

Dekanove nagrade – ak.god. 2021/2022

1. Manuela Frančić (V godina)

Toxikološka procjena nanočestica zlata u ulozi nosača L-Dope na *in vitro* modelu diferenciranih SH-SY5Y stanica

Toxicological assessment of gold nanoparticles in the role of L-Dope carriers on the *in vitro* model of differentiated SH-SY5Y cells

2. Iva Bušić (VI godina)

Povezanost procijenjenog statusa volumena plazme s kliničkim tijekom i smrtnošću u COVID-19

Association of estimated plasma volume status with clinical course and mortality in COVID-19

3. Bernarda Jakuš (VI godina)

Povezanost imunohistokemijske izraženosti proteina p53 i histoloških prognostičkih čimbenika u endometrioidnom adenokarcinomu endometrija

Correlation between immunohistochemical expression of p53 protein and histological prognostic factors in endometrioid endometrial carcinoma

4. Miro Bilić (VI godina), Martina Lukšić (VI godina)

Istraživanje utjecaja anesteziološkog postupka na nastanak kongitivne disfunkcije nakon operacijskog zahvata

Research of the influence of anesthesia procedure on the development of cognitive dysfunction after surgery

5. Marija Babić (V godina), Maria Banović (V godina), Ivana Berečić (V godina)

Ukupni tau protein, laki lanac neurofilamenata i S100B protein u likvoru bolesnika sa spinalnom mišićnom atrofijom liječenih nusinersenom

Total tau protein, light chain of neurofilaments and S100B protein in the cerebrospinal fluid of spinal muscular atrophy patients treated with nusinersen
