaching, which include not only employees of other institutions of higher learning, but also scientists employed at scientific institutes and employees of the public sector active in the field of biomedicine, health care and pharmaceuticals.

In addition to teachers at the University of Zagreb School of Medicine, the PhD programme teachers are employees of several other faculties of the University of Zagreb, including the School of Dental Medicine, Faculty of Pharmacy and Biochemistry and Faculty of Veterinary Medicine (biomedical area), Faculty of Science, Faculty of Education and Rehabilitation Sciences, Faculty of Electrical Engineering and Computing, Catholic Faculty of Theology and Faculty of Law. Also, employees of universities in Rijeka, Split and Osijek participate in a smaller part of the programme. Among the leading scientific institutes, scientists employed at the Rudjer Boskovic Institute, the Institute of Anthropology, the Institute for Medical Research and Occupational Health and the Institute for Physics participate in the teaching and scientific research of the PhD programmes. Finally, employees of all major clinical centres and hospitals that house the clinics of the School of Medicine in Zagreb – University hospital centre Zagreb, University hospital centre "Sestre milosrdnice", University hospital Merkur, University hospital Sveti Duh and University hospital Dubrava are course leaders and lecturers at the PhD programme. Finally, employees of private research companies such as Fidelta (Galapagos, Zagreb) and pharmaceutical companies like Pliva (Teva Pharmaceutical, Zagreb) also participate in the teaching and research components of the programme.

Additional attention is also paid to technology transfer and the financing of scientific research, which is discussed in the three compulsory methodological courses in the series "Structure, methodology and functioning of scientific work". All of the above shows significant openness to collaboration, but more importantly, it provides PhD candidates with new in-depth insights into translational approaches and the pathway of medicine, which could ultimately contribute to the development of new research programmes and significant scientific and economic results.

A.3.6. REQUIREMENTS FOR STUDENTS' ADVANCING DURING THE STUDY

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

In addition to fulfilling the obligations of the curriculum, the requirements for advancing through the programme are as follows: a) submitting a PhD thesis proposal and choosing mentor(s) for enrolment in the second year of study; and b) accepted PhD thesis proposal and mentor by the Faculty Council for enrolment in the third year of study.

A.3.7. REQUIREMENTS FOR APPROVING THE PROPOSAL OF THE DOCTORAL DISSERTATION

All PhD candidates may, immediately upon obtaining the student status in a PhD programme, and at the latest before the expiry of the first study year of a PhD programme, submit to the Board for PhD Theses and Scientific Degrees a request to initiate the procedure for attaining the academic degree of doctor of science and to submit a PhD thesis proposal on the prescribed forms of the Board for PhD Theses and Scientific Degrees (form DR.SC.-01A), with the relevant additional documentation. The obligatory part of the additional documentation is a statement of the PhD candidate that he/she did not register an identical PhD thesis proposal at another PhD programme of the University of Zagreb or any other university. The appropriate, completed forms are also submitted simultaneously to the School's Ethics Committee which is included in the process of review of the PhD thesis proposal. All scientific research on or with humans or animals must be conducted in accordance with regulations, with the approval of the School's Ethics Committee, as well as the institution where the research is conducted, and with consent of all research subjects individually, if they are able to give them, or their proxies or legal representatives.

The Board for PhD Theses and Scientific Degrees proposes the appointment of a committee to evaluate the PhD thesis proposal and to select a mentor to the Faculty Council. The proposed mentor and co-mentor cannot be members of the committees for the evaluation and public discussion of the PhD thesis proposal, nor for the evaluation and defence of the completed PhD thesis.

A PhD thesis proposal is presented at a public discussion. The schedule of public discussions on the PhD thesis proposals is announced on the notice board of the PhD programme and on the School's website. Proposed mentor(s), PhD candidate, members of the expert committee, a representative of the Ethics Committee, members of the Board for PhD Theses and Scientific Degrees and other interested members of the academic community participate in the public discussion. All comments and suggestions made during a public discussion are recorded in the form provided for that purpose (form DR.SC.-02), which also includes the final evaluation report on the PhD thesis proposal. The Committee for the evaluation of the PhD thesis proposal in its report to the Board for PhD Theses and Scientific Degrees proposes either: a) acceptance of the PhD thesis proposal with an explicit statement of the original scientific or artistic contribution achieved, or b) correction of the PhD thesis proposal and the final evaluation, or c) rejection of the PhD thesis proposal.

The report from the public discussion and the evaluation of the PhD thesis proposal (DR.SC.-02 form) as well as the corrected PhD thesis proposal (form DR.SC.-01B) are submitted to the Board for PhD Theses and Scientific Degrees no later than six months after the public discussion. If the report and the corrected PhD thesis proposal are not submitted within the prescribed deadline, the public discussion of the PhD thesis proposal is repeated. Based on the final report from the public discussion (form DR.SC.-02) and the submitted corrected PhD thesis proposal (form DR.SC.-01B), the Board for PhD Theses and Scientific Degrees submits to the Faculty Council a proposal to accept or reject the PhD thesis proposal and to appoint a mentor (and a co-mentor, if necessary).

The Faculty Council must make a statement on the motion by the Committee for the evaluation of the PhD thesis proposal and for proposing a mentor until the enrolment of the PhD candidate in the fifth semester, that is, the third study year.

A.3.8. REQUIREMENTS FOR COMPLETION OF STUDY

The PhD programme is completed by passing all exams, mandatory participation in PhD Days, positively evaluated scientific activity and the preparation and public defence of the PhD thesis. Before submitting the completed PhD thesis, the PhD candidate is obliged to submit the evidence that they have fulfilled all the conditions from the curriculum, which include the following:

- a) that they have accumulated 60 ECTS credits on the basis of their scientific activity during the PhD programme, and
- b) that they are a co-author with the mentor or co-mentor of the PhD thesis of a paper that is published (or has been accepted for publication) and that is related to the PhD thesis, that they are one of the main authors, and that the paper is published in a peer-reviewed scientific journal in the Web of Science (Core Collection) database.

A PhD candidate initiates the process of evaluating the completed PhD thesis by submitting unbound copies of the PhD thesis, digital copy of the PhD thesis, declaration of originality and a written approval and opinion of the mentor on the conducted research and the original scientific contribution achieved, in the School's Registration office with the designation: "For the Board for PhD Theses and Scientific Degrees". If the mentor does not wish to give their approval, the PhD candidate is obliged to inform the Board for PhD Theses and Scientific Degrees about this, who will then send a letter to the mentor that they are to make a written statement with the explanation about it within 15 days. In both cases, the mentor's explanation is provided to the members of the committee for the evaluation of the completed PhD thesis, and they take it into consideration during their evaluation.

On the basis of a motion of the Board for PhD Theses and Scientific Degrees, the Faculty Council appoints a committee for evaluation of the completed PhD thesis, which has three or five members, at least one member of whom cannot teach at the PhD programme or is not an employee of the School, and is preferably an employee of another Croatian or foreign university or related institution. Neither the mentor nor the co-mentor can be a member of the committee for the evaluation of the completed PhD thesis.

The members of the committee for the evaluation of the completed PhD thesis and all others who ex officio (or as associates on the project) have access to the completed PhD thesis are obliged to treat all data and insights from the PhD thesis as confidential until its publication, in order to protect the scientific contribution of the PhD thesis and intellectual property rights.

The committee for the evaluation of the completed PhD thesis is obliged to submit a written and signed report with the evaluation of the PhD thesis within two months from its appointment to the Board for PhD Theses and Scientific Degrees. Each member of the committee has the right to submit a separate opinion and evaluation.

The Committee for the evaluation of the completed PhD thesis may propose in its report:

- a) that the PhD thesis is accepted;
- b) to return the PhD thesis to be corrected and completed and then resubmitted for evaluation within three to six months (depending on the planned scope of the corrections), or
- c) to reject the PhD thesis, after which the PhD candidate loses the right to attain the academic degree of doctor of science in that PhD programme.

Explanation is an obligatory part of the report.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Before submitting the completed PhD thesis, the PhD candidate is obliged to submit the evidence that they have fulfilled all the conditions from the curriculum to the Board for PhD Theses and Scientific Degrees and the Board for Evaluation of Scientific Activity of PhD Candidates, which include the following:

- a) that they have accumulated 60 ECTS credits on the basis of their scientific activity during the PhD programme, and
- b) that they are a co-author with the mentor or co-mentor of the PhD thesis of a paper that is published (or has been accepted for publication) and that is related to the PhD thesis, that they are one of the main authors, and that the paper is published in a peer-reviewed scientific journal in the Web of Science (Core Collection) database.

The committee for the public defence of the completed PhD thesis may have the same members as the committee for the evaluation of the completed PhD thesis, but the Faculty Council is obliged to appoint one substitute member based on the proposal of the Board for PhD Theses and Scientific Degrees.

PhD candidates whose PhD thesis proposal and mentor have been accepted are obliged, no later than five years from the date of acceptance of the PhD thesis proposal, and no earlier than 15 days from the date of the PhD thesis acceptance by the University of Zagreb Senate, to initiate the process of evaluation of the completed PhD thesis. Upon expiry of this deadline, the PhD candidate must regulate their student status and is obliged to initiate the procedure of re-evaluation of the PhD thesis proposal, according to the conditions valid at the time of re-submission of the PhD thesis proposal.

A.3.8.2. Procedure of the public defence of a completed PhD thesis

The defence of the PhD thesis is public. The committee for the public defence of the completed PhD thesis makes the evaluation after the defence. Defence scores can be *rite*, *cum laude*, *magna cum laude* and *summa cum laude*. The score is made by a majority vote of the members of the committee for the public defence of the completed PhD thesis. Public defence of the completed PhD thesis can be held only once.

A.3.8.3. Publishing and storage of a completed PhD thesis

The PhD thesis is published in its entirety on the website of the School's Central Medical Library, no later than one month after the successful completion of the public defence. In exceptional situations, on the basis of a written explanation and with the approval of the Board for PhD Theses and Scientific Degrees, publication on the School's website may be postponed for up to two years.

The hard copy of the PhD thesis is stored in the School's Central Medical Library, the National and University Library and in the archives of the University of Zagreb. The PhD thesis must be published on the public university website of the National and University Library at the latest one month after the defence.

A.3.9. LIST OF REQUIRED AND ELECTIVE COURSES/MODULES, WITH NAMES OF COURSE TEACHERS, NUMBER OF INSTRUCTION HOURS AND APPOINTED ECTS (IF ANY)

REQUIRED COURSES:	COURSE TEACHERS	L	S	P	ECTS
Structure, methodology and functioning of scientific work 1	Assoc. Prof. Ana Borovečki, Prof. Zdravko Lacković, Prof. Jelka Petrak	12	10	6	4.0

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Structure, methodology and functioning of scientific work 2	Prof. Vladimir Trkulja, Assoc. Prof. Donatella Verbanac, Prof. Zdravko Lacković	14	13	11	5.0
Structure, methodology and functioning of scientific work 3: research projects	Assoc. Prof. Fran Borovečki, Prof. Srećko Gajović	3	3	6	2.0
Statistical analysis of medical data 1	Prof. Zdenko Sonicki, Prof. Davor Ivanković	12	6	20	5.0
Medical statistics 2.1: statistical tools for medical data analysis in planned experimental study design	Prof. Mirjana Kujundžić Tiljak	0	4	12	2.0
Medical statistics 2.2: statistical tools for medical data analysis in quasi-experimental study design	Prof. Mirjana Kujundžić Tiljak	0	4	12	2.0
Medical statistics 2.3: statistical tools for medical data analysis in observational study design with large samples	Prof. Zdenko Sonicki, Prof. Davor Ivanković	0	4	12	2.0
Medical statistics 2.4: statistical tools for medical data analysis in observational study design with small samples	Prof. Zdenko Sonicki, Prof. Davor Ivanković	0	4	12	2.0

ELECTIVE COURSES:**BASIC MEDICAL SCIENCE
METHODOLOGY COURSES:**

	COURSE TEACHERS	L	S	P	ECTS
Biochemical methods in biomedical research	Prof. Jasna Lovrić, Assoc. Prof. Dunja Rogić	5	9	21	5.0
Methods of molecular biology in medicine	Prof. Florijana Bulić Jakuš, Prof. Jadranka Sertić	14	5	19	5.0
Genomic approaches in biomedical and translational research	Assoc. Prof. Fran Borovečki	11	5	9	4.0

*L = lectures; S = seminars; P = practical work;

The principal scheme of course enrolment is as follows:

First year: 12 ECTS worth of courses: (**REQUIRED**) Structure, methodology and functioning of scientific work 1 (4 ECTS) + choice of elective methodological courses (8 ECTS in total)

Second year: 12 ECTS worth of courses: (**REQUIRED**) Structure, methodology and functioning of scientific work 2 (5 ECTS) and Statistical analysis of medical data 1 (5 ECTS) + choice of elective methodological and field-oriented courses (2 ECTS in total);

Third year: 12 ECTS worth of courses: (**REQUIRED**) Structure, methodology and functioning of scientific work 3: research projects (2 ECTS) and one of Medical statistics 2 courses, depending on study design (2 ECTS) + choice of elective methodological and field-oriented courses (8 ECTS in total).

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

A.3.10. POSSIBILITY OF IMPLEMENTATION OF THE DOCTORAL STUDY PROGRAMME IN ENGLISH OR SOME OTHER LANGUAGE AND LIST OF COURSES THAT MAY BE OFFERED IN THAT LANGUAGE

PhD programme "Biomedicine and Health Sciences" in English enrolled its first students in the academic year 2007/2008 and was the first such programme in the Republic of Croatia. The requirement for enrolment is foreign citizenship, and the teaching is entirely conducted in English. The courses, structure of the programme and the teaching process are fully equivalent to its Croatian counterpart. There is, however, a difference in the teaching schedule itself. Namely, this program promotes the so-called "sandwich" model of teaching and course attendance. Candidates have an intensive month and a half of courses in each academic year. This allows for shorter absences from their workplace and residence in another country. In addition, candidates can have an additional mentor not affiliated with the School of Medicine in Zagreb, one from their home country. This type of mentoring is encouraged since it facilitates that the candidates conduct at least part of their research, if not all, in their home country. This discourages future brain drain for their countries and enables growth of its research and scientific capacities leading to "brain gain".

According to January 2019 data, a total of 66 applicants from Kosovo, Bosnia and Herzegovina, Canada, Macedonia, Italy and Ukraine enrolled in the programme. Forty-eight of them have finished the courses and are now working on their PhD thesis whose proposals had been successfully accepted. The first graduation ceremony of the two PhD candidates that earned their highest academic title with the completion of the Biomedicine and Health Sciences PhD programme was held on April 1, 2015. So far, 16 students have completed their studies and received the title of Doctor of Science.

There are 48 co-mentors who are foreign nationals. The largest number of those is from Kosovo (18), less from Slovenia (8), the USA (5), Macedonia (3) and Bosnia and Herzegovina, Germany and France (2 comments each). One co-mentor each is from Spain, the Netherlands, Hungary, Belgium, Poland, the Czech Republic, Albania and Canada.

A.3.11. CRITERIA AND REQUIREMENTS FOR ENROLLING IN COURSES/MODULES FROM OTHER DOCTORAL STUDIES

Teaching contents (courses) with final exams at PhD programmes of other medical schools in the Republic of Croatia are as a rule rated in the same way as PhD courses at the School of Medicine, University of Zagreb. However, it is first assessed whether these courses are equivalent to those of this programme. To do this, the candidates must provide course content, course leaders' CVs and other information relevant to the evaluation (similar to the "diploma addendum" in European education terminology).

The same applies to courses taken at PhD programmes of other recognized faculties at home or abroad. In doing so, however, things that are further evaluated are: the enrolment criteria and completion criteria for these programmes, and the inclusion criteria of the course (do courses undergo a review and what kind). Additionally, organized PhD and postdoctoral training with proficiency exams at renowned, non-profit scientific institutes can be also taken into account.

A.3.12. DESCRIPTION OF THE SYSTEM OF ADVISING AND GUIDING DOCTORAL STUDENTS THROUGH THE DOCTORAL STUDY, APPOINTMENT OF STUDY ADVISOR IN THE PROCESS OF ENROLMENT INTO THE DOCTORAL STUDY, AND HIS/HER DUTIES

A three-member study committee is appointed to each PhD candidate enrolled to guide, advise and work with the candidate throughout their studies up to their PhD thesis defence. The study committee consists of the PhD mentor, a head of the department where PhD research is being conducted and one other member of the faculty.

A.3.13. RIGHTS AND OBLIGATIONS OF DOCTORAL STUDENTS, MENTORS AND STUDY PROVIDERS

A.3.13.1. Rights and obligations of PhD candidates

Prior to the enrolment in the first semester of a PhD programme, selected applicants are required to sign a contract on mutual rights and obligations. The contract contains provisions on:

- a) the contracting parties,
- b) PhD candidate's financial obligations,
- c) statements by the PhD candidates and their mentors about the understanding of the commitments they made and their rights and responsibilities during the PhD programme,
- d) the obligations regarding enrolment and completion of the programme, and
- e) other rights and obligations relevant to the completion of the programme.

PhD candidates have the right and obligation to attend all forms of classes, and they are required to attend at least 80% of classes, of which records are kept. The provisions of the Regulations of Graduate Programmes of the School shall be appropriately applied to the questions of attendance, records of classes, taking of examinations and the obligations of PhD candidates.

Upon completion of each study year, PhD candidates are required to certify the year of study. PhD candidates who fail to enrol in the next year of study are required to submit a prescribed form of temporary suspension of studies; otherwise they lose their student status.

A PhD candidate has the right to freely and independently choose a mentor (and a potential co-mentor) for their PhD thesis. A PhD candidate has the right to change the mentor appointed to supervise the accepted PhD thesis proposal once and only for justifiable reasons. A PhD candidate has the right to submit a request to terminate work on the previously accepted PhD thesis proposal once, and to request evaluation and acceptance of a new PhD thesis proposal with the appointment of the same or a new mentor. A PhD candidate may be granted several requests to terminate work on the previously accepted PhD thesis proposal for justified reasons resulting from unforeseen events, extraordinary events and events that could not be prevented, eliminated or avoided.

A PhD candidate is obliged to submit an annual report on their progress to the Council for Postgraduate Programmes. In addition, PhD candidates are required to submit a certificate that in each academic year they spent at least 160 working hours within the laboratory or clinical department or the Referral Centre of the Ministry of Health of the Republic of Croatia or other relevant research dealing with the topic related to the PhD thesis.

A.3.13.1. Rights and obligations of mentors

A person may be appointed as a mentor of the PhD thesis if they are an employee of the School holding a scientific-teaching degree and position or is elected in the title scientific-teaching degree at the School, provided that they are an active researcher in the field for which the PhD thesis is proposed, as evidenced by the simultaneous fulfilment of the following two criteria:

- a) that during the past 5 years they have been a leader of a national or international project or an active contributor to such a project, and

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

- b) have published at least 3 internationally recognized papers relevant to the research of their PhD candidate's PhD thesis (as evidenced by data from the Web of Science, SCI expanded and SSCI) over the past five years.

Professors emerita and full members of the Croatian Academy for Arts and Sciences can be mentors of PhD theses, if they are active leaders of research projects.

In order to ensure the full and comprehensive development and education of PhD candidates, to enhance interdisciplinary research, the quality of research and the mobility of young researchers, and the quality of PhD theses, the School may appoint a co-mentor if necessary.

Prior to taking up the first mentorship, the prospective mentor must attend a workshop for mentors organized by the University, the School or recognized international schools, or co-mentor one PhD thesis. A person may mentor up to five PhD candidates at a time.

The mentor and co-mentor are obliged to supervise the PhD candidate during the preparation of their PhD thesis, to monitor the quality of their PhD thesis, to encourage the publication of their papers and to enable them to participate fully in scientific research projects.

Primary responsibility for publishing papers co-authored by the PhD candidate is the responsibility of the mentor, who is expected to maintain at least average scientific productivity during the writing of PhD thesis, which means publishing at least one paper per year in internationally peer-reviewed journals cited in WoS, SCI expanded and SSCI.

The mentor is obliged to submit annual reports on the PhD candidate's progress to the Council for Postgraduate Programmes.

A.3.13.3. Rights and obligations of the programme provider

The School of Medicine has established working bodies responsible for the realization and quality assurance of the PhD programme in accordance with the approved curriculum.

PhD Programme Coordination Committee consists of a PhD programme director and one or more assistants from the ranks of teaching staff with scientific-teaching titles who actively participate in the organization of the curriculum. A PhD programme director organizes the PhD programme and is responsible for the implementation of the curriculum, proposes a plan for implementation of the curriculum, convenes and chairs the meetings of the course leaders, proposes amendments to the curriculum, submits annual reports on the courses held and performs other tasks in accordance with laws and regulations. Assistants to the PhD programme director participate in the application process and selection of candidates for admission, in the development of the implementation of the curriculum, in the organization and realization of PhD Day, take care of teaching materials and teaching aids, submit reports on the courses held and conduct programme surveys.

The Board for PhD Theses and Scientific Degrees a permanent expert committee of the Faculty Council, which harmonizes the criteria and coordinates the activities in the process of attaining the academic degree of doctor of science from the moment of the registration of the PhD thesis proposal up to the public defence of the completed PhD thesis and the graduation ceremony.

The Board for Evaluation of Postgraduate Programmes is a permanent expert committee of the Council for Postgraduate Programmes, which coordinates activities and harmonizes standards in the process of designing curricula and evaluating postgraduate programmes.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

The Board for Evaluation of Scientific Activity of PhD Candidates is a permanent expert committee of the Council for Postgraduate Programmes, which coordinates the activities and harmonizes the criteria in the process of evaluating the scientific activity of PhD candidates and mentors and evaluates whether the conditions for the public defence of the PhD thesis have been fulfilled.

The Council for Postgraduate Programmes decides on all issues regarding postgraduate programmes within the scope of its jurisdiction, on the basis of proposals from its working bodies (boards). This applies in particular to the harmonization of the quality of the programme curriculum, the analysis and quality assurance of the PhD programme, the determination of the ECTS points according to the curriculum and the evaluation of the scientific activity of PhD candidates during their studies.

A.3.14. COST OF THE STUDY PROGRAMME PER DOCTORAL STUDENT

The sources of funds for the PhD programme are:

- state scholarships (today the Croatian Science Foundation - HRZZ),
- places of employment of PhD candidates (health care institutions, pharmaceutical industry, agencies, etc.),
- PhD candidates themselves (self-financing), and
- School of Medicine's own funds.

Funds raised for the purpose of PhD programme are allocated clearly and in a manner that ensures the maintenance and improvement of PhD education. Since the total costs are paid in part from the revenues of the state budget of the Republic of Croatia, the city and county budgets, the revenues from scientific projects and courses, the total costs are deducted from the costs paid from own revenues (source 31). Tuition revenues are recorded in accordance with the financial rules of the users of the state budget, but refer to the academic year, not the financial year. For this reason, the revenue from the tuition fees of one academic year is transferred to the revenue of another financial year. Accordingly, the costs of a doctoral degree are also charged to two financial years.

The total costs of the School, paid out of own resources, include expenses for spending according to the following basic categories.

Remuneration for work outside the prescribed standard consists of:

- salaries and wages for teaching and non-teaching staff beyond the prescribed standard;
- payment of work wages to external associates through work contracts;
- overtime pay for all employees;
- costs of hiring new employees (agency fees).

Operating cost and other material costs

The total amount of annual operating cost is calculated by using the financial data for source 31 (revenues from own sources) less the amounts of salaries and wages paid from own source revenues.

The School of Medicine systematically allocates funds from tuition and other own resources to cover the **costs related to scientific research** and the preparation of PhD thesis:

- proper disposal of waste (radioactive, infectious, toxic, animal origin, etc.) resulting from research;

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

- training of personnel to handle hazardous materials and devices, obtaining licenses to work with experimental animals and the like;
- procurement of appropriate protective equipment;
- renovation of housing and equipment for experimental animals;
- servicing and maintenance of capital, medium and small lab equipment;
- construction and infrastructure renovation of laboratories;
- procurement of chemicals used by a number of research groups (alcohol, acids, alkalis, formalin, liquid nitrogen, etc.);
- publishing in open access journals, poster design, organization of PhD Day, assistance in attending symposia and congresses and the like.

Costs to third parties relate to:

- the University of Zagreb Development Fund and its components;
- candidate compensation for the Croatian Medical Chamber duties.

The tuition fees for the PhD programme “Biomedicine and Health Sciences” at the School of Medicine are calculated on the basis of the costs of staff, external associates, operating costs of the School, procurement and maintenance of equipment, premises and administrative costs resulting from the overall running of the School.

On the basis of cost parameters, number of candidates per year of PhD programme, number of hours of teaching and engaged teaching and administrative staff, an amount of HRK 70,000.00 to 77,000.00 was determined, which would be sufficient to cover the cost of the programme per candidate. The exact amount, on an annual basis, depends on the number of candidates enrolled, the number and academic rank of teachers hired, and the proportion of the cost of pursuing a PhD degree in the total cost. The exact amount of programme costs in 2017 and 2018 is listed in the table below.

PHD PROGRAMME COSTS		
	2017	2018
Operating expenses		
office material	193,803.50	196,990.92
computers and IT material	261,712.89	298,480.14
promotional services	278,465.15	562,653.18
literature	301,609.14	284,368.30
maintenance (cleaning agents, sanitary fittings and accessories) washing services, freight forwarding	657,024.30	554,165.63
small inventory	98,129.14	64,858.21
clothing	122,334.67	57,807.78
teaching assistants	426,501.50	452,921.95
building and equipment maintenance	2,280,690.43	1,109,401.20
animal care	194,126.40	193,092.84
laboratory supplies and chemicals	319,637.50	221,256.99
pest control, chimney maintenance	17,202.36	20,707.78

<u>total expenditure</u>	17,204,638.19	16,380,058.44
<u>cost per student</u>	77,150.84	70,909.34

Due to the extremely difficult economic situation in recent years, to the strategic need for medical staff and motivating young doctors to continue their scientific education in the Republic of Croatia and to contribute to the development of the medical profession with their expertise and knowledge, the amount of tuition fees for PhD programmes was set at HRK 20,000.00 per year.

A.4. METHODS OF MONITORING QUALITY OF THE DOCTORAL STUDY

A.4.1. LIST OF QUALITY INDICATORS SUCH AS SCIENTIFIC OR ARTISTIC PRODUCTION OF TEACHERS AND DOCTORAL STUDENTS, QUALITY OF INSTRUCTION, RELEVANCE AND QUALITY OF DOCTORAL DISSERTATIONS, STATISTICAL DATA ON DURATION OF STUDY, STATISTICAL DATA ON THE NUMBERS OF NEW HOLDERS OF DOCTORAL DEGREES IN RELATION TO THE NUMBERS OF DOCTORAL STUDENTS ANNUALLY, INTERNATIONAL COOPERATION REALIZED, EMPLOYABILITY OF NEW HOLDERS OF DOCTORAL DEGREES

A.4.1.1. Scientific production of teachers and PhD candidates

The mentor is required to guide the PhD candidate, monitor the quality of their work, encourage the publication of papers and enable full participation in scientific research projects. Therefore, monitoring and evaluating the quality of a mentor's scientific performance is monitored directly and indirectly.

The quality of mentors is directly monitored on the basis of their scientific production. The mentor must have a scientific or scientific-teaching title of at least a research associate or assistant professor and be an active researcher in the field in which the PhD thesis is prepared. This is substantiated in two ways: (1) that the mentor is a leader or associate on an active domestic or international project and (2) that the mentor has previous scientific achievements (publications) in the last five years, or that they have published at least five papers in journals cited in WoS or at least one paper in Quartile 1 (Q1) or Quartile 2 (Q2). Good selection of mentors is shown by data for the 5-year period 2011/2012 - 2015/2016: 685 active and potential mentors (who have the conditions for mentors but did not have a PhD candidate in the last five years) published 10,774 papers (15.7 per mentor), with an average number of citations of these papers 117.6, with an average h-index of these papers 3.7 and an average h-index of mentors 9.5. The data for the last academic year (2017-2018) also clearly show the high productivity of mentors and their PhD candidates (Table 4.1.).

Table 4.1. Indicators of scientific production of mentors for the academic year 2017/2018.

Number of mentors with PhD candidates	Number of mentors whose PhD candidates defended their thesis successfully	Number of published scientific papers by mentors	Number of published scientific papers by mentors in international journals	Number of mentors' publications with their PhD candidates
303	75	834	689	126

Indirectly, the quality of the mentor is also monitored by the quality of scientific work, that is, by scientific activity of PhD candidates. Data on scientific activity and productivity of PhD candidates for the 2011/2012 - 2015/2016 is also satisfactory. Of the 543 PhD students for whom data was collected, 174 completed their studies and received the title of Doctor of Science. During their studies, these PhDs published, on average, 1.33 papers from their PhD thesis, with a citation number of 1234 and an average number of citations of 5.3.

A.4.1.2. Quality of teaching

The quality of teaching and the content of the courses is assessed by a student survey, which has been continuously conducted since the beginning of the programme. PhD Programme Coordination Committee has the right and duty to periodically attend classes. For smaller courses, an anonymous survey is conducted when submitting the exam grade slips to the student office. The students are familiar with the e-mail

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

addresses of the members of the PhD Programme Coordination Committee and the Vice-dean for Postgraduate Programmes, and have the opportunity to express their complaints without any consequences to them. Warranted complaints are reported to the course leaders, with the name of the plaintiff not given without their consent. In order to ensure continuity of the teaching part of the PhD programme, all retired course leaders must have co-leaders, and course leaders who are foreign nationals should, as a rule, have co-leaders resident in the Republic of Croatia (commonly from the University of Zagreb School of Medicine).

According to the annual academic report for the year 2017/2018, PhD candidates of the PhD programme “Biomedicine and Health Sciences” from all three study years (n = 348) evaluated the study with a score of 4.06 (expressed as median). Teachers' quality was rated 4.21, availability of teaching materials (scripts, website, articles, handouts) 4.1, usefulness of teaching materials 4.03, lectures 4.1, seminars 4.07, and practical work 4.06. Graduate study organization rating was 4.03. In general, PhD candidates praised the quality and accessibility of their teachers, interesting presentations and valuable practical knowledge they gained in conducting their own research. There were complaints about occasional unannounced absences of teachers, some lengthy theoretical lectures and lack of teaching materials in some courses.

The concrete suggestions of the PhD candidates for improving the quality of teaching were: to introduce even more practical work, to communicate more clearly with the students, and to explain more clearly what is expected in the exams from individual PhD courses.

A.4.1.3. Relevance and quality of PhD theses

The quality of the PhD theses is reflected in the quality and number of scientific publications resulting from the research during the PhD programme. Data on scientific productivity of PhD candidates in 2011/2012 - 2015/2016 speak in favour of satisfactory scientific productivity. Out of the total number of PhD candidates who graduated and/or were still studying during this period, data was collected for 58.5% of PhD candidates. The number of papers resulting from the narrow topic of their PhD thesis was 362, with a citation number of 1534 and an average number of citations of 2.83. It should be borne in mind that some doctoral candidates had only just their PhD thesis proposals accepted. For those who completed the programme during this period and received the title Doctor of Science (n=174), data shows that they, on average, published 231 papers in the narrower topic of the thesis, on average 1.33, with the number of citations 1234 and the average number of citations 5.3.

A.4.1.4. Statistical indicators of study duration

The median of the duration of studies from enrolment to drafting and defending a PhD thesis for students who have completed their doctoral studies and received their PhD in 2009/2010 was 7.0 years and in 2017/2018 it was 7.74 years. Compared to the developed EU member states, which have a full-time PhD duration of 3 - 4 years, this is still a rather long period. This is understandable, however, since our PhD candidates are largely part-time clinicians and therefore study duration is longer than in developed EU member states. Specifically, a number of part-time PhD candidates take study leave because of other obligations (specialization, scholarships, maternity leave, etc.), which negatively affect the statistical indicators of the duration of studies.

A.4.1.5. Statistical indicators of the annual number of new PhDs in relation to the number of PhD candidates

According to the indicators of the last analysis for the academic year 2017/2018, there were a total of 210 students enrolled in all academic years, not counting PhD candidates who had taken classes

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

and were in the process of writing their PhD thesis. Most students (almost 95%) enrolled in part-time study, and only 5% of students studied full-time. 64 students enrolled in the first year of study, and in the same year 65 PhD candidates defended their PhD thesis. So, in 2017/2018, more doctoral students defended their PhD thesis than were enrolled in the same academic year.

A.4.1.6. International collaboration

The international collaboration of the School of Medicine reflects the dynamic process of internationalization in the field of higher education. Internationalization of the School is one of the proactive strategies of change and improvement of academic life and work in the specific conditions of educational and professional scientific work in the field of biomedicine and health sciences.

The School is active in the following areas of its strategic orientation and level of development of international collaboration and international relations:

- development of PhD programmes in accordance with the Bologna Process, and in particular in accordance with international documents in the field;
- affirmation of ECTS credit system as a unique form of quantification and evaluation of teaching and student workload;
- increasing the number of exchange students and strengthening the intercultural and educational component through European mobility programs, bilateral inter-faculty and inter-university agreements and the organization of thematic summer schools;
- increasing the number of teachers in exchange and as well as their more active participation in longer study visits, scientific and professional fellowships;
- increasing the competitiveness of scientists from the medical field in the area of project applications for the European Union (Seventh Framework Program and Horizon 2020) and maintaining the continuity of international scientific, infrastructural and organizational projects initiated;
- stronger participation, especially by junior researchers, in Marie Curie fellowship programs that encourage the mobility of scientists and researchers at foreign Incoming/Outgoing International Fellowships;
- defining areas of scientific excellence with the aim to integrate Croatian biomedical orientation institutions more effectively into the European Research Area (ERA);
- expansion of the Office for International Relations as a place of coordination and systematic monitoring of all forms of international action and a centre that generates monitoring mechanisms within the quality improvement system in the field of internationalization;
- maintaining the current level and enhancing ongoing cooperation with the central Office for International Relations at the University of Zagreb, with even greater coordination in the exchange of information on international programs and initiatives.

At the international level, the School as an institution, its organizational units, departments and individuals, foster collaboration with domestic and international institutions in the field of biomedicine and health sciences. This kind of cooperation takes place through bilateral inter-faculty and inter-university agreements, participation in the work of academic networks and organizations, and participation in scientific meetings and their organization.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Table 4.2. Review of the International Collaboration of the School of Medicine

Bilateral university agreements	University of Vienna, the Medical University of Graz, Bratislava University, the University of Hamburg, the University of Toronto, the University of Thessalonica, the University of Padua
Bilateral faculty agreements	Schools of Medicine: Graz, Pecs, Timisoara, the Russian State Medical University, Moscow, Hamburg, Ljubljana, Mostar, Skopje, Tetovo, Tuzla, Podgorica, Prishtina, Tirana, Ecole Nationale de la Santé Publique - Rennes, South Carelia Polytechnic Finland, Kent, McGill, University of Michigan Medical School, University of California San Francisco, University of Northern Colorado, University of Georgia College of Medicine, Medical College of South Carolina, Medical College of Wisconsin, Penn State University
Regional initiatives	Cooperation on harmonisation of medical curricula in South-East Europe organized by the German Rectors' Conference and coordination of the School of Medicine in Hamburg; the Medical Competence Network of SEE Medical Schools (coordinator: The Medical University in Graz) Multilateral agreements: ETC-PHHP (European Training Consortium in Public Health and Health Promotion – cooperation with 10 universities in the European Union) and PH-SEE (Public Health in South Eastern Europe – cooperation with 16 universities in South and South-East Europe); South East Europe Workplace Academy (SEEWA)
TEMPUS programmes	Universities in Ghent, Pécs, Vienna, Hamburg, Maribor, Osijek, Split and Prishtina
Participation in international and regional associations and programmes	Association of Medical Schools of Europe (AMSE), International Association for Medical Education (AMEE), The European Training Consortium in Public Health & Health Promotion, Association of Schools of Public Health in the European Region (ASPHER), European Public Health Association (EUPHA), Forum for Public Health in South-East Europe, Organization for PhD Education for Biomedicine & Health in European System (ORPHEUS), European University Association (EUA)
Joint BA/MA or PhD programmes	PhD programme in the field of biomedicine and health sciences with the University of Ljubljana, Master programme Leadership and Management in Health Sciences, postgraduate programme in ultrasound diagnostics in gynaecology with Hamad Medical Corporation Qatar
Summer schools	Federation of European Neuroscience Societies Summer School, Motovun International Summer School of Public Health, European Medical Students Association (EMSA) Summer School in Emergency Medicine Dubrovnik
Professional courses	International courses in cardiology, diabetology, neurology, ENT, occupational medicine and other areas of medicine, and courses run by the European Molecular Biology Organization (EMBO), courses within the longitudinal studies Basic Medical Skills organized according to the European Resuscitation Council
Scholarships for mobility of students and teaching staff	Lions Club Austria: Medical Students Beyond Frontiers, Katolische Kliniken in Kleve Kreis scholarships, Josip Matovinovic Clinical Fellowship, University of Michigan Medical School, Ann Arbor, Michigan

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

FP6 programmes	<i>Diagnosis of acute HCV infection</i> <i>Genome-based therapeutic drugs for depression</i> <i>Eating-out habits</i> <i>European Leukemianet</i> <i>Congenital disorders of glycosylation</i>
FP7 programmes	<i>See Annex: International Projects</i>
COST action	<i>See Annex: International Projects</i>
Other international research programmes	National Institute of Health: Fogarty International Research Collaboration Award: Endemic Nephropathy (State University of New York), DAAD collaborative project: <i>Experimental models of Alzheimer's disease and cerebral diabetes related disorders</i> DAAD PhD scholarship: <i>Brian insulin system alterations in probable experimental models of sporadic Alzheimer's disease</i>

In the context of international educational and scientific projects and programs, the Office for International Relations plays an important role. The Office exchanges information and coordinates affairs with the School's Centre for Translational and Clinical Research, which is primarily responsible for disseminating information on international projects and reporting them. The Office for International Relations also systematically provides information on opportunities, encourages and facilitates mobility of PhD candidates.

The School is in agreement with the European Charter and the Code for Researchers and implements its principles and charters. Understanding of the Charter and the Code is a compulsory part of curriculum for PhD candidates.

Institutional support for PhD candidates to participate in international scientific conferences is described in Chapter 3. Each year, the best PhD candidates at PhD Day participate in the International Doctoral Competition in Prague.

All PhD theses in the PhD programme in English are written in English. PhD candidates in the PhD programme in Croatian also have this opportunity, if they have a foreign co-mentor.

PhD candidates can write their PhD theses using the Scandinavian model, in accordance with the provisions of the Regulations on PhD Programmes of the University and the School.

The School has a number of international collaboration agreements which include joint scientific-research and exchange of teachers and PhD candidates. Examples of selected international agreements are:

- Collaboration Agreement between the School of Medicine and the University of Ljubljana, Slovenia,
- Collaboration Agreement between the School of Medicine and the University of Pecs, Hungary,
- Collaboration Agreement between the School of Medicine and the Medical College of Wisconsin, Milwaukee, USA,

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

- Collaboration Agreement between the School of Medicine and the University of California, San Francisco, USA,
- Collaboration Agreement between the School of Medicine and the University of Georgia College of Public Health, USA.

A.4.1.7. Employability of Doctors of Science

The contextual framework, primarily the economic situation in the Republic of Croatia, affects the low funding of approved projects of scientifically productive leading researchers, which in turn makes it difficult to recruit an adequate number of young researchers on top-rated projects. This also affects the lack of funds to procure equipment and conduct research. There are also insufficient initiatives to send postdoctoral fellows to compulsory residency at internationally respected institutions.

The described situation also affects the employment of young scientists at the School. The School of Medicine, as a responsible scientific institution, is committed to recruitment of young scientists, stimulating interest in research and stay in Croatia, and the return of Croatian scientists from abroad. This is a prerequisite for improving scientific work in biomedicine, which can influence the better position of science and universities in society and contribute to improving Croatia's competitiveness.

Most PhD candidates are employed in healthcare full-time, which prevents them from studying full-time. This challenge can only be resolved by common agreement between the governing ministries responsible for science, higher education and health and subsequent changes in legislation. This would strengthen the high level of research collaboration between basic biomedical sciences and clinical research departments.

PhD candidates find employment in the healthcare system, in the scientific and academic sphere, at the University and the School of Medicine, in the pharmaceutical and biotechnology industry, in government agencies and bodies whose activities are in the field of health, biomedicine, science and technology.

A.4.2. DESCRIPTION OF THE METHOD OF PARTICIPATION BY DOCTORAL STUDENTS IN PROCEDURES OF EVALUATION OF THE PROGRAMME OF THE DOCTORAL STUDY

The mechanisms for quality control and monitoring of the PhD programme and mentoring are at the level of the University of Zagreb and at the School level. At the University level, PhD students are required to submit an Annual Doctoral Progress Report (university form DR.SC-04) each academic year, in which the PhD student evaluates not only the programme and teachers in the previous year but also the mentor. At the School level, an additional form of PhD programme evaluation has been established, consisting of exit surveys for completed PhDs. This survey is being conducted from the academic year 2018/2019.

A.4.3. PROCEDURES FOR MONITORING AND IMPROVING THE QUALITY OF THE DOCTORAL STUDY PROGRAMME, AS WELL AS FOR MONITORING OF SUCCESS IN IMPLEMENTATION OF THE DOCTORAL STUDY (PROCEDURES OF EVALUATION AND SELF-EVALUATION – ANNUAL SELF-EVALUATION OF THE STUDY PROGRAMME, ANNUAL SELF-EVALUATION OF DOCTORAL STUDENTS, REVISION AND IMPROVEMENT OF THE DOCTORAL STUDY IN ACCORDANCE WITH QUALITY MONITORING RESULTS AND RESULTS OF SELF-EVALUATION OF THE PARTICIPANTS IN THE DOCTORAL PROGRAMME)**PROCEDURES FOR EVALUATION AND SELF-EVALUATION**

In order to establish and implement a quality system, the Faculty has selected a model based on the Standards and Guidelines for Quality Assurance in the European Higher Education Area (ESG).

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

The bodies responsible for ensuring the quality system at the leadership and decision-making levels are the Dean, the Dean's Council and the Faculty Council. The bodies responsible for ensuring the quality system at the advisory level are the Boards and Committees of the School. Management and responsibility for quality assurance at the executive and performance levels is put on the heads of departments, course councils, programme coordinators and heads of the School's administrative and professional services. The Quality Promotion Committee is a special body of the School and its members are representatives of internal and external stakeholders. The responsibilities and tasks of the Committee include an advisory role and coordination in promoting the quality culture and quality assurance of the School, in collaboration with the Higher Education Agency, the Board and the Office of Quality of the University of Zagreb and international partners.

Several international and external evaluation processes have been carried out at the School of Medicine in recent years, which have included the evaluation of the PhD programme “Biomedicine and Health Sciences” as well:

- The "Peer" mission of the European Commission visited the School in 2007 as part of the negotiations for Croatia's accession to the European Union and in 2012 as part of monitoring Croatia before joining. Both missions evaluated all levels of education: graduate, postgraduate and specialist training.
- The National Council for Higher Education had initiated the School's external evaluation process at the end of 2008 and, on the basis of the Final Report, the School received a work permit in early 2009. The Final Report states the following (citation): “The evaluation of the School of Medicine at the University of Zagreb has shown that this higher education institution meets all the requirements and standards in the educational, scientific and professional field. The School of Medicine is a well-organized institution that is constantly improving its teaching activity, raising the quality of its programmes and investing in its scientific recognition.”
- Following the decision of the Agency for Science and Higher Education from 2011, the School of Medicine was selected as one of the three faculties of the University of Zagreb, where an internal and external evaluation of the quality assurance system was carried out according to the ESG guidelines. Based on the final report, in 2013, the School received the Agency's certificate for an efficient, developed and functionally organized quality assurance system.
- The re-accreditation process of the School of Medicine was conducted in 2015. The Final Report states: “Each study program is defined in accordance with clearly defined learning outcomes and international standards. The institution of higher education has established mechanisms for approving, monitoring and improving its programs and qualifications. Rating: Fully implemented.”

According to the Regulations on PhD Programmes of the School of Medicine, the Council for Postgraduate Programmes, and its Board for Evaluation of Postgraduate Programmes are responsible for coordinating and harmonizing benchmarks in the postgraduate programme design and evaluation process. The Council and its boards keep records and oversee the PhD research activities and other study responsibilities of PhD candidates, assisted by the Board for PhD Theses and Scientific Degrees. In addition, the Council, with the assistance and support of the Board for PhD Theses and Scientific Degrees, monitors the mentors' workload and performance. The monitoring criteria include the scientific production of teachers and PhD candidates, the relevance and quality of PhD programmes, indicators of study duration, the annual number of new PhDs in relation to the number of PhD candidates and the achieved international collaboration.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

The Faculty has several mechanisms for continuous and periodic quality monitoring and assessment of the PhD programme.

Annual report of mentors and PhD candidates

In accordance to the decision of the Faculty Council of the School of Medicine of 24 September, 2013, and the Regulations on PhD Programmes, University of Zagreb, submission of annual reports on the work of mentors and PhD candidates is a condition for enrolment in the subsequent year of the PhD programme.

The PhD candidates submit the report on the work through the online database of PhD candidates - OBAD to the University of Zagreb, at: <http://doktorski.unizg.hr/obad> via the form DR.SC.-04.

The mentors submit their work report via the form DR.SC.-05, but not through OBAD. The mentor submits the signed report in writing to the Department for Postgraduate Programmes prior to enrolment in the next year.

Assessment of the PhD candidate's scientific activity

During the programme, candidates are required to accumulate a certain number of ECTS points related to their scientific activity. From the academic year 2016/2017 a new on-line scoring system was introduced in which students input their publications and track their scientific activities, and PhD Programme Coordination Committee oversees and evaluates their scientific activity through this system. Between October 2017 and February 2019, the scientific activity of 94 PhD candidates was evaluated, 9 of which were evaluated negatively.

School survey on teaching quality

After each course, the quality evaluation is conducted electronically through the survey available at <https://tinyurl.com/y7agh69x>. This internal anonymous and voluntary survey is conducted sporadically, and the results show that PhD candidates rate teachers' quality and teaching performance very highly (described previously). At the end of the academic year, the results are communicated to the leaders of each individual course as well as to the members of the PhD Programme Coordination Committee.

Exit Survey

Evaluation of the entire programme based on an exit survey (attachment 2.3) is being conducted electronically for the purpose of the PhD programme evaluation from the academic year 2018/2019.

PhD Day

Since 2012, the School of Medicine in Zagreb has been organizing a PhD Day every year as a compulsory part of the PhD Programme Biomedicine and Health Sciences. The aim of this event is to adapt the programme to European standards as much as possible. The purpose of holding a day like this is to improve the accessibility of the public to PhD programmes, facilitate and encourage the exchange of research experiences of PhD candidates and mentors, and insight into the quality of work of PhD candidates for all interested parties. The gathering is attended by representatives of the University of Zagreb Rectorate, guests from other faculties and universities, and sometimes by distinguished representatives of the Croatian Academy of Sciences and Arts and the Ministry of Science and Education.

It is a one-day public presentation of preliminary research results within PhD theses of the second and third year of study in the form of displayed poster presentations and abstracts published in a special publication. In addition, the programme coordinators select some of the best abstracts for oral presentation. Preparation and participation in the PhD Day grants 4 ECTS credits to each active participant. It is also an excellent opportunity to evaluate research activity of the programme and an occasion to evaluate the

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

quality of the programme itself. At the same time, it is also a transferable skills workshop: poster design, presentation and public defence of work in front of colleagues, teachers and guests as well as overview and analysis of peer research.

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 30

OUTLINE OF COURSE/MODULE CONTENT

Technical and clinical aspects of use of computers in medical diagnosis. Fields in which computers contributed to the extraction of quantitative and qualitative data from the imaging patient studies and enabled extraction of information about physiological and metabolic processes. Pathophysiological and pharmacological foundation, instrumentation, i.e. systems for acquisition of image and other relevant data and quality control. Presentation of acquisition protocols and image and data analysis. Algorithms for reconstruction, analysis and data enhancement, i.e. images, as well as clinical results obtained by these procedures. Criteria that differentiate normal from pathological findings, possible problems and mistakes during image and data interpretation. Fields of use: 2d static and dynamic scintigraphy of various organs of human body. ECG synchronized cardiac studies. Digital image filtration methods. Functional and parametric images. Computerized transmission (CT) tomography and emission tomography (SPECT). Principles and methods of nuclear magnetic resonance imaging. Measurement of whole body radioactivity as well as analysis of these data as pertained to internal dosimetry and radiation protection. Computer techniques in medical and accidental dosimetry. Computer analysis of complex energy spectra – gamma spectroscopy. Methods for radionuclide blood flow measurement. Radiology data analysis. Computers in radiotherapy. Osteodensitometry. Computer analysis in cytology. Digital analysis of echograms. Quality control of instrumentation, of diagnostic procedures and software packages. Inter-laboratory quality control.

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 35

OUTLINE OF COURSE/MODULE CONTENT

The goal of the course is to teach student about the application and possibilities of analytical methods used in biomedical research (methods of chromatography, mass spectrometry, electrophoretic methods, enzyme immunoassay, protein and lipoprotein phenotyping, immunoblot, cancer cytogenetics, application of proteomics in biomedicine) as well as the ways of scientific evaluation in biochemical and molecular research. Knowledge gained on the course will help students in the selection of appropriate methods for doctoral thesis as well as to critically follow the literature in biochemistry and clinical chemistry. The aim is to introduce to students the possibilities of contemporary medical biochemistry laboratory - from the blood test to molecular diagnostics as well as its application in translational research.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER: 3

TITLE OF COURSE/MODULE: Disorders of adrenal gland

STATUS OF COURSE/MODULE (REQUIRED/ELECTIVE): elective

NAME OF COURSE/MODULE TEACHER: Associate Professor Darko Kaštelan, MD, PhD

NAMES OF COURSE/MODULE TEACHER/ASSOCIATE TEACHER:

Tina Dušek

Darko Kaštelan

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 15

OUTLINE OF COURSE/MODULE CONTENT

The course covers basic knowledge about hormonal tests for diagnosing adrenal gland disorders, adrenal tumors including adrenocortical carcinoma, hypertension caused by oversecretion of adrenal gland hormones, congenital adrenal hyperplasia and adrenal insufficiency. Furthermore, special attention will be paid on adrenal incidentalomas as improvements in imaging techniques and advances in their availability increased detection of these tumors in the population making their management an extremely important aspect of health care. Within the practical work sessions students will be encouraged to discuss diagnostic and treatment plan for selected patients with adrenal gland disorders.

TITLE OF COURSE/MODULE: Gene targeting in mammals

STATUS OF COURSE/MODULE (REQUIRED/ELECTIVE): elective

NAME OF COURSE/MODULE TEACHER: Prof. Srećko Gajović, MD, PhD

NAMES OF COURSE/MODULE TEACHER/ASSOCIATE TEACHER:

Marija Ćurlin

Srećko Gajović

Dinko Mitrečić

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 10

OUTLINE OF COURSE/MODULE CONTENT

Introduction in analysis of gene function by gene targeting in mouse. Knock-out, gene trap and embryonic stem cell culture methodologies. Their application in human genetics and medicine. Genetically modified mouse. Gene analysis in mammals. What is transgenic mouse and what is knock-out. Analysis of mouse mutants: phenotype changes correspond to gene function. Mouse mutants as a model for human disease. Embryonic stem (ES) cells. A survey of early embryogenesis. Isolation of ES cells. ES cell culture. Genetical modifications of ES cells. From ES cells to mutated mouse. Blastocyste injection. Morula aggregation. Analysis of mouse chimeras. Organization of mouse colonies. Mouse breeding. Isolation of mouse blastocysts. Knock-out and its variants: exon-specific knock-out, conditional knock-out. Experimental strategy of knock-out. DNA vector construction. Selection of ES cell clones carrying the desired genetical modification. Gene trap – a search for new genes. Experimental strategy of gene trap. Isolation and staining of 11.5-day mouse embryos or isolation of malformed mouse embryos.

TITLE OF COURSE/MODULE: Experimental oncology: malignant diseases as persistent oxidative stress

STATUS OF COURSE/MODULE (REQUIRED/ELECTIVE): elective

NAME OF COURSE/MODULE TEACHER: Prof. Neven Zarkovic, PhD, research advisor

NAMES OF COURSE/MODULE TEACHER/ASSOCIATE TEACHER: Neven Žarković

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 20

OUTLINE OF COURSE/MODULE CONTENT

Basic research in oncology, relevance and applicability. Experimental carcinogenesis - basic terms and principles of in vitro and in vivo models. The role of iron in cell growth control and carcinogenesis. UV-irradiation. Molecular basis of malignant transformation, the roles of (proto)oncogenes, suppressor genes and regulatory cytokines - similarities and differences of signal transduction between normal and malignant cells. Oxidative stress in carcinogenesis, diagnostics and therapy of cancer - growth modulation by the lipid peroxidation products with special attention given to the role of "second messengers of free radicals" such as 4-hydroxynonenal (HNE). Malignant diseases as systemic disorders, metabolic changes caused by cancer. Inflammation and cancer, possible roles of granulocytes in carcinogenesis and defense against cancer. Interactions between regenerating tissue and tumors, induction of tumor cells differentiation, phenomenon of reversion and spontaneous regression of cancer. Yeast as a model for the animal cell growth regulation under stress. Alternative and complementary approaches to cancer therapy. New diagnostic and therapeutic possibilities in oncology. Preparation of active form of 4-hydroxynonenal (HNE), mediator of oxidative stress and its' toxic effects in vitro.

OUTLINE OF COURSE/MODULE CONTENT

Lectures: Neuroendocrine tumors of the digestive system and pancreas (GEP-NET). Differential diagnosis of hypoglycemic conditions and diarrhea. Biology GEP-NETs. Genetics of neuroendocrine tumors of the gastrointestinal tract and pancreas-personalized medicine in oncology. Classification of GEP-NETs. Diagnostic methods in GEP-NETs- application of radionuclides in the diagnosis of neuroendocrine tumors. Treatment options for symptomatic GEP-NETs. Treatment options for non-functional GEP-NETs. In the two sessions working in a small group discussed will be cases from clinical practice. Suggested topics will change over time, and it will be possible, with respect to group's special interest to include a topic of choice. Participants will be given a specific literature when discussing the cases. The course will end with journal club reflecting the controversies in the diagnosis and treatment of GEP-NETs.

OUTLINE OF COURSE/MODULE CONTENT

Introduction to epidemiology and its application in public health, clinical work, pharmacological research, as well as the understanding of evidence-based medicine. The general epidemiological principles. Epidemiology and natural history of disease. Epidemiological concept in medicine. Epidemiological variables. Scientific epidemiological terminology. The incidence and prevalence of the disease. Measures of the frequency and extent-general, specific, standardized. Meaning, value and accuracy of incidence and prevalence measures. Using the incidence and prevalence measures. Related behavior and statistical, causal, connection criteria, measures of connectivity. The concept of risk and causation. The absolute, relative and attributable risk, the OR-odds ratio. Descriptive and analytical epidemiological methods: a description of the case, the description of the series (lower) cases, the incidence and prevalence studies, prospective and retrospective studies, transversal and longitudinal studies, "case-control" and cohort studies. Experimental methods-randomized controlled clinical trial, controlled field experiments. A systematic literature review and meta-analysis. Selecting an appropriate study design. Errors, sources of error (random, systematic bias, confounding). Survey of epidemiological studies and methods for improving security response. Sources of public health data for epidemiological research and work in public health institutions. The use of registries and other sources of epidemiological, public health data bases, and other data related to health. Analysis and explanation of study results and decision making. Strategies to solve complex problems. Diagnostic tests and timely diagnosis. The early diagnosis. Interpretation of diagnostic data. Early treatment and compliance of patients. Methods of ensuring the population responds to a mass screening procedure or research. Ethical issues in research and the use of public health and personal medical information, informed consent, ways of informing.

OUTLINE OF COURSE/MODULE CONTENT

Molecular biology and information flow in the cell, organization of the eucaryotic genome. Organization and importance of the heterochromatin and euchromatin. Chromatin and transcription. Coding and noncoding sequences of the human genome. Regulation of gene expression in procaryotes and eucaryotes. Epigenetics - epigenome. Epigenetic mechanisms (DNA methylation, histone modifications, mi RNA), environmental influences, nutritional and environmental effects in early life. Methylome, DNA methylation in genomic imprinting, embryonic growth control by imprinted genes, disorders of genomic imprinting, Prader-Willi and Angelman syndrom. DNA methylation and X inactivation, aging, cancer. Germ cell epigenetics, influence of epigenetics on assisted reproduction. Epigenetics of stem cells, IPS cells. Gene expression regulation at the level of RNA, mechanisms of posttranscriptional editing of RNA, miRNA, RNAi. The role of epigenetics in tumorigenesis and the overview of the future epigenetics in oncology. DNA methylation in normal and cancer cells, hypermethylation and hypomethylation in cancer, interaction of genetic and epigenetic mechanisms in cancer. Nutritional and environmental effects upon epigenome during development and in adult organism. Epigenetics of cardiovascular and other system diseases. Neurodegenerative diseases and epigenetics, epigenetic role of the diet in neurodegenerative diseases. Epigenetic biomarkers in neurodegenerative diseases. Demethylating agents in treatment of malignancies. Methylation identification methods of the specific genes, overview of pyrosequencing method, finding primers, bisulfite conversion, performing MS PCR.

OUTLINE OF COURSE/MODULE CONTENT

Pharmacogenetics - pharmacogenomics; Polymorphism of metabolic enzymes phase I. - cytochrome P450 (CYP) and their role in the variability of pharmacokinetic parameters, the effectiveness and side effects: drugs with a narrow therapeutic window (CYP2C9, CYP2C19 , CYP2D6) . The metabolic phenotype and therapeutic drug monitoring - optimization of therapy: efficacy and toxicity of the drug. The individualization of therapy according to genotype: choosing the right drug and dose; Estimation of drug-drug interactions according to pharmacogenetic polymorphisms; The activation of prodrug: CYP2D6 and side effects of codeine / morphine, CYP2C19 and clopidogrel, interaction with proton pump inhibitors. Polymorphism of metabolic enzymes of phase II. (NAT2, TPMT, UGT, SULT); Pharmacogenomics in oncology: CYP2D6 and tamoxifen, DYPD and toxicity of 5-FU, irinotecan and UGT1A1; TPMT and thiopurine drugs, inhibitors of tyrosine kinase, the B-RAF, K-ras as predictors of efficiency. The role of the genetic variability of the ABC and SLC transporter proteins in the pathogenesis and the effectiveness of pharmacotherapies: ABC transporters and variability of pharmacokinetic / efficacy / side effect (e.g., methotrexate, tyrosine kinase inhibitor). The polymorphism of the serotonin transporter and efficacy / side-effects of serotonin reuptake inhibitors. Polymorphisms of dopamine and serotonin receptors and variability of therapy with psychotropic medication; The pharmacogenetics of coumarin anticoagulants: the importance of polymorphism of CYP2C9 and VKORC1; The pharmacogenetics of statins: polymorphisms of SLCO1A1, ABCG2 and side effects (myotoxicity-rhabdomyolysis/ hepatotoxicity); Pharmacogenetics of antihypertensives: polymorphism of the renin-angiotensin system (ACE, AT1R); Hypersensitivity reactions and HLA system. Pharmacogenetics and interactions: examples of interactions with immunosuppressive agents, psychotropic drugs, antiepileptics; Pharmacogenetics and pharmacovigilance; Pharmacogenetics as a molecular autopsy; Interpretation of pharmacogenetic analyses; Critical analysis of scientific articles in the field of pharmacogenetics, and adverse drug reactions (journal club).

OUTLINE OF COURSE/MODULE CONTENT

Significant advances in the genomic field, achieved since the end of the Human Genome Project and complete decoding of the human genome, provided unprecedented insight into intricate mechanisms involved in genome regulation. Achievement and widespread use of advanced genomic technologies, such as sequencing of the new generation, which has led to increased use of new discoveries in the clinical environment. The advancement of new methods for fast sequencing of the long genome will facilitate the spread of genomic research and will introduce a new spectrum of affordable and fast genomic aberration analysis to a wide range of scientists. During the basic concepts relating to the human genome, the application of modern genomic methodology, as well as basic concepts of bioinformatics will be covered. Special emphasis will be given to the use of various genomic tools ranging from SNP analysis, profiling expression, epigenetics, copying variance number analysis, next generation sequencing, and new DNA sequencing methods. Practical work will include demonstrations and limited individual laboratory work in genomic contents, with emphasis on microarray and sequencing of the new generation, as well as clarification of basic bioinformatics methods in genomic research.

TITLE OF COURSE/MODULE: Genotoxicological research of exposure to physical and chemical mutagens in working and living environment

STATUS OF COURSE/MODULE (REQUIRED/ELECTIVE): elective

NAME OF COURSE/MODULE TEACHER: Aleksandra Fučić, MD, PhD, research advisor

NAMES OF COURSE/MODULE TEACHER/ASSOCIATE TEACHER: Aleksandra Fučić

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 12

OUTLINE OF COURSE/MODULE CONTENT

Basic knowledge of effects of ionizing and non-ionizing radiation on mammalian genome. Definition of chemical mutagens according to their chemical composition and effect on the genome. Clastogens and aneugens. Methods in genotoxicology: chromosomal aberrations and in situ hybridization, in vivo and in vitro micronucleus assay, comet assay. Biodosimetry. Genotoxicological methods in assessing of the cancer risk. Application of genotoxicology in case of nuclear or chemical accidents. The interaction of physical and chemical mutagens. The phenomenon of synergism. The influence of age and sex on genome damage caused by living environment (radon, indoor emissions from building materials) and living style. Exposure to physical and chemical mutagens in the workplace. Examples of the results of biomonitoring of workers exposed to chemical mutagens such as a vinyl chloride monomer, radioisotopes and antineoplastic drugs. The interindividual difference in response to the action of mutagens. Genomic instability as a result of ionizing radiation. Developmental genotoxicology. The impact of xenoestrogens on genome damage. Genotoxicological research in future. Closing seminar: critical analysis of a scientific paper related to the course content ("journal club").

Alan Šućur

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 16

OUTLINE OF COURSE/MODULE CONTENT

Definition, general properties and mechanisms of action of cytokines and chemokines. Division and biological effects of immunocytokines. Receptors for cytokines and intracellular transmission of signals. Control of cytokines' secretion by transcription factors. The methods of determination of concentration of cytokines in cells and body fluids. Basic structure and function of chemokines. The synthesis, secretion and biological effects of inflammatory cytokines (IL-1, TNF-alpha, IL-6) and chemokines. The synthesis, secretion and biological effects of immunostimulatory cytokines (IL-2, IL-4, IL-12, IFN-gamma). The synthesis, secretion and biological effects of immunoregulatory (suppressive) cytokines (TGF-beta, IL-10). Subsets of Th cells (Th1, Th2, Th3, Tr1, Th9, Th17, Th22) and transcription factors important for Th-differentiation and polarization. Inhibitors of function of cytokines (anti-immunocytokines). Role of immunocytokines in pathogenic mechanisms and potential use of cytokines or their antagonists of treatment of sepsis, autoimmune, autoinflammatory and other diseases. Practicals: students will acquire the necessary knowledge of methods we use to measure cytokines (ELISA, flow cytometry, PCR, cytokine bead array), including their advantages and disadvantages. Journal club/seminar: analysis of cutting edge scientific paper published in high-ranked biomedical journal describing significant advances in an area of immunocytokines.

READING LIST (MANDATORY AND RECOMMENDED)

OUTLINE OF COURSE/MODULE CONTENT

Basics knowledge in immunology enabling critical judgment of the role of immune system, especially understanding the complex interactions within the components of the immune system. General organization of the immune system. The principles of immunological recognition and immune response. The HLA system and immunogenetics. Development of lymphocytes and lymphocyte repertoire. Cytokines and chemokines. Processing and presentation of antigens. Lymphocyte activation and signalling. Effector mechanisms of immune response: humoral and cellular immunity, immunological memory. Artificial antigen receptors. Critical evaluation of scientific literature in immunology and critical application of immunological expertise to specific problems in basic and clinical immunology (journal club).

NUMBER OF INSTRUCTION HOURS: 18

OUTLINE OF COURSE/MODULE CONTENT

Epidemiological and other characteristics of biomaterial infections. Etiology and pathogenesis of biofilm infections. Formation and maturation of a bacterial biofilm. Biofilm ultrastructure. Genes involved in biofilm development. The involvement of cell-to-cell signals in the development of a bacterial biofilm. Quorum sensing in Gram-positive and Gram-negative bacteria. Interspecies bacterial interactions in biofilms. Resistance to the host immune system. Biofilm resistance to antimicrobial agents. Physical antiadhesive properties of biomaterials. Biocompatible biomaterials: current status and future perspectives. Biofilm infections: ventilator-associated pneumonia, urinary and peritoneal dialysis catheter infections, bacterial keratitis, otitis media, burn and wound infections, osteomyelitis. Biofilm on medical devices: prosthetic heart valves, central venous catheters, urinary catheters, contact lenses, intrauterine devices, endoprostheses, wound closure biomaterials and devices, etc. Diagnostic methods in detection of biomaterial infections. Prevention of biomaterial infections. Therapeutic challenges and new approaches. New technology for rapid determination of antibiotic susceptibilities of bacterial biofilms. Infections associated with intravascular catheters with special emphasis on sepsis. Guidelines for the management of catheter-related infections. Fungemia in immunocompromised patients associated with intravenous prosthetic devices. Preventing central venous catheter-related infections in intensive-care units. Biomaterial infections in surgery. Infections of artificial organs. Critical analysis of selected paper from scientific literature related to the course subject.

NAMES OF COURSE/MODULE TEACHER/ASSOCIATE TEACHER:

Floriana Bulić Jakuš

Gordana Jurić Lekić

Maja Vlahović

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 17

OUTLINE OF COURSE/MODULE CONTENT

Specific isotransplantation models used in the mammalian developmental biology will be presented and such experimental approaches will be discussed in respect to their benefit for the development of regenerative medicine, tissue engineering or long-term strategy of organ bank establishment. Students will acquire basic theoretical and practical knowledge necessary for the experimentation with various mammalian organ primordia.

New experimental models such as isotransplants of the fetal epiglottis or mandible together with old models such as isotransplants of mouse and rat eyes or isolated neural retina will be presented in the practical. Stability of differentiation in these models at the light microscopy (classical histology, immunohistochemistry) and electron microscopy level will be analyzed. In a concluding seminar (journal club) a recent scientific article dealing with this topic will be critically analyzed.

OUTLINE OF COURSE/MODULE CONTENT

The aim of the subject is understanding mechanisms of nervous system development, and the basis of birth defects. Importance of neural stem cells in developing and adult brain would be clarified. The mechanisms of spatial patterning and cell identity determination during nervous system development will be introduced. Students would get insight in experimental applications used for investigating the genetical basis and morphogenic mechanisms of nervous system development. Specific emphasis will be given to the therapeutic potentials of neural stem cells.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER: 23

TITLE OF COURSE/MODULE: Surgical therapy of pituitary tumors

STATUS OF COURSE/MODULE (REQUIRED/ELECTIVE): elective

NAME OF COURSE/MODULE TEACHER: Professor Darko Kaštelan, MD, PhD; Tomislav Sajko, MD, PhD, senior research associate

NAMES OF COURSE/MODULE TEACHER/ASSOCIATE TEACHER:

Tina Dušek

Darko Kaštelan

Hrvoje Ivan Pečina

Tomislav Sajko

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 15

OUTLINE OF COURSE/MODULE CONTENT

Current methods of diagnosis, research and treatment of pituitary tumors. Pathogenesis of the pituitary adenoma and other tumors of the sellar region and classification of the pituitary tumors according to the WHO. Biological markers of pituitary tumors. Neuroradiological (CT and MR) evaluation of the tumor and surrounding anatomical structures. Overview of the current therapeutical options and trends: surgical minimally invasive concept, irradiation especially “gamma knife” therapy, drug therapy, gene therapy. Development and current trends in surgical treatment with the accent on “minimally invasive” concept. Transsphenoidal microsurgical approach to sellar region tumors as a method of choice. Role and position of endoscope in surgery of the sellar region tumors. Intraoperative visual, radiological, biochemical, and pathohystological monitoring. Clinical and molecular indicators of the pituitary tumors invasiveness. Postoperative clinical, biochemical, and neuroradiological follow-up of patients with surgically removed pituitary tumors. Choice of therapy in case of proven residue or recurrent pituitary tumor. Final seminar for which students are to find international literature on their own, titled: “Latest international consensus on therapy method of choice and standardization of therapy results. Planned practical work will be held in the operating room, and the seminars will be accompanied with video presentations and other audio-visual aids.

OUTLINE OF COURSE/MODULE CONTENT

Macro- and micronutrients. Assessment of nutritional status. Assessment of caloric intake and diet composition. A healthy diet of infants and young children and its role in disease prevention. Healthy diet in adulthood. Nutritional therapy and prevention of chronic diseases in adults. The role of nutrition in inflammatory bowel disease. Nutritional allergies. Nutrition in chronically ill child. Enteral nutrition. Enteral nutrition - a practical approach. Parenteral nutrition. Parenteral nutrition - a practical approach. Feeding a child with a chronic neurological disease - a case report. Nutrition for children and adults with burns - a case report. Preoperative nutrition - a case report. Nutritional support in children with chronic gastrointestinal diseases – multiple allergies, cystic fibrosis, severe malnutrition.

OUTLINE OF COURSE/MODULE CONTENT

Basic characteristics of malignant melanoma (MM): risk factors for MM development (sun exposure and skin reaction, phenotype, familial melanoma, melanocytic nevi, occupation and social status, gender and hormonal factors) and measures of prevention. Tumorigenesis, tumor progression, apoptosis and pathogenesis, genetics – signal pathways in family melanoma (our researches). Precursor lesions and types of MM (superficial spreading melanoma, acral melanoma, lentigo maligna melanoma, nodular melanoma). Clinical detection of melanoma (ABCDE rule). The role of dermatoscopy in diagnostics. Molecular diagnostics of early dissemination of melanoma. Value of PET – CT method in metastasis detection. Follow-up and evaluation in MM patients according to the most recent protocols (experience of the Referral Centre for Melanoma MZS - RH. Review of current knowledge and articles with critical analysis

OUTLINE OF COURSE/MODULE CONTENT

Biochemical composition of bone. Synthesis and resorption of components of extracellular matrix. Enzymes involved in regulation of calcified tissue metabolism. Hormonal regulation of bone metabolism. Calcium homeostasis. Growth factors and cytokines. Influence of bone marrow on bone metabolism. Clinical and analytical aspects of bone marker measurements. Procollagen-peptides, osteocalcin, telopeptides, piridinolin, deokspiridinolin. Effects of bone matrix and demineralized bone matrix on osteogenesis. Bone morphogenetic proteins and cartilage derived morphogenetic proteins – discovery and classification. Bone morphogenetic proteins as regulators of morphogenetic events during embryogenesis. Effects of bone morphogenetic proteins on the process of endochondral ossification, skeleton regeneration and articular cartilage regeneration. Bone morphogenetic proteins and their role in etiology, diagnostics and possible treatment of metabolic bone diseases. Experimental and clinical experiences in application of bone morphogenetic proteins in skeleton regeneration (bone, cartilage) and in metabolic bone diseases. Diagnostic and prognostic biochemical markers of osteoporosis and metabolic bone diseases. Clinical application of bone morphogenetic proteins in orthopaedic surgery – present and future.

OUTLINE OF COURSE/MODULE CONTENT

I. Biochemical aspects of solid organ and tissue transplantation. Pretransplant assessment of the recipient and the donor. Assessment of graft function. Laboratory monitoring of graft function. Immunosuppressive drugs monitoring.

II. Microbiological aspects of organ and tissue transplantation. Infection status and donor acceptability. Infections in transplant patients. Microbiological methods in the diagnosis of viral infections and monitoring of transplant patients. New microbiological methods for diagnosis of infections in transplant patients.

III. Laboratory aspects of haematopoietic stem cells transplantation. Immunohematological aspects of tissue and organ transplantation. Haematopoietic stem cells. Mobilisation and collection of peripheral blood stem cell by leukapheresis. Ex vivo graft manipulation (depletion vs. selection). Cryopreservation and quality control of the hematopoietic stem cell transplant. Cell and tissue Banking. Laboratory monitoring of patients after transplantation of hematopoietic stem cells: hematopoietic recovery and molecular diagnostics, immune recovery and biomarkers of transplantation reaction (GVHD), cytogenetic aspects of transplantation.

NAMES OF COURSE/MODULE TEACHER/ASSOCIATE TEACHER:

Natalija Novokmet

Pavao Rudan

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 20

OUTLINE OF COURSE/MODULE CONTENT

The Course consists of the following themes: Historical development of the field and its theoretical perspectives. Population structure. Molecular-biological analysis of human migrations. Examples from genetic epidemiology. Interactive processes of genetical and/or ecological in the formation of complex characteristics, with examples from different populations and different levels of analysis. Possibilities of contemporary anthropological scientific research of the population level, based upon up-to-date knowledge of population genetics, demography, human epidemiology and ecology, as well as based on individual analyses. Estimations of inter-population distances as well as presentation of analyses (in both manifested and latent space) of poly- and mono-genetically determined characteristics (both continued and discontinued). Application of holistic approach in analysis of diseases, health care systems and in theories of disease and treatment. The influence of adaptation and selection upon the physiological and pathological characteristics of humans. The influences of environmental changes and ecosystems on health and sickness. Theoretical directions of medical anthropology and its applicability in solving global health problems. On the path of reconstructing the Stamparian model. Between the population and individual/a new paradigm of anthropological-epidemiological investigations. Final seminar: Critic analysis of the science article (themed) (journal club).

OUTLINE OF COURSE/MODULE CONTENT

Basic explanation of the concept "Evidence based medicine" including basic terms. History and methods of EBM. Relationship between theory and practical implementation. Benefits in clinical practice. Meta analysis. Database and access to information. Data search, analysis and assessment together with implementation of the research data in clinical practice. The adjustments of clinical practice based on EBM on the concept Management of change. Clinical governance based and assessed on the benefits of EBM. EBM in quality control process and assessment of medical technologies. Cochrane collaboration mission, Presentation of basic principles of its work and understanding of the basic terms. Data analysis and access to relevant information. Practical preparation of clinical EBM project and preparation of the changes based on the results obtained from EBM process. Practical presentation. Practical work with Cochrane databases and other bases available on the internet.

NUMBER OF INSTRUCTION HOURS: 16

OUTLINE OF COURSE/MODULE CONTENT

Checking the selected analytical procedures given the planned experimental study design. Depending on the characteristic of the resulting variable, or whether it is a numerical outcome, a binary outcome, rate or survival time, it is necessary to choose an appropriate analytical method for data presentation, estimation of the intervention effect and the appropriate adjustment to the experimental conditions. Review and selection of available appropriate computer statistical tools to perform the selected analytical procedures. Practical work with the selected computer tools.

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 16

OUTLINE OF COURSE/MODULE CONTENT

Checking the selected analytical procedures given quasi-experimental design of the study as well as studies for the evaluation of interventions. Depending on the characteristics of the resulting variable, or whether it is a numerical outcome, a binary outcome, rate or survival time, it is necessary to choose an appropriate method for presenting data, estimating the intervention effect, and possibly adjusting to the initial conditions of the study. Particular attention will be given to the assessment of specific experimental design conditions that make it quasi-experimental, such as the effects of changes in time, and consequently the adjustment of analytical procedures (the disproportion of hazards, etc.), different therapies of different subgroups (interaction analysis, etc.) and other deviations from the experimental study design. In the case of quasi-experimental study design as well as in the studies for evaluation of interventions that evaluate the relationship between post-intervention, control-intervention, acceptance-non-acceptance of interventions, comparing with the classical study design, appropriate data analysis procedures will be selected and an appropriate computer statistical tool available. Practical work with the selected computer tools.

OUTLINE OF COURSE/MODULE CONTENT

Designing an electronic medical / health record (with respect to parsimonious principles, examples of practice records and research). Database formatting (use database management software on personal computers). Using publicly available databases, downloading data from them, potential and limitations of "big data" (with practical work with such data eg with HCUP databases). Predictability and classification support systems (inductive generation of rules and creation of "medical knowledge", application of decision theory, artificial neural network, examples from medicine, work on a personal computer). Evaluation of the prediction and classification support system. The role of model in understanding problem and communication, model types, methods and techniques of simulation modeling, model validation, application, potential and limitations, and examples of use in medicine and healthcare. Work with programs for designing simulation models on a personal computer (Stella and MedModel graphical user interface software). Biomedical signals and images (detection, registration, processing and screening of biomedical signals and images).

NUMBER OF INSTRUCTION HOURS: 18

OUTLINE OF COURSE/MODULE CONTENT

Historical background, Coombs and Gell's classification of allergic reactions, characteristics of immunologic diseases. Type I reactions: Anaphylaxis: active, passive, generalised, local, in vitro. Allergens. Antibodies: 1. IgE: structure and biological properties, control of synthesis, IgE receptors (FcεRI, CD23), total IgE levels in health and disease; 2. other cytotoxic antibodies: IgG4. Mast cells of mucosa and connective tissue, characteristics of different types; basophils, platelets and eosinophils; mediators of type I reactions and control of mediators release. Atopy: mechanisms, immunodiagnosis and immunotherapy. Type II reactions: Mechanisms, antigens, antibodies (IgG, IgM, IgA), Fc receptors, complement, effector cells (neutrophils, monocytes/macrophages, platelets). alloimmunoreactions (post-transfusion, haemolytic disease of the newborn, transplantation); autoimmune reactions (haemolytic anaemia, organ-specific); reactions to heterologous antigens (drug hypersensitivity, cross-reactivity to pathogens); detection; immunotherapy. Type III reactions: antigens, characteristics of immune complexes (IC); physiologic role of IC, activation of effector mechanisms; experimental models and diseases (Arthus reaction, serum sickness), methods for detection of IC; immunotherapy. Type IV reactions: antigens, antigen presenting cells, effector cells (CD4, CD8, macrophages); regulation of Th1/Th2 reactions, Th17 (cytokines, neuroendocrine mediators); manifestation (contact, tuberculin, granulomatous hypersensitivity reactions); detection of delayed hypersensitivity: in vivo and in vitro; immunotherapy.

OUTLINE OF COURSE/MODULE CONTENT

The class format will include lectures and seminars (with final session-journal club type discussion)

Lectures will provide a basic introduction to the field-summarize current knowledge about the prevalence, pathophysiology, diagnosis and definitions of the metabolic syndrome

For seminars, participants will be encouraged to discuss their opinion on various topics and provide a critical review of assigned reading material. Topics include, but are not limited to: metabolic syndrome and type 1 and type 2 diabetes, lipid disorders, cardiovascular disease, NASH and PCO syndrome, therapeutic approach.

TITLE OF COURSE/MODULE: Research and evaluation methods of health interventions

STATUS OF COURSE/MODULE (REQUIRED/ELECTIVE): elective

NAME OF COURSE/MODULE TEACHER: Professor Stjepan Orešković, MD, PhD

NAMES OF COURSE/MODULE TEACHER/ASSOCIATE TEACHER:

Stjepan Orešković

George Rutherford

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 20

OUTLINE OF COURSE/MODULE CONTENT

Theories: Human capital theory. Determinants of health. Determinants of health outcomes. Three historical periods: Health structures measurement methods. Health processes management and follow up. Methods and indicators for measurement of health outcomes. Health Status Research: Methods of social impact measurements, self-perceived health status. Health condition and Health expectations. Health targets: indicators, instruments and methods. Methodological harmonisation. Health process and outcomes research: Methods for measurement efficiency of health interventions. Comparative methods use and benchmarking: internal, external and process comparison Theoretical model relations between costs and outcomes. Measurements of processes, status, risks, unexpected effects and effects/standard of health interventions. Methods for measurement of health status and outcomes of population interventions: indicators, instruments and methods. Instruments for measurement health status and practical application: Social indicators for health intervention efficiency measurement (SAS); WHO/HFA; indicators, instruments and methods General Health Questionnaire-GHK; SF 36; EuroQol McMaster Health Utility Index; Socio Economic Classification (SEC); Examples of how systems work in practice: CDC/Healthy People 2010; Methods and instruments for measurement efficiency and effects of health interventions: Determination priorities methods. Methods of measurement effect connections, outcomes, efficiency and intervention costs: Unites and methods of measurement efficiency and usefulness, practises and calculations and computer simulations: Disability-Free Life Expectancy, Quality Adjusted Life Years, Disability Adjusted Life Years, Number Needed to Treat, Sickness Impact Profile. Costs and efficiency analysis methods: Method of cost identification; Direct and Indirect costs; Cost-benefit analysis, Cost-effectiveness analysis; Cost-usefulness relation analysis; Cost-minimization method. Modules, simulations and data basis for measurement efficiency and health outcome prices: NICE Care, Cochrane Collaboration, York Health Economics Centre.

OUTLINE OF COURSE/MODULE CONTENT

Principles of work *in vivo* and *in vitro*. Good laboratory practice. Apprehension of ethical issues of work with experimental animals and human material. Care and handling of laboratory animals. Selected surgical procedures on small and large laboratory animals. Principles of investigations of organs, tissues and cells *in vitro*. Embryonic stem cells. Transgenic mice. Investigation of embryogenesis, tissue interactions and transdifferentiation *in vitro*. Primary cell cultures - *in vitro* cultivation of human fibroblasts and short term haematopoietic progenitor cell culture (clonogenic assay). Continuous cell lines. Basic principles of cell separation and immunological analysis of cells *in vitro*, flow cytometry. Culture of preimplantation human embryos - methods of assisted reproduction. DNA-chip technology. The induction of bacterial resistance to antibiotics *in vitro*.

OUTLINE OF COURSE/MODULE CONTENT

Lectures: The central dogma of molecular biology, a summary of the laboratory methods used to study RNA, DNA and proteins. Experimental laboratory work is most part of the course: in several terms is working in small groups, students will become familiar with the basic experimental laboratory methods used in molecular oncology. From the isolation of nucleic acids and proteins, to the methods of studying changes in nucleic acids (polymerase chain reaction - PCR, single-strand DNA sequence analysis - SSCP, melting curve analysis, nucleotide sequencing, fragmentary analysis - "gene scan"), the use of computer base database (search sequences, gene maps, databases SNPs, database specialized for particular genes, primer design, computer processing data obtained by sequencing and fragmentation analysis), quantitative real-time PCR, immunohistochemistry methods, the cell cycle analysis by flow cytometry – FACS and basic brief overview of biostatistical methods.

OUTLINE OF COURSE/MODULE CONTENT

Lectures: Molecular biology at the beginning of the 21st century: organization of the genome. Epigenetics, regulation of gene expression. Stem cells, gene therapy. Creating mouse with a desired genetic change. Mutagenesis; steroid receptors. Oxidative stress. Forensic medicine, paternity testing, y chromosome. Molecular genetics of cancer. Pharmacogenomics. Genomics and laboratory

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

medicine. Genomics: the basis of prospective medicine. Strategy of reverse genetics (positional cloning).

Seminars: Functional genomics. Proteomics. Regenerative orthopedics, cell and gene therapy. Molecular biology procedures in diagnosis of hematologic diseases. Human endothelial cells from umbilical cord blood for diagnostic purpose.

Practical work: Genome databases. RNA isolation and analysis. Immunohistochemistry and electron microscopy in molecular biology (infertile testis). Molecular genetics of cancer (DNA methylation, bisulphite conversion, Western blotting, immunohistochemical markers of apoptosis). DNA analysis in forensic medicine, DNA polymorphisms, mitochondrial DNA. Comet electrophoresis. Cell therapy (cell banks). DNA sequencing - inherited diseases. Real-time PCR application in genetic disorders, oncology and pharmacogenomics. Analysis of cellular DNA using flow cytometry. Molecular detection and identification of microorganisms. Enzyme analyses and metabolomics. FISH cytogenetics.

OUTLINE OF COURSE/MODULE CONTENT

Participants will be informed through lectures, seminars and practical work about experimental research on free tissue transfer, the anatomy and use of flaps in clinical practice. Complex and functional reconstruction with composite flaps, haemodynamics of the microvascular anastomosis, and prevention of thrombosis is important part of programme. On the end complications of free flap transfer and donor area morbidity, postoperational free flap monitoring, and insight into experimental use of new techniques for microvascular anastomosis.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER: 46**TITLE OF COURSE/MODULE: Molecular genetics of aging and carcinogenesis****STATUS OF COURSE/MODULE (REQUIRED/ELECTIVE):** elective**NAME OF COURSE/MODULE TEACHER:** Associate professor Ivica Rubelj, PhD**NAMES OF COURSE/MODULE TEACHER/ASSOCIATE TEACHER:** Ivica Rubelj**LANGUAGE OF INSTRUCTION IN COURSE/MODULE:** Croatian or English, as required**NUMBER OF INSTRUCTION HOURS: 20****OUTLINE OF COURSE/MODULE CONTENT**

The aim of the course is to introduce students to the latest knowledge in the field of biology of aging. Course is about molecular mechanisms that control cell growth, which normally ends with cellular aging, but also the phenomenon of carcinogenesis resulting from the changes of the same molecular structures. Students will get an overview of modern approaches and techniques to this research from the cellular level to the organism and population level. Special attention will be paid to molecular mechanisms of tissue aging and mechanisms of aging in transgenic model organisms, the beginning and development of diseases associated with the aging process etc.

Topics include: introduction to Molecular biology of aging. Definitions, origins of research on molecular mechanisms of cellular aging, overview of modern ideas and techniques of aging research from cell to organism. Cellular aging. Hayflick experiment, a model of human and mouse fibroblasts, endothelial and epithelial cells, the morphological and physiological changes in senescent cells. Molecular basis of (patho)physiology of cellular aging, mechanisms of genetic control of cellular aging: the role of telomeres, structure and mechanisms of their shortening, the role of cell cycle control in aging and telomere shortening. Subtelomeric sequences, their structure and impact on telomeres, types of subtelomeric sequences in several model organism (mammals, yeast, Drosophila, nematodes). Telomeric proteins and their interactions with telomeres; shelterin, recombinant proteins at telomeres, mutations of telomeric proteins associated with genetic diseases. Telomerase; structure of their genes and nucleoprotein, 3D structure, mechanisms of action, interactions with telomeres. Molecular basis of (patho)physiology of aging of tissues and organs, genetic and epigenetic mechanisms of aging control in mice (knock out experiments, histological analysis), the skin as a model: aging of fibroblasts, melanocytes, keratinocytes, endothelial cells, microvasculature. Aging at the organismal level, accumulation of senescent cells, their effect on the surrounding tissue, changes in extracellular matrix and signal molecules - physiological profile of inflammation. Population studies of aging, survival, morbidity and mortality, telomeres as a predictive factor for the individual and population aging, population dynamics of aging in Croatia. Free radicals, their formation, propagation and neutralization, the cell damage theory and energy metabolism, oxidative stress in cell senescence: hyper or hypoxia, telomeres and oxidative stress, the role of mitochondria in cell damage and cellular aging, the role of antioxidants and stress - response mechanisms in cell aging. Tissue damage related to aging, protein modifications, antioxidant mechanisms and protection from damage (enzymes, small molecules - vitamins, minerals). Caloric restriction, model organisms (mouse, rat, monkey, Drosophila), a longitudinal study of calorie restriction in monkeys (*Macaca mulatta*) for > 25 years, the impact of diet on aging and mortality. Carcinogenesis, M1/M2 mechanism, cell crisis and immortalization, effect of SV40 large T antigen (Tg), the role of p53 and pRb; ALT - alternatively

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

lengthening of telomeres in carcinogenesis and metabolism of unicellular organisms, impact on the stability of telomeres.

Evolutionary theories of aging and relationship of aging with carcinogenesis. Comparative biology of aging describe specifics of some groups of organisms (higher mammals, primates, birds, reptiles, insects, aquatic organisms), the role of telomeres and telomerase in aging of various organisms, absence or neglected aging in some organisms. Aging of non-regenerative organs and tissues (brain and nervous system, myocardium) and their resistance to stress, the molecular mechanisms of some degenerative diseases associated with aging; Alzheimer's, Werner's syndrome, Hutchinson -Gilford syndrome progeria).

OUTLINE OF COURSE/MODULE CONTENT

Students will be introduced to the topics of a) molecular and genetic basis of hematopoietic stem cell damage and molecular leukemo- and lymphomagenesis, they will be presented with the b) basic principles of molecular techniques and logics of selecting the appropriate molecular tests in hematology and hemostaseology. Further, (c) molecular aspects of minimal residual disease will be presented, d) molecular redefinition of leukemia and lymphoma categories by gene expression profiling and use of SNP array analysis will be discussed. e) Principles of molecular hematopathology and recent achievements in the field, f) collecting biological samples, isolation of nucleic acids and planning of molecular tests g) mechanisms of actions of new, molecularly targeted therapeutics in hematology, h) and molecular cytogenetics in hematology will also be the topics. Closing seminar: critical analysis of a selected scientific paper relevant to the course. Principles of aggressive chemotherapy and radiotherapy. Scientific facts and controversy in success evaluation regarding chemoradiotherapy and targeted therapy for hematopoietic neoplasms.

TITLE OF COURSE/MODULE: Molecular aspect of lymphocyte development

STATUS OF COURSE/MODULE (REQUIRED/ELECTIVE): elective

NAME OF COURSE/MODULE TEACHER: Prof. Mariastefania Antica, PhD

NAMES OF COURSE/MODULE TEACHER/ASSOCIATE TEACHER: Mariastefania Antica

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 21

OUTLINE OF COURSE/MODULE CONTENT

The topic Molecular aspects of lymphocyte differentiation will provide skills for a critical interpretation of published literature in the field of molecular biology of lymphocyte development. Also a practical approach and the laboratory skills will include knowledge of methods like DNA and RNA isolation from lymphatic tissues, reverse transcription and polymerase chain reaction, (PCR), electrophoresis of DNA fragments, gene expression by protein detection, apoptosis by flow cytometry.

OUTLINE OF COURSE/MODULE CONTENT

Introduction to the principles involved in cancer development and progression, based on the model of gastrointestinal tumors. Review of molecular changings in oncogenes, tumor supressor genes and mismatch repair genes relating to illnesses of the gastrointestinal tract will be given. The role of microbiome and chronic inflammation in the colon cancer tumorigenesis. Course topics include the genetics of hereditary and sporadic colon cancer, familial adenomatous polyposis (FAP) and human nonpolyposis colon cancer (HNPCC, Lynch syndrome) as well as the genetics of family cancer. The gastric carcinoma is second most freequent gastrointestinal tumor in patients with HNPCC and the lectures will include the genetics of hereditary and sporadic gastric cancer. Course topics will be also the most recent findings in: molecular genetics of esophageal cancer, molecular genetics of inflammatory bowel disease (IBD) (ulcerative colitis, Crohn's disease), molecular genetics of pancreatitis and pancreatic adenocarcinoma as well as molecular genetics of GEP-NET tumors. Chemoprevention is another approach to decrease the incidence of colorectal cancer in the general population. One of the topics of this course will be the role of COX-2 in the tumorigenesis and as a new molecular target in chemoprevention and treatment of gastrointestinal tumors. Pharmacogenomics and pharmacogenetics of gastrointestinal tumors, importance of SNPs and mutations in genes for drug metabolism, response to therapy, toxicity and resistance to therapy. Seminar topics will include: molecular diagnostics of hereditary gastrointestinal tumors, presymptomatic diagnostics, pharmacogenetics, interpretation of the results of molecular-genetics analysis (mutation detection and "linkage" analysis).

OUTLINE OF COURSE/MODULE CONTENT

The course gives an overview of various morphological methods which enable the imaging of molecules, cells, tissues, organs and organ systems of human. Basic and clinical approaches are interconnected in microscopy and radiology. The students would get knowledge of different ways of microscopy, in particular in the principles of light and electron microscopy. Theory and practice of methods to image major macromolecules of the living organism, gene activity and protein localization would be provided. Students would get insight in the practical knowledge of the applications of light (fluorescent and confocal) and transmission electron microscopy. The attendees would acquire an overview of knowledge regarding applications of modern imaging methods in depicting morphology of various organs and organ systems. Physical basis will be presented of conventional X-ray methods, ultrasound, computerized tomography, digital subtraction angiography and magnetic resonance imaging, as well as application of these methods in imaging of normal morphology of all organs and organ-systems. The significance of application of various contrast media will be emphasized. Critical analysis will be presented of various imaging methods in biomedical research, their advantages and shortcomings will be discussed, as well as algorithms of their utilization of different methods aimed to visualize from molecule to specific organ systems.

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required**NUMBER OF INSTRUCTION HOURS: 25****OUTLINE OF COURSE/MODULE CONTENT**Enterobacteriaceae producing extended-spectrum β -lactamases

Since plasmid-mediated extended-spectrum β -lactamases (ESBLs) were first detected in *Klebsiella oxytoca* isolate in 1983 in Germany, they have been increasingly reported worldwide. Production of ESBLs is the major mechanism of resistance to oxymino-cephalosporins and aztreonam in Gram-negative bacteria. ESBLs are predominantly derivatives of plasmid-mediated TEM or SHV β -lactamases and arise through mutations that alter the configuration of the active site, thereby expanding the hydrolytic spectrum of the enzyme. The CTX-M family of β -lactamases groups evolutionarily related ESBLs with a much higher level of activity against cefotaxime than ceftazidime; and their similarity to some species-specific β -lactamases, like those of *Klebsiella oxytoca* and *Citrobacter diversus*, has been known for years. The recent finding of 99% homology between the CTX-M-2 enzyme and the β -lactamase of *Kluyvera ascorbata* has indicated the origins of at least a fraction of the CTM-variants. In contrast to TEM and SHV ESBLs which rely on point mutations in *bla*TEM and *bla*SHV genes to expand their substrate profiles, CTX-Ms have an intrinsic extended-spectrum profile. Whereas only three enzymes of this family (CTX-M-1, MEN-1, CTX-M-2, and Toho-1) were described between 1990 and 1995, in recent years the list has been increasing very quickly. In some countries CTX-M β -lactamases are the most prevalent types of ESBLs, for instance in Switzerland, Russia, Greece, Spain, Japan, Taiwan, China and Argentina. Production of CTX-M β -lactamases can be associated with plasmid-mediated resistance to fluoroquinolones due to *qnr* genes which encode proteins protecting bacterial topoisomerase. In contrast to SHV and TEM ESBLs they are usually associated with community isolates. Non-fermentative bacteria such as *Pseudomonas* and *Acinetobacter* can also harbour ESBLs but they are less frequent than in Enterobacteriaceae and predominantly belong to rare families like PER, VEB and IBC. Laboratory detection is based on double disk synergy test or combined disk test with clavulanic acid. Detection of ESBL in non-fermentative bacteria or the species of Enterobacteriaceae which possess chromosomal AmpC β -lactamases pose a challenge because chromosomal ampC β -lactamase can antagonize the synergism with clavulanic acid and lead to false negative results. Addition of cloxacillin which inhibits ampC β -lactamases in the medium is recommended. Carbapenems are the antibiotics of choice for the treatment of infections caused by ESBL positive Enterobacteriaceae. Urinary tract infections caused by ESBL producing

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Enterobacteriaceae can be treated with fluoroquinolones or beta-lactam combinations with inhibitors if in vitro testing shows susceptibility.

AmpC beta-lactamases

Plasmid-mediated AmpC beta-lactamases are derived from the chromosomal beta-lactamases of the bacteria belonging to the genus *Enterobacter*, *Citrobacter*, *Serratia*, *Pseudomonas* and *Acinetobacter* by escape of the chromosomal gene to the plasmid. Plasmid mediated AmpC beta-lactamases are found in the species of Enterobacteriaceae without chromosomal ampC gene such as *Klebsiella* spp, *Proteus mirabilis* or *Salmonella* or with low level expression of chromosomal ampC gene such as *E. coli*. Plasmid-mediated AmpC beta-lactamases confer resistance to third generation cephalosporins and cephamycins and unlike ESBLs are not inhibited by clavulanic acid, sulbactam or tazobactam. Fourth generation cephalosporins are spared. They belong to CMY, DHA, FOX, MOX, LAT, BIL, ATC and other families. Laboratory detection is based on combined disk test with phenylboronic acid as inhibitor of AmpC beta-lactamases.

Carbapenemases in Enterobacteriaceae

Acquired resistance to carbapenems is uncommon in Enterobacteriaceae although extended-spectrum β -lactamase resistance in these organisms is well established. However, β -lactamase mediated resistance to carbapenems has been reported in *Klebsiella pneumoniae* and other Enterobacteriaceae mostly due to the expression of class A KPC β -lactamases susceptible to the inhibition by clavulanic acid, class B metallo- β -lactamases (IMP, VIM or NDM) or OXA-48 β -lactamase belonging to the class D β -lactamases. Furthermore, carbapenem resistance can be mediated by hyperproduction of ESBLs or plasmid-mediated AmpC β -lactamases combined with porin loss. Modification of outer membrane (ompK35 and ompK36) proteins usually develops during therapy with carbapenems. Enterobacteriaceae isolates with reduced susceptibility to carbapenems were recently reported in USA, France, Greece, Turkey, Israel, Austria, Sweden, UK, Spain, Switzerland, Germany, Belgium, Italy, China, and Taiwan, and many other countries of the world. In Croatia, the first carbapenemase described in Enterobacteriaceae was NDM-1. The first group A carbapenemase reported in our country was KPC-2 found in *K. pneumoniae* isolate. Simultaneous production of KPC and MBLs has also been reported in Germany and China. The laboratory detection of carbapenemases in the laboratory is based on modified Hodge test. Inhibitor based tests with EDTA and phenylboronic acid are used to detect metallo-beta-lactamases (MBLs) and KPC beta-lactamases, respectively.

Non-fermentative bacteria producing carbapenemases

The Gram-negative *Acinetobacter baumannii* is one of the most relevant nosocomial pathogen occurring in intensive care (ICU) as well as burn therapy units. The most frequent health-care-associated infections are urinary tract infections, bacteraemia, surgical site infections and ventilator associated pneumonia. One of the reasons of the success of *A. baumannii* within the hospitals is related to the impressive ability of this bacterium to express innate and acquired antibiotic resistance determinants, making last resort antibiotics for the treatment of multidrug-resistant (MDR) strain, like broad-spectrum cephalosporins, carbapenems, and to a lesser extent colistin, frequently ineffective. Carbapenems have a potent activity against *Acinetobacter* and *Pseudomonas* and are often used as last resort for the treatment of infections due to multiresistant *Acinetobacter baumannii* isolates. However, *Acinetobacter*s may develop resistance to carbapenems through various combined mechanisms including decreased permeability, altered penicillin binding proteins (PBPs) and, rarely, efflux pump overexpression. However, the most frequent mechanism of resistance is though the

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

production of carbapenemases such as class B IMP type and VIM type metallo β -lactamases (MBLs) and class D OXA type carbapenemases.

Carbapenemases may be defined as β -lactamases that significantly hydrolyse at least imipenem or/and meropenem. The most clinically significant carbapenemases belong to class B. They are the acquired or transferable metallo- enzymes which require zinc as a cofactor and include the following most common families: IMP, VIM, SPM, GIM, NDM and SIM. The VIM-type enzymes appear to be the most prevalent in Europe and Far East, and at least 34 different variants have been identified (<http://www.lahey.org/Studies>). The worldwide spread of acquired metallo- β -lactamases (MBLs) in gram-negative bacilli has become a great concern. MBLs possess a broad hydrolysis profile that includes carbapenems and almost all extended-spectrum β -lactams except of aztreonam. Genes encoding MBLs are usually located in integrons which contain gene cassettes encoding resistance to aminoglycosides and fluoroquinolones. MBLs have zinc in their active site and are inhibited by metal chelators such as EDTA, mercaptopropionic and mercaptosulphuric acid. Group D includes carbapenem-hydrolyzing oxacillinases which are usually produced by *A. baumannii*. OXA-51 family are intrinsic chromosomally encoded beta-lactamases of the species *A. baumannii*. They cause carbapenem-resistance only if they are associated with ISAba1 insertion sequence upstream of the blaOXA-51 gene. OXA-23-like, OXA-24/40-like, OXA-58-like and OXA-143-like are acquired oxacillinases associated with high level of resistance to carbapenems. They are usually plasmid-mediated and thus transferable. Isolates producing acquired oxacillinases are frequently multidrug resistant. OXA-23 is the most widespread family of CHDL and is reported all over the world. OXA-24/40 was found in North America, Spain, Portugal, Brasil, China and recently in Croatia. OXA-58 was reported in Germany, France, UK, Turkey and Greece. It is often preceded by ISAba3 insertion sequence which is important for the mobilization of the blaOXA-58 gene and increased the expression of the gene and the level of carbapenem-resistance. OXA-143 was identified only in Germany. Changes of outer membrane proteins (CarO) or upregulation of efflux pumps can contribute to carbapenem-resistance. Multiresistant *A.baumannii* isolates belong usually to three main International clonal lineages (formerly EU clones). Recently new clonal lineages have been reported. Strains possessing acquired oxacillinases usually belong to ICL II. OXA-23, OXA-58 and OXA-72 beta-lactamases were reported in the multicenter study in Croatia conducted in 2009-2010. The majority of the strains belonged to ICLII and ST2.

Pseudomonas aeruginosa belongs to bacteria with a variety of intrinsic and acquired resistance mechanisms including the production of antibiotic modifying enzymes like beta-lactamases and aminoglycoside modifying enzymes, impermeability of the cell wall, mutation of receptor molecules or upregulated efflux pumps. *Pseudomonas aeruginosa* develops resistance to carbapenems due to production of metallo-beta-lactamases belonging to class B, KPC beta-lactamases belonging to class A, loss of OprD protein or upregulation of efflux pumps. In Croatia, VIM-2 metallo-beta-lactamase was reported in University Hospital Split and Zagreb. It was encoded in a class1 integron which contained resistance genes for aminoglycosides and blaOXA-1 gene. Resistance to expanded-spectrum cephalosporins in *Acinetobacter* spp and *Pseudomonas* spp can be due to overexpression of class C chromosomal beta-lactamases or acquisition of extended-spectrum beta-lactamases, mostly of VEB, PER and IBC family, but rarely TEM-116, SHV-12, and CTX-M-2 were reported. Resistance to ampicillin/sulbactam in *Acinetobacter* spp is mediated by hyperproduction of TEM-1 beta-lactamase.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Resistance to fluoroquinolones in Enterobacteriaceae is mediated by mutations of chromosomal *gyrA* and *parC* genes or plasmid-mediated *qnr* genes which encode *qnr* proteins to protect topoisomerase. *Qnr* genes are often encoded on the same plasmids which contain *blaESBL* or *blaCARB* genes

Resistance to fluoroquinolones in non-fermentative bacteria is gyrase or topoisomerase subunit. Aminoglycoside modifying enzymes such as adenylases, phosphorilases or acetylases are the major resistance mechanisms to aminoglycosides in *Pseudomonas* spp and *Acinetobacter* spp. Recently, resistance to colistin was reported in *A. baumannii* due to the modification of lipid A component of the lipopolysaccharide of the bacterial cell wall.

Meticillin-resistant *Staphylococcus aureus* (MRSA) emerged very soon after introduction of met icillin in the treatment of staphylococcal infections in the early 60-ies of XX century.

Currently 30 to 50% of *S. aureus* and more than 50% of coagulase negative staphylococci are resistant to semisynthetic penicillins. Resistance occurs as the results of acquisition of *mecA* gene, that encodes a novel penicillin binding protein PBP2', as well as *mecA* a new variant recently reported in France. Expression of PBP2' renders the bacteria resistant to all β -lactam antibiotics (including cephalosporins and carbapenems). Until recently, the one antibiotic that has remained uniformly active against staphylococci has been vancomycin, the current antibiotic of choice for treating staphylococci resistant to oxacillin. However, it is less efficient than izoxazolil penicillins. Other therapies are available nowadays such as linezolid, daptomycin and ceftaroline. Furthermore, it is more toxic than β -lactam antibiotics. MRSA has all properties of staphylococci: it is easily spread from ill/colonized patient to other patients via hands of staff or fomites and causes infections like MSSA (wound infections, sepsis, endocarditis, pneumoniae and osteomyelitis). Prevalence of MRSA in Croatia is 3 to 50%. There are reports of MRSA as community acquired pathogen.

Enterococci are part of the normal flora in digestive and urogenital tract of humans and animals. They cause opportunistic urinary tract infections, wound infections, intraabdominal abscess and sepsis. Enterococci have intrinsic naturally occurring resistance to many antibiotics such as cephalosporins and clindamycin. In order to achieve bactericidal effect, it is necessary to combine penicillins or glycopeptides with aminoglycosides. The most important problem is development of high level resistance to aminoglycosides, penicillins and lately also to vancomycin. The first VRE was described in Europe in 1988 and in USA in 1989. The prevalence of vancomycin resistance in Europe is 2% whereas in USA it is much higher (10%). Infections due to VRE are difficult to treat. Furthermore, genes responsible for vancomycin resistance could be transferred to other Gram-positive bacteria such as staphylococci resulting in vancomycin-intermediate or vancomycin-resistance *S. aureus* (VISA or VRSA, respectively) as well as to other Gram-positive bacteria such as streptococci and listeria.

Recently, nursing homes have been reported to be important reservoir of multiresistant bacteria particularly MRSA or *Acinetobacter baumannii*. The residents of long-term care facilities are usually chronically ill and debilitated and often have prolonged stays in the hospitals where they can get colonized with multiresistant strains.

The practices will enable the students to learn the methods for antimicrobial susceptibility testing, phenotypic tests for detection of extended-spectrum and plasmid-mediated *ampC* beta-lactamases and carbapenemases and molecular methods for detection of resistance genes. Moreover, they will be able to practice methods for genotyping of multiresistant bacteria such as PFGE and MLST. Extraction of plasmids will be done with commercial kit according to the manufacturer's instruction. The plasmid-based replicon typing will be done according to Caratolli et al.

Medicine

OUTLINE OF COURSE/MODULE CONTENT

Use of doppler ultrasound in gastroenterology and hepatology: Physical principles and basics of the examination. Doppler of the aortomesenteric system. Doppler of the hepatoportal system. Contrast enhanced ultrasound in gastroenterology and hepatology: physical principals of basics of the examination. Contrast enhanced ultrasound in liver diseases and extrahepatic diseases. Ultrasonic elastography in gastroenterology and hepatology: physical principles and basics of the examination. Ultrasonic elastography in liver, pancreatic, biliary and intestinal diseases. Endoscopic ultrasound: physical principles and basics of the examination. Endoscopic ultrasound in intestinal, pancreatic and biliary diseases. Intervention ultrasound in gastroenterology and hepatology. Liver, other organ and structure biopsy. Tissue diagnostics of the specimen provided by ultrasound guided fine-needle aspiration. Therapeutic ultrasound use. Practice with models (doppler and elastography). Journal club: doppler, contrast ultrasound, elastography, endoscopic ultrasound, intervention ultrasound in gastroenterology and hepatology.

OUTLINE OF COURSE/MODULE CONTENT

The course deals with the genetic basis tumorigenesis. Genomic changes that are the basis of malignant transformation and progression are described. The emphasis of the course is given on the genomic instability of tumor cells caused by defective DNA repair mechanisms. Therefore, scientific topics of mutations and DNA repair are also represented. Specific type of DNA postreplication repair the so called mismatch repair is extensively covered. Moreover, genetic organization, basic mechanisms of gene regulation and function as well as signal transduction pathways involved in tumor formation and proghression are also included in the course. The genomic characteristics of brain tumors is introduced to the students too, since it represents the main scientific research in the Laboratory for neuro-oncology. The emphasis is on Wnt signaling and gene mutations responsible for specific histopathological brain tumor initiation and development. New research in this scientific field is brought to students' attention.

Practical work enables students to discover genetic changes in human tumors. Specific topics of the course include: Genomic instability in tumor cells; Mechanisms of mutation and DNA repair; Control of gene expression; Genes and signal transduction pathways involved in tumorigenesis; Wnt signaling in brain tumors. Seminars focus on novel scientific papers on genomic instability and tumors genome landscapes. Journal club discussion on selected scientific papers and essays are also part of seminars. Practical work includes following: Screening for microsatellite instability in cancer, the analysis of microsatellite gene markers; Loss of heterozygosity detection; Electrophoresis; Mutation detection method Heteroduplex; Immunohistochemistry and novel techniques of mutation search through High resolution melting on Light Cycler PCR instrument are also included.

NUMBER OF INSTRUCTION HOURS: 20

OUTLINE OF COURSE/MODULE CONTENT

The goal of this course is to present neuropathological, molecular and genetic features of brain diseases related to aging, features of aging of neuronal cells, as well as experimental models for studying cellular aging. The course is divided into following topics: Experimental models of aging (in *Saccharomyces cerevisiae*, *Caenorhabditis elegans*, *Drosophila melanogaster* and *Mus musculus*); Evolutionary theories and theoretical models of aging; Neurobiological basis of human progeroid syndromes: Werner syndrome, Hutchinson-Gilford syndrome, Down and Cockayne syndrom, and ataxia teleangiectasia; Neuropathology of Alzheimer's disease; Sporadic and familial Alzheimer's disease; Biomarkers of Alzheimer's disease; Genetic and molecular features of primary tauopathies, including PART (primary age-related tauopathy); Neurobiological basis of the vascular dementia spectrum; Neurobiological basis of frontotemporal dementia (primarily due to frontotemporal lobar degeneration FTLD-Tau and FTLD-TDP); Neurobiological basis of Lewy body disease (the group of synucleinopathies that include Parkinson's disease and Lewy body disease); Molecular-biological diagnostics and neuropathological picture of Creutzfeldt-Jacobs disease and human spongiform encephalopathy; Neurobiological basis of age-related diseases of the motor system with special emphasis on amyotrophic lateral sclerosis and C9ORF72 mutation; Shortening of telomeres, proteins interacting with telomeres and mechanisms of cell-cycle control associated with telomeres; Morphological, physiological and genetic changes of cells and tissues during aging and relationship between individual aging of cells and tissue aging; Neurodifferentiation and therapeutical use of neural stem cells for degenerative brain diseases; Methods for detection of different modes of neuronal cell death. Practical demonstrations include histochemistry, immunocytochemistry and immunofluorescence of beta-amyloid, alpha-synuclein, tau and other proteins implicated in pathogenesis of brain diseases related to aging; electrophoresis and Western blot of tau proteins; ISEL and TUNEL methods for detection of oligonucleosomal DNA fragments, and electron-microscopical analysis of neuronal cell death.

OUTLINE OF COURSE/MODULE CONTENT

Fetal and neonatal physiology. Structural and functional development of central nervous system. Morphogenesis and histogenesis telencephalon in the light of new knowledge about human specific developmental mechanisms. Recent findings in fetal neurophysiology and behaviour. Adaptation of fetus to stress. Ultrasound patterns of fetal behavior in the first and second trimester of pregnancy. New method, four-dimensional (4D) ultrasound in assessment of fetal behavior and new optimality scoring system for fetal neurobehavior. Clinical application of 4D ultrasound. Hemodynamic parameters, followed by cerebro-umbilical ratio and motor parameters, followed by 4D ultrasound, in prevention of perinatal brain damage of hypoxic fetuses. Intrauterine origin of adult diseases. Behavioral pattern continuity from prenatal to postnatal life. Early neurological development of the child. Primitive reflexes and posture reactions. Spontaneous movements in «fidgety» period. Intracranial ultrasound in neonatal period. Final seminar: critical analysis of article chosen from scientific literature related to course content («journal club»).

OUTLINE OF COURSE/MODULE CONTENT

The subject consists of the following topics: .Epileptogenesis: Migration disorders, cerebral circulation and immunologic response in epileptogenesis in humans and in experimental animals. Pharmacogenomics and pharmacoproteinomics. Pathomechanism of oligodendroglial injury and hypoxic ischemic encephalopathy in neonates. Role of apoptosis, calcium and ion channels in neurogenesis and epileptogenesis. Medial temporal lobe development and its role in epileptogenesis. Neurogenetics in epileptogenesis. Comparative genomic hybridization, gene sequencing , next generation sequencing, whole exome and whole genome sequencing in epileptic syndromes Chromosomopathies. Prenatal diagnosis (STR, microsatelits). Inherited metabolic disorders associated with epilepsy. Neurocutaneous syndromes in epileptogenesis. Epileptic syndromes. EEG: maturation and abnormalities. CNS inflammation: experimental models, molecular diagnostic, inflammatory mediators, intrathecal complements role. Morphologic and functional diagnostics of epileptogenesis: Magnetic resonance imaging: morphological abnormalities in hypoxic-ischemic encephalopathy in premature babies. Migration disorders and brain tumours. Stroke, hemoraghes and inflammation dynamic in functional sequencing. Mechanisms of antiepileptic drugs action. Pharmacogenetics. Pharmacogenomics and pharmacoproteinomics of antiepileptics. Polysomnography in epileptogenesis of epileptic encephalopathies and epileptic syndromes.

Practical work includes independent analysis of electroencephalographic graphoelements in EEG dependent on maturation and age related in specific epileptic syndromes and epileptic encephalopathies, analysis of semiology of specific epileptic syndromes and encephalopathies based on different seizure types video recordings, analysis of REM and non REM phase in specific epileptic syndromes. Practical training include also analysis of structural MRI brain abnormalities including focal cortical dysplasias, strokes, inflammatory and autoimmune brain disorders causing epileptic seizures.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

In Journal club the participants individually prepare their presentations based on scientific literature relevant to the course and critically analyse the methodology, discussion and conclusions with other attendees.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER: 60

TITLE OF COURSE/MODULE: Selected topics in transplantation immunology

STATUS OF COURSE/MODULE (REQUIRED/ELECTIVE): elective

NAME OF COURSE/MODULE TEACHER: Prof. Danka Grčević, MD, PhD, Assoc. Prof. Nataša Kovačić, MD, PhD

NAMES OF COURSE/MODULE TEACHER/ASSOCIATE TEACHER:

Danka Grčević
Tomislav Kelava
Nataša Kovačić
Alan Šućur

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 19

OUTLINE OF COURSE/MODULE CONTENT

Course will include 2 lectures, 2 seminars with paper discussion („journal club“), 2 practicals, and final (round table) discussion.

Lectures (2x90 minutes) will introduce students to basic concepts of molecular and cellular immunology related to experimental and clinical tissue- and organ-transplantation, topics (total 2): 1. Regulation of the immune response and immunological tolerance, 2. Transplantation rejection and graft versus host reaction.

Seminars (2x90 minutes) will include small student groups in the form of “journal club”. Students will present relevant and recent publications related to selected fields of transplantation immunology including discussion of methods, results and conclusions, topics (total 2): 1. Transplantation of solid non-lymphoid organs, and 2. Transplantation of lymphoid tissues. Students' presentation will be evaluated to present 50% percent of total score.

Practicals (2x135 minutes) will consist of individual lab work to introduce students to practical procedures related to methods commonly used in the field of transplantation immunology, topics (total 2): 1. Lymphocyte proliferation after polyclonal stimulation – a) preparation of cell suspensions and plating, b) cell labeling and colorimetric measurement of proliferation; 2. Surface phenotyping of murine hematopoietic stem cells and mature hematopoietic lineages – a) preparation of cell suspensions and antibody labeling, b) multicolor flow cytometry analysis (FACS). At the end of the practicals, students need to describe used methods in a form of laboratory protocol, which will be evaluated to present 25% percent of total score.

Subject will conclude with the final critical discussion (“round table”) regarding the acquired knowledge and skills, and their possible implementation in research and clinical work in accord to the principles of evidence based medicine. Student participation will be evaluated to present 25% percent of total score.

OUTLINE OF COURSE/MODULE CONTENT

By its content, the course includes important parts of the characteristics of clinical medical research in the form of lectures, seminars and exercises. It is attempted to illustrate these topics to attendants through concrete examples of clinical trials and the experiences of clinical pharmacologists. The course consists of the following topics: Controlled clinical trials as the only scientific evidence of the value of therapy, Ethics of clinical trials, Trials of comparative efficacy in medicine, The choice of diagnostic procedure in the example of kidney tumor, Statistics in clinical trials: friend or foe, Clinical medical trials in clinical pharmacology, Difference between interventional and non-interventional trials, Examples of randomized clinical trials, International scientific collaboration, writing of projects and securing grants, Phase IV clinical trials, Comparisons of cost-efficacy: examples of pharmacoeconomic analyses. The course ends by written exam.

TITLE OF COURSE/MODULE: Knowledge discovery in medical domains

STATUS OF COURSE/MODULE (REQUIRED/ELECTIVE): elective

NAME OF COURSE/MODULE TEACHER: Dragan Gamberger, MD, PhD, research advisor; Prof. Zdenko Sonicki, MD, PhD

NAMES OF COURSE/MODULE TEACHER/ASSOCIATE TEACHER:

Dragan Gamberger
Zdenko Sonicki

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 30

OUTLINE OF COURSE/MODULE CONTENT

Data mining and its relation to statistics. Intelligent data analysis based on machine learning techniques for knowledge discovery tasks. Data collection and specification of data analysis goals. Machine learning tools appropriate for knowledge discovery. Illustrative example. Data preparation and attribute types. Handling unknown values and data enumeration. Data mining server, its properties and application. Definition of classification tasks and data formalization. Web interface for user communication. Parameters of the induction process. Understanding of constructed models and list of outliers. Mistakes in data preparation. Interpretation of the results, knowledge formulation, statistical evaluation. Interpretation of attribute relevance and non-obvious connections among attributes. Interpretation of contradictions, sets of rules, and boundary values in rules. Decision tree algorithm and market basket analysis algorithm. Weka and Rapid Miner suites and their applications. Exercises: Practical work on real research tasks in medical domains, aimed at data selection and data transformation, induction of models, and model interpretation. Application of various knowledge discovery tools and comparative analysis of the results. Report – research paper: Students themselves identify data related to their current research interests, with the help of the course leaders they prepare it for the analysis, execute appropriate procedures, and interpret result in the context of the current medical knowledge. Paper selected for the journal club: „Gamberger, D., Lavrač, N. Expert-guided subgroup discovery: Methodology and Application. Journal of Artificial Intelligence Research 2002; 17:501-527“. The paper illustrates the process of interpretation of the results obtained by rule learning aimed at acquiring novel knowledge.

DESCRIPTION OF INSTRUCTION METHODS

Lectures and seminars teaching all relevant parts of the data preparation process, data analysis, and interpretation of the obtained results. For illustration real medical data are used. In the practical part the lectures help students to repeat relevant data analysis steps. It is recommended that student use data that they have collected themselves during their PhD study.

DESCRIPTION OF COURSE/MODULE REQUIREMENTS

Preparation of a report (research paper) in which the student demonstrates how he solved all parts of the data analysis process on a real medical domain. It is recommended that data are related to topic of the student's PhD thesis. In the oral part of the examination the results of the report are analysed and general understanding of basic knowledge discovery concepts is evaluated.

OUTLINE OF COURSE/MODULE CONTENT

General principles: microbial pathogenicity, virulence factors, pathogenicity islands, vertical and horizontal transmission of infection, exogenous infections, endogenous infections, normal microbial flora of the human host, probiotics, nonimmunologic host defenses. Adherence: ubiquitous receptors, bacterial adhesions, viral adhesion and invasion, parasitic attachment, tissue tropism, species specificity. Invasion: invasive and noninvasive microorganisms, enteroinvasive pathogens and the membranous cell gateway. Intracellular motility of microbial pathogens: passive and active actin modification. Subepithelial invasion and spread through the body: infection of distant target organs, serum resistance. Cell and tissue damage induced by bacteria, viruses and parasites and their products: exotoxins, endotoxin, membrane-disrupting toxins, superantigens, enzymes, apoptosis, virus-induced cytopathic effects. The immune response to infection. How microorganisms escape host defense: surviving the phagocyte and complement attack, surviving within phagocytes, antigenic and phase variations, tolerance, immunosuppression induced by microbial infection, microbial presence in bodily sites inaccessible to the immune response. Recovery from infection. Failure to eliminate microbe: latency, persistent infections. Effect of antibiotics on bacterial virulence factors. Methods: determination and quantification of bacterial adhesins, determination of the adherence to polystyrene measured by spectrophotometric assay, measurement of hemolytic activity by use of the microtiter hemolysin assay, detection of bacterial enzymes, serum sensitivity testing and genetic methods of bacterial virulence factors detection. Detection of virus-induced cytopathic effects and cytoplasmic and intranuclear inclusion bodies in different cell lines. Serology: specific and nonspecific serologic methods, determination and/or titration of IgM, IgG and IgA antibodies, determination of specific IgG avidity by use of the adapted enzyme-linked immunosorbent assay. Critical analysis of selected paper from scientific literature related to the course subject.

OUTLINE OF COURSE/MODULE CONTENT

Proteomics represents one of the key and fast-growing branches of molecular biology and medicine with capability to provide quantitative and qualitative analysis of proteins in cells, tissues and organism. Aim of this subject is general introduction to basic principles and methods of proteomics, specifically those based on mass spectrometry. Lectures will shortly describe history of proteomics and its basic strategies (protein electrophoresis, immunohistochemistry and Western-blot); mass spectrometry in global protein identification and quantification processes, as well as specific application in basic biomedical research. Participants will learn how to prepare the sample for analysis and will have opportunity to work with sophisticated proteomic machines (mass spectrometry, HPLC) and learn processing of results utilizing bioinformatics.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

DESCRIPTION OF INSTRUCTION METHODS: Lectures, seminars, practical work

DESCRIPTION OF COURSE/MODULE REQUIREMENTS: Written exam

DESCRIPTION OF MONITORING OF TEACHING QUALITY

Anonymous online questionnaire available at: <https://tinyurl.com/y7agh69x>

APPOINTED ECTS: 3

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER: 68

TITLE OF COURSE/MODULE: Understanding bone metabolism –basic science in clinical practice

STATUS OF COURSE/MODULE (REQUIRED/ELECTIVE): elective

NAME OF COURSE/MODULE TEACHER: Prof. Vesna Kušec, MD, PhD

NAMES OF COURSE/MODULE TEACHER/ASSOCIATE TEACHER:

Darko Antičević

Danka Grčević

Vedran Katavić

Dalibor Krpan

Rajko Kušec

Vesna Kušec

Slobodanka Ostojić Kolonić

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 17

OUTLINE OF COURSE/MODULE CONTENT

Current knowledge on the structure and function of skeletal tissues (bone cells and their origin, intercellular matrix, basic bone tissue functions); bone remodeling (systemic hormone, growth factors and other determinants); regulation of bone mass; potentials and limits of specific diagnostic methods in the assessment of bone status with regard to basic knowledge on the topic of bone cell actions (densitometry, histology, histomorphometry, biochemical parameters and bone markers, molecular biology, x-ray, computerised tomography, scintigraphy); explanation of etiology of most frequent disorders of bone metabolism (e.g. osteoporosis, renal osteodystrophy, bone involvement in malignant diseases, osteogenesis imperfecta, Mb. Paget), clarification of the results of diagnostic and monitoring methods, understanding treatment effects; the significance of research for comprehending bone metabolism, mechanisms of diseases and discovery of new treatment options (cell culture, experimental models, knock-out and overexpression of genes, comparison of phenotypes between experimental animals and human disorders). The course includes discussion on new osteoporosis therapy modalities and the role of bone system in energy metabolism. Seminars and practice – problem and case oriented teaching, discussions of clinical and laboratory results on typical examples of skeletal disorders, evidence based medicine on the topic of metabolic bone disorders (critical analysis of clinically relevant literature, recommendations, reviews, meta-analyses).

READING LIST (MANDATORY AND RECOMMENDED)

- recommended during the course
- current reviews on regulation of bone remodeling, vitamin D metabolism, etiology of osteoporosis and therapy modalities
- reading for journal club discussions is provided during the course
- current literature recommended by other lecturers of the course

DESCRIPTION OF INSTRUCTION METHODS: lectures, seminars, journal club

DESCRIPTION OF COURSE/MODULE REQUIREMENTS: written test (discussion of a research project in bone metabolism)

OUTLINE OF COURSE/MODULE CONTENT

Contents: Population under risk. Assessment of environmental pollutants exposure and their effects on reproduction and development: scientific methods and results. The importance of determining the levels of pollutants in the professional exposure in order to maintain the same biologically acceptable level to protect the workers' health. Recent knowledge on genetic monitoring, on the importance of recognition and identification of reproductive toxins. Recent knowledge on endocrine disruptors in human environment with emphasis on the potential of toxic metals (primarily cadmium) as endocrine disrupting chemicals. Own experience from research work in the field of reproductive toxicology of metals with examples of research protocols, interpretation of results and setting up conclusions. Physiology of reproduction. Vulnerable periods of organ and reproductive cells' development, vulnerable periods of embryonal and fetal development, neonatal and lactation period. Methods used in diagnostics of occupational diseases, with the special emphasis on their reproductive impact. Final session: journal-club type discussion on the article related to the course subjects.

OUTLINE OF COURSE/MODULE CONTENT

Morphology and histology of the limbic system and hippocampal formation. Brain recovery following injury (entorhinal cortex lesion as an experimental model system). Systems of acetylcholine, monoamine and glutamate-containing neurons in human brain, different hypothesis for the aetiology of schizophrenia. Mechanisms of synaptic plasticity in the developing and adult brain: retrograde messengers, volume transmission, Hebbian synapses, LTP and LTD. Continuous reorganization of dendritic spines in the adult brain. Structural and functional plasticity of the cerebral cortex across the life-span. Closing seminar: critical analysis of a selected scientific paper relevant to the course (Journal club).

OUTLINE OF COURSE/MODULE CONTENT

Lectures: Peculiarities of statistical methods in different research approaches in medicine (observational, experimental, clinical trial). Statistical inference and probability. Hypothesis testing, confidence intervals, estimations and likelihood. Statistical modeling and predictions (GLM, logistic regression analysis, Cox regression analysis) and association, interactions interpretation. Factor analysis. Meta-analysis.

Practicals: Working with statistical software. Descriptive statistics, data visualization, parameter estimation. Statistical tests (for quantitative and qualitative variables; dependent and independent samples). Power analysis. Logistic regression. Survival analysis (Kaplan-Meier, log-rank, Cox).

Seminars: Logistic regression. Survival analysis (Kaplan-Meier, log-rank, Cox). Factor analysis. Linking analysis to the study design. Meta-analysis.

Journal Club: Critical appraisal of applied statistical procedures in selected publications.

OUTLINE OF COURSE/MODULE CONTENT

The course consists of two modules, the aim of which is to introduce students to the process of intellectual property protection and ways of realizing the rights derived from intellectual property, and to enable them to independently search and solve basic issues related to the protection of the invention in the field of biomedicine. The second module elaborates in more detail the issue of evaluation of the value of scientific work that started in the subject "Structure, Methodology and Functioning of Scientific Work 1" and a hierarchy of evidence of the practical value of diagnostic, prognostic and therapeutic procedures in medicine. In accordance with this, it endeavors to instruct students to understand the appropriate procedures for analyzing and interpreting their own results, as well as their presentation in the form of text or oral presentations.

OUTLINE OF COURSE/MODULE CONTENT

Health care service represents one of the pillars of every civilized society. It is implemented through the existing network of medical institutions on primary, secondary and third level. The quality of entire health system, among other things, depends on availability and timeliness of health care in rural areas where distance separates the patients from modern medical centers and therefore jeopardizes those patients additionally. By usage of modern telemedicine systems doctors on geographically dispersed locations, or within the same location, are able to communicate directly with patient and to consult mutually which enables them to share important medical information in any form.

We would like to demonstrate all basic characteristics important for developing as well as for understanding of modern telemedicine, such as: a) EU-CPME-Standing Committee of European Doctors) guidance for developing and application of telemedicine. b) application of a methodological approach to evaluate telemedicine programs and its effectiveness c) the problem of standardization and evaluation of telemedicine applications, d) the use of telemedicine technologies in online databases e) the creation of web sites for e-education in medicine, f) telemedicine education: a national interactive center of medical education, g) role of telemedicine in public health, h) guidelines for strategic planning of eHealth development, i) examples of business intelligence in telemedicine using IT simulation scenarios (demonstrations / exercises), j) the evidence-based effectiveness and efficiency of telemedicine implementation and examples economic justifiability and cost-effectiveness of telemedicine investments, k) business and scientific aspects of ICT in medicine and telemedicine, as well as the l) application of modern telemedicine in Croatian and world clinical practice of the 21st century: Telecardiology, Teledermatology, Teleorthopedics-computer assisted

ORDINAL NUMBER: 78

TITLE OF COURSE/MODULE: Translational medicine – from disease to gene

STATUS OF COURSE/MODULE (REQUIRED/ELECTIVE): elective

NAME OF COURSE/MODULE TEACHER: Oliver Vugrek, PhD, senior research advisor

NAMES OF COURSE/MODULE TEACHER/ASSOCIATE TEACHER:

Jelena Knežević

Oliver Vugrek

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 10

OUTLINE OF COURSE/MODULE CONTENT

Lecture: S-Adenosylhomocysteine hydrolase (AHCY) deficiency – example for Translational Medicine; Introduction to methods and techniques relying on the use of genetic information to determine the function of molecules encoded by the genome, a approach defined as «functional genomics». For a better understanding of the use of molecular methods in scientific research, S-Adenosylhomocysteine hydrolase deficiency (KBC Rebro, Zagreb) will be presented to demonstrate the effectiveness of Translational Medicine. Next-generation sequencing (NGS) technology, with its high-throughput capacity and low cost, has developed rapidly in recent years and become an important analytical tool for many genomics researchers. NGS continues to be deployed in clinical laboratories, and recently at Ruđer Boskovic Institute, enabling rapid transformations in genomic medicine. These technologies have reduced the cost of large-scale sequencing by several orders of magnitude, and continuous advances are being made. It is now feasible to analyze an individual's near-complete exome or genome to assist in the diagnosis of a wide array of clinical scenarios. Next-generation sequencing technologies are also facilitating further advances in therapeutic decision making and disease prediction for at-risk patients. During our course we will allow valuable insights into these new technologies.

Lecture: Molecular methods in the 'omic's' era: Introduction to omic's methods such as Genomics, Proteomics, Cellomics, Metabolomics etc

Practice: NGS tehnology for DNA and RNA analysis – sample preparation from different sources (parafin, blood biopsies etc).

Practice: Recombinant proteins, Benefits of recombinant DNA technology, heterologous gene expression, purification of recombinant proteins and their functional analysis.

Seminar- round table: NGS - Next generation sequencing in diagnostics; DNA chips, Application of chip technology in disease diagnosis

Journal Club: Discussion of most recent achievements in the field of NGS technology in oncology.

NUMBER OF INSTRUCTION HOURS: 22

OUTLINE OF COURSE/MODULE CONTENT

The Republic of Croatia for many years is the country with largest number of liver transplants per million population. Exceptional results of the transplant program are comparable with most developed countries. The signing of the cooperation with Eurotransplant in 2006 created the preconditions for cooperation and exchange of knowledge with the respectable scientists and clinicians from leading clinics in the European Union. After the course the participants will be able to critically follow literature in this field focusing on problems of organ donation, indications and contraindications for liver transplantation, surgical techniques, specific diseases treatment (viral, autoimmune, cholestatic and malignant diseases, alcoholic liver cirrhosis, acute liver failure, nonalcoholic statohepatitis and rare liver diseases), immunosuppressive therapy, patohistological analysis of transplanted liver as well as peri- and post-operative complications.

The most current research in the filed of liver transplantation is directed towards the treatment of malignant diseases, discovery of new immunosuppressive protocols and prevention of viral hepatitis recurrence. The postgraduate course will introduce students with the knowledge on the latest developments in the filed of these topics. Problems related to organ shortage and the risk of malignant disease recurrence after transplantation accentuate the importance of the proper patient selection. Evaluation for neoadjuvant therapy eligibility, risk factors related to the disease recurrence after transplantation and molecular markers associated with the prediction of therapeutic response are the most active fields of research. Last five years hepatitis B and C therapy is an extremely active research area. In light of the discovery of new drugs, the application of a complete oral therapy in pre- and post-transplant period fundamentally changed the approach and the outcome of the transplant patients infected with these viruses. Calcineurin inhibitors in 80s revolutionized the survival outcome in the filed of liver transplantation. The use of these drugs on the other hand is associated with many detrimental side effects. Therefore, the current research is directed towards the discovery of new immunosuppressive drugs, the optimal immunosuppressive protocols based on individual patient characteristics, and the development of immune tolerance.

The curriculum is chronically divided into following subjects: Indications and contraindication for orthotopic liver transplantation (OLT); Indications for urgent liver transplantation; Artificial liver support for liver insufficiency; Advantages and disadvantages of Model of End Stage Liver Disease (MELD) score; Cadaveric and living donor liver transplantations, split liver transplantations; Surgical

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

techniques and complications; Specific problems regarding underlying liver disease: cholestatic liver disease: primary biliary cirrhosis, primary sclerosing cholangitis; viral diseases: chronic hepatitis C, chronic hepatitis B, hepatitis B and C co-infection and HIV infection, liver tumors: hepatocellular carcinoma and cholangiocellular carcinoma, alcoholic liver disease and non alcoholic steatohepatitis; Immunosuppressive therapy: standard, specific protocols, mechanisms of action and side effects as well as new research in this field; Immunological and non-immunological complications after OLT. Pathohistological aspects of liver transplantation. This course should enable transplantation to progress further, while at the same time attracts young doctors and researchers resulting in multidisciplinary and intriguing research.

OUTLINE OF COURSE/MODULE CONTENT

Historical discovery of MHC, evolution, animal model. Major Histocompatibility Complex in man - HLA (historical overview of discovery, experimental studies and nomenclature; localization, organization). Biological role of HLA (trimolecular complex; antigen processing and presentation). Structure of HLA Class I and Class II genes and molecules. Update on HLA Nomenclature.

Main characteristics of HLA (polymorphism, phenotype, haplotype, linkage disequilibrium, crossing-over, genotype). Laboratory techniques for detection of HLA antigens, genes and antibodies (serology; molecular typing: PCR-SSP, PCR-SSO; PRA; cross-match). Accreditation, external proficiency testing, EFI standards. Eurotransplant, organ allocation procedures (kidney, heart, liver, pancreas, lung). Croatian bone marrow donor registry CBMDR, Bone marrow donors worldwide BMDW – algorithms for donor selection in unrelated haematopoietic stem cell transplantation. HLA matching in organ transplantation (kidney, heart, liver, pancreas, cornea).

The role of HLA antibodies in organ transplantation (pre- and post- transplantation monitoring of donor specific antibodies DSA; cross-match, virtual cross match; % PRA, vPRA; highly sensitised patients). Posttransplantational monitoring of organ survival (hyperacute, acute and chronic rejection; chimerism follow-up; international project: «Collaborative Transplant Study»).

OUTLINE OF COURSE/MODULE CONTENT

Through this course, students will acquire basic and advanced knowledge on the concept of health/public health risks in emergency situations. It will be understood basic concepts such as crisis situations, accidents, disasters, alternative standards of care, responsibility, related to the different systems in Europe. Students will gain insight into the types of risks that are associated with different categories of emergencies, and will be able to apply the acquired knowledge to the depictions of specific cases (3 case studies - earthquake, terrorism, epidemics). The definition of risk in a crisis situation, the risk of treatment in a crisis situation, the responsibility of the involved persons and the services, ethics in health care and public health terms, the complexity of the concepts of utilitarianism and deontology applied in crisis action. The concept and definition of security of the personnel, the individual patient and the population. Sociological understanding of importance for preparedness and awareness for the prevention of health and public health risks in crisis situations. Rapid assessment of risks, availability of information and information management in crisis situations. Overview of international organizations, experiences and standards of the EU.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER: 85

TITLE OF COURSE/MODULE: Viral hepatitis

STATUS OF COURSE/MODULE (REQUIRED/ELECTIVE): elective

NAME OF COURSE/MODULE TEACHER: Professor Marko Duvnjak, MD, PhD; Professor Adriana Vince, MD, PhD

NAMES OF COURSE/MODULE TEACHER/ASSOCIATE TEACHER:

Neven Baršić
Alma Demirović
Davorka Dušek
Marko Duvnjak
Tajana Filipec Kanižaj
Ivana Kurelac
Neven Papić
Tajana Pavić
Adriana Vince
Lucija Virović Jukić
Snježana Židovec Lepej

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 25

OUTLINE OF COURSE/MODULE CONTENT

Viral hepatitis from A to E – epidemiology, clinical and laboratory characteristics. Natural course of hepatitis C, prognostic factors of progression. Therapy of chronic hepatitis C in naive patients. Therapy of chronic hepatitis C in experienced patients. Therapy of chronic hepatitis C with direct acting antiviral drugs. Extrahepatic manifestations of chronic hepatitis. Chronic hepatitis C with normal AST and ALT. Natural course of hepatitis B, prognostic factors of progression. Therapy of hepatitis B Side-effects of antiviral therapy and management. Liver biopsy – a golden standard ? Morphological changes in viral hepatitis. Laboratory diagnostics of viral hepatitis. Use of elastography in follow up of patients with chronic hepatitis. Pathogenesis of hepatic encephalopathy in acute liver failure. Natural history of HCV-related decompensated liver cirrhosis The impact of overweight, obesity and hepatic stasis on progression and treatment of chronic hepatitis Pathogenesis and treatment of HCV- or HBV- HIV coinfecting patients. Clinical and treatment aspects of viral hepatitis in patients with hematological, psychiatric and renal diseases. Experimental approach to viral hepatitis. Alternative therapies in the treatment of chronic hepatitis Liver transplantation in patients with HBV infection. Liver transplantation in patients with HCV infection. Management of patients with hepatocellular carcinoma. Critical analysis of selected course related scientific paper («journal club»).

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER: 86

TITLE OF COURSE/MODULE: Scientific approach to transfusion treatment

STATUS OF COURSE/MODULE (REQUIRED/ELECTIVE): elective

NAME OF COURSE/MODULE TEACHER: Prof. Jasna Mesarić, MD, PhD

NAMES OF COURSE/MODULE TEACHER/ASSOCIATE TEACHER:

Jasna Mesarić

Slobodanka Ostojić Kolonić

LANGUAGE OF INSTRUCTION IN COURSE/MODULE: Croatian or English, as required

NUMBER OF INSTRUCTION HOURS: 16

OUTLINE OF COURSE/MODULE CONTENT

The role of scientific evidence in transfusion treatment. Researches that have changed therapeutic viewpoints: model of acceptable transfusion threshold; and model of hemodilution. Clinical decision on transfusion therapy and volume replacement based on scientific evidence, with special reference to specific entities in surgery, internal medicine, paediatrics, oncology and gynaecology. Methodology of assessing transfusion therapy efficacy and justifiability as a scientific task in the process of improvement of transfusion treatment quality and safety. Transfusion treatment side effects (vein-to-vein haemovigilance). Alternative modalities of transfusion treatment.

The topics proposed will be adjusted to the group of students; an additional topic can also be introduced, depending on the specific interests of the students.

Final seminar: critical analysis of a scientific article on the topic (journal club).

A.6. TEACHING AND RESEARCH CONDITIONS FOR IMPLEMENTATION OF THE DOCTORAL STUDY

A.6.1. LIST OF TEACHERS AND POTENTIAL SUPERVISORS

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Assist. Prof. Jakov Ajduk

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University hospital center Sestre milosrdnice, University of Medicine, Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Elektrofiziološke metode u medicinskim istraživanjima

BIOGRAPHY

ENT specialist, earsurgeon and subspecialist of audiology, Department of ENT Head and Neck Surgery, University Hospital Center “Sestre Milosrdnice”, Zagreb, Croatia.

- 2017. ass. prof. at the School of Medicine, University of Zagreb.

Vice chairman of the Croatian Society of otology and neurotology.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 2017

LIST OF PUBLISHED WORK WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

1. Hyperbaric Oxygen Therapy as Salvage Therapy for Sudden Sensorineural Hearing Loss.

Ajduk J, Ries M, Trotić R, Marinac I, Vlatka K, Bedeković V.

J Int Adv Otol. 2017 Apr;13(1):61-64. doi: 10.5152/iao.2017.3185.

2. Significance of intraoperative findings in revision tympanomastoidectomy.

Košec A, Kelava I, Ajduk J, Ries M, Trotić R, Bedeković V.

Am J Otolaryngol. 2017 Jul - Aug;38(4):462-465. doi: 10.1016/j.amjoto.2017.04.006. Epub 2017 Apr 12.

3. Primary Ameloblastoma of the Temporal Bone. Košec A, Ajduk J, Ries M, Trotić R.

J Oral Maxillofac Surg. 2017 Jun;75(6):1300.e1-1300.e4. doi: 10.1016/j.joms.2017.01.014. Epub 2017 Jan 24.

4. A case of bilateral congenital middle ear cholesteatoma. Ries M, Kostić M, Ajduk J, Trotić R, Bedeković V.

Braz J Otorhinolaryngol. 2017 Nov - Dec;83(6):723-725. doi: 10.1016/j.bjorl.2015.09.003. Epub 2015 Dec 17.

5. Nasopharyngeal bacterial flora in healthy preschool children during winter-spring months.

Ries M, Kostić M, Zdravac D, Drvis P, Ajduk J, Trotić R.

Coll Antropol. 2013 Jun;37(2):415-22.

6. Hidradenoma of the external auditory canal: clinical presentation and surgical treatment.

Drvis P, Ries M, Zurak K, Trotić R, Ajduk J, Stevanović S. Coll Antropol. 2012 Nov;36 Suppl 2:159-61.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

7. Regulatory T cells in children undergoing rush venom immunotherapy. Ajduk J, Turkalj M, Gagro A.

Allergy Asthma Proc. 2012 Nov-Dec;33(6):525-30. doi: 10.2500/aap.2012.33.3608.

8. Long-term functional outcomes after 10 years of bilateral cochlear implant use.

Trotić R, Kostić M, Ries M, Drvis P, Ajduk J, Petrović I. Coll Antropol. 2012 Mar;36(1):161-5.

9. Temporomandibular joint fistula into the external ear canal. Ajduk J, Ries M, Vagic D, Batos-Tripalo A.

J Laryngol Otol. 2012 Aug;126(8):837-9. doi: 10.1017/S0022215112001144.

10. Clinical and pathophysiological patterns of otitis externa and overview of problematic cases.

Dzepina D, Ajduk J, Zurak K. Lijec Vjesn. 2011 May-Jun;133(5-6):204-8.

11. Etiology of deafness in children cochlear implant candidates in Croatia. Drvis P, Ajduk J, Trotić R, Ries M, Kosović V, Hat J.

Coll Antropol. 2008 Dec;32(4):1111-3.

12. Effect of house dust mite immunotherapy on transforming growth factor beta1-producing T cells in asthmatic children. Ajduk J, Marinic I, Aberle N, Rabatic S, Gagro A.

Ann Allergy Asthma Immunol. 2008 Apr;100(4):314-22. doi: 10.1016/S1081-1206(10)60592-3.

13. Effect of cysteinyl leukotriene receptor antagonist on CD11b and CD23 expression in asthmatic children.

Gagro A, Aberle N, Rabatić S, Ajduk J, Jelacić J, Dekaris D.

Clin Exp Allergy. 2004 Jun;34(6):939-44.

LIST OF PUBLISHED WORK IN THE LAST FIVE YEARS

1. Hyperbaric Oxygen Therapy as Salvage Therapy for Sudden Sensorineural Hearing Loss.

Ajduk J, Ries M, Trotić R, Marinac I, Vlatka K, Bedeković V.

J Int Adv Otol. 2017 Apr;13(1):61-64. doi: 10.5152/iao.2017.3185.

2. Significance of intraoperative findings in revision tympanomastoidectomy.

Košec A, Kelava I, Ajduk J, Ries M, Trotić R, Bedeković V.

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Evidence-based medicine

BIOGRAPHY

Specialist gynecologist and obstetrician, born 1959. in Zagreb.

Graduated at Zagreb University, school of Medicine 1989.

Since 1989 work as gynecologist in UK. From 2003 Professor at Liverpool University, School of Medicine 2010. head of University department of obstetrics and gynecology and pediatrics, Liverpool University, 2014 i Director Harris-Wellbeing Centre.

Author of more than 200 scientific papers, principal investigator in many scientific projects and well as randomized controlled trials. Editor Cochrane Pregnancy Childbirth Group, 2013 president of Academic board Royal College of Obstetricians and Gynecologists.

Special interest highrisk pregnancy, fetal medicine, translation medicine and Evidence Based Medicine.

PROFESSOR OF FETAL AND MATERNAL MEDICINE/ HONORARY CONSULTANT OBSTETRICIAN, University of Liverpool and Liverpool Women's Hospital

Head of Women's and Children's Health, Institute of Translational Medicine, University of Liverpool.

Director of Fetal Medicine Unit, Liverpool Women's Hospital

Director of Harris Wellbeing Preterm Birth Research Centre

Research

My research interest is in fetal medicine, high risk obstetrics, methodology of randomised controlled trials, meta-analysis and Cochrane systematic reviews.

Membership of International and National Committees and Boards

- Royal College of Obstetricians and Gynaecologists – Chair of Academic Committee and Council Member (2013-2017)
- Cochrane Pregnancy and Childbirth Group – Joint Co-ordinating Editor (2007-date)
- NIHR HTA Commissioning Board Member (2013-2017)
- Cheshire and Merseyside NIHR Comprehensive Research Network – Clinical Lead for Reproductive Medicine, Children and Genetics (2014 -2018)

Keynote and plenary lectures

I gave more than 60 plenary lectures at international conferences including RCOG World Congress, World Congress in Fetal Medicine, European Congress in Perinatal Medicine and ISUOG.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 2003

LIST OF PUBLISHED WORK WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Mirna Natalija Aničić, MD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University of Zagreb School of Medicine,
University Hospital Centre Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Liver transplantation in children

BIOGRAPHY

Born 22.08.1984. in Zagreb. She finished Classical Grammar School.

2002 enrolled at the Faculty of Medicine in Zagreb

2005- 2007 demonstrator at the Department of Pathology

2007th to 2008th a demonstrator at the Pediatrics Department

Graduated in 2008, average rating: 4.42

2008th to 2009th internship (KBC Zagreb)

2009th to 2016th Postgraduate Doctoral Program "Biomedicine and Health",
ongoing PhD dissertation, "Liver complications of type 1 diabetes mellitus"

2010.-2014.- pediatric specialist at Pediatric Clinic KBC Zagreb

2014-2018- a pediatric specialist at the Pediatric Clinic of KBC Zagreb

2018-Today, subspecialist of pediatric gastroenterology, hepatology and diet

Since September, he participated as an associate in teaching in the undergraduate teaching of the English study "Pediatrics" since February 2016. in the implementation of the postgraduate specialist study "Emergency medicine", from September 2016. is a teacher of the undergraduate course "Foundations of Medical Aptitude", and since 2017 participated in conducting postgraduate studies "Anesthesiology and Reanimation".

From December 2016 is an Assistant to the Department of Pediatrics.

Member of the Croatian Medical Association, Croatian Pediatric Society, Croatian Society for Pediatric Gastroenterology, Hepatology and Nutrition and ESPGHAN (European Society for Pediatric Gastroenterology, Hepatology and Nutrition).

Knowledge of foreign languages: English active, German passive.

Working on a Computer: Microsoft Office

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED IN THE LAST FIVE YEARS

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Prof. Mariastefania Antica, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Ruđer Bošković Institute, Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:

Molecular features of lymphocyte development, Immunological recognition

BIOGRAPHY

Professional background relevance: M. Antica has a long standing interest in stem cells, lymphocyte development and differentiation, leukemia and cancer research. She was involved in the basic and clinical studies on stem cells for lymphocytes: the time and place of commitment of precursors for the lymphocyte lineage (L. Wu and M. Antica, et al., 1991 Developmental potential of the earliest precursor cells from the adult mouse thymus. *J. Exp. Med* 174, 1617). Her work resulted in a finding of a new population of stem cells in the fetal thymus: (Antica et al 1993. *J. Immunol.* 151, 1-9) and a new population of stem cells in the bone marrow (Antica, et al 1994. *Blood* 84, 111; and a book chapter: R. Scollay, and M. Antica, 1995. Stem cells for lymphocytes: comments on the time and place of commitment of precursors for the T lineage. *Bone Marrow Transplantation, Basic and Clinical Studies*, S. Ikehara, F. Takaku, R. A. Good (Eds) Springer - Verlag, pp. 20-28). With her collaborators she cloned the murine U2 snRNP-A' gene differentially expressed during lymphocyte development (M. Antica, et al 2002. *Immunol letters* 82, 217-223). She returned to the Rudjer Boskovic Institute as a Senior Scientist and was appointed Associate Professor in year 2000 and Professor in 2005. Her publications are highly relevant to the proposed subject of the book, relating to adult stem cells and the reconstitution of cellular immunity and leukemia development. Further work proved T lymphocyte development at extrathymic sites *in vivo* (M. Antica and R. Scollay, 1999. *J. Immunol.*, 163 206-211.)

M. Antica's current work concerns transcription factors that regulate lymphocyte development and their impairment in leukemia (M. Antica, et al 2008. *Blood* 111 3296 – 3297) and research on stem cells from the adult human thymus (partner on the FP7 Health project: Thymistem).

Research experience M. Antica has been working in the area of cellular and molecular biology, adult stem cells, transcription factors in lymphocyte and leukemia development and cancer medicine.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 5th June 2018.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Darko Antičević, professor

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University Josip Juraj Strossmayer Osijek, School of dental medicine and health

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Understanding bone metabolism – basic science in clinical practice

BIOGRAPHY

Affiliation: Physician, Specialist-Consultant in Orthopaedics, Clinical Hospital Centre Zagreb, School of Medicine University of Zagreb

Education: 1973 Medical School, University of Zagreb

1979 Fellowship in Orthopaedics

1992-3 education Hospital for Joint Diseases, New York

Academic Degrees: 1978 M.D., 1981 M.S., 2000 Ph.D.

Internal Clinic Zagreb,

Collaborator in 4 scientific projects, principal investigator “Genomic and proteomic analysis of biomarkers in rare skeletal disorders”

Teaching experience in undergraduate and postgraduate subjects.

Member of Editorial board Liječnički vjesnik, reviewer for Croatian Medical Journal, *Pediatrica Croatica*.

Member of Pediatric Orthopedic Society of North America (POSNA) and European Pediatric Orthopaedic Society (EPOS)

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 11 September 2018

LIST OF PUBLISHED WORK WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

Kubat O, Antičević D. Ortopedsko liječenje djece s rijetkim bolestima – koštanim displazijama. *Pediatr Croat* 2013;57:21-6.

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED AND WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

Associate in research projects of the Department of Orthopaedic Surgery:

1980. Frequency aseptically femoral head necrosis in a population with special emphasis on alcoholism;
1984. 1988. Early detection of spinal deformity in childhood and adolescence
- 1991.-1995. The study of deformations of the spine (scoliosis and kyphosis)
- 1991.-1995. Research of hip deformity and disease by ultrasound
- 2007.-2009. Genomic and proteomic analysis of biomarkers in the blood in the rare bone disease (leader)

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Nataša Antoljak, MD, PhD, associated professor**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** Croatian Institute of Public Health and cumulatively at the Medical School, University of Zagreb.**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Epidemiological research methods**BIOGRAPHY**

Working in the Department of Epidemiology of chronic mass diseases in the Croatian Institute of Public Health and cumulatively at the Medical School University of Zagreb. She graduated from the School of Medicine, University of Zagreb in 1987. and parallel at the Music Academy on the subject of professional piano on 1985. She also completed postgraduate studies at the Music Academy of the art training, followed by postgraduate study in Allergology and Clinical Immunology at the Medical School, University of Zagreb. After the defense master thesis on theme "Specific growth factor of liver and immune status in patients with liver disease," she successfully defended Ph.D. dissertation with theme: "Hepatocyte growth factor, endothelin, and antioxidant status in patients with alcoholic liver disease." She passed medical specialistic exam in Epidemiology in 2007. She participates in the teaching of epidemiology at the undergraduate study (Croatian and English), postgraduate studies, doctoral studies, a co-leader a subject Clinical Toxicology With The Epidemiologic Methods at Pharmacy and Biochemistry Faculty, University of Zagreb. She was mentor for one student graduate thesis, and a member of the committee to review the work of two graduate and two choices for the scientific title. Professional activities is related to the area of epidemiology of chronic mass diseases, particularly the implementation of programs for early diagnosis of colorectal cancer, accidents, diabetes and cardiovascular disease, and the second part of the research application of new biochemical parameters in hepatology and gastroenterology, and other diseases (osteoporosis, diabetes, acute renal failure). She was author of 17 original scientific and expert papers, 78 conference reports, and two chapters in the manual for post-graduate studies, School of Medicine in Zagreb. She was a collaborator and co-author of the European guidelines for quality assurance in the screening for colorectal cancer, coauthor of the translation of medical English-Croatian dictionaries and proofreader of English-Croatian part of the dental bilingual dictionaries. She is an associate in several publications of the Croatian Institute of Public Health, and author and editor of several articles intended for the public at the website www.zdravlje.hr. She is a member of the team on project: "Glutathione S-transferase and superoxide dismutase in the etiopathogenesis of the disease" and "Risks of multiple accidents among the injured being treated in hospitals." She is a President of Commission for the implementation of the Croatian national program for early diagnose of colorectal cancer at the Ministry of Health and Welfare and a member of the expert committee for the same program.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: associate professor and higher scientific degree 2013.**LIST OF PUBLISHED WORK WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME**

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Mirjana Babić Leko, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** University of Zagreb Medical School**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Neurobiology of aging**BIOGRAPHY**

Mirjana Babić Leko studied on Faculty of Science, University of Zagreb (molecular biology). She attended PhD study Molecular Biosciences, Josip Juraj Strossmayer University of Osijek from 2012.-2017. She worked on Croatian Institute for Brain Research, University of Zagreb Medical School since 2012. as project collaborator and since 2015. as assistant at the Department of Neuroscience. She was collaborator of 6 scientific projects. She was trained at Wolfson Centre for Inherited Neuromuscular Disease Oswestry, UK (2014.), Laboratory of Neurogenesis and Neuropoiesis, Monserrato (Cagliari), Italy (2013.), Hannover Biomedical Research School, Hannover, Germany (2011.). She published 17 scientific papers (9 cited in Current Contents), two book chapters and 29 conference abstracts. She was awarded with ADRIS scholarship for PhD students (2016.), award for best poster in basic sciences - Croatian Congress on Alzheimer's Disease CROCAD-16, Tučepi 2016. and CROCAD-14, Brela 2014., scholarship of University of Zagreb for PhD students and assistants in 2015., HEP donation in 2014., FEBS Short-term fellowship – Oswestry, UK 2014., scholarship of Italian Government (2013.) and scholarship of COST CM1103 action (2013.).

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Maja Banović, MD, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University of Zagreb School of Medicine

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Human Reproduction

BIOGRAPHY

Education

2018. Human reproduction specialist, Clinical Hospital Centre Zagreb

2016 Ph.D. in Medical Sciences, School of Medicine, University of Zagreb

2010. Obstetrics and Gynaecology specialist, Clinical Hospital Centre Zagreb

2004. M. D. degree, School of Medicine, University of Zagreb

Position

Since 2016. Senior Assistant, University of Zagreb, School of Medicine, Zagreb, Croatia

Since 2010. Clinical Hospital Centre Zagreb

Scholarships

2018. Erasmus scholarship for University of Zagreb teaching staff – training at St Thomas' and Guy's Hospital HNS Foundation Trust – Assisted Conception Unit, London, UK.

Mentorships and teaching

Integrated Undergraduate and Graduate Program School of Medicine at University of Zagreb curriculums obstetrics and gynaecology (Croatian and English).

Specialist postgraduate studies of School medicine and Obstetrics and Gynaecology at the Medical School of the University of Zagreb

Mentorship of 2 students graduate thesis.

Administrative activities

Secretary of the Croatian Society of Human reproduction and Gynaecological endocrinology, Croatian Medical Chamber.

Awards

Rector's Award University of Zagreb School of Medicine for best student paper 1999/2000.

Memberships in Professional Associations

Croatian Society of Human reproduction and Gynaecological endocrinology, Croatian Medical Chamber.

Member of the Croatian Society of Gynaecologists and Obstetricians, Croatian Medical Chamber

Member of the Croatian Menopausal Society, Croatian Medical Chamber

Publications

Original scientific papers in WoS-indexed and other scientific journals

Total citations excluding self-citations:

Congress communications (abstracts) in SCI/CC-indexed journals (2)

Book chapters and textbook chapters (1)

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: July 2016.

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Professor Ivo Barić, MD, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University of Zagreb, School of Medicine & University Hospital Centre Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Selected chapters in epileptology in developmental age

BIOGRAPHY

DATE OF BIRTH : August 22, 1959

POSITION TITLE

1. Full Professor of Pediatrics, School of Medicine Zagreb, Croatia
2. Head of the Division for Medical Genetics and Metabolic Diseases, Department of Pediatrics, University Hospital Center Zagreb, Croatia (Referral Center for Medical Genetics and Metabolic Disease of Children of the Ministry of Health, Republic of Croatia)

TRAINING (Start with University degree)

1983- graduated at School of Medicine in Zagreb

1984-1985 Internship in the University Hospital “Mercy Sisters”, Zagreb (prolonged due to 1 year compulsory army service)

1986-1988 research fellow at the Department of Paediatrics, University Hospital “Mercy Sisters”, Zagreb (during fellowship completed four semesters postgraduate studies “Allergology and Clinical Immunology”).

1988-1992 residency in paediatrics at the University Hospital Center Zagreb, ended with achieving status-specialist in paediatrics (during residency completed two semesters postgraduate studies “Clinical Paediatrics”)

1991 Fellowship lasting 10 months in Heidelberg, Germany; dealing with molecular genetics of phenylketonuria as a member of the Research group of the University Children’s Hospital Heidelberg

1996-1997- Fellowship in University Children’s Hospital in Marburg, lasting 10 months, supported by Alexander von Humboldt Foundation; dealing with organic acidurias and selective screening for inherited metabolic diseases

After that, numerous international symposiums, congresses and courses in the field of genetics and inherited metabolic diseases

2003- gained status of “subspecialist in medical genetics”

2012- completed „Good Clinical Practice Guideline Course“

INSTITUTION AND LOCATION DEGREE (if applicable) YEAR(s) FIELD OF STUDY

School of Medicine Zagreb Medical doctor 1983, Medicine

School of Medicine Zagreb Ph.D.1992, Medicine, thesis related to molecular genetics of phenylketonuria

Ministry of Health, Republic of Croatia Specialist in pediatrics 1992 Pediatrics

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Ministry of Health, Republic of Croatia Subspecialist in medical genetics 2003 Medical genetics

Ministry of Health, Republic of Croatia Primarius 2004 Medicine, pediatrics, genetics

A. Positions and Honors (Chronological order)

Positions and Employment

1984-1985 Internship in the University Hospital “Mercy Sisters”, Zagreb (prolonged due to 1 year compulsory army service)

1986 General practitioner

1986-1988 Research fellow at the Department of Paediatrics, University Hospital “Mercy Sisters”, Zagreb

1988-1992 Resident in paediatrics at the University Hospital Center Zagreb

1992-2009 Specialist in paediatrics at Division of Genetics and Metabolism, Department of Paediatrics, University Hospital Center Zagreb. The division is Referral Center for Medical Genetics and Metabolic Diseases in Children of Republic of Croatia.

2009- Head of the Division of Metabolic Diseases, Department of Paediatrics, University Hospital Center Zagreb.

2017- Head of the Division of Medical Genetics and Metabolic Diseases, Department of Paediatrics, University Hospital Center Zagreb (Referral Center for Medical Genetics and Metabolic Diseases in Children of Republic of Croatia, member of the European reference network for metabolic diseases “MetabERN”).

Since 1995 teaching paediatrics at Zagreb School of Medicine, from year 2008 as full professor of paediatrics.

Member of the Society for Study of Inborn Errors of Metabolism (Council member since 2013)

Member of the European Union Committee of Experts for Rare Diseases (EUCERD), after that member of the European Commission Expert Group on Rare Diseases

Member of the Advisory Board of the European Metabolic Group

Member of the Advisory Board of the Recordati Rare Diseases Foundation

Head of the Committee for Specialist Education in Pediatrics of the National Committee for Specialist Education of Medical Doctors of the Ministry of Health, Republic of Croatia

Head of the Committee for Newborn Screening of the Ministry of Health, Republic of Croatia

Honors and Awards

2005-2009 President of the Croatian Society of Human Genetics

Since 2009 Member of the Academy of Medical Sciences of Croatia

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2005- “Award Ante Šerčer” given by Academy of Medical Sciences of Croatia for the best article of Croatian authors in the field of medicine in year 2004 (Baric I, et al. S-adenosylhomocysteine hydrolase deficiency in a human: a genetic disorder of methionine metabolism. Proc Natl Acad Sci U S A. 2004;101:4234-9)

2005- “Horst Bickel Award” for the discovery and further work on previously unknown inherited disorder of methionine metabolism- the S-adenosylhomocysteine hydrolase deficiency.

2010- Award of the Croatian Paediatric Society for the best paper in the previous two years period (Barić I. Inherited disorders in the conversion of methionine to homocysteine. J Inherit Metab Dis 2009;32:459-71)

2012- Award for best scientists at Zagreb School of Medicine for the last five year research period (2007-2011; was best ranked among paediatricians)

2016- Member of the Court of Honour of the Croatian Medical Chamber

2018- Award of the Croatian Paediatric Society for the best paper in the previous two years period (Barić I, Staufner C, Augoustides-Savvopoulou P, Chien YH, Dobbelaere D, Grünert SC, Opladen T, Petković Ramadža D, Rakić B, Wedell A, Blom HJ. Consensus recommendations for the diagnosis, treatment and follow-up of inherited methylation disorders. J Inherit Metab Dis 2017;40:5-20.

B. Selected peer-reviewed publications (see below in a separate part of this form)

Until April 2018, there were 80 publications in CC-journals, 84 in WoS Core Collection (SCI-EXP/SSCI), with in total 1683 citations and h-index 23. There are 150 publications in extenso, 20 chapters in textbooks and professional books and several dozen educational texts.

C. Editorial and other review activities

Communicating editor and now member of the Advisory Board in the Journal of Inherited Metabolic Disease.

Editor of the web-pages of the Croatian Paediatric Society.

Reviewer for international journals cited in Current Contents (“Journal of Inherited Metabolic Disease”, “Wiener klinische Wochenschrift”, “Clinica Chimica Acta”, “Molecular Genetics and Metabolism”, “American Journal of Human Genetics”, “Orphanet Journal of Rare Diseases”).

Reviewer on two occasions of scientific projects for the agency of the Czech government and on few occasions for the Ministry of Science of the Republic of Croatia. Evaluator of a candidate for professor position at the University of Colorado, Denver, Colorado, USA.

D. Professional activities

Head of the Division of Medical genetics and Metabolic Diseases, Department of Paediatrics, University Hospital Center Zagreb.

Full professor of paediatrics at the University of Zagreb, School of Medicine.

Board member of the Croatian Pediatric Society.

President of the Section for Metabolic Diseases of the Croatian Pediatric Society.

Research activities: During entire carrier special research interest was for inborn errors of metabolism, since 2000 as principal investigator of the research project “Inherited metabolic and other monogenic disorders of children”. The focus of interest is genotype-phenotype correlation in inborn errors of metabolism. In the last decade particular interest and efforts are directed to the S-adenosylhomocysteine hydrolase deficiency, a previously unknown inherited disorder of methionine metabolism, first reported by our group. This disease is a unique natural model for studying how disorders of methylation affect health and at the same time a poorly understood inherited muscle disease. We were involved in diagnostic work-up of most patients described so far worldwide, all having congenital muscle disease, and try to clarify the pathogenesis of this disease, with belief that this mechanism is important not only for this disease but also for other more common pathological muscle conditions.

So far, co-ordinator for Croatia in four international research projects funded by EU: “European network focused on Congenital Disorders of Glycosylation”(program FP6), “European Registry and Network for Intoxication Type Metabolic Diseases” (program DG Sanco), „Inherited neurometabolic diseases information network“(program DG Sanco) and “ The network and registry for homocystinurias and methylation defects”(program DG Sanco).

Principal investigator in two interventional clinical trials.

Organizer and co-organizer of numerous national and international professional meetings (among them- main organizer of “Orphan Europe Academy”- “4th Inborn Errors in Neonatology Course” in 2010 in Dubrovnik, « Southeastern Europe Inherited Neurometabolic Disease Networking Meeting in 2015 in Zagreb, « 49th European Metabolic Group Conference » in 2017 in Zagreb).

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 14APR 2015

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: prof. Nina Barišić, MD PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Department of Pediatrics University of Medical School

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Selected chapters in epileptology in developmental age

BIOGRAPHY

prof Barišić Nina is full time tenured professor since 2016 in cumulative employment at the Faculty of Medicine University of Zagreb . Head of Division of Child Neurology since 2003. Head of the Pediatrics at University of Zagreb Medical School in 2 mandates (from 2009-2015) and acting director executive (2016 – 2017).Leader for Neurology at the postgraduate study (PS) ‘Pediatrics’ at the Medical School (Faculty of Medicine), University of Zagreb

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 2016

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Assist Prof. Stjepan Barišin, MD, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Clinic for Anesthesiology, Reanimatology and Intensive Medicine, UH Dubrava, Av. G.Šuška 6, Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Hand surgery

BIOGRAPHY

Education

1993 finished Medical School, University of Zagreb - MD

1997 attended the biennial postgraduate study (first year - Clinical pharmacology with toxicology; second year - Biomedical sciences)

2004 finished postgraduated study with topic “Preoperative beta-blockade of heart and hemodynamic response during inotropic support” and received scientific degree MSc

2007 defended thesis "Prolonged hemodynamic effect, safety and cardioprotective effect of levosimendan on myocardial function during and after off-pump coronary artery bypass grafting" and received scientific degree PhD

1997 teacher on University of Applied Health Sciences, Zagreb

2010 promoted by the Ministry of Health to the position - Primarius

2010 elected to the scientific position – Research associate for the field of Biomedicine and health, the field of clinical medical sciences, Faculty of Medicine, University JJ Strossmayer of Osijek

2012 elected to the position - College professor on University of Applied Health Sciences, Zagreb

2012 elected to the title - Senior assistant for the scientific field of Biomedicine and health sciences, scientific field of Clinical medical sciences, scientific branch of Anesthesiology and

Reanimation in the Department of Anesthesiology, Resuscitation and Intensive Care Medicine, Faculty of Medicine, University JJ Strossmayer of Osijek

2013 elected to the position of Acting Head of the Department of Anesthesiology, Resuscitation and Intensive Care on University of Applied Health Sciences, Zagreb

2014 elected to the title – Assistant Professor on Faculty of Medicine, University JJ Strossmayer of Osijek

2017 elected to the scientific position – Senior research associate for the field of Biomedicine and health, the field of Clinical medical sciences, Faculty of Medicine, University JJ Strossmayer of Osijek

Work experience

1995 internship in University hospital Merkur, Zagreb

1996 - 2000 worked as a resident of Anesthesiology, Reanimatology and Intensive care medicine on Dpt of Cardiac anesthesiology and intensive care in UH Dubrava

2000 - 2016 worked as a specialist on Clinic of Anesthesiology, Reanimatology and Intensive Care Medicine, UH Dubrava

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2017 founder of Referral Centre of the Ministry of Health for Hemodynamic Monitoring in Intensive Care of Surgical Patients, the first referral centre in Croatia from the field of anesthesiology and intensive medicine

2016 – 2018 Head of Clinic of Anesthesiology, Reanimatology and Intensive Care Medicine, UH Dubrava, Zagreb

Research activities

2003 - 2006 scientific project “Modulation of systemic inflammatory response in heart surgery”, No 0198019 (Ministry of Science)

2006 - 2012 scientific project “Predictive Models in Health Care” No 108-0982560-0257 (Ministry of Science)

2013 - 2014 scientific project “Evaluation of potential tumor markers in the diagnosis and prognosis of hepatocellular cancer” (University of Zagreb)

2018 - National Coordinator and Researcher at the multicenter study - "MET-REPAIR study" under the European Society of Anesthesiology (ESA)

Publications

As autor and coauthor, published about 50 papers (11 in CC) and abstracts

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: October 27, 2014
Assistant Professor on Faculty of Medicine, University JJ Strossmayer, Osijek

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Silvio Bašić, MD, PhD, research associate**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** University hospital Dubrava**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Pathophysiology of the brain and CSF**BIOGRAPHY**

Silvio Basic was born in 1968 in Zagreb, Croatia. His current post is Head of the Department of Neurology at the University Hospital Dubrava in Zagreb, Head of the Referral Centre of Croatian Ministry of Health for preoperative assessment of patients with pharmaco-resistant epilepsy, Professor of neurology at the University of Applied Health Sciences in Zagreb, Assistant Professor of neurology at the University of Osijek and at the University of Mostar (Bosnia and Herzegovina). He studied medicine at the University of Zagreb School of Medicine and trained in Neurology at the University Hospital Zagreb, followed by several training courses in epileptology and invasive EEG monitoring. He was awarded a PhD in 2008 for his thesis on the role of PGP in epilepsy pharmaco-resistance. During his professional career, his primary mission was improvement of epilepsy management, not only in Croatia but also in the whole region. In 2001 his team, first in the region, started using vagus nerve stimulation. In the following years, his enthusiasm and constant wish for improvement resulted in the implementation of stereoelectroencephalography (SEEG) as a standard procedure in preoperative assessment of patients with pharmaco-resistant epilepsy in Croatia in 2012. Since then, his Centre is the only centre which has been performing this procedure in Croatia and neighbouring countries, including SEEG-guided RF-thermocoagulation as a treatment technique in a selected population of patients from 2015. He is very active in education, and from the beginning of his teaching experience he has been trying to emphasize the importance of epilepsy to medical students, neurology residents, neurologists and other medical specialists, mainly psychiatrists, internal medicine specialists and general practitioners. He introduced the epileptology course at the Medical School in Osijek (Croatia), and at the Medical School in Mostar (Bosnia and Herzegovina), and has been continuously organizing numerous teaching courses on epilepsy. Likewise, he regularly contributes to teaching courses, conferences and lectures around Europe. He chairs the Master's course in Neurology at the University of Osijek. He has been a board member of the Croatian League Against Epilepsy since 2002, and a board member of the Croatian Neurology Society since 2013. In 2016, he was elected the President of the Croatian League Against Epilepsy. He is also a member of the NATO STO Human Factors and Medicine Panel. He was the president of the Organizing committee of thirteen national and international neurology conferences, and the president of the Organizing committee of the 8th ILAE Migrating Course on epilepsy held in Dubrovnik in 2014. His main research interest is pathophysiology and management of pharmaco-resistant epilepsy. He has supervised 8 PhD students and is currently the mentor of 6 neurology residents. He has published over 40 peer-reviewed articles, 6 book chapters and 1 book. Silvio Basic is married, and has three children.

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED AND WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

The role of genetic markers in the development of cerebral atherosclerotic disease

Functional Diagnostics of Brain Circulation

Phosphorylation of Protein in Development and Alzheimer's Disease

Research of efficiency of functional neurosurgical procedures

The role of vascular risk factors in the pathogenesis of Alzheimer's disease

Influenza and the share of pharmacogenetics in the development and outcome of acute and chronic diseases

1H-MRS changes in prediction of therapeutic response, relapse and depression recovery

Determinants and early diagnosis of motor neuronal diseases in the Croatian population

Pathophysiology of Severe Brain Injury and Craniospinal Volumetry

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED IN THE LAST FIVE YEARS

The role of genetic markers in the development of cerebral atherosclerotic disease

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Nikolina Bašić-Jukić, Prof, MD, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Faculty of medicine, University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Kidney transplantation

BIOGRAPHY

Date of birth: July 15, 1971

1989-1994. School of Medicine, University of Zagreb
1994-1998. Assistant at Department of Anatomy, School of Medicine, University of Zagreb
1998-2002. Internship in Internal medicine, University Hospital Centre Zagreb
2002- Working at Department of Nephrology, Arterial hypertension, Dialysis and Transplantation, University Hospital Centre Zagreb

1997. Bachelor of science “Expression of transforming growth factor beta 1 in mice kidney”

1998. Masters thesis “Expression of mRNA for bone morphogenetic proteins in developing and adult kidney, eye and brain”

Current working position: specialist in internal medicine –nephrologist -Department of Nephrology, arterial hypertension, dialysis and transplantation, University Hospital Zagreb, Head of Dept for renal transplantation

Married, mother of two children

AWARDS:

1994. Award “Drago Perovic” for the best student of School of Medicine in academic year 93/94

1995. Award for participation in the most successful project of the year (Creative BioMolecules, Hopkinton, MA, USA)

1998. Award “Borislav Nakic” from Croatian Academy of Medical Sciences for the best paper published by the young author

1999. Award Zonta International for the achievements in genetics

2000. Award for the best paper published in Acta Orthopaedica Scandinavica in 2000.

2006. Award “Almae Matris Alumni Croaticae”- United Kingdom Association of Alumni and Friends of Croatian Universities for achievements in scientific work

2013. Award of City of Podgorica, Montenegro, for establishment of the renal transplant program in Montenegro

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

SCIENTIFIC EXPERIENCE:

1994-1998. Laboratory for mineralized tissues at Dept. of Anatomy, familiar with most of the methods in molecular biology that employ DNA and RNA, cell culture work

Experienced in work with laboratory animals (mice, rats)

From 1998. Epidemiological investigations – nephrology, dialysis and transplantation

2002- Investigations in the field of nephrology – molecular biology of kidney diseases

Scientific projects

participated in numerous scientific projects from the beginning of career,

leader of a project « Risk factors for development of atherosclerosis after kidney transplantation »
financed by Ministry of science and sports.

Participation in editorial boards

She is Deputy editor of Bantao Journal, member of Editorial board of Acta Medica Croatica, and editor of thematic issues on nephrology of Acta Medica Croatica.

Reviewer

Prof. Basic Jukic is an active reviewer for: Therapeutic Apheresis and Dialysis, Croatian Medical Journal, Acta Medica Croatica, International Journal of Osteoporosis, Peritoneal Dialysis International, BANTAO Journal, Transplant Infective Diseases, Case reports in Nephrology and Urology, Asian Journal of Andrology, Renal failure and International Nephrology and Urology.

She was also invited reviewer of the Chilean and Slovenian government – evaluation of scientific projects.

Invited lectures:

More than 100 invited lectures in Croatia and abroad.

Professional work:

Head of department of peritoneal dialysis

Clinical coordinator for renal transplantation

Consultant nephrologist of University hospital Montenegro, Podgorica

Academic profession:

1994. to 1998. Assistant at Department of Anatomy, School of Medicine, University of Zagreb

2004. Assistant at Department of internal medicine, School of medicine, Zagreb

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2008. Assistant professor at Department of internal medicine, School of medicine, University of Osijek

2009. Assistant professor at Department of internal medicine, School of medicine, Zagreb

2013. Professor at Department of internal medicine, School of medicine, University of Osijek

Professional and scientific interests:

Renal transplantation – immunology, complications of immunosuppressive therapy, cardiovascular risk factors in patients with end-stage renal disease, infections, malignancies

Peritoneal dialysis, hemodialysis, chronic kidney disease stages 3 to 5

Complications of chronic kidney disease (anemia, secondary hyperparathyroidism)

Bone morphogenetic proteins

Renal nutrition

Membership in societies

- a. Croatian medical association
- b. Croatian society for nephrology, dialysis and transplantation – vice- president
- c. Croatian society for mineralized tissues
- d. European renal association (ERA-EDTA)
- e. European society for transplantation (ESOT)
- f. International society of nephrology (ISN)

Publications: 250 scientific and professional papers, 75 abstracts at international congresses

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Vanja Bašić Kes, prof.dr.sc.**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** School of Medicine, University of Zagreb**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Electrophysiological methods in medical research**BIOGRAPHY**

Professor Vanja Bašić Kes, MD, PhD obtained her M.D. with thesis honours at the School of Medicine, University of Zagreb (Croatia). She specialized in Neurology and subsequently obtained a Masters and a Doctorate degree in Clinical Neurology (Ph.D.). Her professional training included Fellowship in Neurology at the King's College Hospital in London, United Kingdom and at the Weill Cornell in Salzburg, Austria. Professor Bašić Kes holds her professional appointments at the University of Zagreb (School of Dental Sciences), and University of Osijek (School of Medicine), Croatia, where she has been engaged as Professor and Assistant Professor of Neurology, respectively. She carries out clinical work and research, and teaches at graduate and postgraduate levels, and serves as regular Member of the National Croatian Scientific Advisory Board. She is the principal investigator of several major international studies on multiple sclerosis, rare diseases in neurology and on safe implementation of stroke treatments in Eastern Europe. She is also a Senior Associate of the Faculty of the School of Medicine, University of Zagreb. Professor Bašić Kes has been appointed Head of University Department of Neurology and Lead of Neuroimmunology and Neurogenetics Unit, at the Sestre milosrdnice University Hospital Centre. Her professional highlight is the establishment of the Referent Centre for the Management of Acute and Chronic Pain, and the Referent Centre for Neuroimmunology and Neurogenetics, at the University Department of Neurology, both acknowledged by the Croatian Ministry of Health. Prof. Bašić Kes is the leading expert in the field of neuroimmunology and neurogenetics. Her current research interest focuses on the remyelination, recovery and novel treatment options in multiple sclerosis. She implemented the Croatian Guidelines for the Treatment of Multiple Sclerosis and launched the first international biannual Neuroimmunology and Neuroimmunology congress. Professor Bašić Kes serves as the President of the Croatian Society for Neurovascular Disorders, the President of the Croatian Neuroimmunology and Neurogenetics Society, the President of the Croatian Society for Pain and the President of the Croatian Society for Stroke. She is also an Honorary Member of numerous professional associations and advisory boards, both national and international. Prof. Bašić Kes has published more than 300 articles in scientific journals, authored or co-authored several books and edited a number of others. She is also a member of editorial and advisory board and deputy editor of the Acta Clinica Croatica journal.

Address: Professor Vanja Bašić Kes, MD, PhD; Head of the University Department of Neurology, Sestre milosrdnice University Hospital Centre, Vinogradska cesta 29, 10 000 Zagreb, Croatia;

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: October 22. New Full Professor, University of Zagreb School of Dental Medicine

LIST OF PUBLISHED WORK WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

Scientific meetings:

- I. 2nd Multiple Sclerosis Academy, International Postgraduate Course Program, Dubrovnik (18-22, lipnja, 2018.)
- II. Third Croatian Neuroimmunological Congress with International Participation from 16 to 17 March 2017 at the Multimedia Hall of KBC Sestre milosrdnice Vinogradska c. 29, Zagreb
- III. 1st Multiple Sclerosis Academy, International Postgraduate Course Program, Dubrovnik (26.-30. lipnja, 2017.)
- IV. VIII. Congress of the Croatian Society for Neurovascular Disorders of the Croatian Medical Association with international participation, at the Multimedia Hall of KBC Sestre milosrdnice Vinogradska c. 29, Zagreb (May 19-20, 2016)
- V. II. Croatian Neuroimmunological Congress with International Participation, at the Multimedia Hall of KBC Sestre milosrdnice Vinogradska c. 29, Zagreb (7-8 May 2015)

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

VI.VII. Congress of the Croatian Society for Neurovascular Disorders of the Croatian Medical Association with international participation, at the Multimedia Hall of KBC Sestre milosrdnice Vinogradska c. 29, Zagreb (May 22-24, 2014)

EDUCATION OF SCIENTIFIC OR PROFESSIONAL MASTERS:

Member of the editorial board of the ACTA CLINICA CROATICA (Indexed in the Web of Science / Index, Medicus / MEDLINE, Scopus, Excerpta Medica / EMBASE); <http://actaclinica.eu/about-acc/editorial-board/>

MEMBERSHIP AND FUNCTIONS IN SCIENTIFIC AND PROFESSIONAL SOCIETIES:

President of the Croatian Society for Neurovascular Disorders, Croatian Medical Association (2011-2018)

President of the Croatian Society for Neuroimmunology and Neurogenetics (2011-2018)

President of the Croatian Society for Pain Prevention (2011-2018)

President of the Croatian Society for Stroke (2011-2018)

President of the Expert Committee on Medical Issues of the Association of Multiple Sclerosis Societies of Croatia (2011-2018)

Member of the Croatian Acupuncture Society (2011-2018)

Member of the Croatian Society for Prevention of Cardiovascular Diseases in Patients with Atrial Fibrillation (2011-2018)

Scientific lectures were held at international and domestic scientific conferences (from 2013 to 2018):

VII.Vanja Bašić Kes. Vascular comorbidities in multiple sclerosis; Multiple sclerosis in focus: early diagnosis and treatment in southeast European countries, Beograd, Srbija (18.-19. svibanj, 2018.)

VIII.Vanja Bašić Kes. Diagnostic and differential diagnostic dilemmas in MS. ANF 2018, Monopoli (Puglia, Italy), 23.-27. svibnja, 2018.)

IX.Vanja Bašić Kes. Neuromyelitis optica; 2nd Multiple Sclerosis Academy, International Postgraduate Course Program, Dubrovnik (18-22, lipnja, 2018.)

X.Vanja Bašić Kes. MS therapy 2018; 2nd Multiple Sclerosis Academy, International Postgraduate Course Program, Dubrovnik (18.-22. lipnja, 2018.)

XI.Vanja Bašić Kes. Brain atrophy and cognitive impairment in MS patients; 1st Multiple Sclerosis Academy, International Postgraduate Course Program, Dubrovnik (26.-30. lipnja, 2017.)

XII.Vanja Bašić Kes. Mavenclad; treating highly active multiple sclerosis relapses MIND & BRAIN - 58th International Neuropsychiatric Congress (25.-27. svibnja, 2018.)

XIII.Vanja Bašić Kes. New trends in the treatment of multiple sclerosis; 57th International Neu XIV. Vanja Bašić Kes. Significance of brain atrophy in patients with multiple sclerosis; III. Croatian Neuroimmunological Congress with International Participation, Zagreb (16-17 March, 2017)

XV. Vanja Bašić Kes. Fabric disease. VIII. Congress of the Croatian Society for Neurovascular Disorders of the Croatian Medical Association with International Participation, Zagreb (19th-20th May, 2016)

XVI. Vanja Bašić Kes. Tecfidera-novel in treating MS; II. Croatian Neuroimmunological Congress with International Participation, Zagreb (May 7-8, 2015)

Medicine

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Drago Batinić, MD, PhD, tenured professor

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Medical School University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:

1. Research methods in vitro and in vivo; 2. Immunological recognition; 3. Laboratory approach to transplantation; 4. Biochemical methods in biomedical research. 5. Methods of molecular biology in medicine

BIOGRAPHY

Prof. dr. sc. Drago Batinić, Department of Physiology and Immunology, University of Zagreb School of Medicine, Šalata 3, and University Clinical Center Zagreb, Department of Laboratory Immunology, Kišpatićeva 12, HR-10 000 Zagreb, Croatia (dbatin@@mef.hr)

Place and year of birth: Zagreb, 1957. Education: University of Zagreb School of Medicine (UZSM) (1976-1981), postgraduate study in Medical Cytology, UZSM, Zagreb (1983-1985), postdoctoral training at National Institutes of Health, Immunochemistry Unit, NIDR, Bethesda, USA (Fogarty Fellow 1989-1990, visiting associate 1990-1992). Academic and Scientific Degrees: Doctor of Science, UZSM, Zagreb (1986), Assistant (1997-2002) and adjunct associate professor (2002) UZSM, Zagreb, clinically appointed associate professor of Immunology (UZSM, Zagreb and University Hospital Center Zagreb (UHCZ) (2007), clinically appointed full professor of Immunology (UZSM and UHCZ) (2011), clinically appointed tenured professor of Immunology (UZSM and UHCZ) (2017). Employment and Work Experience: Medical Practice, UHCZ and Community Health Center Trnje, Zagreb (1982-1983), postgraduate assistant, Department of Experimental Biology and Medicine, Rudjer Boskovic Institute, Zagreb (1983-1988), head of Laboratory for Serology, UHCZ, Zagreb (1988-1992), visiting associate, NIH, Bethesda, USA (1990-1992), head of the Laboratory of Cellular Biology, UHC Zagreb (1992-1996), head of the Division for Laboratory Immunology, UHCZ, Zagreb (1997-2011), head of the Clinical Unit for Cellular Immunodiagnostics and Procedures In Vitro, UHCZ, Zagreb (2011), recognized as a Specialist in Laboratory Immunology (Ministry of Health of the Republic of Croatia, 2013), head of the Department of Laboratory Immunology, UHCZ, Zagreb (2015). Mentor to three trainee medical doctors in Laboratory Immunology, UHC Zagreb (2012-present). Lecturer (2000-2011) and Head of Department of Immunology (2004-2011), University of Mostar School of Medicine, BiH. Scientific activity: principal investigator of three projects funded by Croatian Ministry of Science and Technology (CMST) (1998-2014) and Zagreb University grants (2015-2018), associate of three CMST projects (1998-2014), one UKF project (2013-15) and two projects funded by Croatian Foundation for Science (from 2017). Mentor of 5 master theses and 8 dissertations (5 completed). Teaching, Faculty and University Activities: Lecturer in Immunology, Physiology and Clinical Chemistry, course leader of Introduction to Science and elective course Transplantation Reaction (undergraduate medical study), head of three courses and a teacher at the three courses of the doctoral study (UZSM, Zagreb), head of the postgraduate specialist study in Laboratory Immunology (UZSM, 2017) and lecturer in immunology at postgraduate specialist studies at UZSM (since 2016), actual UZSM vice-dean for postgraduate studies in the fourth mandate (since 2009), president of the UZSM Postgraduate Study Council, member of the Biomedical Council of the University of Zagreb (since 2009), member of the Commission for Doctoral Studies of the UZSM (since 2009) and University of Zagreb (since 2011). Other professional and scientific activities: Head of the Reference Center for Immunodiagnostics of Immune and Hematological Diseases of the Croatian Ministry of Health (since 1997), member of the FLOW-MRD Working Group of the ALL-IC BFM International Group (since 2002), Member of the EORTC Leukemia Working Group (2005-2010),

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Member of the Expert Committee for the Proposal of Criteria of Scientific Degrees (2014-2016), member of the Croatian Ministry of Health Commission for Specialist Training of Medical Doctors (since 2016).

Publications: 188 total, 59 papers in CC, 6 in SCI/EXP, 17 in PubMed/ Medline, 17 in SCOPUS; editor and co-author of one professional book and author of 12 chapters, co-author of two textbooks, author of 20 chapters in textbooks, author and co-author of a doctoral study manuals. Number of citations: total 714, h-index 13. Scientific interest: immunology, hematology, immunodiagnostics, immunofenotyping, flow cytometry.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 14-03-2017.

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Assoc. Prof. Natasa Bader, MD, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: School of Medicine, University of Zagreb; Clinical Medical Center Zagreb, Croatia

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Pathogenesis of infectious diseases

BIOGRAPHY

Born in 1960. Graduated at School of Medicine, University of Zagreb, Croatia (1983). Master degree, Faculty of Natural Sciences, University of Zagreb, 1987. Specialist exam of Medical Microbiology and Parasitology, 1992. Ph.D. degree, Medical School, University of Zagreb. Worked as assistant at the Department of medical microbiology at medical School and at Dental School, University of Zagreb, 1990-2012. Employee of Clinical department for clinical and molecular microbiology, at Clinical Center Zagreb, Croatia. Positions at Medical School: 1990-assistant, 2008-senior assistant, 2012-assistant professor and 2018-associate professor.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 09.04.2018., associate professor

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: VLADIMIR BEDEKOVIĆ, MD, PhD, PROFESSOR

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: SCHOOL OF MEDICINE, UNIVERSITY OF ZAGREB

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: ELECTROPHYSIOLOGICAL METHODS IN MEDICAL RESEARCH

BIOGRAPHY

Name: VLADIMIR BEDEKOVIĆ

Permanent address: Department of ENT, Head and Neck Surgery
Sestre milosrdnice University Hospital Center
Vinogradska cesta 29, HR-10000 Zagreb

Telephone/Fax: 01 37 87 360; 01 37 68 293

E-mail: vladimir.bedekovic@kbcsm.hr

Date and place of birth: October 23, 1956, Vrbovec

Title and present position: MD, PhD, Professor, Senior Research Scientist

Head of ENT Department, Sestre milosrdnice University Hospital Center, School of Medicine

Subspecialist in plastic and reconstructive head and neck surgery

Education, Professional Training, Professional Appointments:

1981 Graduated from the Zagreb School of Medicine, University of Zagreb

1986 Residency training in Otorhinolaryngology and Head and Neck Surgery, ENT Department, Sisters of Mercy University Medical Center, Zagreb

1990 Specialist exam in Otorhinolaryngology and Head and Neck Surgery, ENT Department, Sisters of Mercy University Medical Center, Zagreb

1989 M. S. Thesis, „Hormonal Treatment of Endemic Goiter in Adolescents“, Zagreb Medical School

1989 Registered as a scientific researcher under the number 161420

1990 Assistant, School of Dental Medicine, University of Zagreb

1992 Assistant, School of Medicine, University of Zagreb

1997 Ph. D. Thesis, „Elektronystagmographic follow-up of functional modifications in vestibular nuclei and reticular formation“, Zagreb School of Medicine

2001 Senior instructor, School of Medicine, University of Zagreb

2003 Subspecialist exam in plastic and reconstructive head and neck surgery

2004 Assistant Professor

2005 Member of the Board for Doctoral Dissertations and Scientific Appointments, School of Medicine, University of Zagreb

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2006 Senior Research Scientist

2009 Associate Professor

2009 Head, Chair of Otorhinolaryngology with Audiology and Phoniatriy, School of Medicine, University of Zagreb

2011 Head, Department of Otorhinolaryngology and Head and Neck Surgery, Sisters of Mercy University Hospital, Zagreb

2016 Full-time Professor

Teaching Experience:

Undergraduate Teaching, School of Medicine, University of Zagreb

1990 Assistant in Otorhinolaryngology, School of Dental Medicine, Zagreb

1992 Assistant in Otorhinolaryngology, School of Medicine, Zagreb

2001 Senior Instructor in Otorhinolaryngology, School of Medicine, Zagreb

2004 Assistant Professor, School of Medicine, Zagreb

2009 Associate Professor, School of Medicine, Zagreb

2016 Full-time Professor, School of Medicine, Zagreb

Postgraduate Teaching, School of Medicine, University of Zagreb

1992 - present Postgraduate Study „Otorhinolaryngology and Head and neck Surgery“ – head, lecturer

Postgraduate Study „Clinical Oncology – Tumors of the Head and Neck“ – lecturer

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: DECEMBER 13th, 2016

EDUCATION

1988- graduated from Medical School, University of Zagreb

1993- master's degree- basic experimental pharmacology, Medical School, University of Zagreb,

1998-PhD degree, Medical School, University of Zagreb.

Employment

since 2017 full professor tenure (School of Medicine, University of Zagreb),

Previous employments

2007-Associate professor

2002-Assistant professor,

1999-senior assistant

Since 2001-clinical microbiologist at University Hospital Center Zagreb,

1995-assistant,

1989-intern

Education abroad: 1993- Department of experimental pharmacology, «Max von Pettenkofer» Institute, Munich, Germany, 1994- Institute of Pharmaceutical Microbiology, University of Bonn, Germany, 1996- United Medical and Dental School, St Thomas's Hospital London, United Kingdom, 1998- University Hospital Maastricht, the Netherlands, 1999- Institute for Medical Microbiology, University of Zurich, 2000- University of Athens, Greece, 2001- Arndt & Keeser, Hamburg, Germany, 2002-Department of Biochemistry, University of Aquila, Italy, Institute of Microbiology and Hygiene, Technical University of Dresden, Germany, 2005-Department of Pathology, Section for Microbiology, School of Medicine, University of Verona, Italy, 2006--Asklepios University Clinic, Gauting, Germany, 2009-Institute for Microbiology and Hygiene, School of Medicine, University of Cologne, Germany, 2011-University Roma Tre, Rome, Italy, 2012-School of Medicine, University of Verona, 2014- Institute for Hygiene, Microbiology and Environmental Medicine, University of Graz, Austria, 2015- Institute for Hygiene, Microbiology and Environmental Medicine, University of Graz, Austria

FELLOWSHIPS AND AWARDS

1. 1996 Scholarship from British Society for Antimicrobial Chemotherapy (BSAC)

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2. 1998. Fellowship from International Society for Infectious Diseases (ISID)
3. 1997. ESCMID travel award for young European scientists (ESCMID)
4. 1999. Fellowship from Federation of European microbiological Societies (FEMS)
5. 1999. Fellowship from Greek State Scholarship Foundation
6. 2002. Fellowship for postdoctoral research from Italian Government
7. 2003. Fellowship from DAAD (German Academic Exchange Service)
8. 2012-award for successful scientific project from Medical School, University of Zagreb

SUPERVISION OF GRADUATE/ DOCTORAL STUDENTS AND POSTDOCTORAL RESEARCHERS

1. Marija Tonkić: Molecular characterization of Escherichia coli strains producing extended-spectrum β -lactamases in children and adult population. School of Medicine, University of Split, 2006.
2. Ines Jajić-Benčić: Analysis of extended-spectrum β -lactamases in clinical isolates of Enterobacteriaceae causing nosocomial infections. Prirodoslovno-matematički fakultet u Zagrebu, 2008.
3. Ivana Goić-Barišić: Mechanisms of reduced susceptibility to carbapenems in clinical isolates of Acinetobacter baumannii. School of Medicine, University of Split, 2009.
4. Sanda Sardelić: Metallo- β -lactamases in clinical isolates of Pseudomonas aeruginosa, resistant to carbapenems. School of Medicine, University of Zagreb. 2010.
5. Mirna Vranić-Ladavac: Molecular characterization of carbapenemases in invasive and non-invasive isolates of Acinetobacter baumannii. School of Medicine, University of Zagreb.
6. Ljiljana Mihaljević: Effect of S(+) ketamine on antibacterial activity of bupivacaine, levobupivacaine and ropivacaine. School of Medicine, University of Zagreb. 2012.
7. Vlasta Zujić-Atalić: Comparison of molecular characteristics of carbapenemases in clinical isolates of Enterobacteriaceae collected in multicenter study. School of Medicine, University of Osijek, 2013.
8. Amir Ibrahimagić: Epidemiology of infections caused by Gram-negative bacteria producing extended-spectrum and plasmid-mediated AmpC β -lactamases and carbapenemases in hospitalized and community patients. Integrated doctoral study, University of Osijek. 2014.

Hosting of postdoctoral students: Karmen Godić-Torkar; fellowship from Croatian Ministry of Science, Education and Sport for study on carbapenemases in Bacillus cereus

TEACHING ACTIVITIES

Lectures, practices and seminars in basic microbiology and parasitology and clinical microbiology,

Since 2012 leader of the postgraduate study course in medical microbiology

Since 2012 Leader of the subject “Multiresistant bacteria-causative agents of hospital infections” at the PhD programme “Biomedicine and health”

2017-2017 leader of the subject “Clinical Microbiology”

2010-2015-leader of the subject “Methods for characterization of antimicrobial agents” at the Faculty for Health Sciences.

2009-2015-leader of the small elective subject: Multiresistant bacteria

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Since 2016-coordinator of the mentorship programme of ESCMID (European society for clinical microbiology and infectious diseases)

Since 2016-mentor of the foreign students in CROMSIC programme

ORGANISATION OF SCIENTIFIC MEETINGS

Educational course: Septicemia:

Educational course “Multiresistant non-fermentative bacteria, School of Medicine, University of Zagreb, 10th March, 2017, number of participants: 30

Educational course " Causative agents of infections in long-term care facilities, School of Medicine, University of Zagreb, number of participants: 40

ORGANISATIONAL RESPONSIBILITIES

1990-2001- member of the University board for classification examinations

since 2012-member of the postgraduate education board

MEMBERSHIPS

Croatian Medical Association, ISID (International Society for Infectious Diseases) ,ESCMID (European Society for Clinical Microbiology and Infectious Diseases) since 2015 member of ESGAR

MAJOR SCIENTIFIC COLLABORATIONS Dr. Annarita Mazzariol, Department for Pathology, Section of Microbiology, University of Verona, Italy; collaboration on characterization of carbapenemases in Enterobacteriaceae, Prof. Andrea Grisold, Institute for Hygiene, Microbiology and Environmental Medicine, University of Graz, Austria; Collaboration on characterization of extended-spectrum β -lactamases, Prof. Paolo Visca, Department for Biology, University Rome 3, Rome, Italy; characterization of carbapenemases in *Acinetobacter baumannii*, Ass Prof. Karmen Godič-Torkar, Department for Sanitary Engineering, Faculty of Health Science, University of Ljubljana, Slovenija, characterization of carbapenemases in *B. cereus*, Dr. Ivan Barišić, Austrian Institute for Technology –collaboration in development of new diagnostic method (H

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: February 14th, 2017: full professor tenure

LIST OF PUBLISHED WORK WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

PAPERS INDEXED IN CC

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED AND WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

1. 2007-2013 leader of the project “ Mechanisms of resistance to antibiotics in Gram-negative bacteria financed by Croatian Ministry for Science and Education

2. 2007-2013-collaborator of the project financed by Croatian Ministry for Science and Education, leader Prof. dr. sc. Jasmina Vraneš „Effect of antibiotics on biofilm infections“

3. 2008-2013 collaborator of the project financed by Bosnian Ministry of Science and Education „Meticillin-rezistentni *Staphylococcus aureus* (MRSA) and Gram-negative bacteria producing extended-spectrum β -lactamases (ESBL) as causative agents of surgical infections“ leader: Prof.dr.sc.Selma Uzunović-Kamberović (Zenica,BiH).

4. Since 2015 partner in FAPIC project financed by Horizon program

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED IN THE LAST FIVE YEARS

Since 2015 partner in FAPIC project financed by Horizon program

University of Zagreb research grants:

2014: Postexposure effect of metal chelators on carbapenemase producing Gram-negative bacteria

2015: Multiresistant Gram-negative bacteria in long term care facilities

2016: Carbapenemases in hospitals, nursing homes and environment

2017: Mechanisms of spread of OXA-48 carbapenemase

2018: Mechanisms of colistin resistance in Gram-negative bacteria

NUMBER OF SUCCESSFUL MENTORSHIPS THAT RESULTED IN DISSERTATION DEFENCE: 8

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: associate professor Ivan Begovac, MD, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: School of Medicine Zagreb and University Hospital Centre zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Liaison and consultative psychiatry

BIOGRAPHY

He graduated from the Faculty of Medicine in Zagreb in 1990. In 1996 he specializes in psychiatry. Since 2011, he has been head of the Pediatric and Adolescent Psychiatric Institute and Psychotherapy Clinic for Psychological Medicine. In 2000 he obtained his MA degree and in 2004 he received his doctorate in the field of pediatric and adolescent psychiatry at the Faculty of Medicine of the University of Zagreb. In 2001 he became a subspecialist in pediatric and adolescent psychiatry. In 1993 he was on a three-month scholarship entitled: Diagnostic and therapeutic understanding of anxiety disorders, Grace, Austria, under the mentorship of Prof. H. Zapotoczky. In 1996/1997 he was a one-year DAAD scholarship entitled: Investigating Protective Factors - Therapeutic Work with Refugee Children and Adolescents and Their Families, Hamburg, Germany, under the mentorship of Prof. Peter Riedesser. He graduated from a scientific seminar in Camposampier, Italy, in 2002. He has active knowledge of computer work, actively uses English and German. Has participated so far in a number of scientific projects. He is currently head of the scientific project title: personality traits and family of patients with eating disorders after recovery. In 2010 and 2011 he was awarded the Erasmus scholarship for the study room at the Psychoanalytical Institute in Ulm (responsible: Dr. Christine Schwilk), Germany and at the Clinic for Psychotherapy and Psychosomatics in Ulm, Germany (responsible: Prof. Dr. Harald Guendel and Prof. Dr. Joern von Wietersheim).

Participates in graduate (Psychological Medicine, Psychiatry) and Postgraduate Teaching (subjects: Psychiatric Psychiatry, Psychotherapy) at the Faculty of Medicine. He is the head of the subject and is Assistant to the postgraduate study program from Pediatric and Adolescent Psychiatry at the Faculty of Medicine. The head is two elective undergraduate courses: Horvat goes to the doctor; and Child in Crisis Diagnostic Methods in Child and Adolescent Psychiatry. He co-operates with a number of eminent experts from abroad (Prof. Achenbach from USA, Prof. von Wietersheim from Germany).

He has published more than eighty papers, presenting works at several domestic and foreign professional conferences. Since 2006 he has been admitted to the associate professorship of Senior Assistant at the Department of Psychiatry and Psychological Medicine, University of Zagreb Medical School. Since 2007, she holds the title of Primary. Currently President of HD for Pediatric and Adolescent Psychiatry and Psychotherapy at HLZ. Since 2010, she has been a docent at the Faculty of Medicine. In 2010 he became a group analyst at the Institute for Group Analysis in Zagreb. Since the year 2010, psychoanalysis education has started in the psychoanalytic study group in Zagreb.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 2018 – associate professor.

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Center for Research and Knowledge Transfer in Biotechnology, University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Mechanisms of allergic reactions

BIOGRAPHY

Born 15 Aug 1971. in Zagreb. PhD: Faculty of Natural Sciences, 2009. Zagreb. Senior research associate: 2010. Medical School Zagreb. Current employment: head of Lab. of Immunology, CRKTB University of Zagreb. Teaching responsibility: undergraduate program (Experimental Immunology at Faculty of Natural Sciences and Immunology at Faculty of Biotechnology, University of Zagreb) and graduate program (Mechanisms of Innate Immunity at School of Medicine, Innate Immunology and Immunobiology of vaccines at Faculty of Natural Sciences, University of Zagreb). Mentorships: 7 M.Sc. and 7 Ph.D. Scientific interests: innate and adaptive immune mechanisms in viral and chronic diseases. Memberships: International Clinical Cytometry Society, International Society for Advancement of Cytometry, European Federation of Immunological Societies, European Society of Clinical Microbiology and Infectious Diseases, Croatian Immunological Society. Publications: 34 (21 in CC), number of citations: 411.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Vedran Bilić, MD, PhD.

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Clinic for Psychological Medicine, KBC Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Liaison and consultative psychiatry

BIOGRAPHY

From 1991 to the end of the Homeland War organized and conducted psychiatric protection of members of MUP and ZNG for the area of Karlovac. In 1999, the Croatian Medical Association awarded him a diploma for a special contribution. The Association of Croatian Volunteers of the Homeland War – Dubrava awarded him in 2006. a Thank you note. Many years he has participated in organizing and conducting several international psychotherapy schools in the IUC Dubrovnik framework. He is a Member of several domestic professional societies in which he actively participates (Institute for group Analysis Zagreb, Croatian Society for Psychoanalyzes Psychotherapy, Croatian Society for Psychosomatic Medicine, Croatian Psychiatric Society, Croatian Medical Association, Croatian Society of Balint groups). He was a lecturer at national and International congresses. Participated as a researcher in several scientific projects. He was a mentor of one graduate thesis, and now he's a mentor to a doctoral thesis. Specialist psychiatrist, subspecialist from psychotherapy, for many years successfully expertly and scientifically operates in several areas of psychiatry, especially psychotherapy. He was the mentor of one defended graduate thesis, and he is the current mentor of one doctoral thesis. So far 5 papers have been published in the Current Contents database, 3 work in the database Science Citation Index Expanded which are quoted 20 times in the ISI Web of the Knowledge database. He also Published 5 papers in peer-reviewed journals indexed in other databases and eleven chapters in books, four of which are university textbooks. He Presented works at National and International Congresses. He is a Member of several professional associations and is involved in various psychotherapeutic education, as well as in working with students.

BIOGRAPHY

Head of the Department of Physical and Rehabilitation Medicine and Rheumatology, Clinical Hospital Dubrava, Zagreb, Croatia

- implementation of a new IT program into the work process, resulting in the improvement and informatization of business processes in the work of the Department Center (eNartifying, eUputnica, eNalaz and eHZZORAčun, ePrijemPacijenata - self-contained device and application module for fully independent registration of patients upon arrival at the Department)
- established ultrasound diagnostic activity of musculoskeletal diseases (since 2009 in routine practice of diagnostic UZV examination of the musculo-skeletal system).
- established Daily Hospital of the Department
- established Osteoarthritis School of the Department

-leader of the 1st class course at the Faculty of Medicine in Zagreb called "News in the Treatment of Knee Osteoarthritis". The course has gathered 25 lecturers from all over the University of Croatia and 150 participants. Writing a book on osteoarthritis is underway. The course was held 4.10.2018.

2016.Assistant Professor

Libertas International University, Zagreb, (Croatia)

2016.Scientific associates

School of Medicine, University of Zagreb, Zagreb, (Croatia)

2011 – 2014 PhD School of Medicine, University of Zagreb, Zagreb, (Croatia)

Since 2017 a lecturer at the private university "Libertas", subjects: Rheumatology, Physiotherapy, Exercises II and III Since 2016, the subject of Rheumatology for regular and extraordinary students of II year physiotherapy at the Zagreb University of Health Sciences.

Lecturer in biomedicine and health care, field of clinical medical science, rheumatology.

From 2012 until today she is a lecturer at the doctoral postgraduate study in biomedicine and health, MF Zagreb, "Surgery of the hand".

2007/2008, 2008/2009. school year. lecturer at the specialist postgraduate study in Physical Medicine and Rehabilitation, MF University of Zagreb, subject "Forefoot and Fetus Propedeutics".

2010 selection for lecturers in the field of biomedicine and health, field of clinical medical science, branch of physical medicine and rehabilitation in Zagreb University of Health.

During the study as a demonstrator participated in work with students during the microbiology exercise at MF University in Zagreb.A total of 47 scientific and professional papers were published, of which 18 were the first authors.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Author and co-author of 16 original scientific papers published in CC indexed journals, in SCI-Expanded and 12 scientific papers in extenso in journals indexed in Index Medicus / Excerpta Medica.

Published summaries in the supplements of indexed journals, as well as summaries that are published as textbooks in worksheets.

Since 2013. a member of the editorial board of the journal "Physical and Rehabilitation Medicine", a journal of the Croatian Society for Physical and Rehabilitation Medicine.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Ines Bojanić, MD, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University Hospital Centre, Department of Transfusion Medicine and Transplantation Biology

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Laboratory approach to haematopoietic stem cells transplantation

BIOGRAPHY

Date and place of birth

27.7.1964. Karlovac

Education

1988. Medical Doctor, Zagreb University School of Medicine

1990., postgraduate study in Oncology, Zagreb School of Medicine

1992 postgraduate study Mother and Child Health Care (1992), Zagreb School of Medicine

1993-1996, specialization in transfusion medicine, UHC Zagreb

Work experience

1990-1991 General practitioner, Zagreb

1993-1996 residency in transfusion medicine, UHC Zagreb

Since 1996, specialist-in transfusion medicine,

Since 2001. Head of Apheresis Unit, Department of Transfusion Medicine and Transplantation Medicine, UHC Zagreb

Academic degrees

2000. Master of Science Thesis, Longterm treatment of prolactinoma with bromokriptin, Zagreb School of Medicine

2009 PhD Thesis: Peripheral blood hematopoietic stem cell collection with large volume apheresis , Zagreb School of Medicine

Teaching

-since 2002. : College professor, University of Applied Health Studies Zagreb

-since 2006. –postgraduate studies: Biomedicine and Health Sciences; Transfusion medicine, Internal medicine, Haematology, Abdominal surgery, Anaestology, Zagreb Medical School.

Publications

-author or coauthor of 6 papers in journals indexed in Current Contents

-author or coauthor of 4 papers in journals indexed in SCI-EXP/SSCI

-author or coauthor of 16 papers in journals indexed in Index Medicus, Excerpta Medica

-author or coauthor of 11 chapters in books

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

-coauthor of 5 chapters in textbooks

-author or coauthor of 10 abstracts and congress presentations published in journals indexed in Current Contents

-author or coauthor of 159 congress meeting presentation

Research interest

- clinical transfusiology, transplantation medicine, tissue and cell banking, ,quality assurance in health care

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK:

03.10.2011. research associate

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Tomislav Bokun, MD, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** Department of Gastroenterology, hepatology and clinical nutrition; University Hospital Dubrava**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Advanced ultrasonography in gastroenterology and hepatology;**BIOGRAPHY**

Tomislav Bokun, MD, PhD, internal medicine specialist and gastroenterologist, born in 1982 in Zagreb. He graduated medicine and defended his thesis at the University of Zagreb School of Medicine, and for one year he worked as a research assistant at Imperial College London. He is associate faculty for university course on Pathophysiology and Pathology at University of Zagreb Faculty of Pharmacy and Biochemistry and also teaches at Gastroenterology residency program at University of Zagreb School of Medicine. His professional and research interests are ultrasound methods in hepatology and diseases of pancreato-biliary tract diseases. He authored and co-authored a dozen of scientific publications, of which 13 in Current Contents, and has more than 500 independent citations. He organizes Adriatic ERCP Workshop, and since 2013. he is the president of Youth Section of Croatian Society of Gastroenterology.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK:**LIST OF PUBLISHED WORK WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME**

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Associate Professor Ana Borovečki, MD, PhD, MPH

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: School of Medicine , University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Health and public health risks management in crisis situations; Evidence-based medicine; Structure, methodology and functioning of scientific work 1; Characteristics of clinical medical research; Genomic approaches in biomedical and translational research

BIOGRAPHY

Ana Borovečki, was born in Zagreb in 1973 where she has finished Classical Gimansium. In 1998 she graduated medicine from the School of Medicine, University of Zagreb. In 2000 she got bachelor degree in philosophy and comparative literature from the School of Philosophy, University of Zagreb. In 2004 she got European Master of Bioethics degree from the Catholic University of Leuven, Belgium. In 2007 she got PhD degree from Radboud University in Nijmegen, the Netherlands. The title of the thesis was Ethics Committees in Croatia“. She is specialist of clinical pharmacology and toxicology and Master of Public Health. She works at Andrija Štampar, School of Public Health, School of Medicine, University of Zagreb, as Associate Professor.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 29.2.2016.

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Assoc. Professor Fran Borovečki, MD, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University of Zagreb School of Medicine

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:

Structure, methodology and functioning of scientific work 3: Research Projects;

Genomic approaches in biomedical and translational research;

Clinical neuropharmacology;

Research methods of psychological functions and behaviour;

Movement disorders;

Selected chapters of epileptology of developmental age;

Methods of molecular biology in medicine;

BIOGRAPHY

Professor Fran Borovecki was born in 1975 in Zagreb, Croatia. He graduated from Zagreb Medical School in 1999 and attained his PhD from Zagreb Medical School in 2004. He was a visiting research scientist at Harvard Medical School on several occasions from 2003 to 2007 and was also a visiting research scientists at New York University. Since 2007 he has headed the Department for Functional Genomics at the Center for Translational and Clinical Research, University of Zagreb School of Medicine. Since 2012 he has been employed as a board certified neurologist at the Department of Neurology, University Hospital Center Zagreb. Prof. Borovecki was appointed the acting Director of the Center for Translation and Clinical Research, University of Zagreb School of Medicine and University Hospital Center Zagreb in 2015. Since 2017 he serves as the Head of the Division for Movement Disorders, at the Department of Neurology, University Hospital Center Zagreb. Prof. Borovecki's area of scientific and clinical interest is genetics of neurological diseases. He has published 59 scientific papers indexed in CC and WoS databases which have been cited 1961 times according to the Scopus database, published 12 book chapters and has held more than 40 invited lectures at national and international scientific conferences. Prof. Borovecki is the recipient of the Award for Best PhD Thesis defended at Zagreb Medical School for year 2003/2004 and was awarded the National Science Foundation of Croatia Scholarship and the Fulbright Scholarship, as well as Michael J. Fox Foundation Rapid Response Innovation Award.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 18.06.2012.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Assist.prof.dr.med. Zrinka Bošnjak

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: MEF Zagreb, UHC Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Methods of molecular biology in medicine

BIOGRAPHY

Zrinka Bošnjak was born on September 18, 1972 in Split, Croatia. Graduated from the Faculty of Medicine of the University of Zagreb in 1997. and obligated to practice at the Clinical Hospital "Sestre Milosrdnice" and in 1999 passed a state examination at the Ministry of Health. Since 2004 she has been working at the Clinical Hospital Center in Zagreb where she has been granted specialization in clinical microbiology. Specialist exam in 2008. In 2007, she spent a month at the Masstricht Educational School at the University Clinic. A month of education is being conducted in 2009 at the University Clinic in Muenster. In 2009 she was appointed as Assistant Professor of Medical Microbiology Department of Parasitology.

Degree younger assistant achieved in 2010. Scientific associate since 2010. Senior research associate since 2012. The Doctor of Medical Sciences at the Faculty of Medicine of the University of Zagreb became 2009 defending her dissertation under the title "Mechanisms of Resistance to Betalactamic Antibiotics in Clinical Isolate of *Klebsiella pneumoniae*", Faculty of Medicine, University of Zagreb.

She is a collaborator on a scientific project approved by the Ministry of Science, Education and Sports of the Republic of Croatia. Areas of active interest: hospital infections, molecular typing of microorganisms, clinical microbiology, bacterial resistance to antibiotics. Other areas of interest: education in medicine, circulation of multi-resistant pathogens from the chronic sector to acute (hospital). She has participated as a lecturer at several domestic and international congresses. It is active in English speaking language and script. Sovereign uses MS Office applications and the Internet. Participated in international courses and workshops.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 30.06.2014.

LIST OF PUBLISHED WORK WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

1. Carbapenem resistance and acquired class D beta-lactamases in *Acinetobacter baumannii* from Croatia 2009-2010. Vranić-Ladavac M, Bedenić B, Minandri F, Ištók M, Bošnjak Z, Frančula-Zaninović S, Ladavac R, Visca P. Eur J Clin Microbiol Infect Dis. 2013 Nov 6.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Professor Jadranka Božikov, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** retired**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Medical Informatics Methods; Structure, methodology and functioning of scientific work 1; Structure, methodology and functioning of scientific work 2**BIOGRAPHY**

Born in Zagreb where she was educated. Graduated in mathematics from University of Zagreb Faculty of Science in 1977. At the School of Medicine University of Zagreb she completed postgraduate studies in Public Health (Management and Planning in Health Sciences track) and received both, Master in Medical Science (1988) and PhD degree (1997). In 1978 she has joined the Department of Medical Statistics, Epidemiology and Medical Informatics of the Andrija Štampar School of Public Health, School of Medicine, University of Zagreb, firstly as a professional associate and assistant, then advancing in the scientific-teaching professorships from an assistant professor (1998), associate professor (2004) and full professor (2010) to the permanent tenure full professor (2015).

She participated in several internationally supported projects intended for capacity building in public health and medical education, the first one was joint project of the Andrija Štampar School of Public Health and JICA - Japan International Cooperation Agency that already in mid-1980-ties established a Croatian network for continuing education for primary health care by the use of digital and video technology. Within the frame of this project Jadranka paid three-month study visit to Japan in 1985 and participated in the development of e-learning course wares. She served as Director of the Andrija Štampar School of Public Health from 2007 to 2016. She participated in public health projects in South East Europe, contributed to several European associations like ASPHER (Association of Schools of Public Health in the European Region), serves as a member of the editorial board of several scientific journals and reviewer of project proposals for national research funding agencies. Simulation modeling and its application in public health and biomedicine has been in focus of her scientific interest from the very beginning of her career.

For more than a decade she served as an assistant to the director of PhD program in Biomedicine and Health Sciences contributing to the establishment and development of this PhD program based on the Bologna process principles in 2003, including the organization of two European conferences on harmonization of PhD programs in biomedicine and health sciences held in Zagreb in 2004 and 2005 that led to the adoption of the Zagreb Declaration on PhD programs in Biomedicine and Health Sciences and the Standards for PhD Education in Biomedicine and Health Sciences in Europe. As a result of these conferences, the organization named ORPHEUS (Organization for PhD Education in Biomedicine and Health Sciences in the European System) was established.

Jadranka published several textbooks in the field of medical informatics and the use of information and communication technology in biomedicine, medical education, public health and health care, and she is participating regularly at domestic and international scientific and professional meetings in the field of medical informatics and public health. She published some 200 scientific and professional papers in international and domestic medical journals, of which over 50 are indexed in the Web of Science Core Collection database with more than 400 citations (h-index = 12).

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Nada Božina, assoc.prof.

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: School of Medicine, University of Zagreb,
University Hospital Center Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Pharmacogenomics, Research
Methods of Psychological Functions and Behavior, Selected chapters in epileptology in developmental age
; Methods of molecular biology in medicine

BIOGRAPHY

Born in 1953. Education: 1977 dr med, University of Zagreb, School of Medicine (MEF). 1980 MSc- MEF Zagreb, 2005.-PhD- MEF Zagreb. Work experience: 2011-Head of Clinical Unit for Pharmacogenomics and Individualization of Therapy, Department of Laboratory Diagnostics (KZLD), University Hospital Centre (KBC), 1997-2011 Head of the Laboratory for pharmacogenetics KZLD, KBC Zagreb, 1987-1997 Head of the Laboratory of Cell Culture, Centre for Biomedical Research Zagreb (CBI), 1983-1987 Laboratory of cell culture CBI, 1979-1983 Specialization in internal medicine KBC Zagreb, 1977-1979 Internship, KBC Zagreb. The main scientific area of interest is pharmacogenetics / pharmacogenomics, genetic predisposition testing efficacy / side effects of drugs; the study of polymorphisms of metabolic enzymes, transporter proteins and receptors and their role in the variability of pharmacotherapy. Published more than 90 scientific papers, of which 48 in CC, have more than 1000 CC and SCI citations. Won several awards at international congresses. Mentor of 9 doctoral dissertations .Croatian delegate et the European Medicines Agency (EMA), the working group IPN ENCePP (European Network of Centre for Pharmacoepidemiology and Pharmacovigilance), and in the Working group for pharmacogenomics (EMA Pharmacogenomics working party) London, United Kingdom.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 20.04.2015.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Tamara Božina, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** School of Medicine, University of Zagreb**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Pharmacogenomics; Biochemical methods in biomedical research; Molecular and biochemical approach to genetic disorders; Methods of molecular biology in medicine**BIOGRAPHY**

Born in Rijeka, 1980. Education: Faculty of Food Technology and Biotechnology (2009), Doctor of Medical Science (2014), Postgraduate Specialist Study Public Health at the University of Zagreb (2016). Employment: a research assistant at the School of Medicine, Department of Medical Chemistry, Biochemistry and Clinical Chemistry since 2009. She participates in under- and postgraduate teaching at the University of Zagreb. She has published 16 scientific papers. She participated in the realization of several domestic scientific projects. For scientific work she has won two first prizes at international conferences. The main scientific interests of Tamara Božina relate to genetic predisposition of individuals for the development of phenotypic traits related to obesity, dyslipidemia, metabolic syndrome and related cerebrovascular disorders and genetic factors in the form of variability of metabolic enzymes and drug carriers associated with pharmacokinetic modulation, pharmacodynamics and overall efficacy/toxicity of pharmacotherapy.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK:**LIST OF PUBLISHED WORK WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME**

2018. - „The role of genetic polymorphism of metabolic enzymes P450 (CYP) as a factor for hepatotoxicity“, supported by the University of Zagreb, project leader Tamara Božina

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Sanja Brangan, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: School of Medicine, University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Structure, methodology and functioning of scientific work 2 (topic: Language and style of scientific writing)

BIOGRAPHY

Sanja Brangan is a research associate in interdisciplinary field of sciences (Biomedicine and Health Sciences - Public Health; Humanities - Philology); researcher ID: 264176 - Sanja Kušec. She graduated from the School of Humanities and Social Sciences in 1990 (English language and literature; Italian language and literature), and received her Master in Public Health degree in 2005 (thesis: Harmonization of professional and lay terminology in doctor-patient relationship) and her PhD degree in 2011 (thesis: Development of readability formulas for healthcare communication in Croatian language) from the School of Medicine, University of Zagreb. Her research focuses on linguistic aspects of healthcare communication, primarily on health literacy, readability formulas, language and style of scientific writing, and analysis of linguistic corpora in biomedicine. She has published 10 original research papers, 1 review paper, and 2 professional papers (total IF = 28.810; 99 citations), and has presented her research results at national and international conferences. Also, she has been involved in linguistic validation of patient questionnaires for over 20 years, and in translation and English language editing of scientific papers since 1993. She has been teaching Medical English to graduate medical students since 2000, and Language and Style of Scientific Writing to PhD biomedical students since 2002. Between 2004 and 2012, she was involved in teaching medical students at the School of Medicine in Zagreb with the topic on doctor-patient communication, and psychology students at the Osijek University with the topic on communication with patients and health literacy.

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: prof.dr.sc. Boris Brkljačić

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University of Zagreb School of Medicine

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Application of Doppler in research and diagnosis of diseases of blood vessels, Hand surgery; Morphological research methods in biomedical sciences; Advanced ultrasonography in gastroenterology and hepatology

BIOGRAPHY

Board certified radiologis, subspecialist of interventional radiology and ultrasound, full permanent professor, Cathedra of Radiology, chairman, Department of diagnostic and interventional radiology MEF UH „Dubrava“. Vice-dean for science, University of Zagreb School of Medicine and Chair of Radiology Cathedra.

Board of Directors member (2017-2022), first vice-president (2018-9), European Society of Radiology, Vienna. Executive council member of ESR (2011-2017), Finance and Internal Affairs Chair (2011-4), External Affairs and Communication Chair (2014-2017). Član Executive Board International Society for Strategic Studies in Radiology (2013-19). Fellow European Society of Urogenital Radiology.

First vice president of Croatian Medical Association 2013-2021. President of Croatian Society of Ultrasound in Medicine and Biology of CMA. President of Croatian Society of Radiology 2008-2012.

Honorary member, Israel Radiological Association, Hungarian Radiology Sociate, Bulgarian Association of Radiology, Romanian Society of Imaging and Radiology, Belarus Association of Radiology, slovenian Society for Ultrasound in Medicine

Education in Thomas Jefferson University, Philadelphia and Memorial Sloan Kettering Cancer Center, Cornel University, New York City.

Invited lectures at over 260 congresses, professional meetings and institutions in Croatia, USA, Australia, China, Korea, South Africa, Colombia, Israel, Egypt, Iran, Dubai, Qataru, Georgia, Kazakhstan, and over 20 European countries. Organized 32 congresses/ professional meetings, president of joint congress of European Society of Urogenital Radiology and U.S. Society of Uroradiology in Dubrovnik 2011. Visiting profesor, Department of Radiology, Memorial Sloan Kettering Cancer Center, New York City. Vice-presidentk European Congress of Radiology 2019. President European Congress of Radiology 2020.

Author of two monographic textbooks, 59 chapters in foreign and domestic books, 110 scientific and professional papers. 1.348 citations (SCOPUS); h-index 21. Editor-in-chief Journal of Ultrasound (SIUMB). Editorial Board member „Ultraschall in der Medizin“ (EFSUMB). Principal Investigator at three competed scientific projects of Ministry of Science of Croatia, PI of active investigative project of Croatian Science Foundation (2017-21).

President of the Board for Radiology of Ministry of Health of Croatia since 2004. and Board for Professional execution of breast cancer screening programme since 2005. Ordinary member of Academy of Medical Sciences of Croatia since 2010.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 2013

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Srećko Budi, MD PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University Hospital Dubrava

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Hand Surgery, Microvascular tissue transfer

BIOGRAPHY

Name: Srećko Budi, MD, PhD, Ass. Prof.

Occupation

- Specialist of Plastic, Reconstructive and Aesthetic surgery
- Specialist of General Surgery
- Address /Work/

Dept. of Plastic, Reconstructive and Aesthetic Surgery

(accredited by EBOPRAS for educational exchange programmes)

University Hospital Dubrava

Avenija Gojka Suska 6

10 000 Zagreb

Croatia,

Certificates

- Medical Doctor (MD); Ministry of Health, Zagreb, Croatia,

June 26, 1989 /BACHELOR OF MEDICINE/

(Graduation Thesis: Artificial Ligaments of the Knee)

- Medical Doctor /License/; Ministry of Health, Zagreb, Croatia, June 29, 1990
- General Surgeon; Ministry of Health, Zagreb, Croatia, June 25, 1996
- Master of Science (MSc); Postgraduate Study of Natural Sciences, Department of Biology, Division of Biomedicine, Zagreb, Croatia, July 10, 1998

(Master of Science Thesis: Experimental Model of Modified Basket-Like Plate in the Case of Patella Fractures)

- License for Independent Work, Republic of Croatia, Croatian Medical Chamber, Zagreb, December 20, 2002 (This license was issued for the period from December 20, 2002 to December 19, 2008)

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

- Doctor of Science (Ph. D.), University of Zagreb, Medical School, Zagreb, Croatia, September 15, 2003

(PhD Thesis: Mathematical-Anthropological Determination of NAC Position in Male)

- Plastic Surgeon; CSPRAS; Ministry of Health, Zagreb, Croatia, June 09, 2003
- License for Independent Work, Republic of Croatia, Croatian Medical Chamber, Zagreb, May 12, 2009 (This license was issued for the period from December 20, 2008 to December 19, 2014)
- Senior Research Associate in the Scientific Field of Biomedicine and Health – Field of Clinical Medical Science, Scientific Field Committee for the Field of Biomedicine and Health – Field of Basic Medical Sciences, Clinical Medical Sciences, Public Health and Health Protection, Dental Medicine and Pharmacy, Zagreb, Croatia, September 18, 2006
- Assistant Professor, University of Zagreb, Medical School, Zagreb, Croatia, October 07, 2009
- Science Advisor in the Scientific Field of Biomedicine and Health – Field of Clinical Medical Science, Scientific Field Committee for the Field of Biomedicine and Health – Field of Basic Medical Sciences, Clinical Medical Sciences, Public Health and Health Protection, Dental Medicine and Pharmacy, Zagreb, Croatia, March 24, 2011
- License for Independent Work, Republic of Croatia, Croatian Medical Chamber, Zagreb, January 30, 2015 (This license was issued for the period from December 20, 2014 to December 20, 2020)
- Associate Professor, University of Zagreb, Medical School, ZagrebCroatia, May 02, 2016

Previous Experiences (Fellowships)

- General Surg., Univ. Hosp. Sestre Milosrdnice., Zagreb, Croatia, 1992/96
- Plastic Surg., Univ. Hosp. Dubrava, Zagreb, Croatia, 1996/1998
- Plastic Surg., Division for Plastic, Reconstructive and Hand Surgery, University of Zürich, Medical School, Zürich, Switzerland, 1998/ 2000 /fellowship/
- Plastic Surg., Behandlungszentrum Vogtareuth, Germany, 2000 /visiting fellow/
- Plastic Surg., University Clinic for Plastic and Reconstructive Surgery, Innsbruck, Austria, 2001 /visiting fellow/

- Plastic, Reconstructive and Aesthetic Surgery, University Hospital Dubrava, Zagreb, Croatia, 2000/present

Fields of Special Scientific and Clinical Interests

- Plastic and Reconstructive Surgery (in general)
- Aesthetic surgery (in general with special interest in breast, eyelid, ear and facial surgery; VASER liposuction)
- Breast Reconstruction (autologous tissue and prosthesis/expanders)
- Non-surgical facial rejuvenation (Fillers, BotulinumToxin, Mesotrax)
- Microsurgery (free tissue transfer and replantation)
- Hand Surgery
- Refinements in Plastic Surgery

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Innovations

- Tie-Over Refinement: Fixclip, Croatian Authors Agency, Zagreb, Croatia, December 19, 2002 /IN: 02-2436/
- Mathematical Determination of NAC Position in Male in the Case of Burns, Transsexual Patients and Gynecomastia – Software Program, Croatian Authors Agency, Zagreb, Croatia, November 2003

Appointments

- Medical Researcher, Ministry of Technology and Science, Zagreb, 1994/2006
- Lecturer of Plastic Surgery, University of Zagreb, Medical School, Zagreb, 2000/present (students, postdoc. . .)
- President of Wound Management Section (Croatian Society for Plastic, Reconstructive and Aesthetic Surgery) 2008/present
- Official Trainer for HA Filler in the field of facial rejuvenation , Zagreb, Croatia, 2009/present
- Examination Commission (Member) for plastic surgery residents in Croatia (official license in plastic, reconstructive and aesthetic surgery) 2010/present
- Official Trainer for Mesotrax Lifting Threads in the field of facial and body rejuvenation, Zagreb, Croatia, 2014/present

Associations

- Croatian Society of Plastic, Reconstructive and Aesthetic Surgery (CSPRAS) (www.hdprek.hlz.hr, www.kbd.hr/cspras)
- Croatian Surgical Association
- Croatian Medical Association
- Croatian Medical Chamber
- ISAPS (International Society of Aesthetic Plastic Surgery)
- ESPRAS (European Society of Plastic, Reconstructive and Aesthetic Surgery)
- EBOPRAS (European Board of Plastic, Reconstructive and Aesthetic Surgery)
- EWMA (European Wound Management Association)
- ECAMS (European College of Aesthetic Medicine and Surgery)

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Ana Budimir, assoc. prof. MD, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** School of Medicine University of Zagreb**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Methods of molecular biology in medicine; Biomaterial infections**BIOGRAPHY**

Born in Livno, B&H, on 13th of March 1973. Married, mother of three children (21, 19 and 17 years of age). Since 2015 - Head of Unit for diagnostic, typing and surveillance of hospital-acquired infections -UHC Zagreb, Dept. of clinical and molecular microbiology. 2013 -associate professor -University of Zagreb, School of medicine, Department of Medical microbiology and parasitology. Doctoral thesis: Analysis of resistance and virulence genes in MRSA strains, defended in 2006. 73 published papers: 34 cited in CC, 10 papers cited in SCI expanded, 20 papers cited in Index Medicus, 7 in Excerpta Medica and 3 in non-indexed journals, 35 congress abstracts. 1022 citations according to SCI and SSCI, H index 14. Scientific advisor since 4th June 2013. Participated in numerous international and national educational courses, in some as Faculty member. Associated in national and international projects: FP7 and HRZZ. Since 2002 - participation in different courses -School of Medicine: “Medical microbiology and parasitology”, “Clinical microbiology”, “Medical microbiology” - medical studies - Medical Studies in English. Since 2011-course coordinator of elective course. I was my hands from hospital infections. I teach courses at 6 different post-graduate programs in: Pulmology, Nephrology, Anaesthesiology, reanimatology and intensive medicine, Urology, Epidemiology. Participation in 3 different programs -Postgraduate studies: Biomedicine and health sciences. I was mentor to 17 graduate thesis and 4 doctoral theses, and 2 in progress. I am coordinator of multiple postgraduate and continuous education courses, active in Professional societies, and Boards of Medical School and UHC Zagreb. Member of Editorial board of ADMET & DMPK (ISSN 1848-7718) since 2012. Ad hoc reviewer for multiple journals in area of microbiology and infection control. Member of Executive committee Croatian society for Clinical Microbiology, Croatian medical association.

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Anja Bukovac, mag. oecol. et prot. nat.**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** School of Medicine, University of Zagreb**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Genomic Instability**BIOGRAPHY**

Anja Bukovac started working at the School of Medicine, University of Zagreb in 2016 as part of the Croatian science foundation (HRZZ) project which educates young PhD students. She is scientific novice and assistant at the Department of medical biology and Croatian institute for brain research. In 2012 she received her master degree at the Department of biology, Faculty of Science, University of Zagreb. At the same faculty she enrolled in doctoral program in biology in 2015. In 2016 she became a member of the HRZZ project called "The role of the Wnt signalling pathway in the Epithelium-Mesenchymal transition". As part of the project she attended a summer course in molecular biology which was held at the Laboratory of Support to Research in Molecular Medicine, Faculty of Medicine in Porto, Portugal. During her work at the School of Medicine, University of Zagreb, she became associate in two scientific projects (HRZZ and ZCI), co-author of six scientific publications and she actively participated in 15 scientific conferences. Her fields of research are cancer genetics, wnt signalling pathway, tumor suppressor genes, oncogenes, genetic basis of human brain tumors, genome instability and epithelium-mesenchymal transition with emphasis on primary brain tumors. She is a member of the European Association for Cancer Research (EACR), Croatian Association for Cancer Research (CACR) and Croatian Society for Neuroscience.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Assistant professor Krešimir Bulić, MD, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University hospital center Zagreb, School of Medicine University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Hand surgery

BIOGRAPHY

Date and Place of Birth: November 10, 1969, Split, Republic of Croatia

Nationality and Citizenship: Croatian, Croatian

Family: married, father of two sons

Knowledge of foreign languages: active knowledge of English and French

Education:

1988 matured at Newton North High School, Boston, USA

1993 graduated from the Faculty of Medicine, University of Zagreb, average 4.8

2003 Specialization in General Surgery, Clinical Hospital Center Zagreb

2008 subspecialization of Plastic, Aesthetic and Reconstructive Surgery, Clinical Hospital Center Zagreb

Employment (currently):

Head of Clinical Unit for Clinical Research, Clinic for Surgery KBC Zagreb

Head of Department of Plastic Reconstructive Surgery, Department of Plastic Surgery and Breast Surgery, Clinic for Surgery KBC Zagreb

Senior Assistant, Department of Surgery, Faculty of Medicine, University of Zagreb

Graduated Academic Degrees:

2003, Master of Science, "Vertebral Diligent Circulation Doppler Examination - Ultrasound After Cranial Neck Pain Injury", Mentor Prof. dr. sc. Slavko Davila, Faculty of Medicine, University of Zagreb,

Of 2010 Ph.D., "Autostatic growth hormone, E-cadherin and catenine in breast cancer patients" mentor prof. dr. sc. Jasminka Jakić Razumović, Faculty of Natural Sciences and Mathematics, University of Zagreb

Advancement and functions in the service:

1,993th to 1,994th doctor's internship, Clinical Hospital Center Zagreb

1994th to 1995th Associate Professor, Department of Anatomy, University of Zagreb, Faculty of Medicine

1995th to 1998th acting officer of the Croatian Army

1998th to 2003rd Specialization in General Surgery, Clinical Hospital Center Zagreb

2,003th to 2,004th Subspecialization from Plastic, Aesthetic and Reconstructive Surgery, Queen Victoria Hospital, United Kingdom (12 months)

2004th to 2006th Sectional Physician at the Department of Plastic Surgery and Breast Surgery, Clinical Hospital Center Zagreb

2006th to 2008th subspecialization from plastic, aesthetic and reconstructive surgery,

Clinical Hospital Center Zagreb

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2007th to 2008th subspecialization from plastic, aesthetic and reconstructive surgery,

Queen Victoria Hospital, United Kingdom (12 months)

2008th to 2010th Sectional Physician at the Department of Plastic Surgery and Breast Surgery, Clinical Hospital Center Zagreb

2008th to 2011th assistant, Department of Surgery, University of Zagreb, Faculty of Medicine

2010.- Head of Department of Plastic Surgery, Department of Plastic Surgery and Breast Surgery, Clinical Hospital Center Zagreb

2011.- Senior Assistant, Department of Surgery, University of Zagreb, Faculty of Medicine

2012. - Head of Clinical Unit for Clinical Research, Surgery Clinic, Clinical Hospital Center Zagreb

Scientific and professional training

1994th to 1995th Postgraduate Study: Ultrasound in Clinical Medicine, Medical School, University of Zagreb

2000 Salzburg-Cornell Osteopathic Surgery Seminar, Salzburg, Austria

2001. International Symposium for Plastic Surgeons: Aesthetic Breast Surgery - Update, Vienna, Austria

2002. HDPREK microchip course, Zagreb

2,003th to 2,004th Senior Registrar, Plastic and Reconstructive Surgery, Queen Victoria Hospital, United Kingdom (12 months)

2004. Canniesburn flap course, Glasgow, Scotland

2007th to 2008th Senior Registrar, Plastic and Reconstructive Surgery, Queen Victoria Hospital, United Kingdom (12 months)

2012. The Art of Medical Teaching, ŠNZ A. Štampar

Participation in the realization of scientific projects

Organization of professional meetings

2002 in the Organizing Committee of the 4th Croatian Congress of Plastic, Aesthetic and Reconstructive Surgery, Zagreb

2012 at the Organizing Committee of the 9th Croatian Congress of Plastic, Aesthetic and Reconstructive Surgery, Zagreb

Work in the committees and commissions of the faculty of medicine

1991-1993 a representative of students at the Medical School Council

2009 - 2013 Representative of Assistant at the Faculty Medical School

2013 - member of the Electoral Commission

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Membership in scientific and professional societies

1994 Hrvatski liječnički zbor

1998 Croatian Medical Chamber

2003. General Medical Council, United Kingdom

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: TOMISLAV BULUM, MD, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Medical School University of Zagreb, Croatia; Vuk Vrhovac Clinic for Diabetes, University Hospital Merkur, Zagreb, Croatia

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Metabolic syndrome

BIOGRAPHY

Professional positions held: Since 2005 he is employed at the Vuk Vrhovac University Clinic for Diabetes, University Hospital Merkur, where he currently holds a position of a specialist in internal medicine and subspecialist in endocrinology and diabetology in Department of diabetes. Since 2016 he is also employed as an postdoctoral researcher at the Medical School University of Zagreb.

Education: Graduated medicine at the School of Medicine, University of Split in 2002. Ph.D. degree received in 2010 at the Faculty of Science, University of Zagreb (doctoral thesis “Relationship between insulin resistance, thyroid function and serum lipid profile in euthyroid patients with type 1 diabetes”). On 1 March 2012 he passed the specialist exam in internal medicine and gained the name of a specialist in internal medicine. In November 2015 he finished subspecialist training in endocrinology and diabetology and gained the name of a subspecialist in endocrinology and diabetology.

Teaching: He is a lecturer at the undergraduate courses and also at postgraduate doctoral studies in Biomedicine and Health Sciences at Medical School University of Zagreb (courses Clinical propedeutics, Internal medicine, Based medical skills, Metabolic syndrome and Arterial hypertension and diabetes mellitus).

Scientific projects: Since 2012 he is a researcher on the scientific project «Metabolic syndrome in type 1 diabetes“, no. 045-1080230-0516, funded by the Croatian Ministry of Science, Education and Sports (CMSSES), completed by the end of 2013. Since 2015 he is a researcher on the scientific project “Relationship between endothelial dysfunction driven by adipocytokines and the development and progression of microvascular complications in patients with type 1 and type 2 diabetes“, funded by the Croatian Science Foundation.

Professional and scientific activities: He is an author over 70 scientific papers published in Web of Science, Scopus and Index Medicus indexed journals (in 34 papers as a first or corresponding author), and an over 90 scientific and professional abstracts. He is a Reviewer in 17 Current Contents indexed journals (Diabetologia, Diabetes Research and Clinical Practice, Diabetes Obesity and Metabolism, Diabetes/Metabolism Research and Reviews, Endocrine, Lipids, Heart, Hormone and Metabolic Research, British Journal of Nutrition, Global Health Action, Renal Failure, Clinical Epidemiology, Canadian Journal of Physiology and Pharmacology, International Journal of Artificial Organs, European Journal of Clinical Investigations, Archives of Medical Research and World Journal of Gastroenterology). Since 2016 he is a Senior scientific associate at the Medical School University of Zagreb. He is an Editorial Board member of journals Plos One and Archives of Clinical Nephrology.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 6/2016- Senior scientific associate

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Assistant Professor NIKOLA BULJ, MD, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: UNIVERSITY HOSPITAL CENTRE "SISTERS OF MERCY", UNIVERSITY OF ZAGREB, ZAGREB SCHOOL OF MEDICINE

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: ENDOCRINE TUMORS OF GASTROINTESTINAL SYSTEM AND PANCREAS

BIOGRAPHY

PERSONAL INFORMATION Nikola Bulj

Franje Wolfia 4, Zagreb (Croatia)

(+385) 1 3787 626

nikolabulj@gmail.com

Date of birth 26/01/1976

WORK EXPERIENCE

2015–Present Head of Department of echocardiography and non-invasive diagnostics, Cardiovascular Center, Sisters of Charity University Hospital Centre and School of Medicine University of Zagreb, Zagreb, Croatia

2012–2015 Cardiologist at the Department of Cardiology, Sisters of Charity University Hospital Centre, Zagreb, Croatia

2008–2012 Specialist of internal medicine at the Department of Cardiology, Sisters of Charity University Hospital Centre, Zagreb, Croatia

2004–2008 Internal medicine resident, Sisters of Charity University Hospital, Zagreb, Croatia

2002–2004 Scientific associate, Zagreb School of medicine, Sisters of Charity University Hospital, Zagreb, Croatia

EDUCATION AND TRAINING

2017–Present Assistant Professor of Medicine, School of Medicine, University of Zagreb, Croatia

2016 Course in deformation imaging and 3D/4D echocardiography (Berlin, Germany)

2015 Member – Working group for echocardiography – Croatian Cardiac Society

2014 Member – Working group for valvular heart disease – Croatian Cardiac Society

2013 PhD degree, School of Medicine, University of Zagreb, Croatia

2012 Subspecialist in the field of cardiology

2010 Vascular ultrasound – professional advanced training course,

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Pediatrician, clinical geneticist, full professor of medical genetics at Zagreb University Medical School, the founder (2000) and actual President of Clinical Genetic Society of Croatia, retired in October 2014. Since my retirement I 'm continuing to teach at Medical School of Zagreb under the contract.

My approach to any problem is holistic. In everyday practice I have been interested in clinical features of disease, its cause either at the level of chromosome or gene, in patient's family till his/her population. I do not separate routine work from research. Thanks to such approach I was lucky to be with dr. B. Dutrillaux and dr. I. Tivadar, the first to publish the location of the gene causing Duchenne muscular dystrophy (Canki N et al. Ann Génét. 1979) that was the prerequisite for further gene's identification. Except involvement in genetic causes of neuromuscular disorders I was engaged in clinical cytogenetics, male and female sterility and infertility, bone's disease, rare forms of malformations and cystic fibrosis. I was a reporter from Yugoslavia of Working Committee for Genetic Counseling- European Society of Human Genetics (1978), a reporter for WHO review of some community genetics services in Europe (1986), member of Steering Committee for Central and Eastern Europe, European Community concerted action for cystic fibrosis (coordinator J. J. Cassiman) (1996-99), and European Community Concerted Action for the Coordination of Cystic Fibrosis Research and Therapy (coordinator M. Goossens) (1993-97) that has permitted me to have experience in European collaboration. As a President of Organizing Committee of 3rd Congress of Yugoslav Geneticists with International Participation (Ljubljana 1987), the organizer of International Summer School of Prenatal Medicine: "Clinical biology of the fetus" (Dubrovnik, 1991), president of Organizing and Scientific Committee of First Eastern European CF Conference "What's New in the Diagnosis, Treatment and Prevention of Cystic Fibrosis", Zagreb, 2008), I have skills of good communicator between national and international (European) scientific community in the field of medical genetics. My actual main activities include: **Teaching medical and Ph.D. students** (Genetic basis and new diagnostic approaches to monogenic, especially neuromuscular disease; Ethics in clinical genetics; Positional cloning; Cytogenetics in clinical practice and research); **Clinical work** : Examination of selected patients from whole Croatia (children, adolescents and adults (no infants) with muscular and neurological disorders presumed to be monogenic in origin; **Research work**: basic research into the origins and molecular spectrum of some monogenic disorders with emphasis on epidemiological situation in Croatia. Special emphasis is on LGMD2A and B, OPMD and AS. Clinician by vocation, performing implemented research with strong interest in education and disseminating knowledge obtained from great teachers and numerous excellent colleagues and friends I have been privileged to have, I'm happy to transmit to my students and other colleagues.

My education and work experience: MD (University of Zagreb), Certificat de cytogénétique humaine (Univ. of Paris); M.Sc. in experimental biology (Univ. of Zagreb), D.Sc (Univ. of Ljubljana), Specialist

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

diploma in pediatrics (Univ. of Ljubljana). Postgraduate training in cytogenetics (Professor J. Lejeune) and clinical genetics at Hôpital des Enfants Malades, Paris, genetic counseling (Professor J-J Robert, Hôtel-Dieu, Lyon), prenatal diagnosis (Professor A. and dr. J. Boué, INSERM U73 – Paris); molecular genetics (Professor J-C Kaplan, Hôpital Cochin, Paris); myology (Professor M. Fardeau, Hôpital Pitié-Salpêtrière, Paris). I have spent one year as Fulbright scholar at Columbia Univ. College of Physicians & Surgeons, Dept. of Genetics and Development (prof. D. Warburton), New York, USA. University career have started as an assistant at Institute of Anatomy, Zagreb Univ. School of Medicine; was foreign assistant (Service de génétique) at University Claude Bernard in Lyon; an assistant professor then associated professor in medical genetics field, Univ. of Ljubljana Medical School and professor of clinical genetics at University of Zagreb Medical School. I was head of Cytogenetic Laboratory at Department of Gynecology and Obstetrics University Clinical Center of Ljubljana. Under my direction this laboratory was transformed in Division of medical genetics and then to Unit of medical genetics the biggest medical genetics centre in Slovenia. Upon return to native Zagreb (1996) I founded Division of Neurogenetics at Dept. of Neurology, University Medical Centre in Zagreb and Laboratory of clinical neurogenetics and muscular disorders at Croatian Institute of Brain Research. My professional membership includes European Society of Human Genetics (ESHG), European Cytogeneticists Association (member of advisory council since 1998), World Muscle Society, member of Neuromediterranean board of Neuromediterranean, Croatian Academy of Medical Science (full member), Clinical Genetics Society of Croatia (president), Croatian Society for Neuroscience, Croatian Medical Association, Club de Conseil Génétique de Langue Française –previously named Club Européen de Conseil Génétique (member of Administrative Committee since 1978 till its end in 2005) and Slovenian Genetics Society (President 1983-88; 1994-96).

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Assist. Prof. Darko Chudy, MD, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University of Zagreb School of Medicine,
University Hospital Dubrava

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Research Methods of
Psychological Functions and Behavior;

BIOGRAPHY

Name: Darko Chudy

Address: Department of Neurosurgery, Clinical Hospital Dubrava, Av. G. Šuška 6, 10000 Zagreb,
Croatia; e-mail: darko.chudy@gmail.com

Personal Data: born on February 8, 1962 in Zagreb, Croatia; married, father of four children

Professional education, training and activities:

1988.: M. D. degree, School of Medicine, University of Zagreb,

1989.: intern at the University Clinical Hospital Center Zagreb - Rebro, Zagreb, Croatia

1992-1997. Resident of neurosurgery,

1997- 2007: Neurosurgeon at the Department of Neurosurgery, University Clinical Hospital Centar
Zagreb,

2007- present: Head of Department of neurosurgery Clinical Hospital Dubrava, Zagreb

1994.: Visiting physician at the Cologne University, Department of Stereotactic and Functional
Neurosurgery, under supervision of Professor Volker Sturm (three months)

1996.: Visiting physician at the Stockholm, Sophiahemmet Hospital, under supervision of Professor Lauri
Laitinen, and Department of Neurosurgery, University of Umea, under supervision of Professor Marwan
Hariz (three months).

2001. : Visiting physician at the Ankara University, Department of Neurosurgery, under supervision of
Professor Yucel Kanpolat (two months)

2004.: Visiting physician at the La Timone Hospital, Marseille, Department of Stereotactic Neurosurgery
and Radiosurgery, under supervision of Professor Jean Regis (one month)

2009-present lecturer for functional neurosurgery at Medical School University of Maribor,

2011.: Associated affiliated professor at Medical School Washington University Seattle USA,

Positions, research activities and achievements:

1984.-1988.: Research Associate, Department of Anatomy, School of Medicine, University of Zagreb;

1988.-1992.: Assistant in Anatomy, Section of Neuroanatomy, School of Medicine, University of Zagreb;

1993-1995.: postgraduate course in neurobiology,

2000.: received Ph.D. degree at the School of Medicine, University of Zagreb (thesis title: "The clinical
study of possibilities and usefulness of the new stereoadapter in computer tomography and magnetic
resonance brain imaging").

2013. Associated professor at Medical School University of Zagreb

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2015. Associated professor at Medical School University of Zagreb in University Hospital Dubrava

Main professional and scientific achievements and interests:

- the main interest is stereotactic and functional neurosurgery for movement disorders, pain surgery and epilepsy surgery.
- 1995: successfully introduced stereotactic biopsy at the Department of Neurosurgery, School of Medicine, University of Zagreb;
- 1997-2004: successfully introduced several functional neurosurgical procedures in Croatia: stereotactic ablative methods for movement disorders (pallidotomy and thalamotomy), DREZ operation for chronic pain syndrome and deep brain stimulation, motor cortex stimulation as a stereotactic neurosurgical procedure for movement disorders and chronic pain (thalamic, pallidal and subthalamic stimulation and vagus nerve stimulation for epilepsy).
- clinical and research collaboration with Department of Neurosurgery at the University of Umeo, Sweden
- 2004. introduced of gamma knife radiosurgery at the Department of Neurosurgery, School of Medicine, University of Zagreb.
- 2010. associate on technological project: Robotic in neurosurgery and in 2017., in cooperation with the Faculty of Mechanical Engineering and Naval Architecture and INETEC company, with the support of EU funds project NERO (Robotic Stereotactic Framework), in which today 27 researchers participate.
- in 2015., together with neurologist of University Hospital Dubrava establishes a Reference Center of the Ministry of Health, Republic of Croatia for Functional and Stereotactic Neurosurgery,
- Appointed for the proctor in the deep brain stimulation of Medtronic Company and participates in the introduction of DBS in Albania,
- Organizes the first Regional DBS Meeting in Zadar 2015 and the second in 2017 with the participation of a neurologist and neurosurgeon from Queen Square Hospital in London,

Awards:

1999. Award of the Croatian Medical Association.

2004. Award of the Medical School University of Zagreb

2018. Award of Croatian Medical Chamber

Membership in professional societies:

1987- present: member of the Croatian Medical Association (CMA),

1991-present: member of Croatian Neurosurgical Association (CNA),

1994-present: member of European Association of Neurosurgeons (EANS),

1994-present: member of World Neurosurgical Society (WNS),

1997-present: member of the World Society for Stereotactic and Functional Neurosurgery (WSSFN).

2009-present: member of the European Society for stereotactic and Functional Neurosurgery

Medicine

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Prof. Mario Cifrek, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** University of Zagreb, Faculty of Electrical Engineering and Computing**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Electrophysiological Methods in Medical Research**BIOGRAPHY**

Born on March 24th 1964 in Varazdin. Graduated in 1987, MSc 1992, Ph.D. 1997 at the Faculty of Electrical Engineering and Computing in Zagreb. Since 1987 employed in FER. Scientific and professional work in the field of sensors, electronic instrumentation and biomedical engineering, with special emphasis on the measurement and analysis of biomedical signals. Teaching activity. FER undergraduate: Computer Aided Design of Electronic Systems, Technology in Medicine; FER-graduate studies: Biomedical Informatics, Biomedical Signals and Systems, Electronic Equipment Power Supplies, Multisensor Systems and Locomotion, Programming Industrial Embedded Systems, Sensor Technology; FER-postgraduate studies: Biomonitoring Systems, Systems for Measurement Nonelectrical Values; MEF Medical Studies in English: Measurement and analysis of human locomotion; MEF-postgraduate studies: Electrophysiological Methods in Medical Research. He participated in eight scientific and many professional projects. He led two Proof of Concept Grant Fund for Researchers – PoC Public projects (HAMAG BICRO) and two projects of bilateral cooperation with China. Currently he is leading one research and innovation project (strengthening capacity for research, development and innovation – IRI) and participating in Centre of Research Excellence for Data Science and Cooperative Systems – DATACROSS. He is editor of two scientific books and co-author of the nine chapters in scientific books, 31 journal papers, 20 of them CC with more than 350 citations (Wos), and more than 150 conference papers. He was a mentor of a six defended doctoral dissertation at the Faculty of Electrical Engineering and Computing and one at the School of Dental Medicine. Mentor of four PhD students. Member of the Institute of Electrical and Electronics Engineers, International Federation for Medical and Biological Engineering, European Society for Engineering and Medicine, International Federation for Automatic Control, Croatian Medical and Biological Engineering Society, Croatian Society for Communications, Computing, Electronics, Measurement and Control, and a member of the Croatian Academy of Engineering. He was awarded the silver medal "Josip Loncar" for significant and successful master's work, and for the successful doctoral dissertation. He also awarded Annual award of the City of Zagreb in 2014, and Annual Award "Rikard Podhorsky" of the Croatian Academy of Engineering.

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED AND WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

Research and development of the system for driver drowsiness and distraction identification – DFDM, 1. 10. 2018 – 30. 09. 2021, Coordinator XYLON d.o.o. Strengthening capacity for research, development and innovation (IRI).

Young researchers' career development project – training of doctoral students, Croatian Science Foundation. October, 2016 – October 2020. PhD student mentor (Krešimir Friganović), topic „Computer Based Detection of Atrial Fibrillation in Multi-channel Electrocardiogram“.

A software system for parallel analysis of multiple heterogeneous time series with application in biomedicine – MULTISAB (project leader dr. sc. Alan Jović), 1. 10. 2015. – 30. 9. 2018, supported by Croatian Science Foundation, UIP-2014-09-6889. Project associate.

Neurophysiology of Movement Investigated by Evoked Potential Methods (principal investigator Asst. Prof. Velimir Išgum, PhD), 01. 03. 2008 – 30. 10. 2013, Ministry of Science, Education and Sports project RH 312-0362979-3258. Project associate.

Noninvasive Measurements and Procedures in Biomedicine (principal investigator Prof. Stanko Tonković, PhD), 1. 1. 2007 – 30. 10. 2013, Ministry of Science, Education and Sports project RH 036-0362979-1554. Project associate.

Uninvasive Measurement and Technologies in Biomedicine (principal investigator Prof. Stanko Tonković, PhD), 2002 – 2007, Ministry of Science and Technology project RH 0036007. Project associate.

Measurement Systems for Processing of Biological Quantities (principal investigator Prof. Ante Šantić, PhD), 1997 – 2002, Ministry of Science and Technology project RH 036026. Project associate.

New Bioimpedance Methods for Measurement of Biological Parameters (principal investigator Prof. Ante Šantić, PhD), 1990 – 1996, Ministry of science and Technology project RH 2-07-259. Project associate.

Development of Special Instrumentation for Measurement, Analysis and Processing of Biological Parameters and Measurement of Non-electrical Quantities for Industrial Applications (principal investigator Prof. Ante Šantić, PhD), 1988 – 1990, scientific project 33.10. Project associate.

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED IN THE LAST FIVE YEARS

Research and development of the system for driver drowsiness and distraction identification – DFDM, 1. 10. 2018 – 30. 09. 2021, Coordinator XYLON d.o.o. Strengthening capacity for research, development and innovation (IRI).

Body area networks for health applications based on intrabody communication. 2017-2019. Fuzhou University, College of Physics and Information Engineering, Fujian Province, P.R. China. Croatian-Chinese Scientific and Technological Cooperation, project leader Asst. Prof. Željka Lučev Vasić, PhD. Project associate.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Centre of Research Excellence for Data Science and Cooperative Systems – DATACROSS, project leaders prof. Ivan Petrovi, PhD and prof. Sven Lončarić, PhD. 1. 11. 2017 – 31. 10. 2021. Project associate.

Young researchers' career development project – training of doctoral students, Croatian Science Foundation. October, 2016 – October 2020. Doctoral student (Krešimir Friganović) co-mentor with asst. prof. Alan Jović, topic „Computer Based Detection of Atrial Fibrillation in Multi-channel Electrocardiogram“.

Intrabody Communication as a Key Technology for Internet of Things in Health Applications. 2015-2017. Fuzhou University, College of Physics and Information Engineering, Fujian Province, P.R. China. Croatian-Chinese Scientific and Technological Cooperation. Project leader.

A software system for parallel analysis of multiple heterogeneous time series with application in biomedicine – MULTISAB (project leader dr. sc. Alan Jović), 1. 10. 2015. – 30. 9. 2018, supported by Croatian Science Foundation, UIP-2014-09-6889. Project associate.

NUMBER OF SUCCESSFUL MENTORSHIPS THAT RESULTED IN DISSERTATION DEFENCE: Seven (7)

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Maja Cigrovski Berković, MD, PhD, Assistant professor

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University Hospital Centre Sestre milosrdnice

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Molecular genetics of gastrointestinal tumors, Endocrine tumors of gastrointestinal tract and the pancreas

BIOGRAPHY

Assistant professor Maja Cigrovski Berković, MD, PhD

Identification number of the scientist: 314071

Department for Endocrinology, Diabetes and Metabolism UHC Sestre milosrdnice, Vinogradska 29, 10000 Zagreb, Croatia, email: maja.cigrovskiberkovic@gmail.com

EDUCATION

2013, subspecialist in Endocrinology and Diabetes

2009, PhD obtained at Medical School University of Zagreb, Croatia

2008, specialist in internal medicine

2000, MD, Medical School University of Zagreb

WORK EXPERIENCE

2013- present, subspecialist in Endocrinology and Diabetes at UHC Sestre milosrdnice, Zagreb, Croatia

2016-Assistant professor Faculty of Kinesiology University of Zagreb, Croatia

2008-2013, specialist in internal medicine UHC Sestre milosrdnice, Zagreb, Croatia

2004-2008, internship in internal medicine UHC Sestre milosrdnice, Zagreb, Croatia

2001-2004, young scientific researcher, Department of Endocrinology, Diabetes and Metabolism, Clinic of Internal medicine UHC Sestre milosrdnice, Zagreb, Croatia

2000-2001, MD, UHC Sestre milosrdnice, Zagreb, Croatia

RESEARCH AND SCIENTIFIC PROJECTS/GRANTS 2001-2004, young scientific researcher, project financed by Ministry of Science Neuroendocrine tumors of gastrointestinal tract and pancreas

2002, scientific associate, project by Veterinary School University of Zagreb, Measurement of glycogen in human blood

2004-2010, scientific associate, project financed by Ministry of Science, Neuroendocrine tumors of gastrointestinal tract and pancreas

2013, PI and national coordinator of multicentric and multinational noninterventional research of hypoglycemia in insulin treated type 1 and type 2 diabetes patients (HAT-Hypoglycemia Assessment Tool)

2010-2014, PI, project financed by Ministry of Science Neuroendocrine tumors of gastrointestinal tract and pancreas

AWARDS

2014. Etzweiler international scholarship for IDC and Mayo Clinic, MN, USA

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2015 - present lecturer; Course: Molecular genetics of gastrointestinal tumors Doctoral Study in Biomedicine and Health Sciences School of Medicine, University of Zagreb

2015-present lecturer; Course Pancreatic Diseases, Doctoral Study in Biomedicine and Health Sciences School of Medicine, University of Zagreb

2015-present lecturer; Course Fundamentals of Medical Skills, School of Medicine, University of Zagreb, Croatia

2015- associate lecturer at School of Kinesiology University of Zagreb

2010 – present Course leader: Endocrine tumors of gastrointestinal tract and Pancreas, Doctoral Study in Biomedicine and Health Sciences School of Medicine, University of Zagreb

2004-2005, lecturer; Courses Rational use of medications and Medical Emergencies, School of Medicine, University of Zagreb, Croatia

2001-2009-lecturer; Course: Scientific approach to hypoglycemia, Doctoral study, School of Medicine University of Zagreb, Croatia

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 1.6.2016.

assistant professor; 13.12.2011. senior research associate

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Vladiana Crljen, assist. prof.**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** School of Medicine University of Zagreb**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Structure, methodology and functioning of scientific work 1**BIOGRAPHY**

Education and training M.D. – 1986. School of Medicine, University of Zagreb, 1981.-1986. M.Sc. – 1991. Faculty of Natural Sciences, University of Zagreb, postgraduate studies „Biology (Biomedicine) “ 1987.-1991. MSc Thesis title: „Insulin-like growth factor I stimulates phospholipid synthesis in renal cortical slices without production of inositol phosphates“, Ph.D. – 1995., School of Medicine, University of Zagreb, Area Biomedicine and health, field Basic Medical Sciences, branch Physiology, PhD Thesis title: "Effects of HGF on phospholipid metabolism in basal-lateral and brush-border membranes isolated from rat renal cortical slices"; Postdoctoral training: INSERM U356, France, 1995.-1996.; 2010 – Competence course for Scientists Using Animals in Research, Lab Animal Centre, University of Eastern Finland

Appointments: 2006. – Present - Assistant Professor of Physiology and Basics of Neurosciences, School of Medicine, University of Zagreb; 1996. - Senior Research Assistant (Senior Instructor), Physiology and Basics of Neuroscience, School of Medicine, University of Zagreb; 1995. – 1996. Postdoctoral training INSERM U356, France ; 1988.-1993. Research Assistant (Instructor) School of Medicine, University of Zagreb; 1987.-1988. Junior Researcher, School of Medicine, University of Zagreb; 1987. Intern, DZ Novi Zagreb

Professional, research, academic experience and achievements - Associate investigator in research projects: 2018. - The function of uroganylin, a new protein in the brain, from the cell physiology to human health FURNACE (IP-2018-01-7416, prof. dr. sc. Aleksandra Sindić); 2018. - Role of inositol pyrophosphates in regulation of cellular growth (supported by University of Zagreb, prof. dr.sc. Hrvoje Banfić); 2017. - Role of inositol pyrophosphates in regulation of cellular growth (supported by University of Zagreb, prof. dr.sc. Hrvoje Banfić); 2016. - Role of inositol pyrophosphates in regulation of cellular growth (supported by University of Zagreb, prof. dr.sc. Hrvoje Banfić); 2015. - Role of inositol pyrophosphates in regulation of cellular growth (supported by University of Zagreb, prof. dr.sc. Hrvoje Banfić); 2014. - Role of phosphatidyl-inositol 3-kinases in leukaemia cells differentiation (supported by University of Zagreb, prof. dr.sc. Dora Višnjić); 2013. - Signalling pathways in the regulation of leukaemia cells proliferation and differentiation, (Support I) University of Zagreb (D. Višnjić); 2007 – The role of phosphatidyl-inositol 3-kinaseC2β in cell nuclei (108-1081347-0173, MZOS, H. Banfić); 2002 – 2007 Inositol lipid second messengers in cell nuclei (0108-015, MZOS, H. Banfić); 1996-2001 Phospholipid second messengers (108013, MZOS, H. Banfić); 1995-1996 Activation of PLD by angiotensin II in freshly isolated rat renal cortical tubules (INSERM, France); 1994-1996 Second messengers and mechanisms of transport in cells (MZOS, Banfić)

Academic experience: over 300 hours of teaching in graduate study programme of Physiology, Basics of neuroscience, elective Stress and Brain, Medical Ethics, Postgraduate PhD programme study – Structure, methods and functioning of scientific work, Postgraduate professional study Urology - Selected topics from physiology of urogenital system; Other activities: Vice President of Animal welfare committee

Publications in CC indexed journals: 8 Citations: 130

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Danijela Cvijanović, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: School of Medicine, University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Biochemical methods in biomedical research

BIOGRAPHY

Personal data: born in Doboj (BiH), 1985. Education: 2009-2015 PhD in Chemistry, Faculty of Science, University of Zagreb. Work experience: 2015–present senior assistant, 2009–2015 assistant at Department of Medical Chemistry, Biochemistry and Clinical Chemistry, School of Medicine, University of Zagreb. Scientific projects: three. Publications: seven. Poster presentations: eight. Teaching: participation in various courses of integrated undergraduate and graduate study programmes (in both Croatian and English language) at School of Medicine and School of Dental Medicine, University of Zagreb. Member of Croatian Chemical Society.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK:

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER: 5

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Assist. Prof. Rok Civiľjak, MD, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University of Zagreb, School of Medicine; Dr. Fran Mihaljević University Hospital for Infectious Diseases, Zagreb, Croatia

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: “Pathogenesis of infectious diseases”, “Biomaterial infections”

BIOGRAPHY

PERSONAL INFORMATION: Address: Dr. Fran Mihaljević University Hospital for Infectious Diseases, Mirogojska 8, Zagreb; Department of Infectious Diseases, University of Zagreb School of Medicine, Šalata 3, Zagreb; Telephone: +385 91 4012547; Fax: +385 1 2826295; E-mail/Website: rok.civiljak@bfm.hr; www.bfm.hr

Date of Birth: October 18, 1966, Šibenik, Croatia. Education: MD, University of Zagreb School of Medicine, 1994, Zagreb, Croatia. University of Zagreb School of Medicine, Postgraduate Study: Scientific postgraduate course in biomedicine. PhD Thesis: “The impact of a care bundle on reducing the risk of occupational exposure to blood-borne infections among hospital personnel”. Clinical and academic positions: 2016 – 2018, Dr. Fran Mihaljević University Hospital for Infectious Diseases, Zagreb, - Deputy Hospital Director. 2017 – 2018, Department for Acute Respiratory Infections – Head. 2010 – 2018 Research Associate, and since 2016 Assistant Professor at Zagreb University Medical School, Croatia. Abroad training: 1998, Istituto Nazionale per le Malattie Infettive “L. Spallanzani”, Rome, Italy, Visiting Clinician Fellowship, five-week training program: Management of HIV infection (WHO fellowship) and 2002 – 2003, Istituto Nazionale per le Malattie Infettive “L. Spallanzani”, Rome, Italy, five-month training program in European Project on “Standardization of the management of occupational exposure to HIV/blood-borne infections and evaluation of post-exposure prophylaxis in Europe” (as a fellow of Ministry of Foreign Affairs of Italian Government). Memberships: European network for ICU-related respiratory infections (ENIRRI), supported by the European Respiratory Society (member), ESCMID Study Group for Infections in Travelers and Migrants – ESGITM (member).

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 2016, assistant professor

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Marijana Coric, assoc prof.

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Medical School University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Kidney transplantation, Liver transplantation in children

BIOGRAPHY

WORK EXPERIENCE

1994 -1995 Childrens Clinical Hospital, Zagreb, Croatia

1996-2000 Zagreb, Clinical Hospital Center, Zagreb, Croatia

2000 – till now, Zagreb, Clinical Hospital Center, Zagreb and Medical School University of Zagreb, Croatia

Main activities and responsibilities: Liver pathology, nephropathology, uropathology and electron microscopy

EDUCATION

Date: 1987-1993 Medical School University of Zagreb, Croatia, 1993 graduated – M.D.

1994 -1995 Internship – Childrens Clinical Hospital, Zagreb, Croatia

1996-2000 Residency in pathology, Clinical Hospital Center, Zagreb, Croatia

1997-1998 Postgraduate study (Natural Science – Biomedicine); Medical Faculty University of Zagreb, Croatia

2000 Master of Science, Zagreb, Medical Faculty University of Zagreb, Croatia

2005 Ph.D. Zagreb, Medical Faculty University of Zagreb, Croatia

Title or qualification awarded MD; PhD

TRAINING

Year 1998 and 1999., Postgraduate course in theoretic and diagnostic histopathology

Place of training Alexandroupolis, Greece

Name and type of organisation providing training The Departments of Pathology, The Democritus University of Trace, and University of Ioannina in collaboration with The St Bartholomews and the Royal London School of Medicine and Dentistry, And the University of Sheffield Medical School, U.K.

Principal subjects/Occupational skills covered General and surgical pathology

Year 2006, training period in Nephropathology, Basel, Switzerland, Institute for Pathology, University Hospital of Basel, 2011, training period in Nephropathology, Boston, USA, Brigham and Women's Hospital and Harvard Medical School in Boston

Principal subjects/Occupational skills covered: nephropathology and electron microscopy, liver pathology, uropathology

Additional information: assistant in Pathology since 2000., senior assistant in Pathology since 2006, assistant professor in Pathology, since 2009, assoc. prof. since 2017.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2007.-2011. senior researcher of the scientific project “Hepatocellular tumors” (108-0532264-0048)

2007.-2011. researcher of the scientific project “Proteomic research of urinary biomarkers of idiopathic nephrotic syndrome” (108-0982464-0178)

since 2015. researcher of the HRZZ project: Genotype-Phenotype correlation in Alport's syndrome and Thin Glomerular Basement Membrane Nephropathy

since 2017. researcher of the HRZZ project: Epigenetic biomarkers in blood and ejaculate of patients with seminoma of the testis.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 16.1.2017.g.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Marija Ćurlin, Assist. Prof.

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University of Zagreb School of Medicine

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Morphological research methods in biomedical sciences; Gene targeting in mammals; How to become a neuron?

BIOGRAPHY

Date and place of birth: 17.08.1973, Varaždin, Croatia

Current positions:

School of Medicine, University of Zagreb

-Assistant Professor of Histology and Embryology

-Head of the Laboratory for Neurogenetics and Developmental Genetics

-Head of the Electron Microscopy Centre

Previous working experience:

2009. – 2013.g. Postdoctoral research assistant at Department of Histology and Embryology, School of Medicine, University of Zagreb

2000. – 2009.g. Ph.D. research assistant at Croatian Institute for Brain Research, School of Medicine, University of Zagreb

1997. – 2000.g. research fellow at Croatian Institute for Brain Research, School of Medicine, University of Zagreb

Academic degrees achievement:

2013. Assistant Professor at University of Zagreb, School of Medicine and School of Dentistry

2006. Ph.D. in biomedical and basic medical sciences, University of Zagreb, School of Medicine

2000. Master of biomedical and basic medical sciences, University of Zagreb, School of Medicine

1997. Bachelor of science, molecular biology, University of Zagreb, Faculty of Science

Trainings:

Max Planck Institute for Evolutionary Anthropology, Leipzig, Germany (2011.)

International Centre for Genetic Engineering and Biotechnology, Trieste, Italy (2002.),

active participation at more than 20 international conferences, meetings and workshops

Fields of research

- the role of neurotransmitters in molecular regulation of the endocervical gland activity
- interactions of metal nanoparticles with cells in vitro and in vivo (nerve and glandular tissue)
- regulation of gene expression in human and mouse brain
- intracellular regulation of endocytosis in neural cells (intracellular localization and function of the members of ESCRT complex)
- embryology, mouse developmental genetics and neurogenetics (cloning and analysis of gene trapped genes)

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

- development of human brain (appearance and morphological diversity of the NADPH-d reactive “subplate” neurons in the human foetal telencephalon)

Teaching experience

- lectures, seminars and practicals in Histology and Embriology and four electives to M.D. students at School of Medicine, University of Zagreb (in Croatian and English) and to students at School of Dentistry, University of Zagreb
- lectures, seminars and practicals in four electives to M.D. students at School of Medicine, University of Zagreb, and three electives to PhD students, School of Dentistry and School of Medicine, University of Zagreb
- mentor of 2 BSc, 2 PhD thesis, and a student research dean award

Member of the following professional associations:

Croatian Microscopy Society

Croatian Society for Neuroscience

Croatian Brain Council

Croatian Laboratory Animal Science Association

Natural Family Planning Centre

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 9/18/2013

LIST OF PUBLISHED WORK WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

1. Skelin M, Bursać D, Kozina V, Winters T, Macan M, Ćurlin M. (2018) Key molecules in the GABA signalling pathway are present in mouse and human cervical tissue. Reproduction, Fertility and Development. Accepted 4 March 2018 (Q=1; IF=2.105)
2. Kapuralin K, Ćurlin M, Mitrečić D, Kosi N, Schwarzer C, Glavan G, Gajović S. (2015) STAM2, a member of the endosome-associated complex ESCRT-0 is highly expressed in neurons. Mol Cell Neurosci. 67:104-15. doi: 10.1016/j.mcn.2015.06.009. (Q=2; IF = 3.840)
3. Dobrivojević M, Habek N, Kapuralin K, Ćurlin M, Gajović S. (2015) Krüppel-like transcription factor 8 (Klf8) is expressed and active in the neurons of the mouse brain. Gene. 570(1):132-40. doi: 10.1016/j.gene.2015.06.016. (Q=3)
4. Knezovic A, Osmanovic-Barilar J, Curlin M, et al. (2015) Staging of cognitive deficits and neuropathological and ultrastructural changes in streptozotocin-induced rat model of Alzheimer's disease. Journal of neural transmission (SI). 122(4): 577-592 (Q=2)
5. Winters L, Winters T, Gorup D, Mitrečić D, Ćurlin M, Križ J, Gajović S (2013) Expression analysis of genes involved in TLR2-related signaling pathway: inflammation and apoptosis after ischemic brain injury. Neuroscience. 4522(13):118-8. (Q=2)
6. Maricic T, Günther V, Georgiev O, Gehre S, Ćurlin M, Schreiweis C, Naumann R, Burbano HA, Meyer M, Lalueza-Fox C, de la Rasilla M, Rosas A, Gajovic S, Kelso J, Enard W, Schaffner W, Pääbo S. A Recent Evolutionary Change Affects a Regulatory Element in the Human FOXP2 Gene. Mol Biol Evol. 2012 Dec 19. [Epub ahead of print] PubMed PMID: 23197593. (Q=1, IF = 10.353)

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Vladimir Damjanović, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** Department of Chemistry and Biochemistry, School of Medicine University of Zagreb**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Biochemical methods in biomedical research**BIOGRAPHY**

Vladimir Damjanović was born on August 28th 1985 in Rijeka where he finished elementary and high school. He graduated at the Department of Chemistry, Faculty of Science University of Zagreb in 2009. He was awarded the medal of the Department of Chemistry for his achievements in study. As of 2009 he is employed as a teaching assistant/PhD student and from 2015 as a senior teaching assistant/postdoctoral researcher at the Department of Chemistry and Biochemistry, School of Medicine in Zagreb. He obtained his PhD in natural sciences (chemistry) in 2015 with the doctoral dissertation titled “*Synthesis and properties of biologically active o-, m- and p-isomers of N-substituted mono- and bis(pyridinium aldoximes) and their cyano complexes of iron(II)*”. His main research interests are related to the chemistry of the complexes of biologically relevant metals with ligands having potential pharmacological application. He is the author and co-author of 7 original scientific papers in journals cited by CC database, 3 original professional papers and 9 congress reports at national and international conferences. He participates in teaching the courses for medicine and dentistry students enrolled in the Integrated undergraduate and graduate study programme at School of Medicine and School of Dental Medicine, University of Zagreb, respectively, as well as for doctoral students enrolled in the Postgraduate study programme Biomedicine and Health Sciences at School of Medicine, University of Zagreb.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Sanja Darmopil, assistant profesor

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University of Zagreb, School of Medicine and Croatian studies

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Human developmental neurobiology

BIOGRAPHY

Personal information: Born in Zagreb, August 17th 1975

E-mail: sdarmopil@hiim.hr, sanja.darmopil@gmail.com

Education:

2004 - 2009 PhD in neuroscience, Faculty of medicine, Universidad Autónoma de Madrid

2000 – 2002 MSc in immunology and physiology, Faculty of Science, University of Zagreb

1993 - 1999 BS in molecular biology, Faculty of Science, University of Zagreb, Croatia

Appointments:

2014- Assistant professor at Department of psychology, Croatian studies, University of Zagreb

2009 – 2014 Assistant at Department of Anatomy, Croatian Institute for Brain Research, School of Medicine, University of Zagreb, Croatia

2004 – 2009 Assistant at Biological psychology, Croatian studies, University of Zagreb

Training:

Sept – Nov 2011 French government scholarship, Cellular and Molecular Neuroanatomy laboratory, INSERM unit U751 “Epilepsy & Cognition”, Université de la Méditerranée, Faculté de médecine Timone, Marseille, France

2001 - 2002 Fellowship. Geriatric section, NOVUM; KI, Stockholm, Sweden (8 months).

Languages: Fluently speaking and writing English and Spanish, basic knowledge of French

Research and academic experience:

- Teaching experience in neuroanatomy for medical students, as well as biological psychology, cell biology and genetics for psychology students.
- Laboratory competencies include histological techniques (immunohistochemistry and histochemistry, in situ hybridization), neuromorphometric and stereological quantitative methods, Western blot, work with laboratory animals (mouse, rat); experimental stereotaxic surgery, behavioural testing and enriched environment housing.
- Author and co-author of 5 publications in CC, 4 SCI publications, 2 SCI abstracts, 477 citations. • Member of Croatian Society for Neuroscience

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 2nd april 2014

BIOGRAPHY

Krsto Dawidowsky was born in Zagreb in 1968. Since 1998 he is employed at University clinic for Otorhinolaryngology and Head & Neck Surgery, presently at the position as chief of the department. His professional field of work is neurotology, otosurgery and audiology. Since 2008 he teaches at Medical School, University of Zagreb, from 2015 as an Associated Professor of otorhinolaryngology. He is fluent in English, speaks German and Italian. In 1994 he graduated at Medical School, University of Zagreb, where he received his master's degree in 2006 and his PhD in 2011. He is author of five chapters in books, 16 articles published in ENT journals, and 50 congress presentations.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 15.12.2015.

BIOGRAPHY

EDUCATION:

1999: PhD, Biomedicine and Health, School of Medicine, University of Zagreb, Croatia

1986: Master of sciences, Biochemistry, University of Zagreb, Zagreb, Croatia

1980: University degree in Biotechnology, Faculty of Food Technology and Biotechnology, University of Zagreb, Zagreb, Croatia

Teaching activities

1986 – now

Integrated undergraduate and graduate study of medicine:

"Medical chemistry and biochemistry I", School of Medicine, University of Zagreb;

"Medical chemistry and biochemistry II", School of Medicine, University of Zagreb;

"Clinical biochemistry", School of Medicine, University of Zagreb;

Integrated undergraduate and graduate study of dental medicine:

"Biochemistry", School of Dental Medicine, University of Zagreb;

Postgraduate Specialist Programmes

2001 - "Selected topics in biochemistry of skin and subcutaneous lipids", Postgraduate studies of Dermatovenerology, School of Medicine, University of Zagreb;

"Principles of Nutrition", The Coach Training and Education Department, Social Sciences Polytechnics in Zagreb

Postgraduate PhD Study Programmes

2001 - "The role of nutrition in a healing process", Postgraduate PhD Study in Nutrition, Faculty of Food Technology and Biotechnology, University of Zagreb;

2002 - 2007. Coordinator and teacher for "Medical Chemistry and Biochemistry I", "Medical Chemistry and Biochemistry II" i "Clinical Biochemistry", Medical Studies in English, School of Medicine, University of Zagreb.

2001 - 2007 Course teacher "Diet therapy" for students of nutrition at the Faculty of Food Technology and Biotechnology, University of Zagreb;

2002 - Associate Faculty of Kinesiology, University of Zagreb on the "Recreation"; Associate Faculty of Kinesiology, University of Zagreb, postgraduate study, the subject of "Models of kinesiology program in recreation"

2006- 2009 Associate at the Health Polytechnic, Zagreb, on modules "Chemistry" and "Biochemistry" for students of sanitary engineering, medical laboratory diagnostics and radiological technology.

2012 - Associate at the elective course "Nutrition in Health and Disease - selected topics" at the School of Medicine, University of Zagreb

2012. - Lecturing on "Biochemical methods in biomedical research" on postgraduate studies in the field of medicine and health care at the Medical University of Zagreb.

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED AND WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

2018. - Principal investigator „Specificity of lipid status in patients with endometriosis“,
 2015 - 2016 Collaborator „Composition and role of follicular fluid in the development of healthy and fertile egg cells“,
 2014 - 2015 Collaborator “Healthy sperm membrane as a prerequisite of fertile ability”
 2013. - Collaborator, „Application of electrical discharge plasma for preservation of liquid foods”, HRZZ, NTP01
 2009 - 2010. Principal investigator, scientific project "Relationship between lipid metabolism and the prevalence of PTSD", Croatian Academy of Sciences and Arts;
 2008 - Collaborator; Scientific project "Mycotoxins in Foods and Feeds in the Territory of the Republic of Croatia", Ministry of Science, Education and Sports of the Republic of Croatia.
 2009 – 2010. Principal investigator; Scientific project "Relationship between lipid metabolism and the prevalence of PTSD", Croatian Academy of Sciences and Arts.
 2001 – 2007. Principal investigator; Scientific project "Reactions of the organism on modifications in diet"; Ministry of Science, Education and Sports of the Republic of Croatia.
 1996 – 2001. Collaborator; Scientific project "Variations of lipid molecules by food and environmental influence", Ministry of Science, Education and Sports of the Republic of Croatia.
 1991 – 1995. Collaborator; Scientific project "Modulation of lipid molecules: influence of food and environment", Ministry of Science, Education and Sports of the Republic of Croatia.
 1986 – 1990. Collaborator; Scientific project "Modulation of fatty acids by nonconventional nutrition and lipophylic environmental factors", Ministry of Science, Education and Sports of the Republic of Croatia.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Associate Professor Diana Delić-Brkljačić, MD,

Ph.D.NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: School of Medicine, University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Electrophysiological methods in medical research, Application of Doppler in research and diagnosis of diseases of blood vessels

BIOGRAPHY

Work experience:

Since 10/2015 Chair, Department of Cardiology, University Hospital Center „Sisters of Mercy“

Since 2012 vice chair, Cathedra for Internal Medicine, University of Zagreb School of Medicine (UZSM)

Since 2012 vice president, Croatian Cardiac Society

11/2008-10/2015 chief doctor, Division of cardiac and blood vessel diseases, Internal medicine

Department, Univ.Hospital Center „Sisters of Mercy“, Zagreb

9/2003-2009 assistant and higher assistant, Cathedra for Internal Medicine, UZSM

2009-2015 assist. Professor, since 20.7.2015. Associate professor of internal medicine, UZSM

Since 7/1996 board certified internist, UHC Sisters of Mercy

1992-1996 resident in internal medicine, UHC SM

1990-1992 scientific trainee, Internal Medicine Department, UH Sisters of Mercy

Education and training:

Elementary school and Mathematical Gymnasium, Zagreb

University of Zagreb School of Medicine, 1983-1988.; graduated on 15.7.1988., average mark 4.80;

Demonstrator, Department of Anatomy

1988-90. internship, UH Sisters of Mercy, Zagreb

13.4.1990. State competence exam

1990.-92. Postgraduate studies of natural sciences (Biomedicine), Natural-Mathematic Faculty, and University of Zagreb

1992.-1996. Resident in internal medicine

3.7.1996. Board certified internal medicine specialist

Subspecialisation in cardiology 2002-2004. 26.2.2004. Subspecialist exam

May and June 2000. – visiting fellowship Department of Cardiology, University Hospital of Hamburg-Eppendorf, transesophageal echocardiography training. Several times training in cardiac electro stimulation in Switzerland.

M.Sc. and Ph.D. thesis: 18.12.1992. Master of Science thesis in cardiology, UZSM

19.12.2007. PhD thesis «Influence of ATII blockers and calcium channel blockers on Doppler resistance index, acceleration time and acceleration index in intrarenal arteries of patients with essential hypertension, UZSM

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: Assist. Professor, since 20.7.2015. Associate professor of internal medicine, UZSM

LIST OF PUBLISHED WORK, WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

Experience in scientific projects: Principal investigator in Ministry of Science project „Predictors of atrial fibrillation in patients with AV block and cardiac pacemaker (134-0362979-0119) “. Collaborator on project: „Application of Doppler and multislice CT in kidney and blood vessel diseases (108-1080232-0141)

Date and place of birth June 12, 1980, Tuzla, Bosnia and Herzegovina

Citizenship Croatia

Education 1999-2005, School of Medicine, University of Zagreb

2005, September 22: MD degree, School of Medicine, University of Zagreb

2006, April 15: Research Assistant, University Department of Pathology, University Hospital Centre "Sestre milosrdnice", Zagreb

2007, February 22: License for clinical practice in Croatia

2007, September 1: Residency, Anatomic Pathology

2006-2009. PhD study: Zagreb University School of Medicine, Zagreb, Croatia

2009: Postgraduate Study in Anatomic Pathology, Zagreb University School of Medicine, Zagreb, Croatia

2011, December 16: PhD degree, Zagreb University School of Medicine, Croatia

2013: Pathologist (Board Certified, Croatia)

Appointments 2006: Internship, Clinical Hospital Centre, Zagreb, Croatia

2006: Research Assistant, University Department of Pathology, University Hospital Centre "Sestre milosrdnice", Zagreb

2007: Resident, University Department of Pathology, University Hospital Centre "Sestre milosrdnice", Zagreb

2013: Staff Pathologist, Specialist, University Department of Pathology, University Hospital Centre "Sestre milosrdnice", Zagreb

2014: Research associate (Biomedicine – clinical medical science)

Scientific interests GI pathology

Molecular pathology of the tumors

Uropathology

Neuroendocrine tumors (GEP, Breast)

Language skills English (C1)

German (B1)

IT skills Office (Word, Excel, Power Point), Endnote

Organization skills 2006-2012 - Member of the Organizing Committee of „Ljudevit Jurak“

International Symposium on Comparative Pathology, Zagreb, Croatia

2008 - Member of the Organizing Committee of 23rd Meeting of Adriatic Society of Pathology, Dubrovnik, Croatia

2012.... – Member of the Organizing Committee of the Round table at the Croatian Academy of Sciences and Arts "Apoptosis and tumors"

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Awards

- 2012. University of Zagreb School of Medicine: Award as most productive PhD student
- 2012. University of Zagreb School of Medicine, Sergej Saltykow foundation: Award for the best doctoral dissertation
- 2013. Bursary from the European Society of Pathology (ESP) for participation on 25th European Congress of Pathology, Lisbon, 2013
- 2014. Bursary from the Sergej Saltykow foundation for the participation at “Basic molecular biology for pathologist”, Institute of Pathology; Medical University of Graz, March 31- April 4, 2014
- 2017. Bursary from the Sergej Saltykow foundation for the participation at “Postgraduate Course Gastrointestinal Pathology”, Graz, May 18 – 20, 2017.

Seminars, education

- 2006 – Methodological Courses in Biology and Medicine – DNA and RNA (isolation of DNA, isolation of RNA, PCR, RT-PCR, Real-time PCR, Southern blot hybridization, dot blot hybridization, sequencing and genotypization using microsatellites), Ruđer Bošković Institute, Zagreb, Croatia
- 2006 – 1st Training and Proposal Building Meeting of the Medical Research Initiative South Eastern Europe, Maribor, Slovenia
- 2010 - European School of Pathology – Gastrointestinal Pathology, Zagreb, Croatia
- 2010 - British-Bosnian School of Pathology - Dermatopathology , Sarajevo, Bosnia and Herzegovina
- 2010 - Apoptosis, programmed cell-death - The Academy of Medical Sciences of Croatia (Board of Basic Medical Sciences) – Round table
- 2012 - European School of Pathology – Update in Dermatopathology, Zagreb, Croatia
- 2013 - The Open Medical Institute of American Austrian Foundation – Salzburg Cleveland Seminar in Pathology, Salzburg, Austria
- 2014 - Basic molecular biology for pathologist, Institute of Pathology; Medical University of Graz, Austria
- 2015 - European School of Pathology – Update in the Gastrointestinal Pathology, Zagreb, Croatia
- 2015 – Bryan Warren School of Pathology – Pancreatic and Liver Pathology, Sarajevo, Bosnia and Herzegovina
- 2016 - Apoptosis, programmed cell-death - The Academy of Medical Sciences of Croatia (Board of Basic Medical Sciences) – Round table
- 2016 - The Open Medical Institute of American Austrian Foundation – Salzburg Cleveland Seminar in Pathology, Salzburg, Austria
- 2016 - Bryan Warren School of Pathology – GI and Breast Pathology, Sarajevo, Bosnia and Herzegovina
- 2016 – Third Scientific Symposium: Gastrointestinal tumors: colorectal cancer. Croatian Academy of Sciences and Arts (invited speaker), 16th November, Zagreb, Croatia
- 2017 – Fourth Scientific Symposium “Apoptosis and neoplasms”, Croatian Academy of Sciences and Arts, 28th March, Zagreb, Croatia.
- 2017 – 14th ENETS Conference – Post ENETS Webinar, April.
- 2017 – 6th E-congress „Cases from clinical practice in endocrinology and diabetology”, Department for endocrinology, University Hospital Center “Sestre milosrdnice”, April, Zagreb, Croatia (invited speaker)
- 2017 - Zagreb School of Endocrine Oncology, 13-17 March, University Hospital Center Sestre milosrdnice, Zagreb (invited speaker)
- 2017 - 2nd Meeting of the Pannonian Working Group of Gastrointestinal Pathology, Ljubljana, 7-8 April (invited speaker)
- 2017 – Fourth Scientific Symposium: Gastrointestinal tumors: colorectal cancer. Croatian Academy of Sciences and Arts, 21st November (invited speaker)
- 2018 – Zagreb School of Endocrine Oncology, 12-16 March, University Hospital Center Sestre milosrdnice, Zagreb (invited speaker)
- 2018 – Symposium: Collections in acute pancreatitis, 6 April, University Hospital Center Sestre milosrdnice, Zagreb
- Memberships ENETS (2016-)
- ENGIP (2016-)

University hospital centre Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Analysis of medical images

BIOGRAPHY

Date of birth: 12/11/1980

Education:

1999-2005: School of medicine University of Zagreb

2005-2006: internship, General hospital Sisak, Sisak

2007-2011: nuclear medicine resident, Department of nuclear medicine and radiation protection,
University hospital centre Zagreb, Zagreb, Croatia

Work experience:

01/2017 – present: assistant in education, Department of nuclear medicine, School of Medicine
University of Zagreb

2016- present: nuclear medicine physician, Department of nuclear medicine and radiation protection –
unit for PET/CT, University hospital centre Zagreb

2007-2011: nuclear medicine resident, Department of nuclear medicine and radiation protection,
University hospital centre Zagreb, Zagreb, Croatia

2006-2007: general practice physician, Medical centre for railway workers, Sisak

2005-2006: internship, General hospital Sisak, Sisak

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 2017

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Associate Professor Tomislav Domazet-Lošo, Dr. rer. nat.

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Ruđer Bošković Institute

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Genomic approaches in biomedical and translational research

BIOGRAPHY

Professor Domazet-Lošo was born in 1974 in Split, Croatia. He graduated biology from Faculty of Science, Zagreb, Croatia in 1997 and attained his doctorate in genetics from University of Cologne, Cologne, Germany in 2003. He was a postdoc at the Max-Planck Institute for Evolutionary Biology in Plön and a visiting scientist at the University of Kiel between 2008 and 2011. Since 2011 he has been an independent group leader at Ruđer Bošković Institute, and since 2016 a professor at Catholic University of Croatia, Zagreb, Croatia. Prof. Domazet-Lošo's area of scientific interest is evolutionary genomics, evolution of development, evolution of genetic diseases and cancer, and macroevolution. He has published 25 scientific papers which have been cited 4260 times according to the Google Scholar, and held more than 29 invited lectures at international scientific conferences. Prof. Domazet-Lošo is the recipient of twelve awards and distinctions including Order of the Croatian Morning Star for outstanding contributions to science (2012), Croatian State Award for Science (2012), and Postdoctoral Fellowship of the Max-Planck Society (2008-2010).

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 07.02.2017.

2017-2021. Signalni mehanizmi i metaboličke promjene u diferencijaciji stanica akutne mijeloične leukemije. (Voditelj: prof dr. sc. Dora Višnjić)

NUMBER OF SUCCESSFUL MENTORSHIPS THAT RESULTED IN DISSERTATION DEFENCE: 0

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: prof Aleksandra Dugandžić, MD, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: School of Medicine, University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Electrophysiological methods in medical research

BIOGRAPHY

WORK EXPERIENCE

2008-present School of medicine, University of Zagreb

2006-2007 Mayo Clinic, Physiology & Biomedical Engineering, Rochester, MN, USA

2005-2006 Case Western Reserve University, School of Medicine, Dept Physiol&Biophys, Cleveland, OH, USA

2000-2005 Med Klinik und Poliklinik D, Exp Nephrologie, Universitaetsklinikum Muenster, Germany

1996-1999 Department of Physiology School of Medicine, University of Zagreb, Croatia

EDUCATION

2000-2003 School of medicine, University of Zagreb, Ph.D.

1996-1999 School of Medicine, University of Zagreb, Department of Physiology, M.S.

1989-1996 School of Medicine, University of Zagreb, M.D.

TRAINING

May 2006 Washington D.C., USA, NIH, Single channels recordings

TEACHING

2008 – present

Undergraduate program Physiology and elective "Body fluids and oedema" for MD students (for Croatian and foreigner students) at Department of Physiology and Immunology, School of Medicine, University of Zagreb, Zagreb

Graduate curriculum:

Neuroscience:

“Research of membrane proteins in different expression systems”

"Introduction to patch-clamp"

"Cellular neurophysiology"

Biomedicine and health sciences:

"Electrophysiological methods in medical research"

Physiology for students at College of Medicine, Zagreb

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2006 Undergraduate program Physiology for MD students at Department of Physiology and Biophysics - Case Western Reserve University, Cleveland, OH, USA

1998-2000 physiology for students at Collage of Medicine, Zagreb

1996 – 1999 Physiology, Immunology, Neurophysiology and elective CURRICULUM (Body fluids and oedema) at Department of Physiology and Immunology, School of Medicine, University of Zagreb

1991-1995 teacher assistant at Department of Physiology and Immunology, School of Medicine, University of Zagreb

MENTORSHIP OF DEFENDED DOCTORAL DISSERTATIONS

Doctoral theses:

2018 Nikola Habek: „Expression and effects of uroguanylin in the mouse brain“, School of Medicine, University of Zagreb, Croatia

2016 Franjo Jurenec: Effects of thymoglobuline on the hypoxia-reoxygenation injury in HEK-293 cells in culture. Faculty of science, University of Zagreb, Croatia

2014 Katarina Špiranec. “The effects of natriuretic peptides on the bradykinin signaling pathway in primary culture of neurons” Faculty of Veterinary Medicine University of Zagreb, Croatia

2013 Marina Dobrivojević: “The effect of natriuretic peptides on the bradykinin signaling pathway after ischemic injury in the mouse brain“ Medical school, University of Zagreb, Croatia

Diploma theses:

2013 Karolina Rubik: “Effects of guanylin peptides on bradykinin signaling pathway in HEK293 cell culture” Faculty of science, University of Zagreb, Croatia

2007 Ulrike Lehner: „Ligands and signaling of the G-protein-coupled receptor, GPR14, expressed in human kidney cells,“ Med Klinik und Poliklinik D, Exp Nephrologie, Universitätsklinikum Münster, Germany

AWARDS AND RECOGNITIONS

2017 Outstanding reviewer, Elsevier, Biomedicine & Pharmacotherapy

2003 WCN 2003 GfN/Deutsche Nierenstiftung TRAVEL GRANTS

1995 Rector’s Award of the School of Medicine University of Zagreb

ORGANIZATIONAL SKILLS AND COMPETENCES

2017 member of organizing committee of The 4th Congress of Croatian Physiological Society and 2nd Regional Congress of the Physiological Societies, 21st – 24th Sep 2017, Dubrovnik, Croatia, 150 participants

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2016 member of organizing committee of The 11th Annual CPS Symposium with International Participation, 17th - 19th Sep 2016, Zagreb, Croatia, 50 participants

2013 member of organizing committee of The 3rd Congress of Croatian Physiological Society and 1st Regional Congress of the Physiological Societies, 13th – 15th Sep 2013, Rijeka, Croatia, 170 participants

2008 member of organizing committee of The 1st Eastern European CF Conference, 28th - 30th Nov 2008, Zagreb, Croatia, 150 participants

MEMBERSHIP IN SCIENCE ORGANIZATIONS AND BODIES

Croatian Physiological Society

Croatian Society for Neuroscience

OTHER RESEARCH ACTIVITIES

I attended 35 international and national conferences.

REVIEWER: Frontiers in Pharmacology, Frontiers in Physiology

ADDITIONAL INFORMATION AND NOTES

Invited Talks (selected):

Sindic A. Actions of guanylin peptides in mouse and human kidney. 2002

Dept. Physiology, Emory University, School of Medicine, Atlanta;

Dept Physiology & Biophysics, University of Alabama, Birmingham;

Dept Cellular & Molecular Physiology, Yale Univ. School of Medicine, New Haven,

Sindic A. Effects of guanylin peptides in mouse and human CCD. Aventis Frankfurt, Germany 2003

Sindic A. Effekte von Guanylin Peptide in Mause- und Humane-kortikalen Sammelrohren. University of Münster, Germany, 2003

Sindic A. CFTR regulira nov anionski transporter, Slc26a9. IMI, Zagreb, Croatia, 2005

Sindic A Effects of natriuretic peptides on Bradykinin signaling pathways: potential use in treatment of Angioedema?, University of Münster, Germany, 2010

2013 The 3rd Congress of Croatian Physiological Society and 1st Regional Congress of the Physiological Societies, 13th – 15th Sep 2013, Rijeka, Croatia

2013 Göttinger Transporttage, 23th – 24th Nov 2013, Göttingen, Germany

2015 7th International Conference on cGMP, 19th – 21st June 2015, Trier, Germany

2015 5th Croatian Neuroscience Congress, 17th - 19th September 2015., Split, Croatia

2016 The 11th Annual CPS Symposium with International Participation, 17th - 19th Sep 2016, Zagreb, Croatia

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2017 The 4th Congress of Croatian Physiological Society and 2nd Regional Congress of the Physiological Societies, 21st – 24th Sep 2017, Dubrovnik, Croatia

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 26th march 2013

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Davorka Dušek, MD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University Hospital for Infectious Diseases, School of Medicine, University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: PhD Programme Biomedicine and Health Science - course "Viral hepatitis"

BIOGRAPHY: Davorka Dušek, born on 5th October 1980, following graduation from School of Medicine at the University of Zagreb in 2005, worked as a Research Fellow at the University Hospital for Infectious Diseases in Zagreb in the field of viral hepatitis and immunocompromised patients. She started Infectious Disease residency in 2007 that she finished in 2012; since then she is working as attending physician at Department for Viral Hepatitis in University Hospital for Infectious Diseases. During her residency, in 2009 she gained additional education in infections in immunocompromised patients at National Institutes of Health, NCI/ETIB, Bethesda, USA. Since 2015, she is involved in graduate training in the course of Infectious Diseases (Croatian and English studies), as well as postgraduate training (Viral Hepatitis Course). From 2012-2015 she has been Treasurer of the Trainee Association of European Society for Clinical Microbiology and Infectious Diseases. She is currently also working as Secretary and Treasurer of UEMS Infectious Diseases Section.

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Tina Dušek, MD PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: School of Medicine, University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Surgical treatment of pituitary tumors; Disorders of adrenal gland

BIOGRAPHY

Education

School of Medicine, University of Zagreb 2002. Specialist in Internal medicine 2008. Consultant endocrinologist 2012. PhD degree in endocrinology, University of Zagreb 2010.

Position

Consultant endocrinologist at the Department of Endocrinology and Diabetes, University Hospital Zagreb.
Head of the Croatian Referral Centre for neuroendocrinology

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 26 October 2014.
Assist Professor

LIST OF PUBLISHED WORK WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

BIOGRAPHY

CURRICULUM VITAE

Prof. Marko Duvnjak, M.D., Ph.D.

Mob: +38598 98 38 930

E-mail: marko.duvnjak1@gmail.com

Personal:

Date of Birth: December 5, 1949

Place of Birth: Virovitica, Croatia

Marital Status: Married, two child

Citizenship: Croatian

Language: Croatian, English

Education:

1975. Medical Doctor Degree, University of Zagreb, Medical School

1984. Post-Graduate Program in Gastroenterology and Hepatology

1986. Master's Thesis "Parallel Ultrasound and Radioactive Colloid Gold Measurement of Liver Blood Flow in Chronic Liver Disease", Medical School, University of Zagreb

1989. Ph.D.Thesis: "Diagnostic significance of pancreatic pseudocyst considering therapeutic approach", Medical School University of Zagreb.

2002. Postgraduate Course Health Services Financial Management

Employment:

1975. Internship, Sibenik General Hospital

1978-1982. Internal Medicine Residency, "Sveti Duh" General Hospital, Zagreb, Croatia

1982-1989. Dept of Gastroenterology "Sveti Duh" General Hospital, Department of Medicine, Zagreb, Croatia

1989-2017. Dept of Gastroenterology and Hepatology Clinical Hospital "Sestre milosrdnice", Zagreb, Croatia

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

1994-2017. Head, Department of Gastroenterology and Hepatology, Clinical Hospital "Sestre milosrdnice", Zagreb, Croatia

2003-2004. Head of Clinical Hospital Centre "Sestre milosrdnice"

2011-2018. Head of Department of internal medicine of Clinical hospital centre "Sestre milosrdnice"

Academic Appointments

1988. Scientific Assistant, Department of Medicine, Medical School, University of Zagreb

1991. Scientific Associate, Department of Medicine, Medical School, University of Zagreb

1993- present Instructor, Post-Graduate Course "Gastroenterologic endocrinology", Medical School, University of Zagreb

1994 - 1998. Assistant Professor, Department of Internal Medicine, Medical School, University of Zagreb

1998 – 2007. Associate Professor, Department of Internal Medicine, Medical School, University of Zagreb

2003- Scientific Advisor

2007- 2012. Professor, Department of Medicine, Medical School, University of Zagreb

2012.- Distinguished Professor, Department of Medicine, Medical School, University of Zagreb

Certificates:

1976 State Licence Exam

1982 Internal Medicine Licence Exam

1996 Subspeciality in Gastroenterology

Activities:

- President of Croatian Society of Ultrasound in Medicine and Biology (2005-present)
- Former President of Croatian Society of Gastroenterology (2001-2003)
- Member of the Editorial Board of World Journal of Gastroenterology (2004.-)
- Member of the Editorial Board in Acta Clinica Croatica (1991. - 1996.) and Acta Medica Croatica (2002. -)
- Member of American Gastroenterology Association (AGA)
- Member of European Association for the Study of the Liver (EASL)
- Member of American Society for Gastrointestinal Endoscopy (ASGE)
- Member of European Pancreatic Club (EPC)
- Member of International Association of Pancreatology (IAP)
- Assistant to the Editor of Experimental and Clinical Gastroenterology (1990. -1994.)

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

- President of the 3rd Congress of the Croatian Society of Gastroenterology with International Participation, Zagreb, September 23-26, 2001
- President of the 2nd Croatian-Austrian-Slovenian-Hungarian Gastroenterology Meeting, Dubrovnik, June 27-29, 2002

Scientific Projects Sponsored by Ministry of Science and Technology:

- "Transrectal Endosonography in Evaluation of Rectal Carcinoma" (1991-1996)
- "The Role of Hepatitis B Virus X Protein in the Development of Liver Carcinoma and Optimization of Gene therapy Approach for the Destruction of X Protein mRNA by Antisense Oligonucleotides" (1997-2002)
- "The Role of Hepatotropic Viruses in Liver Carcinogenesis and Potential Therapies" (2003-2007)
- "Nonalcoholic steatohepatitis in association with metabolic syndrome" (2007.-present)

Mentorship

R. Troskot "Prognostička vrijednost ultrazvuka u akutnom pankreatitisu"

V. N. Šimičević "Učinak cink-sulfata u liječenju vrijeda dvanaesnika u štakora"

PHD: M. Skalicky "Istraživanje promjena papile Vateri u kolecistektomiranih osoba s proširenim glavnim žučovodom" (1999)

PHD L. Virović-Jukić: "Modifikacija ribavirina radi ciljane dostave

hepatocitima u svrhu poboljšanja terapije virusnog hepatitisa C"

PHD T. Pavic: "Utjecaj bilijarne opstrukcije na koncentraciju grelina, kolecistokinina, humoralnih pokazatelja upale i nutritivni status"

PHD L. Neven Baršić: "Važnost povišenih vrijednosti gama glutamil transpeptidaze za otkrivanje i procjenu težine nealkoholnog steatohepatitisa.

PHD L. Marija Gomerčić Palčić: "Ekspresija i distribucija kaveolina -1 i transformirajućeg čimbenika rasta beta u hepatocitima bolesnika s nealkoholnom masnom bolešću jetara."

Experience in clinical trials:

- Phase III study in viral hepatitis
- Phase III clinical trial in chemotherapy for colorectal cancer
- Phase III clinical study in GERD
- Phase III clinical study in bleeding peptic ulcers
- Phase II & III trials in Crohn's disease
- Phase II clinical study in Ulcerative Colitis
- Phase III trial in Crohn's disease

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 2012.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Dragan Đurđević, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Traumatology Clinic, Clinical Hospital Center “Sestre Milosrdnice”

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Bone morphogenetic proteins in regeneration of bone and cartilage, Doctoral postgraduate study in the field of Biomedicine and public health

BIOGRAPHY

Born on July 6th 1960 in Sušak, Rijeka. After finishing elementary school and high school enrolled to the University of Zagreb School of Medicine from which I graduated in 1987. Since 1992 I have been an employee of the Zagreb Traumatology Clinic, which has since July 2010 been a part of the Clinical Hospital Center “Sestre Milosrdnice”. In 1997 I had my specialist exam in general surgery. My special area of interest is surgery of the pelvis and acetabulum, as well as of the shoulder. I have had training in the USA and France, and have actively participated in a great number of Croatian and international specialist conferences. In 2002 I obtained my master’s degree, and in April 2017 my PhD degree (title “Efficacy of bone morphogenetic protein BMP1-3 in bone healing”).

I am a member of the International Collegue of Surgeons, Croatian Surgical Society, Croatian Traumatology Society, Croatian Association of Orthopeadic and Trauma Surgeons, and Croatian Physicians Association. I am married, wife Marijana, daughter Nina and son Marin.

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Mr Tarek El-Toukhy

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Consultant and Senior Lecturer in Reproductive Medicine, King's College London, UK

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Human reproduction

BIOGRAPHY

- **Qualifications:** MBBCh, USMLE, MSc, MD, MRCOG
- **Experience:** Subspecialty accreditation in Reproductive Medicine obtained in October 2007 and CCT in Obstetrics and Gynaecology obtained in February 2008
- **Special Skills Modules completed:** Level II laparoscopic surgery, Level II hysteroscopic surgery, Gynaecological Ultrasound, Urodynamics, Colposcopy and Medical Education
- **Special interests:** Reproductive Medicine and Minimal Access Surgery
- **Experience:** Over 80 publications in peer-reviewed journals and over 100 oral and poster presentations in national and international meetings
- **Peer-reviewer:** For the following journals: BMJ, BJOG, EJO, Human Reproduction, Fertility and Sterility, RBM Online, Archives of Gynecology and Obstetrics and Expert Review in Obstetrics and Gynecology. Currently, I am a scientific editor of the British Journal of Obstetrics and Gynaecology and Human Reproduction Journals.
- **Research interests:** single embryo transfer, pre-implantation genetic diagnosis (PGD), frozen embryo replacement cycles, minimal access surgery and meta-analysis of randomised studies in the field of reproductive medicine
- Completed the RCOG Special Skills Module in Medical Education
- Faculty member in a 6-monthly Laparoscopic Simulation Training course
- Faculty member in a 3-monthly course on advanced surgical techniques
- Faculty member in a 6-monthly MRCOG revision course
- Faculty member in the British Fertility Society Embryo Transfer Training Course
- Faculty member of a twice yearly Gynaecological Ultrasound Course
- Weekly teaching of medical students from King's College London (KCL)
- Regular participation in the Reproductive and Sexual Health SSM at KCL
- Regular participation in year 4 medical students end of year OSCE examinations
- Regular supervision and mentoring of SSM and BSc students in preparing their projects

Credentials and membership of societies:

Associate Professor of Obstetrics and Gynaecology, Cairo University, Egypt.

Member of the Royal College of Obstetricians and Gynaecologists, UK.

Member of the British Fertility Society, UK

Member of the European Society for Human Reproduction and Embryology, Belgium

Graduate Qualification

MBBCh, Grade Excellent with Honours, Faculty of Medicine, Cairo University, Egypt 1991

Post-graduate Qualifications

. USMLE - American National Board Examination, USA September 1993

. MSc - Obstetrics and Gynaecology, Cairo University, Egypt May 1996

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

- . MRCOG - London September 1998
- . MD - Obstetrics and Gynaecology, Cairo University, Egypt November 1998
- . Completion of Subspecialty Training in Reproductive Medicine, UK 2007
- . Certificate of Completion of Training (CCT) in Obstetrics and Gynaecology, UK 2007

Certificates

- . Management Development Programme for SpRs, King's College Hospital, London 2004
- . Laparoscopy Level II certificate, RCOG, London 2005
- . Hysteroscopy Level II certificate, RCOG, London 2005
- . Ultrasound in Gynaecological Conditions, RCOG London 2005
- . Embryo Transfer Accreditation, British Fertility Society, London 2005
- . Colposcopy Accreditation, BSCCP/RCOG, London 2005
- . Urodynamics Accreditation, BSUG/RCOG, London 2006
- . Medical Education Certificate, RCOG, London 2008

Prizes and Awards

- . Numerous prizes during undergraduate education
- . Best performance in the Master Degree (MSc) examination in Obstetrics and Gynaecology, Cairo University, Egypt, June 1996
- . South East Gynaecological Society prize for SpR presentations, KCH, London, November 1999
- . South East Gynaecological Society Annual prize for SpR presentations, Lewisham Hospital, London, November 2001
- . Short-listed for the "*Promising Young Clinician Award*" by the European Society of Human Reproduction and Embryology (ESHRE), Vienna, Austria, July 2002
- . Oral presentation prize, the Annual South Thames Postgraduate Conference, St. Thomas' Hospital, London, September 2004
- . First prize for best poster presentation, 14th Annual Congress of the International Society of Gynecological Endoscopy, London, April 2005
- . First prize for poster presentations, 6th International RCOG Meeting, Cairo, September 2005
- . Second prize for poster presentations, 6th International RCOG Meeting, Cairo, September 2005
- . Oral presentation prize, the Annual South Thames Postgraduate Conference, St. Thomas' Hospital, London, September 2006
- . *Hospital Doctor* Award for "Best Innovative Team of the year", London, November 2006
- . *Best Young Clinician* Award from the Annual conference of the British Fertility Society, University of York, April 2007
- . Fertility Society of Australia Prize for best judged presentation, Fertility UK 2007 meeting, April 2007
- . Finalist for the *Hospital Doctor* Award for "Best Obstetrics and Gynaecology Team of the year", London, November 2007
- . Oral presentation prize, 7th International RCOG Meeting, Montreal, Canada, September 2008.

Present Appointment

Consultant Gynaecologist and sub-specialist in Reproductive Medicine and Surgery and PGD, Guy's and St. Thomas' Hospital NHS Foundation Trust, London.

Senior lecturer, King's College London, University of London

Previous Appointments Sub-specialty Registrar in Reproductive Medicine, Guy's and St. Thomas' Hospital NHS Foundation Trust, London (April 2006-December 2008)

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

The RCOG accredited subspecialty training programme in Reproductive Medicine at Guy's and St. Thomas' Hospital offers comprehensive experience in reproductive medicine, including advanced techniques of assisted conception, pre-implantation genetic diagnosis, embryology, genetics, endocrinology, andrology and psychosexual medicine. This post has equipped me with the necessary skills to achieve my ambition of working as an NHS consultant in a tertiary-referral Reproductive Medicine centre offering specialized fertility care of the highest standard and producing high quality teaching and academic output.

Specialist Registrar, Benenden Hospital Trust and Maidstone and Tunbridge Wells Hospitals NHS Trust (October 2005 – April 2006) SpR to Mr M Hefni, FRCOG, Miss A E Davies, FRCOG and Mr M Mossa, FRCOG
Specialist Registrar, Queen Mary's Sidcup Hospital NHS Trust (October 2004 – October 2005) SpR to Miss L Hanna, FRCOG and Mr A Seif, MRCOG

Specialist Registrar, Princess Royal University (Farnborough) Hospital, Bromley NHS Trust (October 2003 – October 2004) SpR to Mr J Erian, FRCOG and Mr N Hill, FRCOG

Fellow in Reproductive Medicine and Assisted Conception, Assisted Reproduction and Gynaecology Centre, London (June 2003 – September 2003) Clinical Fellow to Mr M Taranissi, FRCOG

Fellow/ Registrar in Reproductive Medicine, Guy's and St. Thomas' Hospital NHS Trust, London (June 2000 – June 2003) Fellow to Professor P Braude, Miss A Taylor and Mr Y Khalaf

Specialist Registrar in Obstetrics and Gynaecology, Birmingham Heartlands and Solihull NHS Trust (March 2000 – June 2000) SpR to Miss A E Payne, FRCOG

SHO in Gynaecology, Benenden Hospital, Kent, (August 1998 – February 2000) SHO to Mr M Hefni, FRCOG and Miss A E Davies, FRCOG

Senior Registrar and Lecturer in Obstetrics and Gynaecology, Cairo University Hospital, Egypt (December 1996 - August 1998)

Clinical Fellow, Al-Ebtessama Centre for Reproductive Medicine and Endocrinology, Cairo, Egypt (October 1996 - December 1996)

Registrar (Chief Resident) in Obstetrics and Gynaecology, Cairo University Hospital, Egypt (September 1993 - September 1996)

Registrar in General Surgery, Kasr El-Manial Hospital, Cairo, Egypt. (March 1993 - September 1993)

House officer in Urology, Cairo University Hospital, Egypt (January 1993 - March 1993)

House officer, Cairo University Hospital, Egypt. (March 1992 - December 1992)

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Marijan Erceg, MD, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** Croatian Institute of Public Health**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Epidemiological research methods**BIOGRAPHY**

Graduated in 1987 on the Faculty of Medicine of the University of Zagreb and gained the title of Doctor of Medicine. In 1994 he completed his postgraduate studies in Health Information Systems and defended his master's thesis entitled "Model of information system for continuous epidemiological research based on the method of small area analysis". In 1996 he placed a specialist exam in epidemiology with a postgraduate study "Epidemiology". In 2012 he defended his dissertation titled "Five-year cumulative incidence of arterial hypertension in cohort of subjects with initially normal arterial pressure or prehypertension" at the Faculty of Medicine, University of Osijek, mentored by prof.dr.sc. Silvije Vuletić. From 1989 to 1993 he worked as a general practitioner and head of the Information Center of the Community Health Centre in Split. Specialization in epidemiology started at the Public Health Institute of Split-Dalmatia County in 1993 and passed a specialist examination in 1996. From 1996 to 2002 he worked as epidemiologists at the County Institute of Public Health of the Split-Dalmatia County. Since 2002 he has been working at the Croatian Institute for Public Health. From 2002-2004 he was the Director of the Croatian Institute for Public Health. From 2005 to 2012 he worked as a head of department at the Department of Public Health. From 2013 to 2017 he has been working as head of the Epidemiology Department. Since 2018, he has been working as head of the Department of Mortality Statistics at the Department of Epidemiology and Prevention of Chronic Diseases. Since 2016 he has been a scientific associate in the scientific field of biomedicine and healthcare - field of public health and health care.

He participated in the Croatia Health Survey 2003 and 2008 projects and the twining project "Improving the Quality of the National Cancer Screening Programs" (CRO SCREENING) during 2016-2017.

As an external associate he participated in the teaching of the subjects of Epidemiology at the Faculty of Medicine, University of Zagreb where he proved to be a responsible and successful teacher.

In performing the work of the epidemiologist at the Croatian Institute for Public Health, he has proved himself a conscientious and reliable collaborator in projects that require cooperation with domestic and foreign stakeholders.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: research associate– 30. 3. 2016.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Viktorija Erdeljić Turk, MD, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** University Hospital Zagreb**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Characteristics of clinical medical research**BIOGRAPHY**

Viktorija Erdeljić Turk, MD, PhD, qualified in medicine in 1999. During and following her medical training she participated in research programs conducted in cooperation with United Nations High Committee for Refugees (Health Surveillance Program), United Nations Children's Fund (Nutrition and Health Status Improvement in War Affected Areas) and World Health Organization (Development of Information and Rehabilitation System for Crisis Situations; Land Mines: Protection, Epidemiology, Financial Analysis and Raising Awareness). Following graduation at Medical School Zagreb she worked for 3 years for a Contract Research Organization. After completing her training in clinical pharmacology she continued her work at the University Hospital Zagreb, further developing protocols for drug allergy testing and consultations following pregnancy drug exposure, in addition to pursuing her other professional interests in biostatistics and rational pharmacotherapy. She is also a consultant supervising antimicrobial prescribing at the hospital level. Dr Erdeljić Turk is strongly clinically oriented; she is seeing patients on the floor at the Division of Clinical Pharmacology, in the outpatient clinic as well as in the emergency room. She is a member of the Drug and Therapeutics Committee at the University Hospital Zagreb. She is instructor in Advanced Life Support of the Croatian Resuscitation Council. In addition, Dr Erdeljić Turk is involved in the training of medical students at the graduate and postgraduate level. She is a member of the National Committee for Medicines and Medicinal Products (Ministry of Health). Her other interests and hobbies include hiking, mountain climbing, mountain biking. She is a trainee of the Croatian Mountain Guides Association.

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Igor Erjavec, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** University of Zagreb School of Medicine**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Bone morphogenetic proteins in regeneration of bone and cartilage; Proteomics in biomedical research**BIOGRAPHY**

Igor Erjavec was born on 21.04.1982 in Zagreb, Croatia. He graduated molecular biology at Faculty of Science, University of Zagreb in 2007. He enrolled in „Biomedicine and Health“ PhD programme in 2009, while obtaining his PhD in 2014 with a dissertation „Effect of Serotoninemia on Bone Remodelling Metabolism“. He published 16 scientific papers with an *h-index* of 8 with 163 citations according to Scopus and 161 citations according to Web of Science database. In 2012 he was awarded with the „New investigator“ award by European Calcified Tissue Society (ECTS). In 2017 he was a postdoctoral fellow for one year at Center for excellence in metabolomics and bioanalysis (Centro de excelencia en Metabolomica y Bioanalisis; CEMBio), Sveučilište CEU San Pablo, Madrid. In 2019 he was promoted to research assistant at the Department of Anatomy.

15.1.2019; research associate

LIST OF PUBLISHED WORK WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

- Bone morphogenetic protein (BMP)1-3 enhances bone repair. Grgurevic L, Macek B, Mercep M, Jelic M, Smoljanovic T, **Erjavec I**, Dumic-Cule I, Prgommet S, Durdevic D, Vnuk D, Lipar M, Stejskal M, Kufner V, Brkljacic J, Maticic D, Vukicevic S. Biochem Biophys Res Commun. 2011 Apr 29;408(1):25-31.
- Computed microtomography visualization and quantification of mouse ischemic brain lesion by nonionic radio contrast agents. Dobrivojević M, Bohaček I, **Erjavec I**, Gorup D, Gajović S. Croat Med J. 2013 Feb;54(1):3-11.
- The clinical use of bone morphogenetic proteins revisited: a novel biocompatible carrier device OSTEOGROW for bone healing. Vukicevic S, Oppermann H, Verbanac D, Jankolija M, Popek I, Curak J, Brkljacic J, Pauk M, **Erjavec I**, Francetic I, Dumic-Cule I, Jelic M, Durdevic D, Vlahovic T, Novak R, Kufner V, Bordukalo Niksic T, Kozlovic M, Banic Tomisic Z, Bubic-Spoljar J, Bastalic I, Vikic-Topic S, Peric M, Pecina M, Grgurevic L. Int Orthop. 2014 Mar;38(3):635-47.
- Constitutively Elevated Blood Serotonin Is Associated with Bone Loss and Type 2 Diabetes in Rats. **Erjavec I**, Bordukalo-Niksic T, Brkljacic J, Grcevic D, Mokrovic G, Kesic M, Rogic D, Zavadoski W, Paralkar VM, Grgurevic L, Trkulja V, Cicin-Sain L, Vukicevic S. PLoS One. 2016 Feb 23;11(2).

LIST OF PUBLISHED WORK IN THE LAST FIVE YEARS

- Exogenous heparin binds and inhibits bone morphogenetic protein 6 biological activity. Brkljacic J, Pauk M, **Erjavec I**, Cipic A, Grgurevic L, Zadro R, Inman GJ, Vukicevic S. Int Orthop. 2013 Mar;37(3):529-41.
- The clinical use of bone morphogenetic proteins revisited: a novel biocompatible carrier device OSTEOGROW for bone healing. Vukicevic S, Oppermann H, Verbanac D, Jankolija M, Popek I, Curak J, Brkljacic J, Pauk M, **Erjavec I**, Francetic I, Dumic-Cule I, Jelic M, Durdevic D, Vlahovic T, Novak R, Kufner V, Bordukalo Niksic T, Kozlovic M, Banic Tomisic Z, Bubic-Spoljar J, Bastalic I, Vikic-Topic S, Peric M, Pecina M, Grgurevic L. Int Orthop. 2014 Mar;38(3):635-47.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

- Molecular background and physiological consequences of altered peripheral serotonin homeostasis in adult rats perinatally treated with tranylcypromine. Blazevec S, **Erjavec I**, Brizic M, Vukicevic S, Hranilovic D. J Physiol Pharmacol. 2015 Aug;66(4):529-37.
- Constitutively Elevated Blood Serotonin Is Associated with Bone Loss and Type 2 Diabetes in Rats. **Erjavec I**, Bordukalo-Niksic T, Brkljacic J, Grcevic D, Mokrovic G, Kesic M, Rogic D, Zavadoski W, Paralkar VM, Grgurevic L, Trkulja V, Cicin-Sain L, Vukicevic S. PLoS One. 2016 Feb 23;11(2).
- Urodilatin reverses the detrimental influence of bradykinin in acute ischemic stroke. Dobrivojević M, Špiranec K, Gorup D, **Erjavec I**, Habek N, Radmilović M, Unfirer S, Čosić A, Drenjančević I, Gajović S, Sindić A. Exp Neurol. 2016 Oct;284(Pt A):1-10.

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED AND WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

- 2010.-2012. „Bone morphogenetic protein-1 isoforms in bone regeneration“ UKF project, project leader academician Slobodan Vukičević
- 2011.-2014. „Novel targeted therapy for treating osteoporosis: BONE6-BIS“, Croatian Science Foundation, project leader academician Slobodan Vukičević
- 2012.-2016. „OSTEOGROW“ - Novel Bone Morphogenetic Protein 6 Biocompatible Carrier Device for Bone Regeneration, FP7 HEALTH, project coordinator academician Slobodan Vukičević
- 2018.-2022. „OSTEOproSPINE - Novel Bone Regeneration Drug “Osteogrow”: Therapeutic Solution for Lumbar Back Pain“, HORIZON2020, project coordinator academician Slobodan Vukičević

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Dr.sc. Božidar Ferek-Petrić

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Medtronic Adriatic d.o.o. Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Electrophysiological methods in medical research, Structure, methodology and functioning of scientific work 2

BIOGRAPHY

Personal Data

Born May 30th 1955 in Zagreb. Father of the two daughters.

University degree

1974- 1979 University of Zagreb, Faculty of Electrical Engineering. MS electrical engineering

2005 University of Zagreb, Faculty of Electrical Engineering, PhD in technical science, electronic engineering

EMPLOYMENT

1980 – 1997 Clinic of Cardiac Surgery, University Hospital Rebro, clinical engineer

March 1997 – September 2013. Medtronic Adriatic d.o.o. Therapy Development Manager

Rujan 2013 - danas. Principal Medical Affairs Specialist, Medtronic Academia - Eastern Europe

AWARDS & CERTIFICATES

1985. god. State Award for Scientific Research Nikola Tesla.

2009. god. Certified Cardiac Device Specialist (CCDS) at the International Board of Heart Rhythm Examiners of the Heart Rhythm Society of America.

FOREIGN LANGUAGES English (active), German (active), Russian (passive)

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Prof. Igor Filipčić, MD, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** Psychiatric Hospital “Sveti Ivan”, Zagreb**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Telemedicine; Clinical psychopharmacology**BIOGRAPHY**

Specialist psychiatrist and subspecialist of biological psychiatry. I am the Head manager of the Psychiatric Hospital "Sveti Ivan" and head of the integrative psychiatry program “PIPS” of Psychiatric Hospital "Sveti Ivan". 2008 year I defended my doctoral dissertation "The Depth of Depression and the Impact of treating depression on the quality of life of patients with chronic somatic diseases" and received the Croatian psychiatric society award for best doctoral dissertation from the psychiatry.

From 2002 to 2008 I was an associate in the design, writing and implementation project "The program of reduction of stigma and discrimination of psychic patients". Continually I am improving my professional competence in the field of biological psychiatry – education for Transcranial magnetic stimulation at the Boston University Hospital in neurology and psychiatry Harvard Medical School, in 2016 I get the qualification for the use deep transcranial magnetic stimulation “ Certificate of Brainsway deep TMS operator” and in association with Harvard TH Chan, School of Public Health and Institute for Healthcare improvement I completed "The International Leadership Development for Physicians Program". I am member and president number of organizational committees from psychiatric fields. Author and co-author in 8 books and 65 scientific papers (CC, SCI or SSCI). As a lecturer I participated in over 50 domestic and international conferences. I am an extraordinary professor at the Department of Psychiatry at the Department of Dental Medicine and Health at the University of Josip Juraj Strossmayer in Osijek - head of the Psychiatric Department. Also, I am head of the University undergraduate study for nursing in Čakovec and Pregrada the same Faculty of dental medicine and health at Josip Juraj Strossmayer University in Osijek, Croatia. Professor of high school of the Zagreb University Health Care Center - head of Department for Psychiatry. I am an extraordinary professor at the Department of Psychiatry and Psychological Medicine at the University of Zagreb Medical School. I have participated in several domestic and international projects, and I am an active member of the research team for clinical trials. I am Co-editor in the CURENT OPINION PSYCHIATRY magazine, as well, a member of the Editorial Board of the HPD Journal of Social Psychology and Journal of Alcoholism and Psychiatry Research. I am the President of the Croatian Society for Brain Neurostimulation at Croatian Medical Association.

I am a member of the Bureau of Biomedicine and Health Sciences of the Agency for Science and Higher Education. Also, I am a deputy member of the High Court of the Croatian Medical Chamber and member of the Ethics Committee of the Institute for Anthropology.

4. 2016 year Project Manager of the Center for Integrative TMS Management Integration (CEKOM) Psychiatric Hospital "Sveti Ivan".
5. 2016 year associate in the interdisciplinary project "Influence biometeorological and climatic events on health"
6. 2017 year Project Manager of the Center for Integrative Psychiatry (CIP) Psychiatric Hospital "Sveti Ivan"
7. 2017 year project manager "Reducing depression and PTSD symptoms by treatment and innovative method - transcranial magnetic stimulation with HF-R TMS SH1 8 helmet"
8. 2017 year Associate in the project "Wave II of the International Prevalence and Treatment of Diabetes and Depression (INTERPRET-DD),
9. 2017 year associate in the implementation of the DENAMIC research project (Developmental neurotoxicity assessment of mixtures in children)
10. 2017 year associate in the implementation of the scientific-research project "Therapeutic potential of neurosteroids and neuntrophins in dementia (TePoNEDe)"

NUMBER OF SUCCESSFUL MENTORSHIPS THAT RESULTED IN DISSERTATION DEFENCE: 2

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Tajana Filipec Kanižaj

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University hospital Merkur, School of Medicine, University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Liver Transplantation; Viral hepatitis;

BIOGRAPHY

Education:

High School MIOC, Zagreb .

1991-1997. study at the School of Medicine, University in Zagreb .

2001-5. specialist of internal medicine.

2008-10. subspecialist of gastroenterology.

2008 training in the field of hepatology at the Medizinische Hochschule, Hanover .

Scientific:

1999-2011. Research assistant

2011-2017. Assistant Professor

May 2017 - Associate Professor

Work experience:

In 1999 started working as a research assistant and resident in internal medicine at the Medical Faculty in Zagreb. Since 2017 associate professor at the School of Medicine, University of Zagreb. Now working as a specialist in internal medicine, subspecialist of gastroenterology, at the University Hospital Merkur, Department of Gastroenterology. From 1. July 2013 head of the Department of Gastroenterology, University hospital Merkur.

Research, teaching and mentoring activities:

Scientific and teaching career started in 1999. From 1.4.1999. research assistant on the project of the Ministry of Science and Technology and the School of Medicine, University of Zagreb; Project Leader: Prof. dr. Sc. Miroslav Katičić (project number 108-0000000-3114: " Helicobacter pylori infection - the evolution of the disease and new therapeutic procedures ", formerly 0108126: " The evolution of the changes associated with Helicobacter pylori infection, " 0108104 " Epidemiology, diagnosis and treatment Helicobacter pylori associated disease ".) 29.11.2004. MSc thesis at the Faculty of Science, University of Zagreb (Field: Biology, Physiology and Immunology) entitled: " 'Western blot' and PCR reliability in the detection of cagA and vacA Helicobacter pylori virulence genes " (Mentor Prof. dr. Vladimir Presečki) 16.10.2009. PhD thesis at the Faculty of Medicine, University of Zagreb, entitled: "Role of Helicobacter pylori eradication therapy success and virulence antigens on dynamics of gastric mucosa premalignant changes." (Mentor: prof. dr. sc. Miroslava Katičić) Current scientific research is directed to research in liver transplantation and chronic liver diseases. Currently is actively participating as scientific associate on a projects:

1. "Infectomics study of human liver non-parenchymal cells in chronic hepatitis C (ILHNCHC)", financed by the Croatian Science Foundation, School of Medicine, University of Zagreb (guidance of Prof. Adriana Vince,)
2. "Genetic background of alcoholic liver disease", project financed of School of medicine, University of Zagreb (guidance prof. Vesna Medved)
3. "Genetic background of non-alcoholic fatty liver disease after liver transplantation", project financed by Medical School, University of Rijeka: (guidance assist.prof. Ivana Mikolašević).

The organiser or lecturer at:

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

1. 5 undergraduate courses (Internal Medicine, Internal medicine - English programme, Internal Propedeutics, Emergencies in medicine, Elective course - Liver transplantation)
2. 3 postgraduate courses on Medical School, University of Zagreb: *Helicobacter pylori* infection, Liver transplantation, Viral hepatitis
3. postgraduate studies for residents of gastroenterology, infectology, family medicine and pathology,
4. different courses of continuing medical education organized by Croatian gastroenterology association and School of Medicine, University of Zagreb .

The most important technical and scientific achievements: Author and co-author of many papers and book chapters in the field of research of *Helicobacter pylori* infection, hepatology and liver transplantation. Mentor of 5 students of PhD programme at School of Medicine, University of Zagreb, preparing PhD thesis. Mentor of 13 students in graduation thesis at the School of Medicine, University of Zagreb. Mentor of 10 residents undergoing specialist training in internal medicine and gastroenterology. Organiser of 6 international congresses and many domestic in field of hepatology and liver transplantation.

Functions, awards and professional associations: Since 2005 member of the liver transplant team University hospital Merkur. Since 2008. Member of the Croatian consensus team for the treatment of viral hepatitis and *Helicobacter pylori* treatment. Member of the Croatian Medical Association, the Board of Directors Croatian Society of Gastroenterology , EASL , ILTS , Subcommittee for liver transplantation in the Ministry of Health. Since 1. July 2013. Head of Department of gastroenterology, University hospital Merkur.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 2017

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Kristina Fišter (MD, MSc, DSc), Assistant Professor**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** University of Zagreb School of Medicine, Andrija Štampar School of Public Health**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Medical Informatics Methods**BIOGRAPHY**

Kristina Fišter is Assistant Professor and Head of the Division for Medical Informatics at the University of Zagreb School of Medicine, Andrija Štampar School of Public Health, Department of Medical Statistics, Epidemiology and Medical Informatics in Zagreb, Croatia. She is a medical doctor and holds a master of science degree in information sciences as well as a doctorate of science in epidemiology. She leads biomedical informatics courses across graduate and postgraduate studies at the University of Zagreb School of Medicine, including medical, nursing, and PhD studies, as well as professional postgraduate studies for medical doctors specialising in family medicine, occupational medicine, school and adolescent medicine, and epidemiology. She is Associate editor for original research at the Canadian Medical Association Journal, and has previously served as editor at the British Medical Journal (2004-2018) and the Croatian Medical Journal (2002-2004). Assistant Professor Fišter is recipient of the Zagreb University Chancellor Award and Best Poster Award at the European Federation for Medical Informatics MIE2000 meeting in Hannover, Germany. She has co-authored four books, including two textbooks, as well as over 50 articles with more than 180 independent citations in the Web of Science. Assistant Professor Fišter is a member of the Executive Committee at the Croatian Society for Medical Informatics, and a member of the Committee for eHealth at the Croatian Academy for Medical Sciences.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 1st December 2014 Assistant Professor at the University of Zagreb School of Medicine

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Dr sc Aleksandra Fučić Sci adviser

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Institute for Medical Research and occupational Health

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Genotoxicological research of exposure to physical and chemical mutagens in the working and living environment; Methods of molecular biology in medicine

BIOGRAPHY

She has 30 years of research experience in genotoxicology and she is EU expert in biomonitoring. Her main scientific interests are carcinogenesis mechanisms in subjects with genome damage after exposure to chemical and physical agents. She has published over 100 original papers and several books. She is fellow of academia Collegium Ramazzini.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Ksenija Fumić, prof**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** University Hospital Center Zagreb**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Methods of molecular biology in medicine; Biochemical methods in biomedical research**BIOGRAPHY**

Ksenija Fumić was born in Zagreb on January 14, 1961. She graduated in medical biochemistry from the School of Pharmacy and Biochemistry, University of Zagreb. She earned PhD degree in natural sciences at Karl-Franzens University, Graz, Austria. Currently she is Head of Division of Laboratory Diagnostics of Inborn Errors of Metabolism and Newborn Screening, Department of Laboratory Diagnostics, University Hospital Center Zagreb. She is a medical biochemistry specialist, senior research scientist, professor of Zagreb University School of Pharmacy and Biochemistry. She participates in under- and postgraduate teaching; her major scientific interest is diagnostics of inherited metabolic disorders. She is author of 40 CC-indexed papers, 4 chapters in university textbooks, she held 35 invited lectures at scientific meetings. Citation count: WoS: 434, Scopus: 502. In 2007, she received annual award for scientific achievement from Croatian Society of Medical Biochemistry and Laboratory Medicine.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Ivana Furač, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** School of Medicine University of Zagreb**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Methods of molecular biology in medicine**BIOGRAPHY**

Born 19/5/1968 in Karlovac, Croatia. I hold Bachelor of Science in Chemistry and I earned PhD in Biochemistry at the Faculty of Science University of Zagreb. Since 1995. I work in the DNA Laboratory at the Department of Forensic Medicine and Criminology School of Medicine University of Zagreb. Before that I was in the Neurochemical Lab of the Department of Medical Chemistry, Biochemistry and Clinical Chemistry. I was trained at Neurogenetic Laboratory University of Antwerp (Belgium), Armed Forces DNA Identification Lab (USA), forensic DNA Laboratory University of Innsbruck and attended many specialized courses like FEBS Advanced Course: DNA Sequencing and Microinjection and FEBS Course "Techniques in Molecular Biology", The Analysis of Food Samples for the Presence of Genetically Modified Organisms by European Commission Joint Research Centre and WHO, EMBL Courses Gene Quantification by Real-Time qRT-PCR, SNP Genotyping and Haploblock Analysis EMBO Practical Course and Next Generation Sequencing. Besides my work in forensic DNA Laboratory I am involved in teaching medical students (graduate and postgraduate) at School of Medicine and chemistry students at Faculty of Science. Therefore, I attended workshop Innovations in Molecular Bioscience Education, Reading and writing for critical thinking and Computer based learning. I was on academic mobility programme in 2018 at Penn State University and Erasmus+ at University of Santiago de Compostela. Also, I am trainer of statistical methods in forensic genetics certified by EUROFORGEN. Fluent in English and Spanish, good in German, Greek and Latin. Published 20 articles in Current Contents. Main fields of interest: DNA analysis and its different application, molecular diagnostics and innovations in teaching methods.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Asst. Prof. Alenka Gagro, MD, PhD, Research Adviser

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Children's Hospital Zagreb, Department of Pediatrics, Department of Pulmonology, Allergology, Immunology and Rheumatology, School of Medicine, University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Immunocytokines; Mechanisms of allergic reactions; Pathogenesis of infective diseases

BIOGRAPHY

Born in Ljubuški, Bosnia and Herzegovina, May 11, 1965.

Education: MD, Medical School University of Zagreb, 1989; Laboratory for Cell Biology and Histology, Sveučilište u Amsterdamu, Nizozemska, 1994.; PhD, Medical School University of Zagreb 1994; Department of Immunology, Medical School, University of Birmingham, UK, 1998-1999.; Pediatrician, 2008;

Professional Experience: University Hospital for Contagious Diseases “Dr. Fran Mihaljević”, Zagreb, 1989-1991.; Institute of Immunology 1991-1998; 1999-2008 Department of Immunology, Medical School, University of Birmingham, UK (postdoctoral fellowship) 1998-1999; Children's Hospital Zagreb, 2009-;

Research Associate 1998; Senior Research Associate 2002; Research Adviser 2006 (re-election 2013); Department of Physiology and Immunology, Medical School, University of Osijek 2009- (Honorary Assistant Professor 2009). Principal investigator on 4 international projects (2 supported by The Wellcome Trust, UK, one Faculty Research Grant, University of Birmingham, one from MSD, USA) and 5 national projects supported by MOSES. Teaching and mentoring: Since 1998 participates in teaching at medical schools in Zagreb and Osijek, Faculty of Science and Faculty of Food Technology and Biotechnology, University of Zagreb. Mentor of 2 MSc and 6 PhD theses, 3 PhD theses in preparation. Main scientific interests: immunodeficiencies, allergic, autoimmune and autoinflammatory diseases in children. Principal investigator in 4 international and 5 national (MOSES) scientific projects. Member of Executive Board of the National Foundation for Science, Higher Education, and Technological Development of the Republic of Croatia, 2005-2010; Vice president of the Core Board of Croatian Ministry of Science, Education and Sports in the field of basic medical sciences, clinical medical sciences, public health, dental health and pharmacy, 2005-2009; Croatian Immunological Society (Secretary 1994-1998; Vice President 2002-2006; Member of Council 2006-; Vice-president October 2018-); Secretary of Croatian Pediatric Society, 2009- . Awards: National Science Award for 2008, 2009; “Ante Šerčer” Award from Croatian Academy of Medical Sciences, 1996; Award from Croatian Academy of Sciences and Arts in the field of medical sciences, 1996; Publications: 65 (46 in CC/SCIE, 19 in other indexed databases), number of citations 1132 (Google Scholar).

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: November 13, 2013 (permanent), Field: Basic medical sciences, branch: immunology

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Prof. Srećko Gajovic, MD, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** University of Zagreb School of Medicine

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Research methods in vivo and in vitro; Structure, methodology and functioning of scientific work 3: Research Projects; Morphological research methods in biomedical sciences; Gene targeting in mammals; How to become a neuron?; Laboratory animals in biomedical research

BIOGRAPHY

Professor Srećko Gajović is Head of Department of Histology and Embryology at Zagreb University School of Medicine, and Section for Neurogenetics, Medical Genetics, and Regenerative Neuroscience at Croatian Institute for Brain Research. He was Coordinator of EU-FP7 project “GlowBrain: Combining Stem Cells and Biomaterials for Brain Repair - Unlocking the Potential of the Existing Brain Research through Innovative In Vivo Molecular Imaging”, and established preclinical in vivo imaging platform (GlowLab) for magnetic resonance (7T) and optical imaging (bioluminescence and fluorescence). His major scientific interest is brain repair (in particular after stroke) and its relation to neuroinflammation and stem cell applications. He is one of the founder of Navigating Knowledge Landscapes international interdisciplinary network (<http://knowledge-landscapes.hiim.hr>), which deals how innovative knowledge is communicated in the digital society. He is former editor of the Croatian Medical Journal, the best general medical journal in Central-East Europe. He is a former president of the European COST Domain Committee for Biomedicine and Molecular Biosciences, former president of Croatian Microscopy Society, and now the president of the Croatian Association for Regenerative Medicine and Stem Cell Therapies. He is Advisory Board member of Doctors Against Forced Organ Harvesting (DAFOH), organization nominated in 2016 for the Nobel Peace Prize.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 2016

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Assoc. Prof. Koraljka Gall Trošelj, MD, Ph.D.

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Rudjer Boskovic Institute, Zagreb, Croatia

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Molecular oncology – insight into new technologies; Genomic approaches in biomedical and translational research

BIOGRAPHY

Koraljka Gall Trošelj (Gall - maiden name)

Kuslanova 5A

HR-10000 Zagreb, Croatia

Education

March 2000. Ph.D. degree in Biomedicine – Molecular Oncology, University of Zagreb, School of Medicine, Zagreb, Croatia

January 1995. M.Sc. degree in Biomedicine, University of Zagreb, Faculty of Natural Sciences, Zagreb, Croatia

June 1989. - MD degree, School of Medicine, University of Zagreb, Croatia

B) Employment/Positions held:

Current: Head, Laboratory for Epigenomics, Division of Molecular Medicine, Rudjer Boskovic Institute, Zagreb Croatia

2017: Senior Scientist: first election; Rudjer Boskovic Institute, Zagreb Croatia

2016: Associate Professor (re-elected): Josip Juraj Strossmayer University of Osijek, Dept. for Biology

2012 (January – June) – Head, Division of Molecular Medicine, Rudjer Boskovic Institute, Zagreb Croatia

2010 – 2015 Associate Professor – Department of Biotechnology, University of Rijeka, Rijeka, Croatia

2008 (September) – present. Head, Laboratory of Epigenomics, Division of Molecular Medicine, Rudjer Boskovic Institute, Zagreb Croatia

2007-2008. (July) Visiting Fellow, Weill Medical College, Cornell University, New York, USA

2006-2007. Fulbright Scholar, Weill Medical College, Cornell University, New York, USA

2006-2017 Senior Research Associate - Rudjer Boskovic Institute, Zagreb, Croatia

2001 – 2006 Head, Laboratory of Molecular Pathology, Division of Molecular Medicine, Rudjer Boskovic Institute, Zagreb Croatia

2001-2006 Research Associate – Rudjer Boskovic Institute, Zagreb, Croatia

1995 - Cancer Research Scientist, Division of Molecular Medicine, Rudjer Bošković Institute, Zagreb Croatia

1991-1995. Fellow, Croatian Academy of Sciences and Arts, Zagreb, Croatia

1991 (January-August) MD - General Practice, Orahovica, Croatia

1989-1990 MD – General Practice, Medical Centre, Našice, Croatia

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK:

Research: 11.7.2017, Senior Scientist;

Teaching: 15.09.2016, Associated Professor (re-election), Josip Juraj Strossmayer University of Osijek

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Dragan Gamberger, dr. sc.

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: -

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Knowledge discovery in medical domains

BIOGRAPHY

Dragan Gamberger obtained PhD from University of Zagreb, Faculty of electrical engineering and computing, in the year 1986. He has been working at Rudjer Boskovic Institute since year 1975 till 2016. His last position has been senior scientist. He has been head of Laboratory for Information Systems for 17 years.

His scientific interests include machine learning, intelligent data analysis, knowledge discovery, knowledge representation by ontologies, reasoning for decision support, and applications of these techniques in medicine, biology, chemistry, social sciences, economics, and manufacturing.

According to WOS, Dragan Gamberger has 58 publications that have been cited in total 423 times. His h-index is 11. He is co-author of the authored book “Foundations of Rule Learning” (Springer, 2012) that presents most of his long-term research results in the field of machine learning. He is author of the handbook for students and scientists “Data Mining for Knowledge Discovery” (in Croatian). He is main author of the public service “Data Mining Server” that is already for more than 10 years available at <http://dms.irb.hr/>. The service integrates the rule learning algorithms developed at Rudjer Boskovic Institute with a very simple user interface appropriate for teaching and data analysis tasks. Recently he developed the web services for exploratory clustering and predictive induction (<http://rr.irb.hr/>). In year 2018 he served as evaluator for EU Marie Curie projects.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 01.02.2004.
scientific advisor

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Marija Gamulin, MD, PhD, research advisor

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University Hospital Centre Zagreb, Department of Oncology, Kispaticeva 12, 10 000 Zagreb, Croatia

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Biochemical methods in biomedical research

BIOGRAPHY

Date of birth, November 8, 1963.

Education in Croatia: Medical School, University of Zagreb (1983-1990); PhD Thesis, “The estimate of mutagenic effects of radiotherapy on lymphocytes from peripheral blood in patients treated for solid tumors” (2006); Specialization in radiotherapy and oncology (Clinical Oncology), Zagreb, Croatia (1996-2000). Most important education abroad: Training on prostate and testicular cancer Maastricht Clinic, Maastricht, Netherlands (October 2010, May 2011); Training on testicular, prostate, kidney and bladder tumors Indiana University, School of Medicine, Hematology Oncology Division, Indiana, USA (November/December 2011). Present position: Urogenital Unit at the Division of Medical Oncology, Clinical Hospital Centre Zagreb, Zagreb – (since May/2003), Functions: Head of Urogenital Unit at the Division of Medical Oncology, Clinical Hospital Centre Zagreb – (since 4/2015); Head of Referral Centre for the Treatment of Germ Cell Tumors and Extragonadal Germ Cell Tumors in the Republic of Croatia (since October/2013), Deputy of Referral Centre for Uro-Oncology in the Republic of Croatia (since July/2016), Head of Croatian Society for Uro-oncology Croatian Medical Association (since July/2017), Head of the Multidisciplinary Uro-oncological Team at the UHC Zagreb (since June/2015)

Area of interest in daily work: treatment of the kidney, adrenal gland, bladder, prostate, testicular and penile cancer. Over the last 5 years I have especially been interested in immunotherapy in genitourinary cancers.

Main Scientific projects: co-investigator in the consortium “Genome-Wide Association Study of Common Cancers” Prostate cancer- PROstate cancer Association group To Investigate Cancer Associated alterations in the genome (PRACTICAL), The Institute of Cancer Research, London, UK (since February 2014-ongoing); co-investigator in the project with Institute of Human Genetics, University Medical Center Hamburg-Eppendorf, Germany, (Germ cell tumors), (since 2010-ongoing); National Presenter - PI of the 1553-SPECTA EORTC Study (European Organisation for Research and Treatment of Cancer), (uro-oncology), (since January 2019-ongoing).

Collaboration in Scientific Center for the reproductive and regenerative Medicine with a Project “Reproductive and regenerative medicine” – scientific investigation of the new platforms and potential with financial by European Union Foundation with agreement KK.01.1.1.01.0008. , Principal investigator is Prof Davora Ježek, MD, Ph.D., “Characterisation epigenetic changes Leydig cells in the disorders in male fertility” and the element “Epi-genetic of the embryonal testicular germ cells tumors”; Assist. prof. Nino Sinčić, MD, PHD, investigation “Identification epi-genetic biomarkers with translation potential from the testicular non-seminoma germ cell tumors in patients blood and ejaculate” Croatian Scientific Association IP-06-2016 “Epi-genetic biomarkers with translation potential from the testicular non-seminoma germ cell tumors in patients blood and ejaculate”- „epi_Sem“ principal investigator Prof Davora Ježek, MD, Ph.D.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Over last 20 years my area of research have been the mechanisms of carcinogenesis and genome damage through chemotherapy and radiotherapy and genetics in urooncology. Last 5 years I my special interest is immunouro-oncology .

I am a lecturer to undergraduates and postgraduates studies, a menthor for post study students for PhD at the Medical School, University of Zagreb and PI of the clinical urooncological studies at the UHC Zagreb.

Publications: book chapters: 16 published in oncological books; more than 50 abstracts; 53 articles (30 CC).

poglavlja u knjigama: 16 poglavlja iz područja onkologije; više od 50 kongresnih sažetaka; 53 članka-rada Web of Science (21/3/2019): citate of the articles = 434, h-index= 12.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 14/07/2015

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Assoc. Prof. Ozren Gamulin, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** School of Medicine, University of Zagreb**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** “Biomaterial Infections”.**BIOGRAPHY**

Date of Birth: March 5th, 1964, Zagreb, Croatia. Education: Faculty of Physics, University of Zagreb, 1983-1989, Zagreb, Croatia. Postgraduate Study, Master degree thesis in 1996, PhD thesis in 2004. Employment: staff associate at “Rade Končar” Electrotechnical Institute in Zagreb, 1989-2000. Staff associate at Department of Physics and Biophysics, Medical School, University of Zagreb, 1999-2000. Assistant 2000-2005, senior assistant 2005-2008, assistant professor 2008-2019, and associate professor since 2019 at Medical School, University of Zagreb. Head of Department of Physics and Biophysics at Zagreb University Medical School, 2010-. Awarded in 2006 with distinguish acknowledgement at 4. International display of inovations, new ideas, products and technologies - ARCA for project: “Changes Induced by Heat Shock in *in vitro* Culture of Gastrulating Mammalian Embryo - Application of FTIR and Raman Spectroscopy”.

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: prof. dr. sc. Slavko Gašparov, MD, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Department of pathology, School of Medicine,
Department of pathology, Clinical hospital Merkur

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Liver transplantation

BIOGRAPHY

I was born on 20th of May 1962. in Virovitica, Croatia. I graduated at Zagreb University School of Medicine in 1989. After internship (1989-1990) in County Hospital Virovitica I passed the State (licensing) exam, and spent three years working at the same Hospital.

In the period 1993-1997 I finished the Residency in Pathology. I have been working as a pathologist at Department of pathology and Cytology, Clinical Hospital Merkur since 1997. In 1998. I finished the Postgraduate Study in Pathology and received a Master degree at Medical School, University of Zagreb in 2000. The title of my Master thesis was “Significance of lymphatic follicles and lymphoepithelial lesion in *Helicobacter pylori*-associated gastritis”. From 1996-2009 I was a co-worker on three projects at Medical School Zagreb (“*Helicobacter pylori* – epidemiology and infection in Croatia”, “*Helicobacter pylori* infection – evolution of disease and new therapeutic approach” and “Prognostic factors, diagnosis and treatment of hemoblastoses”). All three projects were financed by the Croatian Ministry of Science, Education and Sport.

In 2004 I finished my PhD thesis at Zagreb University, School of Medicine (“Trisomy 3, oncoprotein Bcl-10 and gastric MALT lymphoma in *Helicobacter pylori* infections”). In 2005. I spent three months as a visiting fellow in the Division of Transplantation Pathology, University of Pittsburgh Medical Center (Pittsburgh, USA).

Since 2009 I have been the leading scientist of the project „Prognostic value of FOXP1 and FOXP3 in B lymphoproliferative disorders“. Project number is 108-1081873-1891, and the project is financed by Ministry of Science, Education and Sport of Republic of Croatia.

I was a mentor of four PhD thesis and five students' thesis. Currently, I am a mentor of two PhD thesis in progress.

From 2007 to 2012 I was employed in a position of Assistant professor at Department of pathology, University of Zagreb, School of Medicine. Since 2012 I have been working as a professor at the same University. In 2011 I became the Head of Department of pathology and cytology Clinical Hospital Merkur. I am a member of European Society of Pathology, Croatia Medical Association, Croatian Medical Chamber, Croatian Society of Pathologists and the president of the Croatian Hematopathological section.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Assist Prof. Romana Gjergja Juraški, Assist Prof, MD PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** Children's Hospital Srebrnjak**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Selected chapters in epileptology in developmental age**BIOGRAPHY**

Romana Gjergja Juraški is Paediatrician Specialist from 2003, and Pediatrician Neurologist from 2007. She is the Head of Neuropediatric Unit and Unit for sleep disorders in children at the Children's Hospital Srebrnjak, from 2011 till today. She gained her PhD at the Medical School of Zagreb in 2009 in the field of biomedicine and health, with the Thesis title: The clinical significance of interictal single-photon emission computerized brain tomography in the assessment of functional brain damage in children with partial epilepsy. She is a Scientific Associate at Medical School Zagreb since 2010, an Assistant Professor at Medical School of Osijek and at the Faculty of health studies of Rijeka since 2018. She is a lecturer at undergraduate and postgraduate academic education in Zagreb and Osijek. In her professional and scientific work, she deals with sleep medicine in children, developmental epileptology, syndromology, teratology and neurogenetic counseling within the medical genetics and developmental neurology. So far, she has published several professional and scientific papers from these areas and is an active participant in conferences in Croatia and abroad. She is a co-author in the books and manuals of Medical genetics and Neuropediatrics. She had advanced education in the field of sleep medicine in abroad (Harvard Medical School and Atlanta School of Sleep Medicine). She is a member of the Croatian Medical Association, the Croatian Medical Chamber, the Croatian Society for Child Neurology, the Croatian Society for Human Genetics, the Croatian Somnology Society, the Society for Neuroscience and FENS, the European Society for Sleep Medicine (ESRS).

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Igor Gliha, Professor

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University of Zagreb School of Law

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Structure, methodology and functioning of Scientific work 2

BIOGRAPHY

Prof. dr. sc. Igor Gliha, born on April 16, 1962 in Zagreb. Graduated from the Faculty of Law in Zagreb in 1985; graduated in 1990 from the Postgraduate studies in international public and private law and international relations; Ph.D. in 1996 defending his dissertation under the title "Legal nature of publisher's rights". He continued his studies at foreign scientific institutes: Institut für Rechtsvergleichung, Rechtswissenschaftliche Fakultät, Universität Wien (1993-1997); Max Planck Institute for Geistiges Eigentum, Wettbewerbs- und Steuerrecht (1998 and 2004). He continued his post-graduate courses at the Interuniversity Center in Dubrovnik as well as a professional course: Western European Integration and All-European Developments at the Gustav Streseman Institute in Bonn, 1990. He conducted a six-month court practice at the Municipal Court in Zagreb (September 1987). Judicial Examination passed in 1988. Professional Exam for Trademark Representatives in 2007.

He began his professional career in 1986, working as a lawyer, until joining the Faculty of Law of the University of Zagreb, Civil Rights Department, where he has been working continuously since 1987. He was elected Full Professor on 12 April 2005. From 1992 to 1993 he was an advisor to the Embassy of the Republic of Croatia in the United States.

Dean of the Faculty of Law, University of Zagreb, since October 1, 2017, and vice dean of the same Faculty in academic year 2007/08. and 2008/09. He was a member of the General Committee of the Republic of Croatia for humanities in the field of law. For ten years he was the president of the Committee for university teaching literature of the University of Zagreb.

Author of a hundred papers published in domestic and foreign journals. He has participated in seventy domestic and international scientific and professional conferences. Editor and member of editorial boards of a number of scientific and professional international and domestic conferences. Editor-in-Chief of Publishing at the Faculty of Law, University of Zagreb since 2006. Member of the Editorial Board of the Proceedings of the Croatian Society for Copyright, and a multi-year member of the Proceedings of the Zagreb School of Law.

Head of the working group "Intellectual Property Rights" for the preparation of negotiations on Croatia's accession to the European Union. A member of working groups for drafting the Copyright and Related Rights Act, the Law on Succession, the Property Act and other real rights, and the Act on Amendments to the Copyright Act. As a representative of the Republic of Croatia, he participated in the work of expert groups of the World Intellectual Property Organization (WIPO). Member of the Delegation of the Republic of Croatia to the Diplomatic Conference on Certain Copyright and Neighboring Rights Questions, Geneva, 1996. and at the Diplomatic Conference on the Protection of Audiovisual Performances, Geneva, 2000.

Arbitrator: Permanent Court of Arbitration at the Croatian Chamber of Commerce; The HR DNS subdomain service within the top HR domain, the Arbitration Court's sports court at the COO and a member of the HOO's Arbitration Council.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

He received the Croatian Academy of Science and Art's Award for a Contribution of Persistent and Lasting Importance to the Republic of Croatia in the Field of Social Sciences for 1999 (together with Prof. Dr. Nikola Gavell, Prof. Dr. Tatjana Josipović, Prof. Dr. Vlado Belaj, and Prof. Dr. Zlatan Stipković).

Full member of the Academy of Legal Sciences of Croatia. President of the Croatian Society for Copyright, President of the Croatian National group Association littéraire et artistique internationale (ALAI). Member of the Comité Exécutif Association littéraire et artistique internationale, Paris. Member of the Executive Committee of Almae Matris alumnae et alumni Croaticae - Facultas Iuridica. Founding member of the Association of Friends of the Max Planck Institute for Intellectual Property, Competition and Tax Law, Croatian Society for Civil Law and Practice and member of the Croatian Society for the Study of the European Community.

NAME OF THE INSTITUTION OF EMPLOYMENT OF THE TEACHER; FACULTY OF THE HEALTH SCIENCES,
UNIVERSITY OF LJUBLJANA

NAME OF THE COURSE/MODULE THAT SHE TEACHES: MULTIRESISTANT BACTERIA-CAUSATIVE AGENTS OF
HOSPITAL INFECTIONS

BIOGRAPHY:

1984: obtained graduate degree at Biotechnical Faculty, University of Ljubljana; title of graduate thesis:
Sensitivity of *Pseudomonas aeruginosa* isolates from wounds and burns to antibiotics

1990: obtained masters degree at Interfaculty microbiology studies at Medical faculty and Biotechnical
faculty, University of Ljubljana; title of masters thesis: Beta-galactosidase and proteolytic activity of
Streptococcus thermophilus

2001: obtained PhD degree at Biotechnical Faculty, University of Ljubljana; title of doctoral thesis:
Detection and monitoring of *Bacillus cereus* in milk and dairy products using biochemical, immunological
and molecular genetic methods

Work experience

1984-1989: junior researcher at Institute for milk and probiotics, Biotechnical Faculty, University of
Ljubljana

1991-2007: senior research associate at Institute for milk and probiotics, Biotechnical Faculty, University
of Ljubljana. Head of accredited microbiology laboratory for milk and dairy products.

2005-present day: honorary lecturer at the Biotechnical educational center Ljubljana in the following
fields: Sustainable development with biology and Food microbiology and biotechnology

2007-present day: assistant professor at the Faculty of Health Sciences, University of Ljubljana; lecturer in
the following fields: Microbiology and parasitology, Sampling methods, Food hygiene and technology,
Microbiology methods in the environment

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Mirna Golemovic, PhD, molecular biologist**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** University Hospital Centre Zagreb**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Methods of Molecular Biology in Medicine**BIOGRAPHY**

Mirna Golemovic was born in 1973 in Zagreb. She graduated in 1997 at the Faculty of Science, University of Zagreb in the field of biology, molecular biology. In 2002 she defended her Master's thesis and obtained the title Master of Science. She spent two years (2002-2004) working at the Department of Leukemia, The University of Texas M. D. Anderson Cancer Center, Houston, Texas, USA. In 2006 she defended her doctoral thesis at the Faculty of Science and obtained her PhD title. In 2009, she was promoted to Research Associate at The University of Zagreb School of Medicine. From 1998 until 2007 she was employed as a scientific novice at the Department of Immunology at University Hospital Centre Zagreb (UHC Zagreb). Since 2007 she has been employed as a full-time employee at the Clinical Department of Transfusion Medicine and Transplantation Biology, UHC Zagreb. In 2012 she completed International On-line Course in Tissue Banking, Cell Therapy and Regenerative Medicine and 4th Advanced Course in Tissue Banking, Cell Therapy and Regenerative Medicine – Transplant Procurement Management (TPM) at University of Barcelona (Extension Certificates). From 2011 until 2017, she was head of the Cellular Therapy Unit. Since January 2016, she is the Croatian delegate at the Committee for Advanced Therapies in the European Medicines Agency. In 2015 she was the President of the Scientific Committee of 24th Congress of European Association of Tissue Banks.

She is a lecturer at the University of Applied Health Studies Zagreb. She participates in one course at Specialist postgraduate study in Transfusion Medicine at The University of Zagreb School of Medicine.

She was a mentor at one doctoral thesis (Faculty of Sciences) and co-mentor at another (Faculty of Mechanical Engineering and Naval Architecture). She is currently co-mentoring one PhD student at School of Medicine. She was a mentor at two master graduation theses at Faculty of Sciences and one at the University of Applied Health Studies. She was the author or co-author in 14 published papers and 57 conference reports. She is a co-author in two chapters of two manuals for students at the doctoral study at the School of Medicine. She is a member of the Croatian Immunological Society, the European Association of Tissue Banks and a Board member in the Croatian Society of Biologists in Health Care. Her scientific interests are related to the fields of cellular therapy and tissue banking.

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Assist. Prof. Branka Golubić Čepulić, MD, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University Hospital Centre Zagreb, Department of Transfusion Medicine and Transplantation Biology

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Laboratory approach to transplantation of haematopoietic stem cells

BIOGRAPHY

Date and place of birth

25.8.1958, Zagreb

Education

1990 specialization in transfusion medicine

1987 postgraduate study in Medical Cytology

1982 medical doctor, University of Zagreb, School of Medicine

Work experience

1996-present head of the Department of Transfusion Medicine and Transplantation Biology, University Hospital Centre Zagreb

1995-1996 advisor, Croatian institute for health insurance

1990-1995 specialist in transfusion medicine, Department of Transfusion Medicine, University Hospital Centre Zagreb

1987-1990 residency in transfusion medicine, University Hospital Centre Zagreb

1983-1987 general practitioner, Public Health Care Centre Trnje, Zagreb

1982-1983 internship, Children's Hospital Zagreb

Academic degrees

2011 PhD, Dissertation: Sources of Errors and Their Control: An Adverse Event Management Model in Clinical Transfusion, University of Zagreb, School of Medicine

1998 Master of Science, Thesis: Influence of high doses of gamma irradiation on platelets concentrates, University of Zagreb, School of Medicine

Teaching position

2015-present Assistant Professor, School of medicine, University of Zagreb (160 h)

2013-present Assistant Professor, Department of Health Studies, University of Split (100 h)

2002-present College professor, University of Applied Health Sciences, Zagreb (90 h)

In total 350 teaching hours

Publications

in total 65 articles in medical journals: 40 articles in indexed journals (18 Current Contents, 13 Medline, 6 Scopus, 3 WOS)

author or co-author of 20 chapters in student's textbooks and 19 chapters in other books (all in Croatian)

editor of 4 books in the field of transfusion medicine (all in Croatian)

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 20.07.2015

Assistant Professor, University of Zagreb; 10.06.2013 Assistant Professor, University of Split

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Kristina Gotovac Jerčić, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** Clinical Hospital Centre Zagreb**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Genomic approaches in biomedical and translational research**BIOGRAPHY**

Kristina Gotovac Jerčić was born in 1983 in Zagreb, Croatia. She graduated from Faculty of Science, Department of Biology in 2008 and attained her PhD from Faculty of Science, Department of Biology in 2014. From 2008 to 2016 she was employed at the Department for Functional Genomics (Center for Translational and Clinical Research). Since 2016 she has been employed as a molecular biologist at the Department of Neurology, University Hospital Center Zagreb. For the purpose of scientific training she spent two months in 2010 in the group of prof. Dr. Nicholas Hastie at the Medical Research Council Human Genetics Unit in Edinburgh (Scotland), and in the laboratory of prof Dr Tiago Outeiro at Georg-August University in Göttingen (Germany). So far she has published 12 publications indexed in CC and WoS databases which have been cited 165 times according to Scopus database and has actively participated in several scientific congresses in the country and abroad.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Professor Danka Grčević

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: School of Medicine University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Selected topics in transplantation immunology, Immunological recognition, Understanding bone metabolism – basic science in clinical practice

BIOGRAPHY

DATE AND PLACE OF BIRTH: 15. 7. 1967. ZAGREB

EDUCATION

1992.: MD, School of Medicine University of Zagreb;

1998.: MS in Natural Sciences – Biology Postgraduate Education in Biomedicine, University of Zagreb School of Natural Sciences, Thesis: Alleviation of graft versus host reaction by the pharmacological inactivation of T lymphocytes in murine bone marrow; supervisor Prof M Marusic);

2001.: PhD in Medical Sciences – Biomedicine and Health, Doctoral thesis: Role of T and B lymphocytes in osteoclast differentiation, supervisor Prof M Marusic);

2013: Specialisation in laboratory immunology, Ministry of Health RH

EMPLOYEMENT

1995 - 1996: PhD student, Department of Physiology and Immunology;

1996 - 2003: Assistant, Department of Physiology and Immunology;

2003 - 2010: Assistant Professor, Department of Physiology and Immunology,

2010 - 2016: Associate Professor, Department of Physiology and Immunology,

2016- : Professor, Department of Physiology and Immunology.

RESEARCH AND TEACHING ACTIVITIES

Scientific training:

1997 (4 months) i 1999 (3 months): Scientific training in the laboratory of Prof J Lorenzo, University of Connecticut Health Center, Farmington, CT, USA;

2002, 2003 i 2004 (total 4 months): Scientific training in the laboratory of Prof P Croucher, Institute of Musculoskeletal Sciences, University of Oxford, Headington, UK;

2009 – 2018 (total 12 months): Visiting researcher (laboratories of Prof HL Aguila and Prof I Kalajzić), University of Connecticut Health Centre, Farmington, CT, USA.

Teaching experience: Involved in several obligatory courses at the Medical School in Zagreb (Physiology, Immunology, Introduction to Research) and Medical Studies in English, collaborator at several postgraduate courses of Doctoral Studies at Medical School in Zagreb.

Selected textbooks:

1. Abbas AK, Lichtman AH, Pillai S. Stanična i molekularna imunologija, 8th ed. Batinić D, Lukinović-Škudar V (ed.). Zagreb: Medicinska naklada, 2018. (kotranslator)

RESEARCH INTERESTS

Mechanisms of functional interactions between immune and one systems in the bone marrow microenvironment, particularly the molecular interactions between immune and bone cells in physiological and pathological conditions.

MAJOR SCIENTIFIC ACHIEVEMENTS

- PI of the project awarded by the Croatian Scientific Foundation, participation in several national and international scientific projects, invited speaker at the number of scientific meetings.
- Co-organizer of the EMBO workshop: “Anatomy and Embryology of the Mouse” at Medical School.
- Long-term member of the Executive Board of the Croatian Medical Journal, membership and active participation in scientific and professional organizations (Croatian Immunological Society (president), America Association of Immunologists)
- Co-leader (leader Prof Batinić) of the Postgraduate specialty study in Laboratory immunology, School of Medicine University of Zagreb

NUMBER OF PUBLICATIONS/ CITATIONS: 47 / 792 CITATIONS (Scopus)

AWARDS

2017. State Award for Scientific Achievement, Biomedicine and Health, Ministry of Science and Education

2012. Award for Scientific Achievements, University of Zagreb School of Medicine

2010. Short term fellowship award European Molecular Biology Organization (EMBO) for scientific training in the Laboratory of Prof HL Aquila, UConn Health Center, USA

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Prof. RUDOLF GREGUREK, M.D., Ph.D.

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: School of Medicine, University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Research Methods of Psychological Functions and Behavior ; Liaison and consultative psychiatry; Mental health service management;

BIOGRAPHY

He was born on 17th January 1958. He graduated in University of Zagreb Medical School in 1981. In 1987 started residency in psychiatry in a Clinic for Psychological Medicine and he finished it in 1990. Since then he works as a psychiatrist on a Clinic for Psychological Medicine, Clinical Hospital Centre Zagreb. In 2000 he became subspecialist in psychotherapy. Same year he became head of Policlinic for Psychotherapy and in 2003 he became head of Clinic for Psychological Medicine.

From 2003.- 2013.he was head of Clinic for Psychological Medicine, Clinical Hospital Centre Zagreb, head of Desk for Psychiatry and Psychological Medicine, University of Zagreb Medical School

From 1990 to 1995 he was in education and supervision in individual psychotherapy, and when he finished it he became supervisor in individual psychoanalytical psychotherapy. He started personal group analysis in 1987 that was finished in 1992 and also become supervisor in group analysis and in dynamic family marital and partner therapy as well.

In 1994 he became assistant on a desk for Psychiatry and Psychological Medicine, University of Zagreb Medical School, in 1998 he became assistant professor, and in 2003 professor of psychological medicine. In 2006- 2009 he was head of Desk for Psychiatry and Psychological Medicine at University of Zagreb Medical School. Presently, from 2014. he is full professor of Psychological Medicine and Psychiatry on School of Medicine, University of Zagreb.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 2014.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Ivica Grgurevic, MD PhD, Assoc Prof**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** University Hospital Dubrava**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Advanced ultrasonography in gastroenterology and hepatology; Proteomics in biomedical research;**BIOGRAPHY**

Ivica Grgurevic is Assist. Prof. of Medicine and Board certified Consultant in Internal Medicine, Gastroenterology and Hepatology. He graduated at University of Zagreb School of Medicine and attended postgraduate clinical fellowship in Hepatology at Institute for Liver and Digestive Health, University College London, Royal Free Hospital, UK. Currently works at Department of Gastroenterology, Hepatology and Clinical Nutrition (Head), University hospital Dubrava Zagreb. He was the first in Croatia who introduced Quantitative ultrasound elastography (in 2009); Contrast-enhanced ultrasound (2014) and invasive measurement of portal pressure (HVPG) (2015). His principal scientific interests are in the field of Hepatology and Ultrasound, more specifically diagnostic performance of noninvasive methods for assessment of liver fibrosis, steatosis, and portal hypertension. Member of EASL, EFSUMB, IASGO, Member of the Governing Board of the Central European Hepatology Collaboration, President-elect of the Croatian Society of Gastroenterology, Vice-president of the Croatian Society for the Ultrasound in Medicine and Biology. He serves as the Associate professor at University of Zagreb, Faculty of pharmacy and biochemistry and Assistant professor at University of Zagreb School of Medicine. He has published 45 scientific papers (25 indexed in Current contents), 90 congress abstracts, held 69 invited talks, authored or co-authored several chapters in books, was awarded the best poster in the category of Liver imaging at United European Gastroenterology Week in Vienna 2016.

- Noninvasive approaches to diagnosing portal hypertension: evaluation and comparison of the existing methods and discovery of new serum markers (HePortoNew). University of Zagreb School of Medicine and The Adris Foundation. Leader: Assoc. prof. dr. sc. Ivica Grgurević

NUMBER OF SUCCESSFUL MENTORSHIPS THAT RESULTED IN DISSERTATION DEFENCE

1. Bokun Tomislav „Characterisation of liver tumours by quantitative ultrasound elastography“, University of Zagreb School of Medicine, 11.7.2017. Mentor: Assist. prof. dr. sc. Ivica Grgurević

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Professor Lovorka Grgurević, MD, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Medical school University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Biochemical methods in biomedical research; Methods of molecular biology in medicine; Proteomics in biomedical research

BIOGRAPHY

Lovorka Grgurevic conducts research in the Center for Translational and Clinical Research (CETRI), University of Zagreb School of Medicine, head of the proteomic centre where she conducted research program related with rare bone disease and tissue regeneration. She explores the structure and function of bone morphogenetic proteins (BMPs) in biological fluids, has discovered circulating osteogenic proteins and associated molecules in the plasma, and then investigated their effectiveness in bone healing and in models of acute and chronic renal failure. She contributed significantly to the discovery of a new carrier for BMPs and tested its efficacy in animal models of bone defects. Dr Grgurevic discovered novel biomarkers for bone repair, breast and prostate cancer prognosis. She received a new laboratory installation grant from the Croatian Science Foundation and was awarded by the Croatian Academy of Sciences and Arts for scientific achievements.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: full professor September 2019

LIST OF PUBLISHED WORK WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

Associate project:

- 2002.-2006. „Mehanizam i učinkovitost koštanog morfogenetskog proteina 6 u liječenju osteoporoze“, sponzor Ministarstvo znanosti, obrazovanja i sporta, voditelj projekta prof. dr. Slobodan Vukičević
- 2004.-2007. „Osteoinduktivna molekula“, sponzor Hrvatski institut za tehnologiju, voditelj projekta prof. dr. Slobodan Vukičević
- 2007.-2012. Genomska i proteomska analiza biomarkera u krvi kod rijetkih koštanih bolesti (108-1080327-0343), sponzor Ministarstvo znanosti, obrazovanja i športa, voditelj projekta doc. dr. sc. Darko Antičević
- 2007.-2012. „Uloga TSH u modelu osteoporoze i u bolesnika sa smanjenom koštanom masom“, sponzor Ministarstvo znanosti, obrazovanja i sporta, voditelj projekta prof. dr. Slobodan Vukičević
- 2010.-2012. „Bone morphogenetic protein-1 isoforms in bone regeneration“ UKF projekt, voditelj projekta prof. dr. Slobodan Vukičević
- 2011.-2014. „Nova ciljana anabolička terapija za liječenje osteoporoze: BONE6-BIS“, sponzor Hrvatska zaklada za znanost, voditelj projekta prof. dr. Slobodan Vukičević
- 2012.- EU FP7 Project GlowBrain, voditelj prof.dr.sc. Srećko Gajović
- 2012.-2016. „OSTEOGROW“ - Novel Bone Morphogenetic Protein 6 Biocompatible Carrier Device for Bone Regeneration, FP7 HEALTH projekt, kordinator projekta prof. dr. Slobodan Vukičević, voditelj dva podprojekta (WP 2,3) za kliničko testiranje novog lijeka.
- 2012.-2013. “Novi intervencijski postupak uvođenjem tehnologije poboljšanja srčane funkcije nakon preboljenog infarkta miokarda”, BICRO PoC (Program provjere inovativnog koncepta), voditelj projekta prof. dr. Slobodan Vukičević
- 2017.-2022. „Reproduktivna i regenerativna medicina – istraživanja novih platformi i potencijala“, projekt Znanstvenog centra izvrsnosti za reproduktivnu i regenerativnu medicinu, voditelji: prof. dr. sc. Davor Ježek i prof. dr. sc. Slobodan Vukičević
- 2018.-2022. „OSTEOproSPINE - Novel Bone Regeneration Drug Osteogrow: Therapeutic Solution for Lumbar Back Pain“, HORIZON 2020, voditelj 1 podprojekta (WP5), koordinator projekta: prof. dr. sc. Slobodan Vukičević

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: dr. sc. Darko Grošev

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University Hospital Centre Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Analiza medicinskih slika

BIOGRAPHY

1962: born in Skopje, Macedonia.

1981- graduated from High school for mathematics and informatics, Zagreb Croatia.

1989- obtained BSc degree in physics at Faculty of Natural sciences and mathematics, Zagreb, Croatia, in the field of theoretical particle physics

1989 - until present: Employed as a health physicist in Clinical Department of Nuclear Medicine and Radiation Protection, Clinical Hospital Center, Zagreb, Croatia.

1996- Completing the postgraduate study in Medical Physics at the Faculty of Natural sciences and mathematics, Zagreb, Croatia; obtained Master of Science degree with thesis „*Calculation of thyroid volume from ultrasonic cross sections*“.

2011- PhD degree in medical physics at the Faculty of Natural sciences and mathematics, Zagreb, Croatia; Thesis title: “*Determination of Thyroid Remnant Geometrical Parameters in the Dosimetry of Radioiodine Ablation*”

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 2016.

LIST OF PUBLISHED WORK WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Zorana Grubić, Prof

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Tissue Typing Center, Department of Clinical Transfusiology and Transplantation Biology, University Hospital Centre Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Immunological recognition

BIOGRAPHY

Zorana Grubić was born on 10 May 1963 in Split. In 1986 she graduated from the Department of Biology, Faculty of Science in Zagreb. In 1991 she earned her Master's Degree, and in 1997 her PhD from the same Faculty. Since 1987 she has been an employee of the Tissue Typing Department of the Department of Clinical Transfusiology and Transplantation Biology of the University Hospital Centre Zagreb. She was awarded the title of Research Associate in the area of Biomedicine and Health; field of clinical medical sciences, University of Zagreb, School of Medicine in 2005, and in 2017 the title of Scientific Advisor in the area of Biology, University of Zagreb, Faculty of Science.

In 2017, she was awarded the title of Full Professor in the area of Biomedicine and Health, field of fundamental medical sciences at the Postgraduate interdisciplinary university programme Molecular Biosciences at the University of Josip Juraj Strossmayer in Osijek.

The main area of her scientific work is the research of the main histocompatibility system (HLA) in humans, and its role in the transplantation of tissues and organs, HLA gene polymorphism and links between the HLA system and diseases. As the first author or a co-author, she has published 70 scientific papers indexed in CC journals and is the co-author of 5 university textbooks. She has actively participated at 80 scientific conferences (55 international and 25 national) and has given over 20 keynote speeches. Since 2003, she has participated in implementation of the undergraduate programme at the Department of Biology of the Faculty of Science in Zagreb as the coordinator of the elective course "Transplantation immunology". Since 2004 she has taught at the undergraduate programme of the Department of Biology at the University of Josip Juraj Strossmayer in Osijek as the coordinator of the elective subject "Immunocompetence and Transplantation". She has also taught at the postgraduate programme in Molecular biosciences at the University of Josip Juraj Strossmayer in Osijek as the coordinator of the elective subject "Immunogenetics of transplantation". She has introduced the subjects listed above into these programmes and has so far taught over 1000 norm hours. At the same time, she has been the mentor of 27 diploma papers, 3 master's thesis and 5 doctoral dissertations. She has actively participated in 13 scientific projects (5 international and 8 national). She acted as the project manager of one of the projects, a researcher on 9 projects, consultant on 2 projects, while she was a researcher and representative of the Republic of Croatia. She is the member of 9 international and national professional associations.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 29.11.17.

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Mario Habek, MD, Assistant Professor of Neurology

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: School of Medicine, University of Zagreb and University Hospital Center Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Research Methods of Psychological

Functions and Behavior, Structure, methodology and functioning of scientific work 2

BIOGRAPHY

Mario Habek was born in Slavonski Brod in 1978. He graduated from School of Medicine, University of Zagreb in 2003, and in 2010 he received the PhD title at the same School. Since 2009 he has worked at the Department of Neurology, University Hospital Center Zagreb, as a consultant neurologist. He is Head of the Laboratory for Autonomic Nervous System Testing and the Head of the Referral Center for Autonomic Nervous System. Since 2004 he has worked at the School of Medicine, University of Zagreb, and from 2013 he is Assistant Professor at the Department of Neurology. He is a lecturer at the graduate and postgraduate study at the School of Medicine, University of Zagreb, and the lecturer at the professional postgraduate study Clinical Neurology. He is the Head of several scientific project, one funded by CSF, "Brainstem Evoked Potentials Score and Composite Autonomic Scoring Scale as a Predictors of Disease Progression in Clinically Isolated Syndrome", and three projects funded by University of Zagreb, and he also participates in different scientific research projects, whose results are presented in numerous national and international scientific journals. He is a reviewer for internationally recognized journals. He is vice-president of the Croatian Federation for EEG and Clinical Neurophysiology of the Croatian Medical Association, member of the advisory board of the Croatian Neurological Society, member of the European Academy of Neurology, where he is member of the Scientific panel for Multiple Sclerosis, Autonomic Nervous System i Clinical Neurophysiology; member of the Management group of the Scientific panel for Autonomic Nervous System of the European Academy of Neurology and Co-Chair of the Scientific panel for Autonomic Nervous System of the European Academy of Neurology. His field of scientific interest are multiple sclerosis, autonomic nervous system and clinical neurophysiology.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Miro Hanževački, MD, PhD, Assistant Professor

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Health Care Center Zagreb West, Medical University Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Telemedicine

BIOGRAPHY

Miro Hanževački is practicing physician, specialist in Family Practice / General Medicine also working as Director of Primary Health Care Center in Zagreb, Croatia.

Graduated in Zagreb University in 1994, completed post graduate study in pharmacology. During the period 1994. and 2005. worked in Pharmaceutical industry as Scientific Associate, .Marketing and Sales Manager and Business Unit Manager. Specialized in Family Practice in 2011. and defended the PhD Thesis in Geriatrics in 2012.

His area of interest is Pharmacology and Primary Care. He participated in publication of more than 10 scientific publications in the field of pharmacology and primary care.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 2018

LIST OF PUBLISHED WORK, WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Marija Heffer, Prof. dr. sc.**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** Faculty of Medicine Osijek, Osijek**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** How to become a neuron?**BIOGRAPHY**

Born: 1965, Osijek. Education: MD, 1989, Faculty of Medicine, University of Zagreb. Postgraduate and Doctorate study: Zagreb, Faculty of Natural Sciences and Mathematics, Ph.D. in 1996. Postdoctoral study: 1997-1998. John Hopkins Medical School, Baltimore (USA). From 1990 to 2011 he has been working at the Faculty of Medicine in Zagreb, and since 1999 he has been working at the Faculty of Medicine of the University of Josip Juraj Strossmayer in Osijek. She has passed through these institutions through the following positions: researcher trainee, assistant, senior assistant, docent and at the end of 11.07.2011. Marija Heffer is Full Professor of Biomedicine and Health Sciences, Scientific Field of Basic Medical Science and Scientific Neuroscience. Tenure position from: 30.05.2017. So far she has been the leader of 8 national projects and has participated in 4 national and 10 international projects. The area of scientific interest: the role of glycoconjugates in the development and aging of the brain, stress and stem cells. Mentor of: 11 doctoral thesis, one master's degree and 6 graduate theses. Author of: 40 CC and 14 SCI papers. In the period 2003 - 2019 she has held 85 lectures aimed in educating and popularizing science. So far she organized of 17 manifestations of the Brain Week, first at the Faculty of Medicine in Zagreb (2002) and then for the J. J. Strossmayer University (since 2003). Also, she had been running 5 projects of the DANA Foundation for the popularization of science. She participated in the organization of 4 TEDxOsijek events, and lectured at one. Cited 15019 times, h-index 17.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 30.05.2017., 117/373

Expression of calcium/calmodulin-dependent protein kinase II and pain-related behavior in rat models of type 1 and type 2 diabetes. *Anesth Analg*. 2013 Mar;116(3):712-21. [IF(2013)=3.422] TC=14, Q1

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED AND WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

1998-2001: Project Manager "Glycoconjugates in the Human Brain" Ministry of Science and Technology of the Republic of Croatia

2002-2006: project leader "The role of gangliosidosis in maturation and plasticity of the brain" of the Ministry of Science, Education and Sports of the Republic of Croatia (0219021)

2007-2014: Project Manager "The role of lipid rafts and glycoconjugates in the development and regeneration of the nervous system", Ministry of Science, Education and Sports of Croatia (219-0061194-2157)

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED IN THE LAST FIVE YEARS

2015-2016: Project Manager "The potential of multiplying adult stem cells after chronic stress on the model of young and old rats", VIF2015-MEFOS-1.

2015-2016: Project Manager "Pregnancy Obesity as a Risk Factor for the Development of Metabolic Syndrome in Mother and Child", VIF2016-MEFOS-22.

2015-2019: project leader "Pathophysiological Consequences of Changes in Lipid Raft Composition", Croatian Science Foundation (IP-2014-09-2324) for 48 months (10/12/2017 - 09/12/2018).

2016-2020: Project Leader of Young Scientist Career Development Project, Croatia Foundation for Science.

2016-2016: Project Leader "Lipid micro-environment of leptin and insulin receptors in development and aging", projects for visiting professors at J. J. Strossmayer University, INGI-2016-35.

NUMBER OF SUCCESSFUL MENTORSHIPS THAT RESULTED IN DISSERTATION DEFENCE

11

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Associate professor Neven Henigsberg, M.D.

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University of Zagreb, School of Medicine

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Mental health service management

BIOGRAPHY

EDUCATION

2009 Subspecialty in Biological Psychiatry

School of Medicine, University of Zagreb

2003 Master of economic sciences

School of Economy, University of Zagreb

2000 Doctor of medical sciences, field of psychiatry (thesis title: Seasonality of schizophrenic births and characteristics of developed schizophrenia features)

School of Medicine, University of Zagreb

1996 Specialist in psychiatry

School of Medicine, University of Zagreb, Vrapče University Hospital

1994 Master of medical sciences

School of Medicine, University of Zagreb

1993 – 1995 International postgraduate study „School of Business Management“

School of Economy, University of Zagreb

1989 – 1991 Postgraduate study „Health Information Systems“

School of Medicine, University of Zagreb

1987 Medical doctor

School of Medicine, University of Zagreb

CURRENT POSITION(S)

2017 - Full professor, Chair of Psychiatry and Psychological Medicine

Medical School, University of Zagreb

2013 – present Head of Department of Cognitive Neuroscience

Croatian Institute for Brain Research, Medical School, University of Zagreb

2012 – present Head of Department of Research, Head of Research Department in Psychiatry Vrapče University Hospital

2004 – present Head of Department for Neuropsychopharmacology and Pharmacology of Behaviour

Croatian Institute for Brain Research, Medical School, University of Zagreb

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

School of Public Health „Andrija Štampar“, Medical School, University of Zagreb

PREVIOUS POSITIONS

2011 – 2017 Associate professor of psychiatry, Chair of Psychiatry and Psychological Medicine
Medical School, University of Zagreb

2006 – 2011 Assistant professor of psychiatry, Chair of Psychiatry and Psychological Medicine
Medical School, University of Zagreb

2002 – 2006 Senior Assistant, Chair of Psychiatry and Psychological Medicine
Medical School, University of Zagreb

1997- 2002 Assistant, Chair of Psychiatry and Psychological Medicine
Medical School, University of Zagreb

1993 – 1996 Resident in psychiatry
University Hospital for Diabetes, Endocrinology and Metabolic Diseases „Vuk Vrhovec“, Medical School,
University of Zagreb

1989 – 1993 General practitioner, Primary Health Care Centre

1987 – 1989 Research Assistant, School of Public Health "Andrija Štampar", Medical School, University
of Zagreb

TEACHING ACTIVITIES

2017 - Full professor, Chair of Psychiatry and Psychological Medicine, Medical School, University of Zagreb

2011 – 2017 Associate professor of psychiatry, Chair of Psychiatry and Psychological Medicine
Medical School, University of Zagreb

2009 – 2018 Honorary Associate professor of psychiatry, Chair of Psychiatry and Psychological
Medicine, Medical School, University of Osijek

2006 – 2011 Assistant professor of psychiatry, Chair of Psychiatry and Psychological Medicine
Medical School, University of Zagreb

2003 - 2009 Honorary Assistant professor of psychiatry, Chair of Psychiatry and Psychological Medicine
Medical School, University of Osijek

2002 – 2006 Senior Assistant, Chair of Psychiatry and Psychological Medicine
Medical School, University of Zagreb

1997- 2002 Assistant, Chair of Psychiatry and Psychological Medicine
Medical School, University of Zagreb

Medicine

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED AND WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

2018 – Project leader, “Spacijalni korelati 1H-MRS s povratom depresije i konverzijom u bipolarni poremećaj”, University of Zagreb

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2015 – 2018 Project leader, „Multimodal approach to treatment and long-term

assessment of depressive disorder by means of magnetic resonance”, Croatian Science Foundation

2017 – 2018 Project leader, „Spacijalni korelati 1-H MRS terapijskog odgovora u praćenju povrata depresije“, University of Zagreb

2016 – 2017 Project leader, „Spacijalni korelati 1-H MRS terapijskog odgovora u praćenju povrata depresije“, University of Zagreb

2015 – 2016 Project leader, „Spacijalni korelat 1-H MRS s terapijskim odgovorom u liječenju depresivnog poremećaja, University of Zagreb

2014 – 2015 Project leader, „Longitudinalno praćenje 1H-MRS promjena kao prediktora terapijskog odgovora, relapsa i povrata depresije“, University of Zagreb

2007 – 2010 Researcher, „Neuroimaging, neurogenomics and pharmacogenomics of the frontal lobe connectivity: normal development and abnormalities in developmental cognitive disorders“, project within UKF programme, in cooperation with School of Medicine, Yale i McGill University

2006 – 2014 Project Leader, “1H-MRS promjene u predviđanju terapijskog odgovora, relapsa i povrata”, Croatian Ministry of Science

2005 – 2009 Member of Steering Committee; “Electronic Neuronal Oscillations and Cognition (ENOC)”; COST project B27

2004 – 2008 Contractor (principal investigator in Croatia), «Genomic based therapies for depression (GENDEP)», European Commission funded scientific project in 6th Framework Program (coordinator: London Institute of Psychiatry, King’s College, London)

2002 - 2006 Project Leader, “Predictive role of genetic loading on therapeutic outcome in treatment of psychoses”, Croatian Ministry of Science

2002 - 2005 Researcher, “Efficacy of health care system in war time period”, Croatian Ministry of Science

2002 - 2006 Researcher, “Are functional psychoses a nosologic entity?”, Croatian Ministry of Science

1996 - 2000 Researcher, “Effects of privatisation to Croatian health care system”, Croatian Ministry of Science

1996 – 2002 Researcher, “Functional psychoses as nosologic entity”, Croatian Ministry of Science

1996 – 2000 Researcher, “Analysis of the Croatian health care system during the war”, Croatian Ministry of Science

1996 - 1999 Researcher, «Development of antemortal database for identification of war victims», Smithsonian Institution and Medical School, University of Zagreb; scientific project approved by US-Croatian Joint Board

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED IN THE LAST FIVE YEARS

2018 – Project leader, “1H-MRS spatial correlates of recurrence of depression and conversion to bipolar disorder”, University of Zagreb

2015 – 2018 Project leader, „Multimodal approach to treatment and long-term

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Mislav Herman, MD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University Hospital Centre Zagreb, Department of Gynaecology and Obstetrics

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Diabetes and pregnancy

BIOGRAPHY

Born on March 21st, 1977, Zagreb, Croatia

Education:

2017-present - subspecialist in maternal-fetal medicine at the Clinical Hospital Center Zagreb, Department of Obstetrics and Gynecology

2015-2017 - fellowship in maternal-fetal medicine at the Clinical Hospital Center Zagreb, Department of Obstetrics and Gynecology

2008-present - OBGY specialist

2004-2008 - residency in obstetrics and gynecology at the Clinical Hospital Center Zagreb, Department of Obstetrics and Gynecology

2004-present - Postgraduate doctoral study "Biomedicine and Health" at the University of Zagreb

1995-2001 - Medical School, University of Zagreb

1991-1995 - High school - XVI. Gymnasium, Zagreb

1983-1991 - Elementary school "Ivan Goran Kovacic", Zagreb

Work experience:

2017-present - Member of the City Assembly of the City of Zagreb

2016.- present - Chief Medical Officer (CMO) of the Republic of Croatia

2008-present- specialist in University Hospital Centre Zagreb, Department of Gynaecology and Obstetrics

2004-2008 - OBGY resident at University Hospital Centre Zagreb, Department of Gynaecology and Obstetrics

2001-2002 - medical internship at the Clinical Hospital Center "Sisters of Mercy"

In the academic year 1996-1997 and 1997-1998 demonstrator in the Department of Anatomy "Drago Perovic" 'School of Medicine, University of Zagreb

An Associate of the Department of Obstetrics and Gynecology, School of Medicine, University of Zagreb

2005-2012 - Lecturer in the School of Nursing in Mlinarska street in Zagreb

Lecturer on "Course for pregnant women" in the organization of the Department of Obstetrics and Gynecology of the Clinical Hospital Center Zagreb

Doctor of Croatian waterpolo team

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Iva Hojsak, Md, PhD, senior research associate**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** Children's Hospital Zagreb, University of Zagreb School of Medicine**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Clinical nutrition**BIOGRAPHY**

Iva Hojsak, MD, PhD is pediatric gastroenterologist and head of the Referral Center for Pediatric Gastroenterology and Nutrition, Children's Hospital Zagreb, Croatia and deputy director of Children's Hospital Zagreb. She graduated on Medical School of Zagreb, where she also received her PhD degree. She has published more than 120 scientific and clinical papers (100 published in CC cited journals) and has been a coworker in more than 15 international and Croatian scientific projects.

She was a head of Scientific Committee of the Children's Hospital Zagreb (2104-2018), ESPGHAN Council Member as Education Secretary (2017-2019), secretary of the ESPGHAN Committee on Nutrition (2012-2018), associate editor of Journal of Pediatric Gastroenterology and Nutrition (since 2014) and board member of ESPGHAN Young Investigators Forum (since 2016).

Her main clinical/research interests include probiotics, intestinal failure and parenteral nutrition and inflammatory bowel disease.

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Marina Horvatiček, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Ruđer Bošković Institute, Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: "Diabetes and Pregnancy",
"Physiology and biochemistry of uterus in pregnancy and labour"

BIOGRAPHY

Born 1982. in Zagreb. Graduated in 2007 at Biology department, Faculty of science, University of Zagreb. 2012-2017. PhD degree: University Postgraduate Interdisciplinary doctoral study Molecular Biosciences. 2009-2016. Junior researcher/Scientific fellow at project "Diabetes and metabolic syndrome after previous gestation diabetes", PI prof. dr. sc. Marina Ivanišević, School of Medicine Zagreb.

From 2015. Teaching assistant at Postgraduate Study in Biomedicine and Health Sciences University of Zagreb School of Medicine (Diabetes and pregnancy; Nutritional and respiratory function of the placenta, fetal growth and fetal endocrinology; Physiology and biochemistry of the uterus during pregnancy and delivery)

2016. - 2018. Teaching assistant at Medical chemistry and biochemistry (Graduate medical studies, University of Zagreb School of Medicine)

From 2018. postdoc at Ruđer Bošković Institute.

Attendant at summer school "Mass Spectrometry in Biotechnology and Medicine" 2013. g. and workshop "How to build biobank - learning by doing" 2015. g.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 22.09.2017.

- 2009 PhD degree in medical sciences at the University of Zagreb School of Medicine, Croatia; dissertation title: Abdominal fat measurement in patients with morphological changes of the aorta on MSCT angiography
- 2004-2008 radiology residency at the University Hospital Center Zagreb, Croatia
- 2003-2006 postgraduate programme “Biomedicine and Health Sciences” at the University of Zagreb School of Medicine, Croatia
- 1996-2002 undergraduate education at the University of Zagreb School of Medicine, Croatia

Work Experience

- 2018 – head of Division for urogenital radiology, Department of diagnostic and interventional radiology, University Hospital Center Zagreb
- 2017 – member of the Education & EBCR Committee of the European Society of Cardiovascular radiology (ESCR)
- 2016 – president of the Section for cardiac radiology, Croatian Society of Radiology
- 2016 – assistant professor at the Department of Radiology, University of Zagreb School of Medicine
- 10/2014 - 09/2015 Marie-Curie fellow at the University Hospital Basel, Switzerland
- 2009-2016 postdoctoral researcher/senior assistant at the University of Zagreb School of Medicine, Department of Radiology
- 2008 – board certified radiologist at the University Hospital Center Zagreb
- 2003-2009 research fellow/teaching assistant at the University of Zagreb School of Medicine, Department of Radiology
- 2002-2003 intern (Croatian Institute of Public Health, University Hospital Center Zagreb)
- 1999-2001 demonstrator at the Department of pathophysiology, School of Medicine
- 1997-1999 demonstrator at the Department of pathophysiology, School of Medicine

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: Nov 7, 2016

1996: MSc, Zagreb University School of Medicine, Zagreb, Croatia

2013: PhD (“Completeness and Changes in Registered Data and Reporting Bias of Randomized Controlled Trials in ICMJE Journals after Trial Registration Policy”), Split University School of Medicine, Split, Croatia

Mirjana Huic is a medical doctor and specialist in clinical pharmacology and toxicology. She represents Croatia in the European HTA Network and serves as a WHO national HTA focal point. Since 2009, as the Assistant Director in Croatian Agency for Quality and Accreditation in Health Care and Social Welfare and Head of Department for Development, Research and HTA, she is responsible for establishing a transparent, evidence-based HTA process in Croatia. Since 2010 she actively participates in different EUnetHTA scientific work and production of European joint HTA reports on the whole range of health technologies. Previously she worked as a clinician, clinical trials investigator and lecturer at the UHC Zagreb. She participated in different national and international scientific projects and is the author or co-author of numerous scientific articles, book chapters, international and national HTA Reports.

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED AND WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

National projects (Co-investigator on national projects financed by Croatian Ministry of Sciences, Education and Sport):

Influence of illness to drugs pharmacokinetics;

Influence of rotation of antimicrobial drugs to bacterial resistance;

RegPok.hr-Croatian clinical trials register.

International projects:

TAIEX Project, 2010, organized by the Technical Assistance Information Exchange Instrument of the European Commission (TAIEX) in co-operation with Croatian HTA Department: 2 days Workshop - "Health Technology Assessment; main principles, HTA process and report";

FP7 EQUIPT project (European-study on Quantifying Utility of Investment in Protection from Tobacco);

EUnetHTA Joint Action 1 Project, EUnetHTA and European Commision, European Commision and European HTA Agencies;

EUnetHTA Joint Action 2 Project;

EUnetHTA Joint Action 3 Project;

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Obzor2020 SELFIE (Sustainable intEgrated care modeLs for multi-morbidity: delivery, Financing and performance) project.

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED IN THE LAST FIVE YEARS

FP7 EQUIPT project (European-study on Quantifying Utility of Investment in Protection from Tobacco);

EUnetHTA Joint Action 1 Project, EUnetHTA and European Commision, European Commision and European HTA Agencies;

EUnetHTA Joint Action 2 Project;

EUnetHTA Joint Action 3 Project;

Horizont2020 SELFIE (Sustainable intEgrated care modeLs for multi-morbidity: delivery, Financing and performance) project.

Croatian Scientific Bibliography (CROSB) 345865

Datum i mjesto rođenja: 13/3/1973, Zagreb, Croatia

Education

4.4.2014. Subspecialty Ultrasound

30.6.2013. PhD – Medical School University of Zagreb - dissertation “The value of targeted US examination in diagnosis of MR lesions”

18.4.2008. Board examined radiologist

31.5.2007. Masters degree – Medical School University of Zagreb

2004-2005. Education in breast imaging - 6 months “The Applicability of the Breast Imaging Reporting and Data System to Mammographic detection of Breast Cancer in Southeast Europe”, Memorial Sloan Kettering Cancer Center, New York, SAD

2002-2003. Scientific postdoctoral study “Biomedical sciences” Medical School University of Zagreb, 2002-2003.

2003 “Color Doppler in extracranial and intracranial circulation” theoretical and practical course, Clinical Hospital “Sestre milosrdnice” Zagreb

2000-2001. Scientific postdoctoral study “Zaštita majke i djeteta” Medical School University of Zagreb

2001 “Ultrasound in diagnosis of perinatal brain damage” theoretical and practical course, Childrens Hospital Zagreb

1997-1998. Pripravnički staž Klinička bolnica “Sestre milosrdnice”, Zagreb

1991-1997. Medical School University of Zagreb

1987-1991. Matematički informatički obrazovni centar (MIOC)

Radno iskustvo

2008.- today Radiologist, University Hospital Dubrava

2002.- 2008. Residency in radiology University Hospital Dubrava Zagreb

2001.-2002. Medical Development and regulatory affairs, Belupo d.d.

1999.-2001. Scientific fellow, “Perinatal brain damage”, Childrens Hospital Zagreb

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:.**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Dr Dusko ILIC, Reader in Stem Cell Science**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** King's College London**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Human reproduction**BIOGRAPHY**

Dr Dusko Ilic obtained his MD degree and BSci in Molecular Biology at the University of Belgrade. After receiving a PhD degree at the Tokyo University, Japan, he did postdoctoral work at the University of California in San Francisco. He held position of Adjunct Associate Professor at the University of California San Francisco and Consultant at the Veteran Affairs Medical Center, San Francisco. He also worked as the Director of R&D at California-based company StemLifeLine. Since 2009, he works at King's College London. He is also a co-founder and CSO of VitroLabs, CA, USA.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 2014**LIST OF PUBLISHED WORK WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME**

- 114 peer-reviewed publications, *h*-index 36;
- Since 2014: 52 peer-reviewed publications, including two in *Stem Cell Reports* (IF = 7.338) and one in *Human Reproduction Update* (IF = 11.366) as a senior author and two in *Nature* (IF = 41.458) and two in *Nature Cell Biology* (IF = 19.679) as a co-author.
- 8326 citations (422 in 2014, 382 in 2015, 528 in 2016, 451 in 2017, and 431 in 2018).
- Three most significant outputs in the fields of embryology since 2014:

- 1) Noli et al. *Discordant Growth of monozygotic twins starts at the blastocyst stage: case report*. *Stem Cell Reports*. 2015 Dec 8;5:946-953. I am a senior author.

The first RNAseq analysis of human monozygotic twins at Day 6 of development points to the key role of IGF-1 signalling in growth of inner cell mass of embryo.

- 2) Noli et al. *Developmental clock compromises human twin model created by embryo splitting*. *Hum Reprod*. 2015;30:2774-2784. I am a senior author.

Analyses of 176 twin embryos created by splitting of 88 human embryos from either early (2–5 blastomeres) or late (6–10 blastomeres) cleavage stages suggested that the human preimplantation development is subjected to a strict temporal control. This is the first time shown that humans have “developmental clock”

- 3) Concise review *hESC - What have we done? What are we doing? Where are we going?* published in *Stem Cells* in 2017 was one of the journal's top 20 most downloaded papers (5247 downloads with the first 12 months of online publication). I am a lead author.

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED AND WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

- Effect of maternal metabolic intrauterine environment on fetal methylome
- Embryo twinning
- Effects of maternal obesity on child
- Developing embryo and foetus
- Fertility preservation for women undergoing cancer treatment

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED IN THE LAST FIVE YEARS

In addition to above:

- Full thickness skin models from human pluripotent stem cells for identification and testing effectiveness of personalized therapies in atopic dermatitis

NUMBER OF SUCCESSFUL MENTORSHIPS THAT RESULTED IN DISSERTATION DEFENCE

Eight PhD students

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Assist. prof. Gordana Ivanac

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University of Zagreb School of Medicine

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Application of Doppler in research and diagnosis of diseases of blood vessels, Hand surgery; Morphological research methods in biomedical sciences; Advanced ultrasonography in gastroenterology and hepatology;

BIOGRAPHY

MD, PhD, specialist radiologist, scientific advisor, assistant professor of radiology

Author in 20 articles in journals cited in WOS, number of citations: 140; invited speaker at more than 20 domestic and international meetings, including European radiology congresses and Euroson ultrasound congresses

5.9.2018. scientific advisor in biomedicine and health, Ministry of Science of Croatia

2005-16 Eight educational courses organized by European Society of Radiology

7/2015 – full docent/ass.proff, Radiology Cathedra, University of Zagreb School of Medicine

2014- Euroson 2014 Tel Aviv, IS – award for the best scientific presentation

April 2013.– Clinical observership, Department of Radiology, Memorial Sloan-Kettering Cancer Center, New York City, NY, USA

30.1.2013. senior research associate in biomedicine and health, Ministry of Science of Croatia

2011. fellowship, University of Szeged, HU, „Teach the teachers“ programme of European Society of Radiology

12.7.2010. elected as docent / ass.proffessor honoris causa, Cathedra for Radiology, University of Zagreb School of Medicine

17.11.2009. elected as research associate, Ministry of Science of Croatia

25.8.2009. PhD thesis, UZSM, „Conventional ultrasound and color Doppler in diagnosis of joint alterations in patients with rheumatoid arthritis“

2009. Subspecialty exam in ultrasonography in radiology, Univ.Hospital „Dubrava“

14.12.2006. Board exam in radiology, University Hospital „Dubrava“

20.12.2005. MSc thesis, UZSM, „Evaluation of thyroid nodules vascularisation with high resolution transducer“

2004-2005 Specialty postgraduate study in radiology, University of Zagreb School of Medicine

1998-2000 Scientific Postgraduate Course in Biomedical Sciences, University of Zagreb School of Medicine

1991-1997 MD, graduated at UZSM on 15/9/1997, average score 4.5

1987-1991 High School / Mathematical Gymnasium, Zagreb

Work experience:

Since 2014 – section head for Diagnostic Radiology, Department of Diagnostic and Interventional Radiology, Univ.Hospital „Dubrava“, Zagreb

2012-2014- section head of Breast and Musculoskeletal Radiology Unit of the Department

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2007-2009 fellowship in ultrasound in radiology, Univ.Hospital „Dubrava“

Since 2006- board certified radiologist, Department of Diagnostic and Interventional Radiology, Univ.Hospital „Dubrava“, Zagreb

2001-2006 – residency in radiology, UH Dubrava, Zagreb

1999-2001- research assistant at scientific project funded by Ministry of Science of Croatia „Tumors in thyroid autoimmune diseases“, PI Franjo Škreb, Nuclear Medicine Division, Univ.Hospital Dubrava, Zagreb

1998-1999 Internship, Hospital for Lung Diseases, Zagreb

Memberships and functions

Croatian Medical Association, Croatian Society for Ultrasound in Medicine and Biology – vice president, Croatian Society of Radiology 2nd vice president, European Society of Radiology, European Society of Breast Imaging, European Society of Urogenital Radiology, Central European Vascular Forum, European Society of Skeletal Radiology

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 20.7.2015.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: prof. Marina Ivanišević, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University of Zagreb School of Medicine,
Women's Clinical Hospital, University Hospital Centre Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: "Diabetes and Pregnancy",
"Physiology and biochemistry of uterus in pregnancy and labour"

BIOGRAPHY

EDUCATION

1994-1996. Postdoctoral study, Fogarty Fellowship; Name of the institution: UCLA, Los Angeles

1989. PhD.; Name of the institution: New York Hospital, Cornell University Medical College, Fulbright
fellowship. University of Zagreb School of Medicine

1986 Master postgraduate studies in "Allergology and clinical immunology"; University of Zagreb School
of Medicine

1982 Doctor of medicine (MD): University of Zagreb School of Medicine

Employment

2016 – Position: Full Professor tenure of Obstetrics and Gynecology; University of Zagreb School of
Medicine

2009 – Position: Head of Unit for diabetes and fetal growth, Women's Clinical Hospital, University Hospital
Centre Zagreb

1989 – Position: Cumulatively employed as Assistant at the School of Medicine (Department for
Obstetrics and Gynecology) and University Hospital Centre Zagreb (Women's Clinical Hospital,
Department for diabetes in pregnancy)

1985 – 1989 Position: Obstetrics and Gynecology residency, Women's Clinical Hospital, University Hospital
Centre Zagreb

Previous employments

1982 – 1985 Position: General Practitioner, Primary Health Care Center, Zagreb

FELLOWSHIPS AND AWARDS

1994 – 1996 Fogarty fellowship, Postdoctoral study, UCLA, Los Angeles, SAD

1987 – 1988 Doctoral study, Fulbright fellowship; Cornell University Medical College, New York, SAD

SUPERVISION OF GRADUATE/ DOCTORAL STUDENTS AND POSTDOCTORAL RESEARCHERS

1997– 2017: Mentor of 1 master and 6 PhD thesis.

1. Sokol Karadjole, Vesna. „Adequacy of low- molecular- weight heparin prophylaxis in pregnant women
with hereditary trombophilia as a cause of recurrent pregnancy loss“. University of Zagreb School of
medicine, 2018.

2. Horvatiček, Marina. “The impact of supplementation n-3 unsaturated fatty acids on concentration of C-
peptide in pregnant women with type 1 diabetes mellitus“. Interdisciplinary Doctoral Study of Molecular
biosciences, University of Osijek, 2017.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

3. Šklempe Kokić, Iva. “The Impact of Structured Aerobic and Resistance Exercise on the Course and Outcome of Gestational Diabetes Mellitus”. Fakulteta za matematiko, naravoslovje in informacijske tehnologije, University of Primorska, Kopar, Slovenija, 2016.

4. Juras, Josip. “Diabetes and metabolic syndrome after previous gestational diabetes” University of Zagreb School of medicine, 2015.

4. Bljajić, Danko. “The influence of gestational diabetes and obesity of mother on insulin resistance and levels of adiponectin, resistin and leptin in maternal and umbilical blood”. University of Zagreb School of Medicine, 2010.

6. Červar-Živković, Mila. “Vasoactive substances in placentas of normal and preeclamptic pregnancies”. University of Zagreb School of Medicine, 1997.

Mentor of master thesis:

1. Radončić, Erden. “Lupus anticoagulant in pregnant women with retained abortion”. University of Zagreb School of Medicine, 1999.

TEACHING ACTIVITIES

2016 – Position: Full Professor tenure of Obstetrics and Gynecology, at Undergraduate and Graduate Study of Medicine in Croatian and English, Postgraduate study “Biomedicine and Health”. University of Zagreb School of medicine

2011 – 2015: Cumulatively employed as Full Professor of Obstetrics and Gynecology at the School of Medicine (Department Obstetrics and Gynecology) and University Hospital Centre Zagreb (Women’s Clinical Hospital)

2000 – 2011: Cumulatively employed as Associate Professor of Obstetrics and Gynecology at the School of Medicine (Department Obstetrics and Gynecology) and University Hospital Centre Zagreb (Women’s Clinical Hospital)

1994 – 1999: Cumulatively employed as Assistant professor at the School of Medicine (Department Obstetrics and Gynecology) and University Hospital Centre Zagreb (Women’s Clinical Hospital)

1990: Cumulatively employed as Assistant at the School of Medicine (Department Obstetrics and Gynecology) and University Hospital Centre Zagreb (Women’s Clinical Hospital)

ORGANISATION OF SCIENTIFIC MEETINGS (conferences, congress, symposia)

Head and lecturer in courses for continuous medical education: Improvements in Perinatology, Prostaglandins in gynecology, obstetrics and related areas, New insights into the placenta, Hypertension and pregnancy, Diabetes and pregnancy, Neurological diseases and pregnancy, Emergencies in obstetrics and gynecology, Ultrasound in obstetrics and fetal medicine as well as Ultrasound in fetal cardiology.

ORGANISATIONAL RESPONSIBILITIES

2015-now: member of two committee (University of Zagreb School of Medicine):

- Committee for continuous professional medical education
- Committee for Student’s Scientific Research

MEMBERSHIPS (e.g. scientific committees or associations; evaluation committees, editorial boards; etc.; specify the year and name of the institution) (if applicable):

2017- now: First Vice President of the Croatian Perinatal Association

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2014- now: Associate member of Diabetes Pregnancy Study Group of European Association for the Study of Diabetes EASD

2014- now: A member of the Agency for Research of the European Commission (Research Executive Agency) as an expert for the evaluation of the program Horizon 2020

1987. Founder of International Society of Ultrasound, London, UK

1986. Member of Croatian Perinatal Association

President of the Croatian Perinatal Fund

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 2016.

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED AND WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

Project leader in Croatian Science Foundation: „Prevention of hypoglycemia in pregnant women with type 1 diabetes“, (IP-01-2018)

Collaborator: "Influence of maternal metabolic state on placental and neonatal serotonin system: from DNA methylation to protein function ", Croatian Science Foundation (IP-01-2018), PI Jasminka Štefulj, PhD

Project leader in Croatian Ministry of Science, Education and Sports projects:

2009-2014: "Diabetes and metabolic syndrome after previous gestational diabetes"

2002-2006: "Hypertension and pregnancy"

Collaborator in Croatian Ministry of Science, Education and Sports projects:

2007-2013: "Metabolic and endocrine changes in diabetic pregnant women (PI: prof. Josip Đelmiš, PhD)

1997-2006: "Diabetes and pregnancy" (PI: prof. Josip Đelmiš, PhD)

Collaborator in Catholic University of Croatia projects:

2017. Association of maternal emotional state in pregnancy and placental DNA methylation of serotonin-related genes (PI J. Štefulj, PhD)

2016. Serotonin transporter gene regulation in human placenta and establishment of a biobank for further research (PI J. Štefulj, PhD)

Project leader of Support for scientific research (University of Zagreb):

2018. „Prevention of hypoglycemia in pregnant women and puerpera with type 1 diabetes"

2017. "Prevention of hypoglycemia in pregnant women and puerperas with diabetes type 1"

2016. "The effect of diet on lipid content and adipokines concentration in placental tissue"

2015. "The effect of diet on lipid content in placental tissue"

Project investigator and principal investigator in Clinical trials Novonordisk A/S:

2013-2018. EVOLVE study Birth registry of diabetic women – non interventional study NN340-4016.

2007-2010: A randomised, parallel-group, open-labeled, multinational trial comparing the efficacy and safety of insulin Detemir (Levemir®), versus human insulin (NPH insulin), used in combination with insulin Aspart as bolus insulin in the treatment of pregnant women with type 1 diabetes.

Project co-investigator in Clinical trials Novonordisk A/S:

2002-2006: A randomised, parallel-group, open-label, multinational trial comparing the safety and efficacy and insulin Aspart (NovoRapid®) versus Human Insulin (Actrapid®) used in a multiple injection

NUMBER OF SUCCESSFUL MENTORSHIPS THAT RESULTED IN DISSERTATION DEFENCE: 6

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Davor Ivanković, MD, PhD, Professor (retired)

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Retired professor

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: 1. Statistical Analysis of Medical Data 1

2. Medical Statistics 2.1: Statistical tools for medical data analysis in planned experimental study design

3. Medical Statistics 2.2: Statistical tools for medical data analysis in quasi-experimental study design

4. Medical Statistics 2.3: Statistical tools for medical data analysis in observational study design with large samples

5. Medical Statistics 2.4: Statistical tools for medical data analysis in observational study design with small samples

BIOGRAPHY

Born in Sisak, 1945. Retired professor-reelected of Medical statistics in the Department for medical statistics, epidemiology and medical informatics, A. Stampar School of Public Health, Medical School, University of Zagreb. Education and training:

Medical School, University of Zagreb, 1969. WHO Workshop on educational issues for teachers of health statistics and related subjects, University of Cardiff, Wales, UK, 1978. Specialty: Epidemiology 1979. Metodology of Quality Assessment & Quality Assurance in Health Care fellowship (mentor Professor J.W.Williamson): Johns Hopkins School of Public Health, Baltimore, Md. 1982.

First WHO Training Course in Quality Assurance, Barcelona, Spain

Third WHO Training Course in Quality Assurance, Aranđelovac

Professional experience: Since 1971 affiliated with Andrija Stampar School of Public Health, Medical School, University of Zagreb as Assistant, Senior lecturer, Associate Professor (1987), Professor (1997) and Professor-reelected (2003) of Medical Statistics. Temporary adviser to WHO-Euro 1983-1986.

Research activities: MSc 1976 . PhD 1986. Over first 35 professional years co-investigator and principal investigator in numerous research programmes financed from local or foreign funds and since 2006 co-investigator in research project “How to measure health?” and “Regionalism of behavioral cardiovascular risks – intervention model”, financed by the Ministry of science, technology and education, RH. Mentored more than 10 PhD Theses.

Publications: 46 papers in CC indexed journals, 35 u other index publications, 18 other papers, 42 congress reports, 6 professional projects, 1 textbook, 1 textbook for PhD students (5 eds.), 12 teaching materials. Over 160 independent citations.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 2003.

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Ruđer Bošković Institute

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Laboratory animals in biomedical research

BIOGRAPHY

Personal data

Address: Odakova 7, Zagreb

Date and place of birth: July 7, 1964, Virovitica, Hrvatska

Nationality: Croatian

Education

- Doctor of Veterinary Medicine (DMV), University of Zagreb, Faculty of Veterinary Medicine, 1993
- MSc in Natural Sciences – Biology-Biomedicine, University of Zagreb, Faculty of Science, 1999
- PhD in Biomedical Sciences – University of Zagreb, Faculty of Veterinary Medicine, 2006
- Certification for work with experimental animals: LabAnim 3 – Laboratory Animal Science Course, FELASA cat. C equivalent, 2012

Employment

- Ruđer Bošković Institute, Division of Molecular Medicine, research assistant, 1999 – 2001
- Ruđer Bošković Institute, Division of Molecular Medicine, research assistant (scientific novice), 2002 – 2006
- Ruđer Bošković Institute, Division of Molecular Medicine, senior research assistant, 2006 – 2009
- Ruđer Bošković Institute, Division of Molecular Medicine, Senior adviser in science – research associate 2009, senior research associate 2011, senior scientist in biomedicine 2013

Research activities

Mr.sc. - Antitumoral effects of Newcastle disease virus: Faculty of Science, Division of Biology, University of Zagreb, 1999.

PhD - Antitumoral effects of lentogenic strains of Newcastle disease virus in presence of manganese, dexamethasone and indomethacine: Faculty of Veterinary Medicine, University of Zagreb, 2006.

Publications

- link on CROSBİ profile: <http://bib.irb.hr/lista-radova?autor=243083&lang=EN>

28 publications in peer reviewed journals, of which 18 in journals indexed in Current Contents, 1 conference paper with international peer-review, 14 abstract at international and national conferences

Mentorship

Supervisor of 3 PhD theses and co-supervisor of 5 graduation thesis, 1 master and 1 PhD thesis

Teaching activities

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2012- ... „Animal models of rodents in experimental oncology“, collaborator, Postgraduate studies at Faculty of Science, University of Zagreb

2011-... „Laboratory animals in biomedical research“, collaborator, Postgraduate studies at Faculty of Medicine, University of Zagreb

2011-... „Animal models in experimental oncology“, collaborator, Postgraduate studies at Faculty of Medicine, University of Zagreb

2008-... „In vitro and in vivo studies of bioactive substances“, collaborator Postgraduate studies at the School of Dental Medicine, University of Zagreb

2007/2008 „Biology of tumor cells and tumor markers“, Collaborator, Undergraduate studies at Faculty of Pharmacy and Biochemistry, University of Zagreb

2001-2003 „Experimental oncology“, Collaborator, postgraduate studies, Faculty of Medicine, University of Osijek

Awards

Award of RBI for published scientific paper: PloS ONE 7(6): e39030. doi:10.1371/journal.pone.0039030 (2012); cover sheet of CC journals: Collection of Czechoslovak Chemical Communications 74 (2009)

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED AND WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

- New therapeutic models in the treatment of malignant diseases
- Therapeutic effects of mushroom extracts, 2006-2009
- Antitumorous effects of viruses and oncolytic viral vaccines, 2002-2006
- 90 Day Oral Toxicity Study in Mice - performed for Medigence LLC, Chapel Hill, U.S.A., 2003
- Antitumorous effects of Newcastle disease virus, 1999-2001

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED IN THE LAST FIVE YEARS

New therapeutic models in the treatment of malignant diseases

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Assistant Professor Alan Ivković**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** School of Medicine, University of Zagreb**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Methods of Molecular Biology in Medicine**BIOGRAPHY**

Dr. Ivković graduated from the School of Medicine in Zagreb in 1999. His residency in orthopaedic surgery started in 2002, and he passed specialist exam in 2007. He obtained PhD degree in biomedical sciences in 2009, and the topic of his thesis was application of gene therapy in articular cartilage repair. Currently he is a consultant orthopedic surgeon at the University Hospital Sveti Duh in Zagreb. He is also assistant professor at the Department of Biotechnology University of Rijeka where he teaches regenerative medicine and tissue engineering. He also has academic affiliations with School of Medicine University of Zagreb and with faculty of Health Sciences in Zagreb. He authored numerous scientific articles published in peer-reviewed journals, as well as numerous chapters in books and encyclopedias. As an International Fulbright Fellow he spent academic year 2007/2008 in the Center for Molecular Orthopaedics at Harvard University in Boston, USA. He is a recipient of numerous domestic and international fellowships and awards. During his career he visited numerous international teaching institutions and participated in various courses, including those in Boston, Chicago, Amsterdam, Freiburg, Munich and Basel. His professional focus is adult lower extremity reconstructive surgery (including joint replacement and soft tissue surgery), as well as bone and cartilage tissue engineering. He is a team leader of the Croatian partner in the international consortium within EU FP7 project BIO-COMET (Bioreactor-based, clinically oriented engineering of tissues) and HORIZON 2020 project BIO-CHIP (Bioengineered grafts for cartilage healing in patients). He is a board member of the Croatian Orthopaedic Society and the national EBOT (European Board of Orthopaedic Surgery) delegate. As an official physician of the Croatian Water Polo Federation he participated in 2012 London Olympic Games (gold medalist), European Championships in Zagreb 2010 (gold medalist) and World Championships in Melbourne 2007 (gold medalist).

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: April 7th 2017**LIST OF PUBLISHED WORK WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME**

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Oleg Jadrešin, MD, MSc

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Children's Hospital Zagreb, Klaićeva 16, Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Clinical nutrition

BIOGRAPHY

Date of birth: 1st February 1969

Nationality: Croat

Address: Ladučka 33, 10000 Zagreb, Croatia

Phone: + 385 91 8853265

E-mail: oleg.jadresin@gmail.com

Current position: Pediatric Gastroenterologist, Referral Center for Pediatric Gastroenterology and Nutrition, Children's Hospital Zagreb, Klaićeva 16, 10000 Zagreb, Croatia

EDUCATION

1975-1983 Primary school, Zadar, Croatia

1983-1987 Secondary school, Zadar, Croatia

1988-1994 Medical School University of Zagreb

1997 State Exam, Ministry of Health, Republic of Croatia

2000-2003 Residency in Pediatrics

2005-2007 Pediatric gastroenterology

FOREIGN LANGUAGES: English, German

WORKING EXPERIENCE

1995-1997 Internship

1997-1998 Health Care Centers, Emergency and Family Medicine Departments

1998-2000 Research Fellow, scientific project “Coeliac disease in children”, Referral

Center for Paediatric Gastroenterology and Nutrition, Children's Hospital

Zagreb

2000-2003 Pediatric resident, Children's Hospital Zagreb

2003-2007 Pediatrician, Children's Hospital Zagreb

2007- Pediatric Gastroenterologist, Children's Hospital Zagreb

POSTGRADUATE EDUCATION

- Postgraduate Study „Health Care of Mother and Child“, Medical School, University of Zagreb (1998-1999)

- Postgraduate study “Medical Sciences”, Medical School, University of Zagreb (2000-2001)

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

- Deutscher Akademischer Austauschdienst (DAAD), grant, „Dr. von Haunersches Kinderklinik und Kinderpoliklinik“, Ludwig Maximilians Universität, München, Abteilung für Gastroenterologie und Hepatologie (10/8/2009 – 31/1/2010), mentor: Professor Sibylle Koletzko

Postgraduate courses (main)

- International Seminars in Pediatric Gastroenterology, Hepatology and Nutrition, Salzburg (2000)
- European Society for Parenteral and Enteral Nutrition (ESPEN) - Basic Course of Parenteral and Enteral Nutrition, Budapest (2000)
- ESPGHAN Summer School “Advances in Pediatric Gastroenterology, Hepatology and Nutrition”, Zagreb (2001)
- ESPGHAN Summer School “«From Bench to Bedside in Pediatric Gastroenterology», Helsingør (2005)
- ESPGHAN Summer School “Nutrition and Immunity”, Cavtat (2007)
- Nestle Nutrition Institute Clinical Nutrition Course, Lausanne (2008)
- Pediatric Esophageal Diseases School, Children's Hospital, University Hospital Center Ljubljana, Slovenia (2010)
- APLS – Advanced Pediatric Life Support Course, Zagreb, 2010.
- High Resolution Manometry and Impedance-pH MMS Pediatric Training Course, Enschede, Netherlands 2011.
- ESPGHAN Pediatric Hepatology Summer School, Salerno, 2014.
- Metabolic Liver Disease 2014, Birmingham, 2014.
- Ultrasound in Gastroenterology, Medical School University of Zagreb, Zagreb, 2014.

Membership: Croatian Medical Association, Croatian Medical Chamber, Croatian Pediatric Society, Croatian Society for Pediatric Gastroenterology, Hepatology and Nutrition, European Society for Pediatric Gastroenterology, Hepatology and Nutrition (ESPGHAN)

Reviewer: Journal of Pediatric Gastroenterology and Nutrition, Paediatrica Croatica

Main interest: cystic fibrosis, pancreatology, pediatric hepatology

Skills: upper gastrointestinal endoscopy, esophageal dilatation, percutaneous endoscopic gastrostomy, percutaneous liver biopsy, esophageal multichannel intraluminal impedance

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Professor Miro Jakovljević, MD, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** University of Zagreb School of Medicine**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Clinical psychopharmacology**BIOGRAPHY**

Miro Jakovljević was born on January 27 1954, in Sarajevo, Bosnia and Herzegovina (B&H), graduated from the School of Medicine, University of Sarajevo in 1977. Since 1979, he is employed at the Department of Psychiatry, University Hospital Center (UHC) Zagreb, Croatia. He passed specialistic exam in 1983, got master's degree in 1984, after the postgraduate study of clinical pharmacology, and achieved PhD degree in 1989. In 1990 he became assistant professor, in 1993 higher scientific collaborator, in 1996 extraordinary, in 2003 full professor of psychiatry, and is a distinguished professor since 2007. He is a subspecialist in biological and social psychiatry. From 1998 to 2007 he was the head of the Ward for Biological Psychiatry, and from 2007 to 2015 the head of the Department of Psychiatry, UHC, Zagreb. He headed the Chair for Psychiatry, (2001-2013) and was the vice-dean for science of the School of Medicine, University of Mostar, B&H (2007-2013). From 2010-2012 he was the head of the Chair for Psychiatry and Psychological Medicine, School of Medicine, University of Zagreb. He is the editor-in-chief of the international journal "Psychiatria Danubina" (IF 1.232), cited in several indexing publications (Index Medicus/MEDLINE, SCIE, CC) and the journal "Socijalna psihijatrija". He is the member of many professional societies, Member of the Croatian Academy of Medical Sciences (AMZH), foreign member of the Academy of Sciences and Arts of Bosnia and Herzegovina (ANUBIH), the president of the Croatian Society for Psychopharmacotherapy and Biological Psychiatry, and from 2018 the president of Danubian Psychiatric Association. He published over 20 books and more than 200 scientific and professional papers, also having 28 chapters in the books of other authors. Also, he is the peer reviewer in many distinguished journals worldwide in the field of psychiatry and related disciplines. He passed the education in transactional analysis, NLP, hypnotherapy. His special interest is in clinical psychopharmacology and creative person-centered psychopharmacotherapy, biological psychiatry and transdisciplinary integrative psychiatry.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 12.04.2007.**LIST OF PUBLISHED WORK WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME**

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED AND WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

1985-1987: Coordinator of Project: "Biochemical Aspects of Mental Disorders" - School of Medicine, University of Zagreb

1987: Coordinator of Integrative Research Project: "Biological Markers in the Diagnosis and Treatment of Mental Disorders" - School of Medicine, University of Zagreb (Investigation of platelet 5-HT, serum GABA, gangliosides, the free radicals, endocrine and immune parameters)

1985-1987: One of the Coordinators of the WHO Study: "Chronobiology of Depression" in the WHO Collaborating Centre for Research and Training in Mental Health for Former Yugoslavia, Zagreb

1986: One of the Coordinators of the WHO Study: "Misuse of Psychotropic Substances in Traffic Conditions" in the WHO Collaborating Centre for Research and Training in Mental Health for Former Yugoslavia, Zagreb

1989-1994: Coordinator of the study "Lithium Every Second Day"

1993: The head of project "Long Term Treatment of Schizophrenia: An Integrative Biopsychosocial Research" within Croatian Brain Research Institute

1993-1998: Coordinator of Croatian "Leponex Safety Programme"

1993: Coordinator of the Project "Drug Treatment of Depression in Primary Care"

1996-2002 collaborator on Project "Neuropharmacology of GABA and 5-HT system", Ministry of Science and Education of the Republic of Croatia

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2002-2006 Principal investigator of Project “Biological indicators of mental disorders”, Ministry of Science and Education of the Republic of Croatia

2007-2011 Collaborator on Project “Pharmacogenetic variability of psychiatric patients”, Ministry of Science and Education of the Republic of Croatia

2007-2011 Principal Investigator of Project “Multidimensional analysis of biological markers in mental disorders”, Ministry of Science and Education of the Republic of Croatia

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED IN THE LAST FIVE YEARS

2011-2017 Principal Investigator in Croatia of Project “Molecular mechanisms of posttraumatic stress disorder (PTSD)” - Deutscher Akademischer Austauschdienst (DAAD), Stability Pact for South Eastern Europe, Principal partner: Professor Juergen Deckert, MD (Wuerzburg, Germany)

BIOGRAPHY

Born April 10th 1964. in Zagreb. Graduated from Faculty of Science, University of Zagreb, Statistics and Informatics 1988. Master degree from Faculty of Science, University of Zagreb, Biomathematics, 1995. PhD from Medical School, University of Zagreb, Public Health, 2001. Teaching courses Statistics for Engineers, Basics of Informatics, Biometrics, Basic Statistics, Applied Statistics, Statistical methods and models in forestry for undergraduate and graduate studies at the Faculty of Forestry, University of Zagreb, and Mathematical models in research and Statistical methods in research on postgraduate courses at Faculty of Forestry. At the graduate study of Mathematical Statistics, at Faculty of Science holds course in Statistical methods in biomedicine. From 2010-2016 president of Croatian biometric society. Author of 34 scientific papers (CC base), 36 scientific papers in SCI-based, 19 papers at international conferences and 44 abstracts at international conferences. h-index-11. She won Conference Award for Scientists at the 21st Conference of the International Society for Clinical Biostatistics at Trento, Italy 4-8.9.2000.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 17.1.2017. full professor tenure

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED IN THE LAST FIVE YEARS

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Mislav Jelić, MD, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** Orthopaedic Clinic, Clinical Hospital Center Zagreb and University of Zagreb School of Medicine**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Bone morphogenetic proteins in regeneration of bone and cartilage**BIOGRAPHY**

Prof. Mislav Jelic graduated from the School of Medicine, University of Zagreb, Croatia, where he obtained his PhD in 2001. Between 1996 and 1999, he was a postdoctoral associate at the Laboratory for Mineralized Tissues, and a teaching assistant at Department of Anatomy, School of Medicine, University of Zagreb. He finished his residency in orthopaedic surgery at the Department of Orthopaedic Surgery, University of Zagreb, in 2003 where he works as a staff member since.

He obtained an Assistant Professor title in 2009 and Associate Professor title in 2015. His research interest is related to biological reconstruction of the bone and articular cartilage.

He published some of the first clinical cases of the biological reconstruction of the skeleton with BMPs. He received several awards in the field including the ESSKA Best Poster Award in 1994 and the Hughston Award in 2009 together with a group of authors.

His clinical interest includes knee surgery with the greatest scientific interest in the regeneration of the articular cartilage. Prof. Jelic is the head of the biological reconstruction unit at the Department of Orthopaedic Surgery, University of Zagreb. He was also selected for four travelling fellowships: EFORT in 2001, ICRS in 2004, ESSKA-AOSSM in 2011 and Knee Society Insall TF in 2014.

His publications have been cited more than 2,000 times. As a part of his scientific work, he has been or currently is a leader of several projects mostly focusing on ACL reconstruction and articular cartilage repair for which he has received grants such as the Croatian Institute of Technology Grant, FP-7, etc. He is a co-inventor on four patent applications.

Publications: 80 scientific publicationsCitations: More than 1600Reviewer for medical journals:

International Orthopaedics; KSSTA (Knee Surgery Sports Traumatology and Arthroscopy); Journal of Orthopedics; Collegium Anthropologicum; Biotechnology and Bioengineering; American Journal of Sports Medicine.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Ana Branka Jerbić, PhD, dipl. ing. EE**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** University of Zagreb**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Electrophysiological methods in medical research**BIOGRAPHY**

Ana Branka Jerbić (ex. Šefer) obtained a dipl. ing. degree in 2008 and a doctoral degree in 2015 from the Faculty of Electrical Engineering and Computing (FER) of the University of Zagreb (UniZg). Since 2009 she has been a research assistant at UniZg. She was involved in research and teaching activities at the laboratory POLIN, UniZg, and research activities of students enrolled at FER and at the interdisciplinary scientific postdoctoral study Language and Cognitive Neuroscience, UniZg. From April 2009 till December 2011 she participated in the work of the Laboratory for Cognitive and Experimental Neurophysiology, KBC Zagreb, and the Referral Centre for Epilepsy of Croatian Ministry of Health. During 2012 she spent three months in the Laboratory of Brain Computer Interfaces, Institute for Knowledge Discovery, Graz University of Technology. Since 2015 she has been a technology transfer associate at the Technology Transfer Office of the University of Zagreb where she is involved in technology transfer from academia to industry, primarily in the field of electrical engineering and medicine (projects: System for telemetric temperature measurement for rotational drivetrain elements (RotoTemp); Human Powered Electronic Transmission (HuPowET); Spatial orientation testing for early detection of Alzheimer disease (SPOT-ALZ); Genomic Tests for Diagnosis of Neurodegenerative Diseases (GENOMA-TEH)). Her scientific interests include the analysis of biomedical signals and machine learning applied to brain computer interfaces. She is a member of Croatian Biomedical Engineering and Medical Physics Society.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 29.04.2015.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Davor Ježek, Prof. Dr.

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University of Zagreb, School of Medicine

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Reproduction and workplace;
Human reproduction; Methods of molecular biology in medicine

BIOGRAPHY

1982 – medical student, University of Zagreb, School of Medicine

1988 – medical doctor, University of Zagreb, School of Medicine

1989 – passed state exam; assistant, Institute of Histology and Embryology, University of Zagreb, School of Medicine

1990 – postgraduate studies in Oncology, University of Zagreb, School of Medicine

1991 – postgraduate studies in Medical Cytology, University of Zagreb, School of Medicine

1991-1994 - postgraduate education for Ph.D. thesis, University of Innsbruck (Dept. of Pathology) and University of Hamburg (Dept. of Andrology)

1995-current – permanent education at domestic and international meetings, conferences and congresses; invited speaker at more than 20 international meetings

Scientific and professional career:

1988- graduation paper: Sertoli Cells (mentor: As. Prof. Ljerka Banek, University of Zagreb, School of Medicine)

1991 – M. Sc. Thesis: “Influence of high doses of testosterone on the rat testis” (mentor: As. Prof. Ljerka Banek, University of Zagreb, School of Medicine)

1994 – Ph.D. Thesis: “Influence of orchiectomy on the rat parotid gland” (mentor: As. Prof. Ljerka Banek, University of Zagreb, School of Medicine)

Scientific and teaching occupation:

1989- assistant, Institute of Histology and Embryology, University of Zagreb, School of Medicine

1991 – scientific assistant, University of Zagreb, School of Medicine

1994 – senior assistant, University of Zagreb, School of Medicine

1999 – assistant professor, University of Zagreb, School of Medicine

2005 – associate professor, University of Zagreb, School of Medicine

2011- full professor, University of Zagreb, School of Medicine

Areas of research: histology and embryology, in vitro cell & tissue cultivation, andrology, biobanking, cell and tissue freezing, testis, testosterone, human reproduction, cryptorchidism, male infertility, testicular sperm extraction (TESE), genital ridge development, testis-distant organs interactions.

Techniques: light microscopy, fluorescent microscopy, electron microscopy, stereology, image analysis, immunohistochemistry, genital ridge isolation and micromanipulation, cells and tissue freezing, tissue banking

Other:

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Current Projects: Co-chair, Center for Excellence in Reproductive and Regenerative Medicine at the School of Medicine of the University of Zagreb (EU K.K. 01.1.1.01.008); Project Leader, Internationalization of Higher Education EXPPAND (Experimental Pharmacology and Pathology and Summer School Organization Clinical Nutrition and Diet Therapy - EXPPAND ", European Social Fund / UP.03.1.1.02 /); project partner, ODISSeA (Organ Donation Innovative Strategies for South East Asia, Erasmus +); project partner, BIOCHIP (Bioengineered grafts for cartilage healing in patients, Horizon 2020 / No. 681103 /); project leader, EPISEM (Epigenetic biomarkers in blood and ejaculate of testicular semen, HRZZ / 3692 /); project leader of several domestic and international projects, collaborative project and translation program in biomedicine. Author of numerous publications in internationally indexed journals. Mentor 2 master's and 5 Ph. Theses. The bearer of multiple awards and awards. Currently Vice-Dean for International Cooperation and Head of Medical Studies in English, School of Medicine, University of Zagreb.

Knowledge of foreign languages:

English, German

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Nataša Jovanov Milošević, DVM, MSc, DSc**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** University of Zagreb Medical School**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Neurobiology of aging; Methods of investigation in vivo and in vitro; Morphological research methods in biomedical sciences; Human developmental neurobiology;**BIOGRAPHY**

Nataša Jovanov Milošević is a tenured Professor (first election) of Medical Biology and Neuroscience, and the Head of Laboratory for immunohistochemistry at the Croatian Institute for Brain Research of the University of Zagreb Medical School. At the Croatian Institute for Brain Research, prof. Jovanov Milošević also leads the Section for laboratory animals. She graduated from the University of Zagreb (School for Veterinary Medicine), in 1995; received MSc at Faculty for Natural Sciences in 2001, and Doctorate of biomedical sciences at School of Medicine in 2005. She has extensive expertise in the brain development and developmental disorders and has established international cooperation related to markers of brain extracellular matrix in development and collaboration on malformation of cortical development. Prof. Jovanov Milošević is deputy head of the DS Neuroscience and president of the Ethical Committee for the use of Animals in Research and Education at the School of Medicine University of Zagreb.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Prof. Miloš Judaš, MD, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** University of Zagreb School of Medicine, Croatian Institute for Brain Research**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Human developmental neurobiology; Synaptic plasticity and mind**BIOGRAPHY**

Miloš Judaš was born on May 1, 1961 in Petrinja, Republic of Croatia. He graduated from the University of Zagreb School of Medicine in 1984, where he has been employed since 1985 - now as a full time tenured professor for Neuroscience and Anatomy. He is also the director of the Croatian Brain Research Institute and Head of Centre of excellence in research for basic, clinical and translational neuroscience. He has been a member of the Department of Medical Sciences of the Croatian Academy of Sciences from 2008. At the University of Zagreb School of Medicine he was a Dean of Science for five mandates (1998-2000, 2005-2014), Chairman of the Committee for PhDs (2005- 2014), and a member of numerous other faculty committees and boards. He was member of the Editorial Board of the University Publications (2000-2003), Member of the Council of Biomedicine and Health (2005-2014), Member of the Project Office (2007-2012), President of the Commission for the Rector Awards (2007-2014) and member of the University Senate (2009-2014). He is a member of the administrative and organizational bodies of leading European and international neuroscience organizations (member of the International Brain Research Organization (IBRO) - Central and Eastern European Regional Committee 1999-2012, member of the IBRO PanEuropean Regional Committee 2012-2017, member of Federation of European Neuroscience Societies (FENS) Council 2012 - today, member of the IBRO Council 2012.- today). In January 2014, he was also chairman of the panel for evaluation of 27 competitive projects within the EU's Flagship Project "Human Brain Project".

His research focus is on the developmental neuroscience and neuroanatomy of the human brain, the developmental and evolutionary neurobiology of cognitive functions and languages, and the history of neuroscience. He has published 169 papers, which have been quoted so far: WoS 2,025 times (h-index 22), Scopus 2,332 times (h-index 22) and Google Scholar 3,104 times (h-index 24). Over the past five years, 1,827 new Google Scholar-based quotes have been made, while the cumulative IF for 10 of his most significant works is over 100. He also published two single-author books, 12 chapters in foreign books and monographs, and 30 chapters in domestic books. The papers are quoted in the leading world textbooks and manuals (eg Nelson CA, Luciana M, eds (2001) Handbook of Developmental Cognitive Neuroscience, The MIT Press - Bradford Book, Paxinos G, Mai JK, eds (2004) The Human Nervous System , 2nd Ed., Amsterdam: Elsevier, O'Rahilly R, Mueller F (1999), The Embryonic Human Brain, An Atlas of Developmental Stages, 2nd Ed., New York: John Wiley & Sons, Barkovich AJ (2005), Pediatric Neuroimaging, Philadelphia: Lippincott Williams & Wilkins, Johnson MH et al (2002) Brain Development and Cognition: A Reader, Oxford: Blackwell, Eliot L (2001) Early Intelligence: How Brain and Mind Develop in the First Five Years of Life. London: Penguin Books). He was an invited speaker at a number of renowned international congresses and schools (Innsbruck, Graz, Wien, Jena, London, Oxford, Helsinki, Turku, Osaka, New Haven, Cold Spring Harbor). In addition to academician Ivica Kostović, he is the most responsible for the founding of the Croatian Brain Research Institute and the Croatian Society for Neuroscience, the founding of neuroscience and the doctoral study of neuroscience. He is the winner of the annual State Prize for Science for 2011, the Academy of Science Award for Exceptional Scientific

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

Productivity (2011) and Mentor of the Most Productive Ph.D. (2012); He is also the recipient of recognition for a special contribution to the Homeland War: Monument to the Homeland War (1994), special praise of the President of the Republic of Croatia (1994) and the Order of the Croatian Trefoil (1997).

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Emilja Juretić, MD, PhD, Associate Professor of Pediatrics

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Clinical Hospital Center, Department of Obstetrics and Gynecology, Division of Neonatology

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: "Diabetes and Pregnancy"

BIOGRAPHY

Education

MD: Medical School, University of Zagreb, 1978.

Postgraduate study in clinical pediatrics, 1982.

Postgraduate study in perinatology and neonatology, 1987.

Specialist in pediatrics, 1986.

Subspecialist in neonatology, 2005.

Work experience

University Hospital «Dr. M. Stojanović» internship, 1980.

Clinical Hospital Center Zagreb, Department of Pediatrics Rebro, specialization in pediatrics, 1980 – 1986.

Staff neonatologist at Division of Neonatology, Department of Obstetrics and Gynecology from 1986.

Primarius, 2002.

Senior assistant, chair of Obstetrics and Gynecology, Medical School, University of Zagreb, 2004.

Senior scientific associate, 2006.

Head of Division of Neonatology, 2006.

Assistant Professor, 2008.

Associate Professor, 2013.

Research activities

PhD – Neonatal lymphocyte subpopulations in relation to gestational age and infection, Medical School, University of Zagreb, 1997.

Principal investigator on Ministry of Science project Analysis of lymphocyte subpopulations in newborns and parturients, 2002.

Investigator on 3 other Ministry of Science projects

Publications

9 papers in CC indexed journals, 8 kongress abstracts in CC indexed journals, and 30 other kongress abstracts, 20 papers in elsewhere indexed journals, 10 book chapters

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Ivana Jurjević, MD, PhD**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** Department of neurology, Clinical Hospital Centre Zagreb, and Department of Pharmacology, University of Zagreb Medical School**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** 1.Clinical Neuropharmacology
2.Movement Disorders; Pathophysiology of the brain and CSF**BIOGRAPHY**

Ivana Jurjević was born on November the 14th, 1982. in Karlovac, Croatia. She finished elementary school in Zaprešić, and X. gymnasium in Zagreb with excellent grades. Ivana started attending University of Zagreb School of Medicine in the year 2001. and graduated from it in 2007. Then she worked as an intern for a year at the Clinical Hospital Centre Zagreb, and passed the State exam for medical doctors in the year 2008. Shortly after graduation she also started her scientific work as a research fellow at the Department of Pharmacology. Concurrently she worked as a resident at the Department of neurology of the University hospital centre Zagreb showing special interest in movement disorders, as well as teaching medical students neurology and pharmacology. In 2014. she finished her PhD thesis in the field of CSF pathophysiology and hydrocephalus, which was followed by successfully passing her residency exam in neurology in 2015. Shortly after, she proceeded with her education in sensory evoked potentials at the University hospital centre Zagreb, and additionally her scientific work which has led her to Juntendo University Medical School, Tokyo, Japan where she spent 6 months researching microRNA in NPH and other movement disorders together with education in deep brain stimulation. At the moment she works at the Department of pharmacology of Medical school University of Zagreb, and is in the process of being elected for assistant professor. She is a part of two scientific projects: „Pathophysiology of the cerebrospinal fluid and intracranial pressure“, under the mentorship of the lead investigator, prof. Marijan Klarica, and the project “Mystery of subthalamus – anatomic division of the subthalamic nucleus - 3STAN“ with the lead investigator assistant professor Goran Sedmak. She teaches Pharmacology for graduate students in english and croatian language at the University of Zagreb Medical School, and also participates in the postgraduate doctoral studies „Biomedicine and Health“ as well as „Neuroscience“ at the University of Zagreb School of Medicine, in the class called „Pathophysiology of the brain and CSF“ under prof. Marijan Klarica. She is the author or co-author of 13 scientific papers (9 CC papers), and she is an active member of the Croatian society of pharmacologists, Croatian society for neuroscience, IBRO, FENS, IUPHAR, EPHAR, Croatian Neurological Society and of University of Zagreb Medical School College Council. She participated in many domestic and international scientific meetings. She is active in english and german, and passive in spanish language.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Anja Kafka, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: School of Medicine University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Genome instability

BIOGRAPHY

Anja Kafka was born on December 1st 1986 in Pakrac, Croatia. She graduated at the Faculty of Science University of Zagreb in 2011. In 2010 she begun to volunteer at Croatian Institute for Brain Research. In 2012. she started to work as research assistant at Department of Biology School of Medicine, University of Zagreb and Laboratory of Neurooncology at Croatian Institute for Brain Research. In 2012 she enrolled PhD program in the field of Biomedicine and Health Sciences at the School of medicine, University of Zagreb. In October 2017 she defended her PhD thesis entitled „Changes in gene structure and protein expression of DVL1, DVL2, DVL3 and transcription factors TCF1 and LEF1 in astrocytic brain tumors“.

Education:

2005-2008 Faculty of Science University of Zagreb, Bachelor of science, BS

2008-2011 Faculty of Science University of Zagreb, Master of science, MS in Experimental Biology

2012-2017 School of Medicine University of Zagreb, PhD Biomedicine and Health Sciences

Work experience:

2010-2012 volunteer at Croatian Institute for Brain Research

2012-2018 research assistant at Department of Biology School of Medicine, University of Zagreb and Laboratory of Neurooncology at Croatian Institute for Brain Research

2018-present postdoctoral research assistant at Department of Biology School of Medicine, University of Zagreb and Laboratory of Neurooncology at Croatian Institute for Brain Research

Participation in scientific projects:

Researcher at 10 scientific projects

Publications:

Author of 16 published scientific papers (+ 2 in process of peer review) and coauthor of 35 congress abstracts.

Teaching:

Participate in courses within undergraduate study: Medical Biology (Medical study in Croatian and English), Eucaryotic genome and Medical genetics. She is also involved in courses on doctoral studies Biomedicine and Health Sciences (Genome instability) and Neuroscience (Genetic basis of brain tumors).

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Držislav Kalafatić, MD, PhD, Assistant professor

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Department of Obstetrics and Gynaecology, School of Medicine, University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Diagnostics and treatment of female urinary incontinence

BIOGRAPHY

Born 29th January 1970, Split, Croatia.

Education:

1989-1995. School of Medicine, University of Zagreb, undergraduate study.

1997-2000. School of Medicine, University of Zagreb – Postgraduate study “Biomedicine”

January 2001. Master degree

March 2011. PhD degree

Work experience

1995-1997. Internship - Clinical Hospital "Sestre milosrdnice", Zagreb.

1997-2001. Research fellow in Obstetrics and Gynaecology, School of Medicine, University of Zagreb

2001-2005. Clinical hospital centre Zagreb / Department of Obstetrics and Gynaecology - specialization in gynaecology and obstetrics

April 2005 - present: Clinical hospital centre Zagreb / Department of Obstetrics and Gynaecology, gyn&obs specialist;

2014 – present - Head of the Transvaginal Surgery Ward, Department of Obstetrics and Gynaecology

2011 - subspecialist of urogynecology

2011 – 2015 – Clinical assistant in Obstetrics&Gynaecology

May 2015 – present – Assistant Professor of Obstetrics&Gynecology, University of Zagreb

Additional information

Co-author of 20 original scientific publications indexed in Current Contents.

Member of the Croatian Medical Association, Secretary of the Croatian Society of Gynaecology and Obstetrics (HDGO), member of the European Urogynaecology Association (EUGA) and Croatian Society for Cancer Research (HDIR).

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: May 2015

- Croatian Science Foundation project „Novel molecular mechanisms as targeted therapy: Interactions of mRNA molecules and Hedgehog-Gli signal pathway in serous ovarian carcinoma (MIRnaGli)“, project leader dr. Sonja Levanat, 2017-present

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:**FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER:** Svjetlana, Kalanj Bogнар, Prof. dr.**NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER:** School of Medicine, Zagreb University**NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY:** Research methods in vivo and in vitro**BIOGRAPHY**

I was born in Zagreb, where I graduated at Classical Gymnasium in 1983. I studied medicine at School of Medicine, Zagreb University, and obtained University degree of Doctor of medicine in 1989. I did my 1-year internship as an employee of the Psychiatric hospital Vrapce, and obtained the licence for general practitioners in 1990. I defended PhD thesis in the field of Biomedicine and health (basic medical science, medical biochemistry) in 1998, at School of Medicine, Zagreb University. From 1992. to 2004., I participated in research and teaching at Department for Chemistry and Biochemistry - first as a young researcher and afterwards as a postdoctoral fellow. I obtained a title of Assistant Professor in 2004, and since 2007. became a member of teaching staff of Department for Chemistry and Biochemistry. In 2009, I obtained a title of Associate Professor, and in 2016. a title of Professor. Since foundation of Croatian Institute for Brain Research I have been participating in research activities of Laboratory for molecular neurobiology and neurochemistry; since 2007., I've been a head of the Laboratory. My scientific training includes study visits and research in Germany (Technical Faculty, Bielefeld), Slovenia (School of Medicine, Ljubljana University), and France (Centre de Génétique Moléculaire du CNRS, Gif-sur-Yvette). Since 2010., I have established scientific collaboration with colleagues from Leibniz Institute for Neurobiology (Magdeburg, Germany), and recently I have started to collaborate with several other scientific institutions in United Kingdom, Romania and Sweden. I was a researcher collaborating in more than 10 national and international scientific projects, and leader of two national and two bilateral international projects financed by Croatian Ministry of science, education and technology. In the project period 2017.-2021. I am a principal investigator of a research project supported by Croatian Science Foundation. My scientific interests refer to molecular neurobiology and neurochemistry, particularly to research of membrane lipids and their role in molecular pathogenesis of neurodegeneration. I published more than 30 scientific and popular papers, coauthored more than 50 conference abstracts, and was invited lecturer at international conferences. I mentored scientific work of students - 2 of the student projects were awarded by Rector of Zagreb University. I was mentor of 5 diploma works, 1 MSc thesis, 3 PhD theses. I am active member of Croatian Society for biochemistry and molecular biology, Croatian Society for Neuroscience, Federation of European Neuroscience Societies (FENS) and Society for Neuroscience (SfN).

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: 19.01.2016.**LIST OF PUBLISHED WORK WHICH QUALIFY HIM/HER FOR IMPLEMENTATION OF THE PROGRAMME, THAT IS, WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME**

1. Ježek D, Schulze W, Kalanj Bogнар S, Vukelić Ž, Milavec-Puretić V, Krhen I: Effects of various cryopreservation media and freezing-thawing on the morphology of the rat testicular biopsy. *Andrologia*, 33:368-378, 2001. (IF=1,546 ; Q3 andrology)
2. Vukelić Ž, Kalanj Bogнар S: Cell density-dependent changes of glycosphingolipid biosynthesis in cultured human skin fibroblasts. *Glycoconjugate J*, 18:429-437, 2001.(IF=2,1; Q3 biochem/mol.biol.)

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

3. Kalanj Bogнар S. Ganglioside catabolism is altered in fibroblasts and leukocytes from Alzheimer's disease patients. *Neurobiol Aging*. 27(9):1354-6, Sep 2006. (IF=5,8; Q1 neurosciences)

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Prof. Sanja Kapitanović, MD, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: Rudjer Boskovic Institute

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Molecular genetics of gastrointestinal tumors, Endocrine tumors of gastrointestinal tract and the pancreas

BIOGRAPHY

Prof. Sanja Kapitanović, , MD, PhD

Identification number of the scientist:200570

Senior Research Scientist permanent position

Laboratory for personalized medicine, Division of Molecular Medicine, RBI, Bijenička c. 54, Zagreb, Croatia; e-mail: kapitan@irb.hr

EDUCATION:

1997, Ph.D., School of Medicine, University of Zagreb

1992, M.Sc., School of Medicine, University of Zagreb

1988, MD, School of Medicine, University of Zagreb

WORK EXPERIENCE:

20011 - today, Senior Research Scientist permanent position, Head of Laboratory for Personalized Medicine, Division of Molecular Medicine, Ruđer Bošković Institute, Zagreb

2009 - 2011, Senior Research Scientist, Head of Laboratory for Personalized Medicine, Division of Molecular Medicine, Ruđer Bošković Institute, Zagreb

2005 - 2008, Senior Research Scientist, Laboratory of Molecular Oncology, Division of Molecular Medicine, Ruđer Bošković Institute, Zagreb

2002 - 2005, Senior Research Associate, Laboratory of Molecular Oncology, Division of Molecular Medicine, Ruđer Bošković Institute, Zagreb

1998 - 2002, Research Associate, Laboratory of Molecular Oncology, Division of Molecular Medicine, Ruđer Bošković Institute, Zagreb

1997 - 1998, Postdoctoral Researcher, Laboratory of Molecular Oncology, Division of Molecular Medicine, Ruđer Bošković Institute, Zagreb

1993 - 1997, Research Assistant, Laboratory of Molecular Oncology, Division of Molecular Medicine, Ruđer Bošković Institute, Zagreb

1990 - 1993, MD, Department of Transfusiology and Immunohematology, County Hospital Šibenik

1988 - 1989, MD, Transfusiology Institute of Croatia, Zagreb

SCIENTIFIC GRANTS

1999-2002, principal investigator of MZOS grant for young scientists: Molecular genetics of colon tumors.

2002–2006, principal investigator of MZOS scientific project: Molecular genetics of gastrointestinal tumors.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2002-2006, collaborator of MZOS scientific project: Cyclooxygenase-2: new target for chemoprevention and treatment of colon tumors.

2007-2014, principal investigator of MZOS scientific project: Molecular genetics and pharmacogenetics of gastrointestinal tumors.

2007-2014, collaborator of MZOS scientific project: Neuroendocrine tumors of gastrointestinal tract and pancreas.

2017-2021, principal investigator of Croatian Science Foundation scientific project: Microsatellite instability (MSI and EFAST) in molecular profiling of sporadic colon cancer

AWARDS

2006 National Award for Science in Biomedicine

1994 Croatian Academy of Sciences and Arts Award for Special Achievements in Science

SUPERVISION OF DOCTORAL AND POSTDOCTORAL STUDENTS

8 graduate /3 master of science /5 doctoral, Faculty of Science, University of Zagreb

TEACHING ACTIVITIES

2003 - present Course Leader: Molecular genetics of gastrointestinal tumors, Doctoral Study in Biomedicine and Health Sciences School of Medicine, University of Zagreb

2007 - present Course Leader: Personalized medicine – predictive medicine and pharmacogenetics, Doctoral Study in Molecular Biosciences, University of Osijek/Ruđer Bošković Institute

2009 – 2015 Course Leader: Molecular diagnostics, Graduate Study, Faculty of Science, University of Zagreb

SCIENTIFIC PUBLICATIONS:

87 (70 indexed in Current Contents, JCR Q1:23, Q2:25)

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK:

28.11.2005. Senior Research Scientist

8.9.2011. Senior Research Scientist permanent position

29.11.2017. Full Professor permanent position University of Osijek

LIST OF SCIENTIFIC AND ARTISTIC PROJECTS IN WHICH HE OR SHE PARTICIPATED AND WHICH ARE RELEVANT FOR THE FIELD OF THE DOCTORAL PROGRAMME

1999-2002, principal investigator of MZOS grant for young scientists: Molecular genetics of colon tumors.

Medicine

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

2002–2006, principal investigator of MZOS scientific project: Molecular genetics of gastrointestinal tumors.

2002-2006, collaborator of MZOS scientific project: Cyclooxygenase-2: new target for chemoprevention and treatment of colon tumors.

2007-2014, principal investigator of MZOS scientific project: Molecular genetics and pharmacogenetics of gastrointestinal tumors.

2007-2014, collaborator of MZOS scientific project: Neuroendocrine tumors of gastrointestinal tract and pancreas.

2014 -2017, MC member in COST Action BM1206: Cooperation Studies on Inherited Susceptibility to Colorectal Cancer.

2017-2021, principal investigator of Croatian Science Foundation scientific project: Microsatellite instability (MSI and EMAST) in molecular profiling of sporadic colon cancer

2018 -2021, MC member in COST Action CA17118: Identifying Biomarkers Through Translational Research for Prevention and Stratification of Colorectal cancer.

DOCTORAL PROGRAMME „Biomedicine and Health Sciences“

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Assistant Professor Ivana Karmelić, PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: School of Medicine University of Zagreb

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Biochemical methods in biomedical research

BIOGRAPHY

EDUCATION AND TRAINING: 1991.-1995. Gymnasium in Supetar; 1995.-2001. Faculty of Food Technology and Biotechnology (Bsc/M Food Engin., Biotechnology) 2003.-2007. and 2007.-2012. Doctoral studies in Biochemistry at Department of Chemistry, Faculty of Science, University of Zagreb (degree obtained: PhD).

Training: 2003. International Summer School on Biophysics ‘Supramolecular Structure and Function’, Rovinj; 2005. HPLC Method Development Course, Poreč; 2007. HPLC Troubleshooting Workshop, Pula; 2015. HPLC i UPLC: Troubleshooting Workshop + DSP Workshop, Zagreb; 2015. New Column Technologies and Application Possibilities from Waters, Zagreb; 2015. Symposium & Workshop on Microscale Thermophoresis; 2016. Columns and preparation of samples for liquid chromatography 2016. Breaking bad chromatography habits, Zagreb.

WORK EXPERIENCE: 2003.-2009. PhD student – young teaching assistant; 2010.-2012. PhD student-teaching assistant, 2012.-2017. postdoctoral researcher-senior-teaching assistant and 2018.- current Assistant Professor at Department of Chemistry and Biochemistry, School of Medicine, University of Zagreb.

Actively involved in teaching several classes at undergraduate level for students studying Medicine and Dental medicine in Croatian and English curriculum at University of Zagreb (Medical Chemistry and Biochemistry I and II; Clinical Chemistry, Inorganic substances in biological processes, Dental Chemistry, Dental Biochemistry). Participating in teaching at PhD program in Biomedicine and Health Sciences and Postgraduate specialist studies in Clinical microbiology.

SCIENTIFIC ACTIVITY: Scientific activity focused on topics in the field of sphingolipids, using advanced methods of HPLC analysis and complementary techniques for biomolecule analyses with emphasis on sphingolipid metabolites analysis in biological samples.

PRESENTATION OF WORK AT SCIENTIFIC MEETINGS: Co-author of 15 congress summaries - posters, of which 4 published in journals indexed in the CC base, 3 published in other journals and 8 published in the conference proceedings.

OTHER SCIENTIFIC ACTIVITY: Reviewer for scientific journals.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK:
10.04.2018.

ORDINAL NUMBER:

FIRST NAME, LAST NAME, AND TITLE OF THE TEACHER: Professor Vedran Katavić, MD PhD

NAME OF INSTITUTION OF EMPLOYMENT OF THE TEACHER: University of Zagreb School of Medicine

NAME OF COURSE/MODULE THAT HE/SHE TEACHES AT THIS DOCTORAL STUDY: Understanding bone metabolism – basic science in clinical practice; Methods of investigation in vivo and in vitro

BIOGRAPHY

I am a Professor of Human Anatomy at the University of Zagreb School of Medicine, where he finished his PhD in 2001. Mz scientific background is in the fields of bone biology and immunology. I have extensive experience in teaching in the graduate courses of Anatomy (gross and clinical); postgraduate teaching in Bone biology and Molecular biology; postgraduate teaching and courses for the continuing education of M.D.s in "Writing and publishing a scientific paper"; and graduate and postgraduate courses on Responsible Conduct of Research (RCR) for both the Croatian and English programs of his School.

I am or have been a Member and President of the Croatian national Committee for Ethics in Science and higher education (2006-11); Member of the European Network of Research Integrity Offices (2006-11); Section head at the 1st World Conference on Research Integrity, Tampa (FL); Research Integrity Editor at the Croatian Medical Journal (2001-10); expert for scientific and ethics assessment for projects funded by the European Commission (FP7, H2020, MSCA, EASME...) proposals (since 2015); and Member of the Research Integrity Committee of the Luxembourg Agency for Research Integrity (LARI) (since 2017).

I have published greater than 30 papers in indexed journals with greater than 1000 independent citations and an h-index of 15.

DATE OF LAST APPOINTMENT TO A RESEARCH-AND-TEACHING OR ART-AND-TEACHING RANK: November 13, 2018
